DO YOU BELIEVE IN SIGNS?

Most business men do.

Retail dealers in particular. They believe in signs, because by actual tests they have found certain signs pull business.

For example—O-Cedar Polish Window Signs, Store Signs, Show Cards, attractive Store Hangers and Display Stands.

They attract attention and act as a reminder to a customer to buy more of their favorite—O-Cedar Polish.

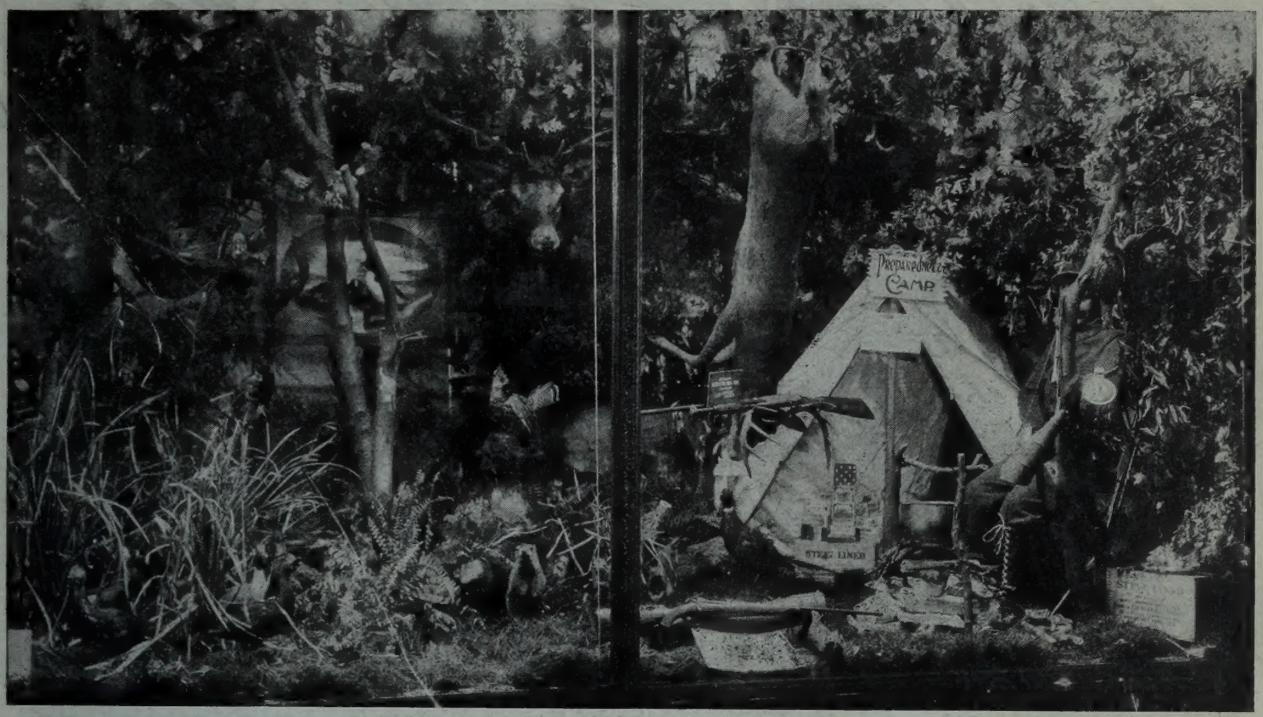
And to make your windows attractive. The well-known O-Cedar girl with her pleasant smile will brighten up your window. She puts the finishing touch to a window dressed with O-Cedar Polish and O-Cedar Polish Mops in a way that makes folks stop, look and buy.

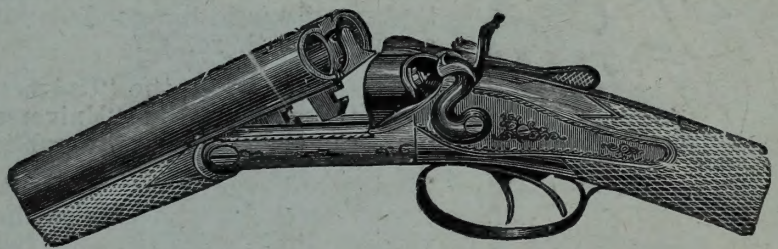
Write or phone for an assortment of handsome O-Cedar signs, window cards and dealer helps. They are free. They are sure signs of quick turnover and good profits.

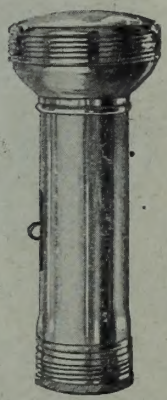
Channell Chemical Co., Limited, Toronto

O-Cedar Polish

HARDWARE AND METAL, September 4, 1920. Volume XXXII., No. 36. Published every Saturday at Toronto. Yearly subscription price, $4.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.



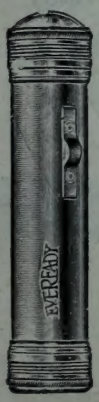




Prepare for the Fall Hunting Season

There is a growing tendency for men to spend their vacation in the Autumn and as far away from civilization as possible. This means a demand for guns, rifles, ammunition, flashlights, etc. Are you ready for this demand?

Our stock of shot guns and rifles includes: Victor, Winchester, Remington and Savage, etc., and a full range of ammunition for same.



Columbia 1561 Hotshot Battery makes an excellent camp light. When fitted with a 2 C.P., 6-8 volt lamp gives 65 hours' steady light or 98 hours' intermittent.

No. 2561 Hotshot gives 200 to 290 hours.

No. 3561 gives 400 to 470 hours.

Order your Eveready Daylos and Columbia Batteries now.

All Satisfied

UNIVERSAL CUTLERY

Well Made — Well Known
Easy to Sell — Best to Own

A manufacturer may know that his goods are the best ever, but unless he comes out in the open and says so with force and frequency, nobody else will know it. Letting people know that quality is in the goods is just as important as putting it there.

There is quality in the "Universal" line—there is confidence in the "Universal" name—the name is firmly fixed in the public mind.

That word works as a silent salesman for every merchant who carries the line. It advertises the dealer's good faith, imbues his clerks with enthusiasm, helps lead the halting customers across the finish line accompanied by a joyous jingle in the cash register.

Plymouth Rope

Manila Fiber Is a Product of the Wild Banana Plant Grown Exclusively in the Philippine Islands

The first essential in a rope is good material; second, good workmanship and a knowledge of rope construction that the fiber may be properly combined into a good whole, possessing strength, utility and service.

Manila fiber which is grown exclusively in the Philippine Islands is the best material for rope-making from the standpoint of strength, flexibility and durability. The plants are cultivated as illustrated above, and after about three years' cultivation some of the stalks are ready to cut. The native operations of cutting, stripping and cleaning the fiber for commercial purposes will be illustrated and described consecutively in a series of educational advertising of which this is the first.

Because of its dependence upon soil cultivation, moisture, sunshine and the degree of care exercised in the processes of gathering and cleaning, the quality of Manila fiber varies to a considerable extent, so that while a rope may be called "Pure Manila," it is not a safe indication of quality. The quality of Plymouth Rope is high-grade and is uniformly maintained.

You Do Not Yell To Make Sales

WINDOWS were first used to allow the entry of light into dwelling places.

Ninety-five per cent. of the windows in the world to-day are still used for that purpose.

The other five per cent. should function as money-makers.

The chief duty of a store window is not to let light in. That is merely incidental.

Your store window saves you the bother of standing outside your store and yelling at passersby to come in and look over your stock. Your store window is your silent salesman.

Becomingly dressed, this window will make many sales and create interest in what you are selling. Poorly dressed it will do you more harm than good.

Part of our service to our customers consists of helping them with window-dressing schemes, price cards, etc., to dress their store windows. For the different seasons we have different window-dressing schemes, and right now we suggest a window display of Beacon Lanterns, Hot Blast Heaters, Daisy Oil Cans, **SMP** Acorn Oil Cans, and similar lines for burning or holding coal oil—lines that are saleable in the months of September and October.

Beacon Lanterns—Both in Canada and abroad, this well-known Lantern is winning and holding friends, "A Good Friend After Dark."

Hot Blast Heaters—
Give as much heat as any, look as well as any, cost half as much as any.

Daisy Oil Cans—
Hot Galvanized throughout. The favorite lay-down pattern Oil Can.

SMP Acorn Oil Cans—
The Favorite Pump Oil Can for safely filling Lamps and Lanterns.

Coal Oil Cans—
Our lines of Coal Oil Cans have been the standard for years. You can rely on them being free from leaks.

Ask Any Mechanic to look over a Carborundum Niagara Grinder

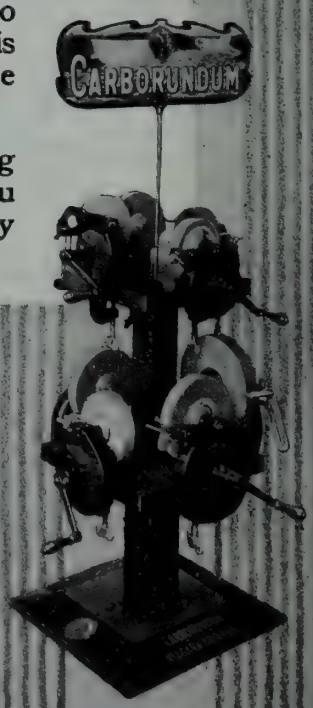
HE will find every model so sturdily serviceable, so mechanically right, so sensibly designed and so carefully put together that he will tell you to "wrap one up."

He will find that the gears are accurately cut, that the little machines run true and smooth—that the castings are strong, durable, oil tight.

He will find many little mechanical perfections that he won't see in any other machines.

And he will be pleased to note that every grinder is equipped with a genuine Carborundum Wheel.

Glad to send catalog—quote prices—tell you about our free display stands.



Carborundum Niagara Grinders

All you need to do is to stock them

Story for Week Dated September 4, 1920 Being No. 21 in the Series

From Match Wagon To Fast Freight

THE central illustration above symbolizes the astonishing growth of the E. B. Eddy Company's business since 1851, when the late Ezra Butler Eddy did all the selling and delivering of his matches by wagon and team over great distances. In this part of Canada a few veteran retailers recall with pleasure the visits of the late E. B. Eddy and his sales of matches at the retail stores.

Great changes have come about since that early day, both in the E. B. Eddy business and the great Dominion of Canada. Modern auto trucks replace the horse vehicle that helped lay the solid foundation of the business; great railway sidings at the plant and fast trains have broadened the territory until there is scarcely a geographical limit to the sale of Eddy Company Products to-day.

Where the small rented factory then stood, vast buildings have been erected; the fuming, thundering Chaudiere Falls have been called from their idle sport of creating dancing rainbows to the more useful task of developing 18,000 horse-power for the E. B. Eddy plant of to-day.

Ezra Butler Eddy set in motion a great business where none had been. From the Chaudiere Falls, idle for centuries, he brought 18,000 horse-power to serve him, and from the age-old forest he developed the undreamed of wealth in wood-pulp.

It was Mr. George H. Millen's lot to succeed to this great work, and by his ability as a business executive and with his inventive skill, to bring this great plant to the marvellous state of efficiency in which it stands to-day under his Presidency.

Products That Build Sales

Indurated Fibre Ware

Sells because of special valuable qualities that win the customer; builds repeat sales because customers appreciate the satisfying service rendered.

It never leaks because it is made in one piece, seamless and without joints, offering no crevices in which germs can lodge. It cannot be battered or bent, nor can it shrink, rust or fall apart. It holds the heat of hot water longer and is lighter to handle.

Good for the Hardware Dealer.

A·G·M·CO.
VIKO
ALUMINUM

Always Dependable— A Money-Maker

The modern housewife's marked preference for aluminum cooking utensils is easy to understand. Aluminum is light in weight, therefore easy to handle. It is tough, durable, and neither chips nor cracks. Moreover, it is an excellent conductor of heat.

But the modern housewife wants aluminum ware that is sturdily constructed and well designed, a *branded* ware that she can identify when she wants to buy again. Thousands are asking for VIKO, The Popular Aluminum—first, because Viko gives perfect satisfaction in use; second, because Viko is popular in price.

You can make money on Viko.

A RAZOR THAT SHAVES HIM

Men have learned from experience that the same kind of razor or razor blade will not shave every beard and leave the face cool and comfortable.

They know that a man with rugged skin requires an entirely different razor from the man with tender skin.

There used to be a lot of guesswork in razor buying and selling. Securing the proper razor was considered more or less a matter of luck. Customers were often dissatisfied when the razor they bought would not shave them with comfort. They blamed the dealer.

Now razor buying and selling has changed. Dealers carry the GENCO LINE and are in a position to sell more than razors. They can assure each customer that he is to secure satisfactory shaving service.

And the Dealer is backed by the Maker's Guarantee:—

"GENCO RAZORS MUST MAKE GOOD OR WE WILL."

THERE IS A GENCO RAZOR
For Every Condition of Beard and Skin

Handsome Genco Display Cabinets are supplied with assortments of Genco Razors which include a wide variety of styles. The proper razor for each customer.

A brief but thorough clerks' selling chart is attached to each cabinet and always in sight.

Order one of these assortments from your Jobber and sell each customer

A Razor that will shave him.
If your jobber can't supply you, write us.

GENCO WEEK
NOVEMBER 8TH TO 13TH
$1,000
IN CASH PRIZES

Tell your window decorator to watch our advertisement in Hardware and Metal, September 18, for particulars. He can win one of the prizes and increase your sale of Genco Razors at the same time.

A Genco Display Assortment on your Cutlery Counter will help too. Order one now.

MILLERS FALLS TOOLS

If interested tear out this page and place with letters to be answered.

Work of Hand, Head and Heart--- and *your* part in it

MEN who work with their hands love good tools. All day long, their tools are their intimate companions. Accurate balance, smooth operation, keenness of cut are part of their very thought.

Men such as these are your best customers. As they build up their kits, or replace tools which, after years of service, have lived their life, they come to your store for Millers Falls Tools. Training-school graduates and seasoned veterans both know that the Millers Falls trademark stands for the best.

Through advertisements in The Saturday Evening Post, the story of Millers Falls quality is being told to your big untouched market—the man who "tinkers" about the house. If he buys his Millers Falls tools from you, he will as well buy hinges, hasps, screws, locks—the hundred - and - one things that a handy man adds to his home and his car.

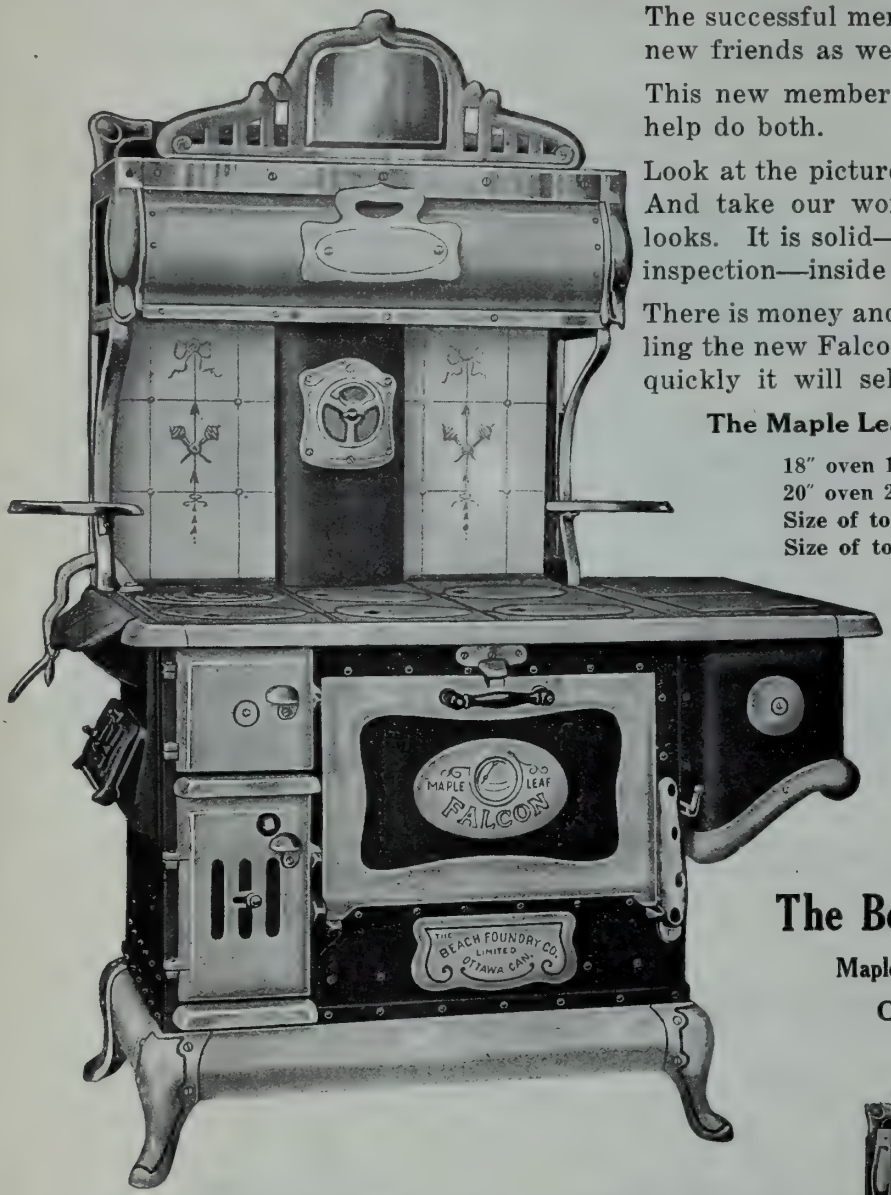
A New Range That Will Make Friends



The successful merchant must continually make new friends as well as keep the old ones.

This new member of the Maple Leaf line will help do both.

Look at the picture! Isn't the range a beauty? And take our word for it—it's as good as it looks. It is solid—and genuine—and will bear inspection—inside and out.

There is money and satisfaction for you in handling the new Falcon. Send for one and see how quickly it will sell.

The Maple Leaf Falcon is made in two sizes

18″ oven 18 x 19 x 12½
20″ oven 20 x 19 x 12½
Size of top for 18″ 43½ x 27
Size of top for 20″ 45 x 27.

HAVE YOU OUR FULL LISTS AND PRICES OF STOVES AND RANGES? SHALL WE SEND THEM TO YOU?

The Beach Foundry Co., Ltd.

Maple Leaf Ranges, Stoves and Heaters

OTTAWA CANADA

A Few of the Construction Features of the "Falcon"

A.—Note height to which front key plate may be raised, allowing scuttle of coal to be emptied freely without use of shovel or poker.

B.—Heavy sectional perpendicular fireback. All other linings also heavy and almost perpendicular.

C.—Large combination draft and poker door opening.

D.—Duplex grates that may be removed through grate opening for replacing with wood grate (note letter N) or for any other purpose, without disturbing the firebox linings. Also note improved cog gudgeons.

E.—Very large ashpan.

F.—Drop closet door.

G.—Combination check draft with key to close off flue and opening for air intake.

H.—Improved sliding direct draft damper, giving full control of heat units to oven or chimney flue.

I.—Key plate top. Covers and short centres heavily ribbed. Sectional reducing cover.

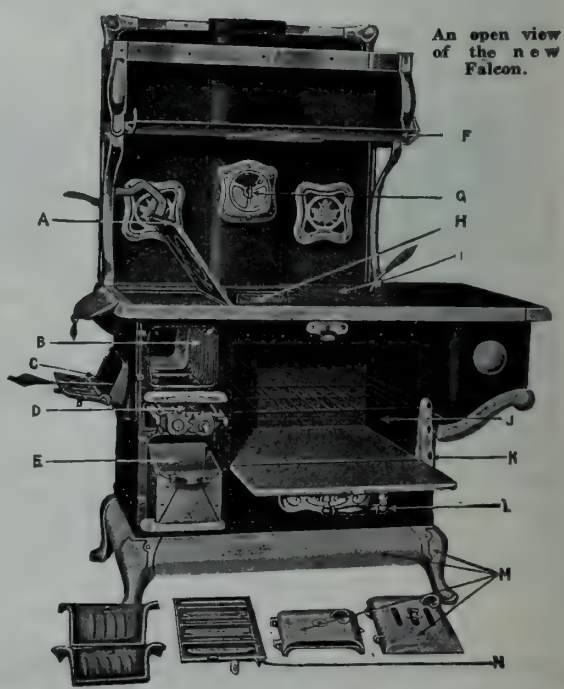
J.—Large oven made in two sizes, 18 x 19 x 12½ in., or 20 x 19 x 12½ in.

K.—Improved attachment for spring oven door balance. Door held down by spring when open and held tight in place by spring when closed.

L.—Rubberoid oven door handle—always cool.

M.—All nickel parts plain, high finish, easily kept clean.

N.—Special wood grate replaces duplex grates for burning wood only.



An open view of the new Falcon.

WHAT BRAINS ARE YOU PUTTING INTO YOUR CUSTOMERS' BUSINESS?

You put brains into your own business — hence your success.

You pride yourself on the orderly arrangement of stock — quick attention to orders — and ability to buy to advantage.

One more thing you need — a working knowledge of your customers' business — particularly if you are in a territory where there are large industries using Threading Tools.

Most merchants have at least one such industry near them — where mechanisms having threaded parts are being made and assembled. Study this process of threading — often of tremendous and rapidly growing importance.

Anticipate the results which workmen, foremen, superintendents, or engineers, *might* be getting with your help in introducing GTD threading tools to to them. Show them how better threading means:

Reduced vibration *Quicker assembly*
Lower repair costs *Less thread weight*

Putting the same brains into your customers' business that you do your own, means marketing brains along with the goods — the highest type of science any business house can give today.

Three Floor-warming Baseburners

The Baseburner, to-day, is the friend of the economical housewife and the true home-lover. It is accepted by this class of citizen because it has proved beyond doubt that it saves fuel and furnishes real, genuine comfort. At the present time, with coal both high in price and scarce, the Baseburner is more acceptable since it gives just the desired amount of warmth, and is so well controlled as to limit its consumption of fuel to the amount of space required to heat.

These facts are becoming more and more proven to the buyer of to-day. As a result the demand for the most cheerful looking and attractive heaters made is becoming more emphasized. The three Baseburners illustrated are not only attractive, but they will remain so, due to the superior quality of the nickel and its ability to stay permanently bright.

They are constructed on the only real principle of home heating—that of warming the floor first. The flue construction forces the heat to flood the base—this heat radiates direct to the floor. A warm floor means a warm house.

These three Baseburners are of first-class quality material. They are made up to McCLARY'S high standard.

This is the season when they should be displayed—and well displayed.

We are particularly well situated to deal with your orders now; our nearest branch will be pleased to explain to you our facilities for prompt shipment—write to-day.

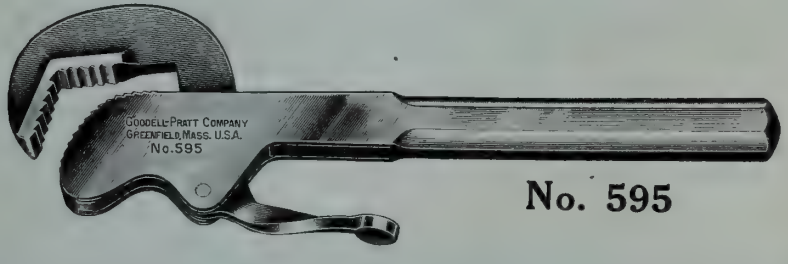
GOODELL-PRATT

1500 GOOD TOOLS

Chauffeurs' Universal Wrench

Can Replace 6 Ordinary Wrenches



No. 595

The pressure of your grasp on this new model wrench readily opens the jaws. Slip the opened jaws around the nut or pipe to be turned. As you release the pressure, the wrench automatically tightens in place around the nut or pipe.

Trigger action—quick, easy and sure. This chauffeurs' handy wrench will handle any job up to ⅝ inches on round, square or hexagon nuts. It holds round stock up to ½ inch. A new wrench of many uses for many users.

The tool is made entire from steel with hardened jaws. The handle affords the user a good, strong grip.

Toolsmith dealers will appreciate this addition to their sales opportunities in the Goodell-Pratt line.

Mr. Punch Says:

Some dealers begin by ordering a few

Toolsmiths

tools for machinists, others by ordering a supply for motorists, carpenters or house owners—but they all soon get the real Toolsmith idea, which is that the bigger the stock of Goodell-Pratt tools, the bigger the profits!

Advances of 5 to 25% on Enamelware, etc. This Week: High Price Tendency Maintained.

Manufacturers Faced With Grave Difficulties in Securing Sheets and Plates—Customers, Both City and Rural, Said to be Callous to High Prices and No Drop in Trade Expected—Farmer Pays $11 for Aluminum Kettle and Never Winces

A SHARP advance in prices on enamelware, tinware, galvanized ware and kindred lines has featured the hardware trade during the past week. The advance which has now been made effective ranges from 5 to 25 per cent. This represents the second or third advance on such lines within the past twelve months and indicates that the tendency toward higher prices has not yet reached its climax in so far as the hardware trade is concerned.

In addition to the general price advances on these commodities the concession allowed to city dealers has also been reduced by 25 per cent., bringing it now to 7½ per cent. where it formerly was 10 per cent.

Sheets and Plates Bought at a Premium

"Shortage of raw materials and the fact that sheets and plates are being bought at a premium to-day is the chief cause of the advance," said J. H. Flack, Toronto manager of Thomas Davidson & Co., Ltd., in discussing the matter with Hardware and Metal. Higher freight rates in the United States, effective on August 24 last, have also been a factor in increasing prices. Manufacturers have little or no stock of sheets and plates on hand and there is therefore great difficulty in predicting what course prices on these lines are likely to take within the near future.

Have Difficulty Meeting Orders Despite High Prices

Asked as to whether the advance would likely have any deterrent effect upon business in these commodities, Mr. Irwin, Toronto manager of the McClary Mfg. Co., did not think this would be the case, particularly in view of the fact that they are having difficulty handling present business. Like other manufacturers, this firm has experienced great difficulty getting various parts and materials and this shortage has interfered to some extent with the firm's usual exhibit at the Canadian National Exhibition.

There seems to be some confusion as to the possibility of securing raw material supplies from various parts of the United States. Some have stated that sheets and plates can be secured if those wanting them can arrange transportation to their plants, but despite the fact that every step has been taken by McClary Mfg. Co. and others to secure supplies in any way possible they have been held up for months for just such materials.

English Sheets Failed to Arrive

Asked as to the possibility of securing sheets from other sources, it is pointed out that while Canadian manufacturers formerly received some shipments from English mills, none have been forthcoming since the war, despite the fact that English sheets were expected on this market during the past summer.

No further advances are anticipated on these lines within the near future, according to Mr. Irwin, who stated to Hardware and Metal that very few in the trade anticipated the present advances would be as extensive as they have proved to be.

Neither City or Country Trade Expected to Suffer

Some inquiries were also made as to the probable effect of the advance upon business in these commodities. For this purpose trade is divided into two sections—the city trade and the country trade. In the case of the latter it is pointed out that the farmer as a class is to-day buying a better quality of household goods and the opinion was expressed to Hardware and Metal by a traveler who has a large clientele throughout the country districts that the farmer, too, is becoming callous to the higher price tendency now existing and is still desirous of having the best at any price. In this connection Mr. Turner, sales manager of the McClary Mfg. Co., Toronto, tells a story of a farmer who recently paid one of their retail customers $11 for an aluminum kettle and never winced when told the price. This is mentioned as an example of

the farmer's ability to pay. This class of trade is therefore likely to give little trouble with higher prices asked for lines which are in such great demand for use on the farm.

Summary of Advances

The extent of the advance on the lines may be judged from the following summary: Enamelware (cheap grade) was 45 per cent. off list and is now 40 per cent.—advance of 5 per cent.

The standard quality grey enamelware was 15 per cent. off and is now 5 per cent. off—an advance of 10 per cent. Blue enamelware was list plus 17½ per cent. and is now list plus 30 per cent.—an advance of 12½ per cent. The latter line is said to be in less demand now that there is a considerable difference in price as compared with the standard quality. Formerly, when there was little difference in price many customers preferred it for its white lining and blue exterior.

Japanned ware was formerly list plus 20 per cent. and is now list plus 33 1-3 per cent.—an advance of 13 1-3 per cent.

Stamped ware was 40 per cent. off and is now 35 per cent. off—an advance of 5 per cent.

Pieced ware was list plus 90 per cent. and is now list plus 80 per cent.—an advance of 10 per cent.

Steel ware was list plus 25 per cent. and is now list plus 50 per cent.—an advance of 25 per cent.

Galvanized ware, including light pails and tubs, was list plus 45 per cent. and is now list plus 60 per cent—an advance of 15 per cent.

The same line in heavy ware was list plus 25 per cent. and is now list plus 50 per cent.—an advance of 25 per cent.

Garbage pails were list plus 30 per cent. and are now list plus 45 per cent.—an advance of 15 per cent.

Japanned coal hods advanced 20 per cent.

Galvanized coal hods advanced 15 per cent.

Stove boards advanced 5 per cent.

Copper tea kettles advanced 10 per cent.

Stove pipe elbows have advanced 23 2-3 per cent.

It will be noted that articles of steel ware and heavy galvanized ware constitute the two greatest advances.

Has Not Missed a Sale at Higher Prices

Asked as to the effect of higher prices on retail trade, Mr. Gilverson, store manager of Rice Lewis & Son, Ltd., Toronto, stated that to date not a single sale had been missed as result of the new quotations. He pointed out that aluminumware and other such lines had been similarly advanced recently and that there was therefore no discrimination against enamel and tinware for household use. He stated that the whole trend of their trade had been toward popularizing the better grade of these commodities and that customers were buying them and paying the higher prices just as they have been in the habit of doing with all commodities for some time past.

Customers Want Best Grade Utensils

Mr. Blue, store manager of the Vokes Hardware Co., Toronto, confirmed this opinion that customers were wanting the better grades of utensils and were willing to pay the price. He added that while his firm did not cater strongly to this class of business, yet what trade they did called for only high grade utensils and that therefore no other grade of such lines is carried. Under such circumstances it is doubtful if the new prices will have any immediate effect upon the volume of trade in these lines.

"Prices Will Come Down But Not to 1914 Level"—Sir Edmund Walker

"I BELIEVE we will have high prices for another generation to come," remarked Sir Edmund Walker, in the course of his address on the Canadian banking system, before a convention of wholesalers in Toronto last week. "I do not mean that they will not come down," he continued, "but I do not think they will come down to the levels prevailing before the declaration of war in 1914. These higher prices will prevail as long as the weight of war is felt. A new basis will be reached, but we do not know what that level is yet. When we reach it, however, I believe we will begin a new era of prosperity. The price of all commodities and all services will have to be high until we have broken the back of the war debt."

Middleman Now Bearish

"When prices fall in spite of production being less than the actual demand, it is for this reason. The rise of prices since peace, the slackness of the workers, a surrender of all attempts to save, utter failure to produce adequately, have resulted in an anomalous position. The middleman all over the world has been bullish. He was anxious to boost his stocks. Now the middleman has become bearish. He has turned from buyer to seller."

Banks Cease Lending

"The banks have been telling them to get their money elsewhere, with the result that they must get rid of their stocks and prices are declining."

Sir Edmund stated that banks of Canada can lend even while prices rise, so long as new deposits or new forms of money are sufficient to meet their needs, but if savings and deposits fall, and Governments cease going into debt the lending power of the banks is just so much lessened.

"When the workman struck the manufacturer yielded and added the higher cost to the goods, but the middleman kept on buying," continued Sir Edmund. "The Government kept spending what they did not have by creating forms of debt to pass as money. Everything seemed happy until Governments found that living on your debts cannot go on for ever and people began to find their pockets not quite so full. When the total of bank credits and forms of money were arrested loans had to be shortened, which meant that commodities must fall in price or be lessened in quantity. All middlemen are thus turned from buyers to sellers and hence the fall we have seen take place when production does not equal the real demand of the consumer."

An Unrivalled Future

"What would have been our state had we had a bad crop, instead of the good one that is anticipated, it would be hard to define. By virtue of its great areas, the greatest in the world, Canada has a future such as no other country has. Whatever you dealers do, the banks can be relied upon to do their share in building it up."

Keeps Tools to Fore Throughout Year

Machinists' and Builders' Tools and Other Similar Basic Lines Should Not Be Neglected for Other Lines Which Have Short Seasonable Sale—Sarnia Hardware Co. Devotes Special Attention to Tools Periodically Despite "Seasonable" Sellers—Many Local Opportunities for Tool Sales Are Overlooked.

WHILE the fall season brings many individual hardware lines to the fore, nevertheless it is inadvisable to relegate to the background the standard lines which are all-year sellers and which in most cases are the basic lines of the trade, during the season when other lines are for a short time in greatest demand.

A number of Canadian hardware merchants have realized this in recent years and have taken steps to more evenly balance up their efforts in pushing various lines. Thus to-day the customer entering the store of the Mills Hardware Co., of Hamilton, the J. H. Ashdown Hardware Co., Winnipeg, and others, is immediately confronted with prominent displays of basic lines which are in demand throughout the year. The experience of these stores has been that their action has resulted in increasing sales of such lines as tools and has caused no falling off in sales of seasonable lines as result.

Another hardware firm who have realized the importance of this matter is the Sarnia Hardware Company, Sarnia, Ont. Despite the fact that the approach of the fall season brings hunting goods, stoves, sporting goods, etc., into an active season, machinists' and builders' tools are by no means overlooked. Instead they are found to be devoting window displays exclusively to this line periodically and linking up these displays with other selling effort.

Tool Window Brings Excellent Results

A recent window display arranged by the Sarnia Hardware Company is shown herewith. Mr. J. B. Kee, of this firm, informs Hardware

This window of machinists' and builders' tools, as arranged by the Sarnia Hardware Company, Sarnia, Ont., was put to work for two weeks recently and brought splendid results. This company is one which realizes the importance of giving ample publicity to the basic lines of the hardware trade periodically throughout the year despite "seasonable" sellers, and has found that results f lly justify this action. The display shows wrenches, saws, hammers, levels, planes, trowels, braces, bits, chisels, squares, micrometers, drills, oilstones, rules, etc., attractively arranged on a neat background. Suitable window cards are placed throughout the display, emphasizing some point of the stock carried, the service given, etc.

and Metal that this tool window was put to work for two weeks and gave excellent results in sales. It is evident, therefore, that under present circumstances a little sales effort will serve to increase the sale of tools in what otherwise might be a slack period for this line. The window contains a good arrangement of wrenches, saws, hammers, levels, planes, trowels, braces and bits, chisels, squares, screw drivers, pliers, micrometers, drills, oil, oil stones, rules, etc. Samples on green baize-covered boards form the background of the display and a lattice-work is arranged at the sides. It will be noticed that several neatly written cards are placed in the display. The wording of some of these cards is as follows:

"A good mechanic takes a pride in his tools. That's why we carry the best."

"Our stock is large and complete. Ask about any article you do not see."

"Squares and rules you can rely on for accuracy and long service."

Devote Ads. to Tools

Linking up with the window displays, an occasional advertisement can profitably be devoted to a little talk on tools. A sample of an advertisement on tools as used by the Cowan Hardware Company, London, Ont., is shown herewith. It contains a complete list of machinists' tools and building tools, many lines are illustrated and descriptive matter and prices are quoted on each.

Cowan's Hardware, London, Ont., sees the value of giving special attention periodically to the sale of tools and link up such advertisements as these with other sales effort. This ad. is well illustrated, gives plenty of description and quotes prices on the various lines.

Cry for Increased Production

At the present time there is need for increased production. This includes manufactured articles to a great extent. More production is said to be the only solution for the present industrial problem and this means not only a tendency for more manufacturers to come into the field, but it also encourages the use of all labor-saving devices possible to increase production in factories at present operating.

Many Dealers Overlook Opportunities for Mill Supplies

Mill supplies are an important department of trade in many of the larger retail stores throughout the country, but it is quite evident that many dealers are overlooking great opportunities for sales of machinists' supplies to local manufacturers.

More Activity in Building

Then there is the building industry which is far more active now than at any time for many years past. Building to the extent of $75,000,000 was done in Canada during the year 1919 and this year will greatly exceed even this large figure. For the month of July figures just issued show building permits issued throughout the Dominion to the value of $12,241,086 as against $8,587,536 for the corresponding month of last year. Building totals for the year are greatly in excess of the returns of last year, the total for the first seven months of 1920 being $67,915,971 as against $35,519,403 for the same period last year or an increase of $32,396,568. Of the larger cities Toronto leads, with Montreal and Winnipeg next in order. Edmonton shows a remarkable increase and Vancouver leads the Pacific Coast cities. Moose Jaw leads the smaller cities with Saskatoon, Hamilton, Ottawa and Halifax next in order.

Western Cities Experience More Building

The most pronounced improvement over building conditions last year is reported in the case of the fourteen Western cities with a total of $5,098,650 as against $1,726,595 last year. The record of the twenty-five Eastern cities is $7,142,436 as compared with $6,870,941 or an increase of $271,495.

Summing up there appears to be a good opportunity at the present time for hardware merchants to develop the sale of machinists' and builders' tools. There is much business to be secured in every manufacturing or other centre where such tools are used but the only way to keep interest alive and get a share of this trade is to keep tools to the forefront of the store, put in a window occasionally and use some advertising space on this line exclusively. Investigate local manufacturing and building possibilities and then each dealer will know what to expect in the way of local tool trade.

Will Be Shortage of Glass for Years

How War Hit Supply—Now Canada Must Depend on United States—England is Supplying Europe—Insuring of Plate Glass Windows No Longer Profitable

BEFORE the war the world's supply of glass came from a limited area in the United States, England, Northern France and Belgium. There were other sources of supply, but the industry had reached its highest in the latter three places. Belgian and French glass was considered the finest in the world, and brought very high prices. Canada obtained its glass from the United Kingdom and Belgium, largely, although quantities were imported from Belgium, especially glass made up into lamp chimneys and similar articles. Now this country is dependent almost entirely upon the United States for its supplies of glass, and for reasons that will be given later must continue to be dependent for some time to come. Official figures showing the quantities of glass imported into Canada during 1915 and 1919 from various countries are as follows:

Window Glass

	Square feet	
From	1915	1919
United Kingdom	7,593,930	56,090
Belgium	10,501,798	.....
France	20,000	.....
Germany	38,378	.....
Japan	.....	74,200
Netherlands	6,100	.....
United States	1,418	59,813
Total	38,444,324	17,785,624

Glass for Photo Plates

From	1915	1919
United Kingdom	$18,094	$ 3,416
Belgium	2,222	.....
United States	1,418	59,813
	$21,734	$63,229

These figures indicate many things. First, that Belgium and France are no longer able to supply Canada with glass. The reason is this: The glass factories of Belgium and Flanders are situated in the battle area, and when the country was overrun by the Germans most of them were destroyed. The figures show that Great Britain no longer sends us glass, or at least sends but a small quantity of it. The reason is that British glass manufacturers are busy turning out glass to help in the reconstruction of the devastated areas in Europe, and to replace the thousands of windows shattered in the British Isles during air raids.

New Sources of Supply

To replace the glass we can no longer get from Europe we have turned to new sources. Chief of these is Japan, but the quantity imported is infinitesimal as compared with the demand. We are practically dependent upon the United States, but the demand in that country for glass for industrial and housing purposes is such that exportations to Canada have necessarily been cut down.

As a result of such a condition the price of glass of every kind in Canada has risen tremendously. Anyone who has tried to buy a sheet of window glass to replace the kitchen pane will understand that. The increased price has been reflected in many ways, in the cost of picture-framing, in the price of windshields and, it may be noted, in the charges for plate glass insurance.

The insuring of plate glass windows—those large expanses of shining surface which adorn the fronts of retail stores—was long a profitable business. But now it is anything but that. One Toronto company that insures plate glass windows has found its losses four times its premium income. Rates have been advanced but it is impossible under present conditions to fix a rate high enough to pay the actual cost of the insurance.

There is a world-wide shortage of glass at the present time. The shortage will continue, it is evident, for some time to come.

HEADLIGHT ANTI-GLARE LAW EXPECTED TO BE EFFECTIVE BY MIDDLE OF SEPTEMBER.

Ontario hardware dealers who handle automobile accessories will be interested to know that after much consideration and investigation the Headlight Anti-glare Law for the Province of Ontario is expected to become effective about the middle of September. The work of examining headlight lenses and other devices for the elimination of glare has taken longer than was anticipated, hence the delay. Professor Laing, of Toronto University, is superintending the inspection of devices and he expects the list of acceptable devices will be complete within another week. Officials of the Department of Highways have informed Hardware and Metal that as soon as the list is complete and has been published, the law will immediately become effective. Further advice will be given on the matter.

CANADA NOW EXPORTING AUTO TIRES

Manufacturers of automobile tires in Canada have not been slow to capitalize their export opportunities. In the comparatively brief span since the tire industry began to occupy a position of major importance in Canada there has been a constantly increasing percentage of Canadian-made tires sold in proportion to the entire number going into consumption. In corresponding scale the export of tires from Canada has grown until the record of $3,016,974 was reached for the fiscal year ending March, 1919, and subsequent increases in the volume of foreign business have been made.

Better Graphite Output

Graphite mining is said to be beginning to to take on more activity after the comparative dullness extending over a full year. The mines of the Quebec Graphite Company have been re-opened, and the mill has been completely remodelled. There is now a larger output of graphite products in Canada, such as flake lubricants, graphite pastes, foundry facings, etc. Extensions to manufacturing operations that are contemplated include the making of graphite greases, stove polish, electrodes and paints.

Mica Mining Active

Production of mica in Canada is being prosecuted in an active way. The demand for the product is good, and prices are reported to be satisfactory. A considerable portion of the output of the Wallingford mines at Perkinson are being shipped to Great Britain; some exceptionally large sheet mica is being taken out at these properties. Over 80 per cent. of the Canadian production of mica last year was from mines in the Province of Quebec.

Editorial Comment

BOOSTING LOCAL INTERESTS HELPS THE DEALER TO GET MOST OUT OF HIS TRADE

NO one ever lost anything by letting the world know his town is on the map. In other words, boosting for the home town and for everything local is one of the first requirements of good citizenship. J. R. Hunter, owner of the Nelson Hardware Co., Ltd., Nelson, B.C., has been a consistent booster for his home town for the past twenty-three years, nearly a quarter of a century, and to-day he is not only the proud owner of a hardware store doing a substantial retail and wholesale trade in Nelson and district, but his public-spiritedness has been rewarded by his election to the office of president of the Nelson Board of Trade. There is a lot of truth in the statement that boosting local interests tends to keep out foreign influence. Build up a community spirit and the goodwill which exists will do much to get the utmost out of local trade and preserve it against the inroads of outside influence which tend to deflect the trade which legitimately belongs to the local retailer. Every hardware dealer may not be able to be president of the local board of trade, and many no doubt are too busy to accept such a position, but there are enough advantages to be secured to justify the dealer in boosting anyway.

GOOD ROADS MEAN MUCH TO RETAIL MERCHANTS

THE construction of good roads is a matter which vitally affects the hardware merchant in all parts of Canada. He is affected in many different ways. Good roads encourage the wider settlement of the country's newer districts and increase trade possibilities as well as encouraging the more frequent visitation of farmers to the nearest trading centre. Then there is also the question of encouraging motor touring and the use of automobiles in general. Good roads encourage motor tourists to explore the sections of the country which are new to them and on such tours they are dependent to some extent upon the hardware dealer for the supplying of gasoline and accessories. Apart from the tourist traffic, good roads help the dealers' auto accessory departments by encouraging the wider replacement of the horse and buggy with the more up-to-date motor car. This movement is largely under way in the rural districts of the country to-day and is due in large part to the extension of good roads.

So far Canada has done little in the way of national development of highways, though the provinces have been taking some steps to extend good roads throughout their boundaries. Such action by all the provinces of the Dominion will soon bring things to the stage where such roadways can be linked up into national highways. In this connection it is interesting to note that the Province of Manitoba is planning the expenditure of $3,500,000 on the improvement and extension of roadways within the near future. Ontario and other provinces have spent millions of dollars on roads and it is encouraging to note that there are many movements on foot now to support the call for better roads throughout the country.

Frank Stockdale, the United States retail merchandising expert, in addressing a Western convention of merchants, pointed to the fact that trading centres which boast of good roads throughout the district are much more progressive and do a far larger business than those which have neglected their highways. All retail dealers can help to push the good roads movement along and it is worthy of the utmost support.

EDITORIALS IN BRIEF FORM

IF INTIMATE contact between men in the same profession were made more intimate, it would go farther toward bringing about that era of brotherhood for which most of us crave. Distrust would give way to trust. Men would learn to know one another better, and knowing one another would make for a broader understanding of motives. Interpretation of the acts of others would be guided by sympathy and sentiment instead of, as at present, heartlessness and harshness.

THE advertisements in the trade paper pay two classes—the advertisers who put them there and the dealers who read them.

News of Western Canada

Boosting Keeps Out Foreign Influences

J. R. Hunter, of the Nelson Hardware Co., Ltd., Nelson, B.C., Has Been Constant Booster for Twenty-three Years—Has Now Developed Substantial Hardware Trade and is President of the Board of Trade—Has Good Business in Lines Which Generally Go to the Jewelry Trade—A Suggestion for Trade in Bee-Keeping Supplies

DURING the past quarter of a century J. R. Hunter, owner of the Nelson Hardware Co., Ltd., Nelson, B.C., has found out many ways of successfully developing business in hardware supplies. It was 23 years ago that Mr. Hunter bought out the Ashdown Company in Nelson and formed the present firm, and ever since that time he has been a most enthusiastic booster for the city. Boosting everything locally, helps to keep interest alive in local matters and this tends to offset foreign influences which try to work their way in. It also helps to maintain the feeling of friendship and goodwill which makes it easier to develop business. Among other things so enthusiastic a booster has Mr. Hunter been that he has had the distinct honor of being elected president of the Board of Trade for the year 1920. This is but one indication of the possibilities ahead of the dealer who becomes a booster for his town.

A substantial wholesale and retail hardware business is conducted by this firm, and the store is equipped in every detail to handle this business.

This interior view of the store of The Nelson Hardware Co., Ltd., Nelson, B.C., emphasizes the importance attached to the sale of silverware, cut-glass, cutlery, etc., for they are shown to occupy the most prominent showcase in the store, right opposite the entrance. It will be noted that the best use is made of wall fixtures to carry a large stock. On the right will be noticed a display of chinaware and crockery on the wall shelves, and on the left are seen wall cabinets with samples of tools and such lines affixed to the cabinet doors.

Doesn't Let Silverware Business Go to Jewelry Stores

Silverware, cutlery, chinaware, cut glass, etc., represent an important line in the trade of this store, and the most prominent showcase in the store, namely that opposite the entrance, is devoted to a constant display of such lines.

"Some hardware dealers let this class of business go to the jewelry stores without a fight," said Mr. Hunter to Hardware and Metal, "but we believe in developing every possible source of business, and by paying a little attention to this department we have worked up a substantial business. We find it a profitable line and quite suitable to be carried with an up-to-date stock of hardware. During slack periods in the general hardware line, the range of cut glass, fancy china, silverware, cutlery, etc., works in exceptionally well and helps to keep trade going. Such lines work in for wedding presents in June and September months, and for gifts at Christmas time."

The assortment of such lines carried makes it possible for this store to cater to any class of trade, wholesale or retail. The business which has been developed is largely credited to the effective displaying of the goods and also to the efforts of the salesmen from whom the utmost courtesy and efficiency are required.

Let Public Know They Are at Liberty to Come and Examine Goods

"Particular attention is paid to letting the public know that they are at perfect liberty to come in and examine goods and ask questions without being under any obligation to buy," said Mr. Hunter.

Separate Store for Implements and Machinery

About a year ago Mr. Hunter found it necessary to open another store on the main street of the town in order to give better attention to the farm implement and machinery department of his business. This store is devoted entirely to such lines, and since its opening a noticeable increase in business has taken place. This has been achieved largely through the ability to demonstrate and the giving of better service by confining such lines to their own premises.

The two floors above the main store are used as a warehouse, it being necessary to have considerable room to store the large stocks which must be carried owing to the fact that the store is located at a long distance from the source of supply. The top floor is used for a tin shop. Among other things all the galvanized ware used by the company is manufactured in the shop.

Mine, Mill and Smelter Supplies a Big Line

Mine, mill and smelter supplies are also a big line with this firm owing to the fact that mining is extensively carried on in British Columbia.

Bee-Keeping Supplies Handled

Bee-keeping supplies are also an important line with this firm. W. J. Sheppard, general inspector of the bee industry of British Columbia, is a resident of Nelson, and anyone interested in bees looks to Nelson for advice. There is an interesting opportunity for developing business here which enterprising dealers in other sections of the country might take advantage of. The Nelson Hardware Company naturally carries a very complete line of bee supplies, such as hives, frames, etc.

Much retail trade in hardware supplies is also secured from the interior of the province. Nelson is advantageously located for such trade, and being a good distributing centre, such trade has been worked up by special representatives who call on the retail trade throughout a wide district surrounding the city.

The city of Nelson is a splendid example of efficient management. It has cheap power and all its public utilities are owned and operated by the city. It is a city unto itself, and everyone is a persistent booster for local interests.

Melville, Sask.—Burglars broke into the local hardware store of W. Anderson and succeeded in getting away with a few dollars.

Drop in Building Costs Now Improbable

Shortage of Buildings Too Great to Allow for Decline—Canada and United States Have Piled Up Enormous Construction Deficit in Six Years

The shortage in buildings is so great that it cannot be corrected for many years, and for this reason it is not probable that there will be any rapid decrease in the cost of building. This is the opinion of men high up in the building world.

Their assumption that there is a tremendous shortage of buildings is backed up by figures compiled from various sources. The United States Geological Survey points out that while the value of permits issued in the United States has increased enormously the actual amount of building going on is subnormal, owing to increased values of the commodities that enter into construction. Thus, taking the year 1913 as normal, there has been an average annual deficit of over 20 per cent. in construction in the United States during the past six years, as the following tables show:

	Value of Permits.	Allowance for cost.	Per cent. normal.	Deficit in Building
1919	$1,281,000,000	200	75	25%
1918	430,014,365	159	31	69%
1917	687,415,605	139	60	40%
1916	1,024,211,675	117	..	..
1915	799,735,860	100	..	..
1914	785,525,746	100	..	..
1913	859,657,250	100	100	0%
Accumulated deficit				134%

Canada Also Behind

The following table showing building permits issued in Canada during the same period indicates that the building deficit in this country is equally as serious as shown by the United States figures:

1920 (6 mos.)	$59.691.699
1919	75,030,999
1918	37,028,146
1917	33,711,669
1916	32,736,661
1915	34,411,561
1914	105,264,237
1913	167,359,778

At the present time high money rates and the inadequacy of transportation are factors quite as serious as the shortage of building materials in promoting high costs of building. For instance, in localities where there are plenty of bricks there is apt to be a shortage of cement. Also certain lumber mills are idle because they are unable to move their product.

However, the dearth of materials is still the most important factor, or possibly it would be more correct to say the dearth of materials at prices that would-be builders are willing to pay.

Answering the question: "Will it be possible to build a building in a year or two for materially less than it would cost now?" H. H. Fox, vice-president of the Turner Construction Company, who has made a special survey of building conditions generally, says:

"Consideration of this question involves two principal factors—the general price level; that is, the value of the dollar, and the demand for building construction.

"Many articles have been written on the prospects of a decrease in the general price level and it is not necessary to discuss this topic at length. In view of the enormous increase of money in circulation ($56 per capita to-day against $35 per capita in 1914); increased credit facilities due to the Federal Reserve System, making money easier to get and, therefore, easier to spend; high prices, shortage of raw materials, and inefficiency of labor in foreign countries which will prevent foreign competition from being a vital factor for some time, it seems unreasonable to hope for a rapid drop in the general price level."

To Open Ashdown Store in Edmonton

James H. Ashdown Visiting in Montreal—In Reminiscent Mood—Tells of Early Pioneering on Western Prairies—Outlines Further Extensions to Western Enterprise.

MONTREAL.—Mr. James H. Ashdown, of Winnipeg, characterized as a merchant prince from a great country, is visiting in Montreal. When interviewed Mr. Ashdown was in a reminiscent mood and recounted many interesting stories of pioneering in the West since he tramped to the site of Winnipeg fifty-three years ago. From the small beginnings of those days Mr. Ashdown has evolved what is now one of the leaders in Winnipeg's commercial enterprise. His business establishments are equally known in Calgary and Saskatoon and he states that he has plans in preparation for the erection of a large store in Edmonton next spring. Edmonton, he says, is the gateway to the great Peace River country which is becoming an increasingly important fac tor in Canada's national life.

Mr. Ashdown is modest in regard to taking credit for the rapid growth of the enterprise of which he is head. In being interviewed he makes the simple statment: "I have simply grown up with the country."

When Mr. Ashdown tramped into the prairie on his long and arduous journey from the township of Brant, Ontario, having made the last 450 miles afoot alongside the Red River carts, there were no great church spires or edifices and the name of Winnipeg had been little heard except in the musical dialect of the Indian. There was a fort there to accentuate the presence of the Hudson

JAMES H. ASHDOWN
Head of J. H. Ashdown Hardware Co., Ltd., Winnipeg, who visited Montreal last week.

Bay Company and a straggling settlement of people, possibly about 10,000, occupying what was known as the Red River settlement. "For much of the way from St. Cleod," said Mr. Ashdown, "we passed alongside the scene of the great Sioux massacre in Minnesota which had occurred a comparatively short time before."

Mr. Ashdown tells of the Riel Rebellion arising from the apparent indifference of the Government towards helping the pioneers of the Western prairies.

Manitoba Highway Construction

The Canadian Minister for Railways has approved plans submitted by the Manitoba Government for extensive highway construction under terms of the Dominion Highways Act. The expenditures contemplated will amount to about $3,500,000, and about 4,000 miles of roadway will be improved. The highways approved are those from Winnipeg to Lake Winnipeg; Winnipeg to Rainy River; Winnipeg to Emerson, at the United States boundary; Winnipeg to Reston, connecting with western roads there; Winnipeg to Portage la Prairie and Brandon to Elkhorn, and connecting with the Saskatchewan system at Russell. There is also a system starting at the United States boundary and extending through the Province of Manitoba.

An additional roadway will be built through the central part of the Province of Manitoba, extending north and south, with a series of intermediate trunk and market roads. All of the provinces are participating in the Federal scheme of highway improvement, which is calculated to revolutionize public highway transportation in Canada.

Novel Invention by Winnipeg Man

Winnipeg.—A window blind attachment has been invented by J. A. Crozier of Winnipeg, Man.

The invention provides an attachment to the ordinary window blind which affords perfect ventilation from the top of the window, without any blinds flappin when the window is opened. By means of a fibre rolling screen, which is absolutely fly proof, the window curtain is enabled to fall, carries with it the window blind, and any portiers attached, and at the same time gives the necessary ventilation. It can be installed on any window, either new or old. In the winter time, the fibre screen rolls up on the inside of the window and thus is protected from the weather. Steps are being taken to form a company.

Regina Travellers Hold Happy Picnic

Enjoyable Day Spent by the United Commercial Travellers and Their Friends

Regina.—The annual picnic of the United Commercial Travellers at Hungry Hollow recently was attended by fully three hundred travellers with their wives and friends. From all angles the outing was a distinct success. E. R. Cameron, chairman of the general picnic committee, proved himself an able organizer, and won much praise for his efforts and G. P. Millan and Dave Best also acquitted themselves nobly in their preparations for conveying the party to the picnic grounds.

Senator Laird acted as judge of sports. The Boy Scouts' band was in attendance.

Develop Good Accessory Trade from Small Beginning

Blairmore, Alta.—L. Dutil, proprietor of the Blairmore Hardware Co., Blairmore, Alta., and Coleman Hardware Co., Coleman, Alta., installed a gasoline tank in the former town when there were only two autos there. He was the first in the district to put in such a tank. From this small beginning he has now developed an excellent auto accessory business.

Outlook is Poor for Natural Gas in Ontario

In a report of the natural gas inquiry of 1920 and of natural gas conditions in the province, handed in by Commissioner E. E. Estlin to the Minister of Mines, a gloomy summing up of possibilities and of the situation in this field is made.

The preface of the report states that depletion has been considerably accelerated owing to heavy consumption in wartime, that gas enterprises hold out no hope of financial gain, and therefore do not attract capital for further development work, which fact gives promise of the situation becoming more acute as times goes on.

"If a general readjustment in the whole situation does not take place immediately the business will pass into a decline, and this valuable fuel supply will be lost to about 15 per cent. of the population of the province," the report states. In addition the commercial end of the business is hedged in with contractual obligations assumed when the fields were young, which prevent any possibility of improvement.

In the Tilbury field, which supplies Windsor, it is stated that a decline of one-third since 1919 is reported. The gas is being withdrawn at about one-third of the open flow, which is stated to be too fast, and the field is in danger of being drowned out if the output is not considerably reduced. On other fields the report is no more encouraging.

Events in the Trade

Business Changes

Toronto.—The Elm Cutting Oil Co. has been sold to the Superior Oil Co.

Hamilton.—The Palmer Tire & Rubber Co. have been succeeded by Geo. H. Furguson.

Vanscoy, Sask.—The hardware business of S. L. Locass has been succeeded to by O. L. Locass.

Ridgeville, Sask.—A new hardware business has been commenced here by Stewart & McLloyd.

Montreal.—Dubuc Giroux have bought out the hardware store of Latour Hardware Co., 1145 Mount Royal Ave., E., Montreal.

Picton, Ont.—Adams & Vandusen, of Picton, have purchased all the patterns, stoves, stove castings, etc., of J. D. J. Barker Foundry Co., of Brighton, Ont., and are removing to Picton. This foundry was formerly located in Picton. A few years ago a new company was formed and it was moved to Brighton.

Incorporations

The Standard Metal Goods Co. has been incorporated to import and sell automobile parts and accessories.

Dominion Motor Castings, Limited, has applied for a charter, with an authorized capitalization of $250,000. The new concern will manufacture different types of castings used for automobiles, etc. A factory is being constructed in Windsor with a floor space of 23,000 square feet. It is proposed to employ about 150 men in the manufacture of castings.

Hold Annual Picnic

About seventy-five employes of the Ever-Ready Safety Razor Company attended the annual picnic at Bolton and enjoyed an excellent program of sports. The feature of the day was a baseball game between teams representing the office and factory, and which was terminated with the latter team in the lead.

Gas Order Issued by Commissioner

Chatham.—Provincial Gas Commissioner Estlin to-day issued an order to companies to cut off all consumers who are using natural gas for other than domestic purposes, except under special license. This action follows a complaint made that gas which should be conserved for households next winter was being used now for manufacturing.

JOINS WILT TWIST DRILL COMPANY STAFF

E. A. Humphries, for the past three years a member of the staff of Hardware and Metal, recently became connected with the selling force of the Wilt Twist Drill Company of Walkerville, Ont.

London Hardware Holds Successful Picnic

London, Ont.—More than one hundred employees of the D. H. Howden Hardware Co. and their friends had a most enjoyable outing at Springbank Park on Saturday afternoon on the occasion of the firm's first annual picnic. Everybody had such a rattling good time that by an absolutely unanimous vote it was decided to hold a similar outing every summer. The picnickers got away early on Saturday afternoon and secured the east end of the big park and started in with a program of sports that kept everybody interested. A feature of the day was the baseball game between the office staff and the men in the warehouse. The game was replete with fast plays and as the score shows plenty of hitting. The score at the finish stood 18 to 10 in favor of the men from the warehouse. The warehousemen also proved their mettle by coming off victorious in a tug-of-war. Many novelty races were introduced and such events as "Chasing the Chickens" and the biscuit eating contest.

News of Western Ontario

G. A. Sills, hardware merchant at Seaforth, Ont., has left to spend a few weeks with relatives and friends at Prince Albert, Sask.

* * *

Mr. and Mrs. George Reid, of Blytheswood, Ont., have been spending a few days with their son, Orville Reid, of the Reid Hardware, at Belmont, Ont.

* * *

The ratepayers at Newbury, Ont., will vote on September 14 on a by-law to raise $9,000 for installation of a new electric lighting system.

* * *

John Lind, formerly of London, Ont., now manager of the St. Mary's Cement Works at St. Mary's, Ont., has purchased Ardmore Park, and may present it to the town

Eggett & Co. have been awarded both the plumbing and heating contract for the $70,000 addition to public school at Ealing, a suburb of London, Ont.

* * *

Thomas Partridge, of London, Ont., has plumbing and heating contract for new $10,000 office building for the London and Petrolea Barrel Co.

* * *

Charles Cook, formerly of the Taylor Hardware Co., now of Porcupine, Ont., has been spending a few days looking up old friends at London, Ont.

* * *

J. G. Steele, of London, Ont., who had contemplated moving his hardware business to new and larger premises on Dundas street which he purchased some time ago, has decided to remain in his present location for a while.

* * *

Word has been received of the death in Winnipeg of W. B. Collins, for many years proprietor of a general store at Wyoming, Ont., and one of the best known oil men in the district. Until about a year ago he took an active part in the management of the Sarnia Gas Co. and was vice-president of the Sarnia Electric Co.

* * *

Fred. McLeod who has been pricer at the Hobbs Hardware, London, Ont., for some time has purchased the hardware business of W. D. Yelf, at Ailsa Craig, Ont., and is now busy taking stock.

* * *

The death occurred at London, Ont., on Saturday after a long illness of Mrs. Margaret C. Brady, mother of "Ted" Brady, of the Cowan Hardware Co. She was the wife of John C. Brady of the Customs House staff.

Removal of British Embargo on Hides and Skins

A cable from London says that the following products have been removed from the export embargo list: calfskins, hides.

Exports and Imports of Canada Almost Even

Ottawa, Ont., Aug. 29.—According to a summary of Canadian trade issued by the Dominion Bureau of Statistics for the 12-month period ending July 31, exports and imports are almost even.

The total imports are valued at $1,253,191,735 and the exports at $1,264,463,537. Figures covering the same period of 1919 were: Imports, $870,850,691, and exports, $1,273,443,272.

Chatham Steam Heating Plan Not Favored by R.M.A.

Chatham.—The proposition to take over the plant of the steam heating company and operate it next winter as a semi-public owned utility is not popular among all of the members of the Retail Merchants' Association. It was stated this morning that a large number of the merchants are considering the installation of their own heating systems rather than depend upon the steam heating company, which fell down badly last year during the cold weather. It is quite likely that before winter sets in a large number of the merchants will have dispensed entirely with the Chatham steam heat.

Decreased Demand for British Cutlery

Reports from Sheffield, England, say that foreign and domestic orders have fallen off considerably in the cutlery and silver-plate industries. Table cutlery is still maintaining its position, but quicker deliveries can now be obtained, even of stainless cutlery. The quietude of the pen and pocket knife departments has had the effect of reducing selling prices in some instances.

British Empire Steel Corporation

It is announced by the British Empire Steel Corporation that it has decided upon a development programme which will call for an expenditure of approximately $20,000,000 in Nova Scotia in developing its steel, coal and shipbuilding properties. Of this sum, the Dominion Coal Company will have $6,250,000 for new ocean terminal piers at Louisberg; the Dominion Iron & Steel Company $6,250,000. the Nova Scotia Steel Company, Sydney Mines, $2,080,000; Cape Breton, $14,580,000; Nova Scotia Steel Company, New Glasgow, $4,160,000, and the Halifax Shipyards, $1,250,000.

British Manufacturers Can Make Immediate Deliveries

Cable advices have been received by F. W. Field, the British Government Trade Commissioner in Toronto, from the Department of Overseas Trade, London, England, that the United Kingdom iron and steel industries are fully occupied with home orders to the capacity of raw materials available. Manufacturers of tin plates, galvanized sheets, hardware, cutlery and pottery, are in a little better position and can deal with an increased export business. Among the industries in the United Kingdom which can now handle larger business are machine tools, motor cars (except the higher grades), electric batteries and accumulators, musical instruments. Indications in those industries point to a larger export trade in the near future. The same remarks apply to glass and glassware.

Death of William P. Millar

For Many Years Prominent in the Trade and Until Recently Winnipeg Manager of the James Smart Plant of Canada Foundries & Forgings, Ltd.—Died at Virden on Return from Trip to the Orient.

THE death occurred at Virden, Manitoba, of Mr. W. P. Millar, Director of Export and Imports of the Canada Foundries & Forgings, Limited, and for many years a prominent figure in the trade. In 1916 Mr. Millar was appointed as manager of the Winnipeg branch of the James Smart Mfg. Co., Ltd., which was later taken over by the Canada Foundries & Forgings, Ltd. Mr. Millar had had several years' experience in the Northwest prior to that time and was well fitted for the position which he assumed. He recently set out on an extended trip to the Orient, renewing export connections for the James Smart plant and the other plants of the Canada Foundries & Forgings, Ltd., and was just returning from this trip when he died at Virden.

LATE WILLIAM P. MILLAR

Whose death at Virden, Man., is announced, while returning from a trip to the Orient in the interests of export trade for the Canada Foundries & Forgings, Ltd. Deceased was formerly manager of the Winnipeg branch of the James Smart Co.

To Build Steel Mills and Furnaces in British Columbia

Victoria, B.C.—Rolling mills and blast furnaces for the manufacture of steel, will, it is expected, be established in this province as soon as the necessary market for the product of such an undertaking has been assured, according to a statement made by Major Martyn, Industrial Commissioner for the province, who, with James M. McVity and Nichol Thompson, of the advisory council of the British Columbia Department of Industries, has left for Chicago and San Francisco in connection with the matter.

German Workmen Threaten to Wreck Plant

More than 15,000 workmen in metal industries at Stuttgart, Germany, were locked out following their threat to wreck the plant and do bodily injury to the management if the plan to deduct income tax from their wages was carried out.

Canadian Opportunity

Greek mining for its more progressive and exetnded exploitation requires principally: (a) capital; (b) modern machinery and plant installations; (c) more economical methods in mining operations; and (d) more convenient means and greater faciilties of transport. It may be expected that further developments will occur in this industry, whose productive capital already is estimated at at least 69,000,000 drachmas, and Canadian manufacturers of mining tools and machinery should note the existing industry and watch carefully whatever additional progress takes place.

World's Largest Oven at a South Wales Steel Works

A giant oven, over eighty-five feet high, has just started work at the Ebbw Vale Steel Works in South Wales.

This furnace, the largest in the world, took over three years to build, and cost a million pounds. When working at full blast it will produce 3,000 tons of steel a week, or enough to build an Atlantic liner every month.

The first fires were started on July 4, and now they will never be allowed to go out. When the second giant furnace is completed the twin engineering wonders of South Wales will produce 300,000 tons of steel every year.

Huge West African Market

Statistics recently compiled show that the total import and export trade of the West African States and Colonies last year amounted to nearly £100,000,000.

There is throughout the whole of West Africa a large demand for hardware and ironmongery.

Newsy Notes From Here and There

Montreal. — Fred Walker, city salesman for Caverhill Learmont & Co., Ltd., is out of the city this week spending his vacation.

* * *

Montreal.—G. Prudhomme, of A. Prudhomme & Fils, wholesale hardware merchants, was bereaved this week in the sudden death of his wife.

* * *

Montreal.—Mr. Philips, of the Stark-Seybold Wholesale Hardware Co., Ltd., Montreal, is away on a two week's vacation.

* * *

Montreal.—Mr. Breigle, who is in charge of the heavy hardware department of Caverhill and Learmont Co., Ltd., Montreal, left the city early this week for a two week's vacation.

* * *

Montreal, Que.—The Imperial Electric and Hardware Co. has been registered at Montreal.

* * *

Toronto. — Hardware dealers from out of town who were visitors at H. S. Howland Sons & Co., the first week of the Exhibition included: — D. J. Hartle, Minden, Ont.; T. F. Donald, Keswick, Ont.; W. G. B. Martin. Wilberforce, Ont.; Sam Pollard, Petrolia, Ont.; J. W. Perkins, Unionville, Ont.; E. H. Herring, Seabright, Ont.; Buyer of Hillhouse, McLeod Co., Clifford, Ont.

* * *

Toronto, Ont.—L. W. Simms, president of T. S. Simms & Co., Ltd., and a party of friends will be in Toronto next Thursday. After visiting the exhibition they will continue their trip to Chicago.

* * *

Toronto, Ont.—P. McA. Simms, of T. S. Simms & Co., Ltd., is in Toronto from St. John, N.B. He will remain here during the exhibition and is located at the company's booth in the Industrial Bldg.

* * *

Toronto.—Hardware dealers visiting Kennedy Hardware Co., Ltd., during the first week of Exhibition were as follows: Representative of C. M. Allen Co., Colborne, Ont.; Messrs. Allen of Lindsay, Ont., and Henry, of Orono, Ont.

* * *

London, Ont.—R. A. Somers, superintendent of the wares factories of Mc Clary Manufacturing Co., has resigned and has been succeeded by Kenneth Gunn.

* * *

Renfrew.—Renfrew Electrical Products Co., Ltd., about a year ago purchased the exclusive right to manufacture Majestic electric heaters from a firm in Toronto. They have moved the business here from that city. The local company has a large number of expert workmen, needed to keep up with the orders which are coming in from all parts of Canada.

* * *

Parkhill, Ont.—A gas and oil company has been formed among the farmers of West Williams township.

* * *

Brampton, Ont. — A thief recently gained entrance to the Bush Hardware Store by removing a portion of a window at the rear of the store, and ramsacked the place. The show cases, cash drawer and shelves were somewhat upset, but there is little evidence that the thief got away with any quantity of goods.

* * *

Falher, Alta.—The Falher Hardware Co. is going into the general store bus-

* * *

Loverna, Sask.—Perry & Knott's general store was completely destroyed in a recent fire. A strong wind was blowing and when the barrels of lubricating oils in the hardware section caught fire the flames threatened to wipe out the whole business section. A timely shower stopped further destruction.

Hardware Letter Box

PORTER LANTERNS

The Plaunt Hardware Co., Ottawa.—Kindly advise us of the address of Wm-Porter & Sons, manufacturers of lanterns, in the States.

Answer.—The Porter Co., 241 Water St., New York City.

Catalogs and Booklets

TWIST DRILLS AND REAMERS

The Wilt Twist Drill Co. of Canada, Ltd., Walkerville, Ontario, has just published a very elaborate catalog of drills, reamers and cutters which not only lists the various types of tools, but gives a description of the various styles and types, and gives suggestions on their proper uses. This catalog is now ready for distribution and can be had by writing to the jobber or direct.

Empire Steel Starts.—The first result of the British Empire Steel Corporation's scheme of development for the Dominion Coal Company's properties, at Springhill, was evident when the sod was broken for a new mine at a point one hundred yards distant from Number 7, which was opened a short while ago. The new slope is expected to tap a rich seam of coal from four to six feet in width.

To Operate Brickworks.—The Dominion Steel Corporation, following out its policy of being self-suporting, will put into operation the plant of the Sydney Cement Co. and the Sydney Pressed Brick Co. These plants have had a thorough inspection by the officials of the Dominion Steel and will be put into good working order with up-to-date machinery at the earliest possible moment.

Engravers and Die Sinkers Ltd. has been incorporated to manufacture machinery, metals, merchandise, etc., their head office to be in Toronto, Ont.

Trade Enquiries

The names of the firms making the inquiries given below, with their addresses, can be obtained only by those interested in the respective commodities upon application to HARDWARE AND METAL.

Please Quote the Reference Number When Requiring Addresses

1772. **Electrical accessories.**—A Hull firm ask to be placed in touch with Canadian exporters of electrical accessories, cables, fittings, motors, dynamos, glass shades, etc., etc.

1773. **Fencing wire.**—A South African agent asks for correspondence in reference to the representation for the Union on fencing wire.

1174. **Iron and steel.**—A Manchester firm are open to consider offers of steel, wire rods, billets, blooms, plates, sheets, bars, iron bars, etc.

1175. **Iron and steel, etc.**—A Manchester firm inquire for Canadian manufacturers of pig-iron, manufactured iron and steel, aluminium, copper and non-ferrous metals seeking representation in the north of England.

1776. **Iron and steel.**—A Manchester firm are open to represent manufacturers of steel blooms, slabs, billets, sheet bars, plates, wire rods, joists, channels and angles.

1777. **Oils.**—A Manchester firm are prepared to consider offers of mineral lubricating oil, paraffin wax and scale.

1778. **Athletic goods.**—A Manchester firm are open to import hockey sticks and raw material for manufacture of athletic goods.

1780. **Rubber.**—A Manchester firm are open to purchase crude materials used by india-rubber manufacturers, comprising reclaimed rubber, colored pigments, drugs and chemicals.

1782. **Pianos.**—A Cape Town firm of commercial agents are seeking Canadian piano agencies for the Union of South Africa. Will purchase their samples. Immediate correspondence requested.

1783. **Leather.**—A Northampton firm are open to purchase box calf and willow calf and sides, or would be prepared to act as agents.

Mechanical Displays Stimulate Sales

Sylvestre & Fils, Montreal, Use This Plan With Success—Pays to Interest Children — Small Motor Provides Power — Suggestions for Mechanical Displays of Paint, Fishing Tackle, etc.

SYLVESTRE & FILS, 603 Mount Royal Ave., East, Montreal, are great believers in the value of mechanical window displays as trade developers. So definite is the conviction of Mr. Sylvestre, Sr., on this point that he uses this method of drawing trade very frequently, and when the representative of Hardware and Metal called recently to interview the firm, there were mechanical displays in each window. In view of the fact that definite results have followed the installation of these moving displays, it is proof of their value from a trade-stimulating viewpoint.

"Sales are always better when we have one of these moving displays in the window," said Mr. Sylvestre. "We are very much satisfied with the results obtained in the use of these mechanical displays."

Pays to Interest Child

One of the great advantages of these moving displays is that of the interest created on the part of the child. In referring to this phase of trade development, Mr. Sylvestre said:

"The child is one of the best advertisers you can find. They go home and tell their parents about the moving display in the window, and persuade the parents to come down and look at it. When the father or mother arrives they see the display but they also see what other lines we have in the window and are impressed with the display, even though they may not want to buy at that time. Later, when they want to buy, they remember that they saw a certain line on display in our window and come to us for it."

Mr. Sylvestre stated that this was the only kind of advertising they do, but that so marked have the results been that they feel it is the best type of advertising which they can do. Located, as they are, in a densely populated and fast-growing district of Montreal, they find that sales are quickly developed and the growth of trade is continuous.

In speaking of these moving displays further Mr. Sylvestre continued:

"On Saturday night there is such a crowd of children around the windows that we can scarcely get near it. These displays always draw big crowds of children and as they do a lot of talking they are the very best advertisers."

Apparatus Is Simple

The necessary arrangements for electric motor and this consumes very simple nature and this is one great advantage.

"We use a one-eighth horse power electric motor and this consumes very little current. The shafting is all of wood and we made this ourselves. The cost to operate is, therefore, very small and the shafting and the pulleys are always ready for a different kind of display."

The mechanical apparatus is located in the basement immediately beneath the store windows. Connection is made with the contrivances in the windows by means of heavy cotton cord, and as all the apparatus used is very light, and generally constructed of cardboard, there is no strain of any kind.

In order that there may be no noise or friction, lubrication is easily applied to the various parts where there is any possibility of friction, and the operation of the contrivance is absolutely noiseless.

Some of the Windows

When the writer called the two windows above referred to were seasonable ones. One of them was a paint display. In the centre of the window a section of small panels, descriptive of a line of enamels, was placed on two paint cases—at a sufficient height to strike the eye of a passer-by just about half way between top and bottom of this panel. Centered in the middle of the top and bottom of the panel it links up with the mechanism and revolves. Just to the left of this panel the figure of a man was so arranged as to permit of his arms being attached to the crank of a pail filled with high colored pigments, showing the operation of paint-grinding. Tinted with various colors, this naturally looks very life-like and was decidedly attractive. It possessed an air of uniqueness, and certainly drew the attention of children and grown-ups alike.

In the opposite window was depicted a would-be angler sitting on the banks of a river, fishing. A box was lined with tea lead and water was placed in this box. At the end of the line suspended from the fishing rod the fisherman had hooked an old boot. The expression on the angler's face was anything but pleasing, indicating his chagrin at not catching the real thing.

Both of these contrivances are operated from the basement, on the same line of shafting, and are run by the one-eighth horse power motor.

Mr. Sylvestre uses this type of display for various goods and had one some time ago in which a hunter was shooting rabbits. Another one he hopes to display in the very near future is the actual operation of a model washing machine.

U.S. May Advance Extras On Nails

Cleveland, Ohio.—The Iron Trade Review says:—Influence of higher freight rates in effect remains cast generally over the iron and steel market. The factor of increased cost therein represented is leading both buyers and sellers to act with greater deliberation until the new basis of operations has been more clearly established. Conflict of various state and national authorities with regard to new intrastate rates has confused the situation in several directions. An increase of 50 per cent in ore handling charges at lower lake ports has been proposed together with higher storage rates to conform to the new rail schedule.

Iron and steel prices continue to reflect the increased cost of production attendant upon the new rates. It is reported though not officially announced that the leading wire interest has decided upon an advance of $5 per ton in its extras on nails. Base prices are not to be altered. If this action is taken it will be the first semblance of a price change adopted by the Steel Corporation since March, 1919. The National Tube Co. has announced a new composite list on oil country goods, incorporating the advanced freight rates, in which are consolidated the several zone lists previously followed. Independent mills are holding their schedules more firmly and in some lines are quoting higher. Improvement in transportation conditions is progressing but some acute spots remain. Oil field operation in the Southeast having reached a critical stage because of the shortage of supplies, the interstate commerce commission has been forced to allocate cars to Pittsburgh and Youngstown mills for relief. Buyers are feeling their way at the advanced prices recently established in pig iron. Sales and inquiry have dropped off considerably especially for next year. Prices however show general strength. A decided shortage of iron in eastern Pennsylvania has developed especially in basic and plate mill operations are being retarded.

Some rail tonnages of importance for 1921 delivery have been accepted by the mills but the price is left open to be settled by Jan. 1. An increased demand for track fastenings is in evidence. Car orders remain few. English makers of ferro-manganese have cut their price to this country $20 per ton.

You and Your Customers Can be sure of . . . . .

CROWN DIAMOND PAINT

because many elaborate tests and analyses have proven that it is constructed of materials which give wearing qualities and service far beyond that given by ordinary paint.

The letter shown on the opposite page is more convincing than any expression from us, because Mr. Job is an absolutely unbiassed paint authority. He is consulting chemist for the largest railways and is closely associated with the extensive paint tests conducted in the States. Many of the Government paint specifications have been prepared by Mr. Job, and he is in no way connected with the paint industry.

This is why we submitted the Crown Diamond Paint formula to Mr. Job and his letter but verifies our own statements of the exceptionally high standard and wearing qualities of Crown Diamond Paint.

Selling paint backed by such assurances of quality means that you create a lasting reputation for reliability.

Write us to-day and we will give you details of other tests which will convince you that Crown Diamond Paint is a pure paint — a practical paint for all purposes, and a paint you can sell with absolute confidence that it is creating an extensive good-will for your business.

SUBJECT: PAINT FOR OUTSIDE USE

Gentlemen:-

We wish to acknowledge your letter of April 7th in which you transmit for the writer's opinion the Standard Formula for your CROWN DIAMOND White Paint for Outside Use.

WHITE.- The writer has made a special study of paints and paint materials in the United States and in Canada for many years, as to both wearing properties and durability, and in his opinion your Standard Formula for the PIGMENT represents one of the very best devised for general outside use, and the Formula for the LIQUID also represents excellent quality, having high resistance to dampness or water.

TINTS.- These materials combined in proper proportions make a very durable paint which has also proved very satisfactory as a base for TINTS.

SOLID COLORS.- As to SOLID COLORS, you state that your Formulae are in accordance with the highest standards for the leading railways of America, - in such cases there should be no question as to the durability and permanence when properly applied.

Yours truly,

MILTON HERSEY COMPANY, Limited

R. Hersey

VICE-PRESIDENT.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

EXTERNAL EMERGENCY BRAKE

A new external emergency brake is being offered the trade by the Raybestos Company, Bridgeport, Conn., who have supplied the following description:

This addition to the Raybestos line is scientifically correct in principle. In practice it works out as intended. It takes the place of the internal expansion brakes in the rear wheels of the Ford car, but these need not be removed unless desired. It can be attached in a few moments as no drilling is required. It may be put on without removing the wheels, but this is less convenient.

This brake requires only a wrench to install as it fits the studs on the Ford brake housing perfectly. The principle used is the "wrapping" or "winding" action, which increases in proportion as the brake is applied. Developed by brake specialists this principle is accepted as correct and will undoubtedly continue standard practice for some years to come.

Constructed of rolled steel of substantial weight, eight and one-quarter inches by one and one-quarter inches, covered with a rust-resisting compound.

An adjusting nut makes it possible to keep the brake tension just right. Everything needed to apply the brake is supplied.

The Reliable Battery Filler

The Reliable Mfg. Co., 2819-35 Prospect Avenue, Cleveland, Ohio, offer to the trade their new battery filler. They claim that it keeps distilled water clean and covers a convenient means of filling batteries and that it is strongly built of substantial materials to stand heavy service, and no metal comes in contact with contents and is easy to refill. The capacity is one gallon.

NEW TOOLS MADE BY GOODELL-PRATT CO.

The Goodell-Pratt Co., of Greenfield, Mass., have recently brought out some new machinists' tools among which are the following:

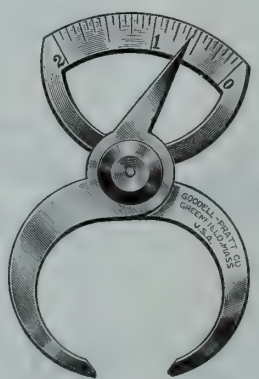
Chauffeurs' Universal Wrench, No. 595

This chauffeurs' universal wrench is so named because it is self-adjusting for any size or hexagon nut up to ⅝ of an inch, and will hold round pipe up to ½

inch. The jaws are opened by pressing a trigger and automatically closed by means of a spring. It is said to firmly grip any size piece within its capacity and to be made from steel with hardened jaws. The handle is shaped to give a good grip.

Indicating Calipers

These tools will be found more convenient than caliper rules for making

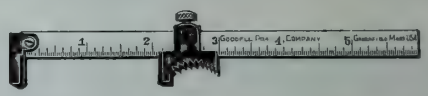


all outside measurements of either lengths or diameters, up to 2 inches in the No. 662 and 50 mm. in No. 672.

It is claimed that the tool is made from a hard stock and is stiff and rigid and the arc is accurately divided to read 16ths of an inch. The entire tool is very nicely finished.

Slide Caliper Rule No. 1771

This useful little tool, it is pointed out, can be used for three distinct purposes. It is primarily intended for use as a caliper rule, for which purpose

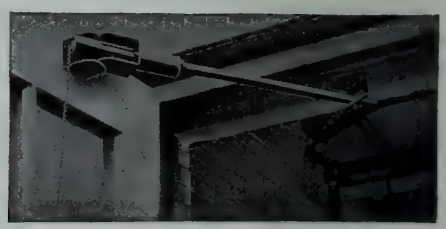


it will be found extremely convenient as measurements are read directly from the end of the slide without the necessity of making any allowances.

By reversing the thumb slide the tool becomes a stop rule, and by removing it entirely a narrow hook rule.

GARAGE DOOR HOLDERS

The Stanley Works of New Britain, Conn., have brought out a new garage door holder, the purpose of which is to prevent doors slamming and doing



damage to cars. The holder consists of a U shaped arm of heavy steel, with springs covered by a cylinder, which are said to act as a cushion, relieving the strain on hinges. The holders are furnished in different finishes and are reversible and can be applied to right or left hand and square or curved top doors.

ICELESS REFRIGERATORS

The Thermanor Co., 709 Sixth Ave., New York City, are responsible for a new food container which they claim keeps food cool and fresh without the use of ice. The Thermanor, as they term it, employs the principle of cooling by evaporation and it is said that for all except the few days in the year when humidity is exceptionally high the Thermanor will save expense by cutting down ice bills, as all that is necessary is to immerse the Thermanor in water every three days and place it where moving air can sweep over it.

It is said to be compact, neat and easily cleaned and makes no mess in the house.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

HIGHER prices are reported on a good many hardware lines this week and perhaps the most outstanding feature and the one that will affect most housewives is the advance which has taken place on all wares. Practically everything that is used round the kitchen has been increased in price and new discounts are out on all lines of tin and enamelware, also on galvanized ware, steel and sheet iron goods and on nickel plated copper ware. Hardware and Metal were informed by manufacturers that increases were justified by higher costs of raw material, etc., and all materials entering into make-up of these goods have been hard to obtain.

Higher prices are noted on stoveboards, and washboards, also on barbed wire, hay knives, cut glassware, and food choppers.

Linseed oil and turpentine have lower prices and another reduction has taken place in price of leather soles and heels.

Shortages continue on wire nails and on iron pipe and pipe fittings. Canada plate and galvanized sheets are very scarce indeed and dealers are unable to get supplies anywhere.

The iron and steel market has already felt the influence of increase in freight rates from the mills. A greater deliberation on the part of buyers and sellers is reported. While a slight improvement in transportation is reported, there is room for a lot more yet as distribution is still poor.

The hardware and paint trade generally report a fair amount of business and booked orders for future delivery are good, although prices do not seem to have declined in hardware commodities and many lines are scarce both jobbers and dealers are optimistic and look for a record fall trade.

Collections are coming in satisfactorily.

MONTREAL MARKETS

MONTREAL, Sept. 3.—The Montreal hardware market is very quiet this week except for a few changes, principally the oil line. Gasoline has advanced two cents a gallon this week. Lubricating oils are between one and two cents a gallon dearer and greases have advanced about two cents a pound. Scythes for next year will be more expensive. There was an advance last week in the price of roofing and building paper. Tin and enamelled ware are also higher. Building paper will cost more. Also an advance of 55 per cent. on steel and brass jack chains. Leather soles are reduced twenty per cent. in price. A scarcity of the small sizes of nails exists. The market is rather quiet but the prospects for the fall business are very good in most lines. The sales of roofing for Montreal this season are twenty per cent. higher than they were for the same season last year. The shortage of iron and steel is being felt more and more by the hardware trade.

As a result of the steel workers' strike here there is a stringency in iron and steel. This has also caused for the first time scrap to be shipped from Canada to England. Later this may prove to be a boon to scrap merchants as well as to Canada.

Outlook Exceedingly Dark For Iron and Steel

Montreal.

IRON AND STEEL.—The outlook for iron and steel is even darker this week than in previous weeks. Besides the under production to meet demands, the strike in one of the big plants has crippled production at the worst possible time. How long this state of affairs will last it is hard to say. Prices as given below hold but shipments are at a premium.

IRON AND STEEL

Iron finish machinery steel		$5 05
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50

Very Strong Market for Rubber Belting and Hose

Montreal.

BELTING AND RUBBER HOSE.—There has been no change in quotations on rubber hose or belting since early in July. The market, since then, has held very firm, and although no changes are contemplated, it is certain that under conditions prevailing for raw material that any movement would be a change

upward. The demand for these lines has been unusually good this season.

Automobile Tires in Big Demand

Montreal.

AUTOMOBILE TIRES.—The market for raw rubber is very strong and the existing demand is barely met by supplies. The requirements this season have been heavy, and while there are no changes in price the market is very strong.

Shipping Scrap Metal to England For First Time

Montreal.

OLD MATERIAL.—The strikes prevalent here in the rolling mills have had a great effect on the market for old material or scrap. One effect it has had is that a market overseas has been sought and proved to be excellent. This is the first time that scrap material has been shipped from Canada to England. Despite this movement this market is very quiet at the present time, quotations given below holding.

Dealer's Buying Prices		
Automobile tires	0 02½	0 03
Yellow brass	0 09	0 10
Red brass	0 16	0 17
Light brass	....	0 06½

26 gauge	....	11 25
22 to 24 gauge	....	12 05
20 gauge	....	12 05
18 gauge	....	12 05
16 gauge	....	10 75
English Standard—		
28 gauge	13 00	13 50
26 gauge	12 75	13 25
24 gauge	12 15	12 65
22 gauge	11 80	12 30
18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Scythes Will Cost More Next Season

Montreal.

HARVEST TOOLS.—Reports on the prices for harvest tools for next year are in general about the same. Scythes have advanced in price $2.75 per dozen. This is principally on account of the higher price of the steel used. The manufacturers point out that in a scythe there are three different kinds of steel required. There is also a difficulty in obtaining skilled labor for the manufacture of these tools. It requires a man skilled in this art to turn out the best knives, and since there have been very few apprenticeships lately, and only in rare cases do sons follow up their father's trade, there is a great need for skilled men in the manufacture of scythes. Higher wages have to be paid to the men who are now able to carry on this work.

Building Paper Quotations Show Advanced Prices

Montreal.

TARRED PAPER.—There has been an advance this week in the price of tarred paper and tarred felt. The new quotation for tarred felt is $6.05 per cwt. For heavy tar straw sheets, the price is $8.05 per cwt. No. 2 dried building paper is $1.50 per roll; No. 2 tarred building paper is $1.70 per roll; No. 1 dry building paper is listed at $1.85 per roll, and No. 1 tarred building paper is listed at $1.95 per roll. The "Surprise" dry building paper is quoted at $1.55 per roll. Ready Roofing two-ply is selling at $2.33 per roll. The three-ply is selling at $2.75 per roll.

Leather Soles Reduced by Twenty Per Cent.

Montreal.

LEATHER SOLES.—There is a reduction this week of 20 per cent. on tap soles and top lifts. This reduction is on account of a slight reduction in the price of leather.

Advance of 55% on Steel Jack Chains

Montreal.

STEEL AND BRASS CHAINS.—There is a 55 per cent. advance announced on the price of single and double steel jack chains. There is also an advance of 35 per cent. on brass jack chains, both single and double. This advance is accounted for in the initial cost of the metal.

Scarcity of Small Sized Nails Exists

Montreal.

NAILS.—While the price of nails remains almost the same there is a scarcity of the smaller sizes. This scarcity has become almost acute and no hope for relief is apparent before the winter season.

Advance on Tin and Enamelled Ware Made

Montreal.

ENAMELWARE AND TINWARE.—There is an advance announced this week on all enamel and tinware. This increase in price is due to higher cost of labor and raw materials. Full price lists will be found on another page of this issue of Hardware and Metal.

Supply of Furnaces Does Not Meet Demand

Montreal.

STOVES AND FURNACES.—There is the usual fall demand for stoves but there is an increased business in hot-air furnaces. The big drawback is the lack of production in this line, and in many cases orders cannot be filled. There is no change in price in these lines and the market is holding firm.

5c Per Gallon Advance on Lubricating Oils

Montreal.

LUBRICATING OILS.—The advance in the price of lubricating oils which was announced last week amounts to 5 cents per gallon on engine oils, cylinder oils, machine oils and black oil. In fact the advance is general throughout the lubricating oils.

Hemp Market Strong; Rope Price Firm

Montreal.

ROPE AND CORDAGE.—The price for raw hemp is holding firm and the market is steady. There is no change in the price of manila rope. The pure manila is quoted at 35½ cents; British and New Zealand at 28 cents, and sisal at 22½ cents per pound. Business is rather quiet in this line at this season but a larger movement is hardly expected.

Higher Prices on Axle Grease

Montreal.

AXLE GREASE.—There has been an advance this week in the price of axle grease. The advance will add between one and two cents per pound to the cost. This change in price follows through all the oil products and originates in the higher price for crude oil in the primary market.

Higher Prices for Gasoline Now

Montreal.

GASOLINE.—Gasoline, like other oil products, has advanced in price this week. The new price is 2 cents a gallon dearer than previous quotations. The new prices are 43½ and 48½ cents per gallon. Coal oil and fuel oil are about the only oil products not yet affected in the advance. Their position on the market is, however, very strong.

Ingot Metals Firm and Unchanged

Montreal.

INGOT METALS.—Ingot metals have

held firm this week with no changes despite the slight decline that has occurred during the past few weeks. To all appearances this market is very firm and prices hold.

TIN.—Tin is quoted by importers at 56 to 57 cents per pound. In some localities there is a difficulty in obtaining supplies.

COPPER.—No change in the price of copper has occurred this week, quotations being 24 and 24½ cents.

LEAD.—Lead holds very firm in price and quotations range about 10¼ cents per pound.

ANTIMONY.—Limited sales of antimony are quoted at 10½ cents per pound. This market also continues firm at quotations given.

SPELTER.—Quotations of 10¾ cents per pound are made on the limited demand for spelter. Although the market is not active the prices are holding firm.

ALUMINUM.—No change is recorded in the price of aluminum this week, quotations being from 37 to 39 cents per pound.

TORONTO MARKETS

TORONTO, Sept. 4—Price advances are many this week and probably the feature that is the most noticeable is the increase in the price of all tin and enamel wares. The higher prices indeed affect the whole line of wares, and japanned ware, colored and white, galvanized wares, sheet iron and steel and nickel plated copper ware are all advanced. The manufacturers state that higher prices are necessary owing to the increased costs of raw material.

Other lines increased in price included cut glassware, hay knives, barbed wire, food choppers and ash sifters. Stoveboards are also higher in price. Reductions are announced on leather soles and heels.

Business keeps good and fall goods are moving out well and bookings for next spring delivery are coming to hand favorably.

The scarcity and shortage on heavy lines does not seem to improve any and iron and steel generally is hard to obtain. Wire nails are expected to follow the lead in the U.S. and advance to conform to increased freight costs. Small sizes in wire nails are especially hard to obtain. There is no improvement in the black and galvanized sheet situation and dealers look like having a hard time before them to supply stove pipes this fall. All wire goods are getting scarce. Sporting goods for fall, including firearms and ammunition, are in great demand. Collections are good.

Japanned Wares Also Revised Upwards

Toronto.

JAPANNED WARES. — These have come in for a general revision and the discount on the general list has been changed from list plus 25 per cent. to list plus 33 1-3 per cent. and the white japanned from plus 35 to plus 45. The new discount on sprinklers is 33 1-3 on list and japanned coal hods are now 80 per cent. advance on list.

Advances in Wares; All Lines Take Discounts

Toronto.

WARES.—An advance has taken place in wares and practically all lines are affected. The increases are from five to twelve and a half per cent. in tin and enamel ware and from fifteen to twenty-five per cent. in galvanized and sheet-iron ware. The high prices are called for, say the manufacturers, by the increased cost of production, scarcity of raw materials and higher freight rates on same. Manufacturers and jobbers have found it gradually getting more difficult to fill orders in these lines and the list of shortages has been growing steadily larger. Lines for which there has not been much of a call have been eliminated, but while this has undoubtedly helped, the demand has been greater than the supply.

In another column will be found complete list of new discounts.

Nickel Plated Copper Goods 10% Higher

Toronto.

COPPER WARES. — Nickel-plated copper tea kettles, tea and coffee pots are advanced another 10 per cent. and the new price on these goods is list plus 60 per cent.

Fifteen Per Cent. Advance on Galvanized Ware

Toronto.

GALVANIZED WARE. — All galvanized ware has an approximate advance of 15 per cent.

Light pails and tubs are now list plus 60 per cent. and the heavy list plus 50 per cent.

Garbage pails now sell at list plus 45 per cent. and galvanized coal hods at an advance on list of 90 per cent.

Tin, Iron, Steel and Hollow Wares Higher

Toronto.

TIN, IRON AND STEEL WARES.—An increase has been made on all these goods and on hollow ware and new discounts will be found on complete list printed in another column.

Stove Boards Advance Fifteen Per Cent.

Toronto.

STOVE BOARDS.—These goods have come in for an upward revision and new prices on the wood lined board is list plus 10 per cent. All goods made partly or wholly of lumber are costing very much more to produce than they used to.

Thirty Per Cent. Advance Rubber Window Cleaners

Toronto.

RUBBER WINDOW CLEANERS. — There has been an increase of 30 per cent. on prices of rubber window cleaners. This applies to all sizes.

Higher Prices on American Cut Glass

Toronto.

CUT AND BLOWN GLASS.— There has been a considerable advance in the price of glassware and American cut glass is now costing from 20 to 35 per cent. more in price.

Many hardware dealers are now carrying this in stock and may be interested to know that an increase of 30 per cent. has taken place in the price of Canadian blown tumblers.

Paperhanging and Painters' Tools Cost More

Toronto.

PAINTER'S TOOLS. — Higher prices are in effect on paper hanging tools and painter's scrapers.

Paper rollers are costing $3.50 a dozen and wheel knives from $7.00 to $10.50, while the common painter's scraper has advanced to $2.00 per dozen.

Higher Prices Asked For Hay Knives

Toronto.

HAY KNIVES. — Increased prices are asked on hay knives and the present prices on the following makes are as follows:

Lightning, $17.50 per dozen; Heath,

$17.50 per dozen; Spear Point, $19.00 per dozen.

Barbed Wire Higher and Very Scarce

Toronto.

BARBED WIRE. — Besides being scarce and hard to get all season barbed wire is higher in price and is now selling at $7.00 per 100 pounds net. The stocks of this are still low everywhere and it does not appear as if shortage will be relieved this season.

Quotations Higher on Food Choppers

Toronto.

FOOD CHOPPERS. — Higher quotations are out on the Universal make of food choppers being an increase of 33 1-3 per cent., and the following are new prices for this line:—

No. 0—$30.00 per dozen.
No. 1— 36.00 per dozen.
No. 2— 42.00 per dozen.
No. 3— 58.00 per dozen.

Brass and Copper Rods and Sheets Firm

Toronto.

BRASS AND COPPER. — The market has been firm and prices on brass and copper rods and sheets are unchanged but supplies have been none too plentiful. Now that there is a curtailing of the output in the automobile industry it is thought possible that there will be an improvement in conditions in this market and supplies will likely become easier as a big quantity of both these metals have been largely in demand for some time by makers of cars.

The base price for brass sheets 24 gauge is 40 cents and for copper sheets 16 ounce and heavier 46 cents.

Wood Ash Sifters to Cost More

Toronto.

ASH SIFTERS.—The long handled wood ash sifter is advanced in price and is now selling at $2.90 per dozen.

Demand Good For Fire Arms and Ammunition

Toronto.

FIRE ARMS AND AMMUNITION.—With the coming of fall more interest is taken in this line of sporting goods and jobbers report good sales of rifles, shot guns and for ammunition. The calls for the popular makes and sizes is greater than ever and despite the much higher costs on all these goods due to materials, labor and rate of exchange and the addition of the luxury tax there is a much larger demand than usual, proving that people have got the money and will have the goods if they want them.

Leather Belting Firm; Half Soles Cheaper

Toronto.

LEATHER BELTING. — No change has taken place in leather belting prices and manufacturers state they are running their plants on full time and cannot get supplies fast enough, and cannot see any sign of a decline in prices. On the other hand there have been further reductions in the price of tap soles and heels.

Wrought Pipe and Fittings Scarce But Unchanged

Toronto.

PIPE AND PIPE FITTINGS.—There is still a great scarcity in different sizes of wrought iron pipe, both black and galvanized and many sizes of fittings are equally hard to obtain.

Little or no improvement in supplies is observed and further advances in prices are not unexpected. Pipe is still quoted as per list 46 which will be found on current market quotation pages, and fittings, which are also unchanged, will be found there too.

Valves and Cocks in Fair Demand

Toronto.

VALVES AND COCKS. — There has been a good seasonable demand for brass goods and stocks though lighter are in fair shape and supplies can be obtained reasonably well. Jenkins gate valves are now selling at net and Jenkins globe valve at list plus 10 per cent.

Cotton Rope and Cord Firm and Unchanged

Toronto.

COTTON ROPE AND SASH CORD. —Prices on sash cord, cotton rope and twines are unchanged and markets are firm.

Reports vary as to the new crop but accounts show that three weeks of damp weather late in the season helped the boll weevil and has meant the discoloration of a good part of the crop.

Fifteen Per Cent. Advance on Mattress Wire

Toronto.

MATTRESS WIRE. — While this is not an article which is stocked by the average hardware dealer, an advance is noted in the price from $12.00 to $14.00.

Cotter Pins; Mixed Lots For Automobiles

Toronto.

COTTER PINS. — There has been a good demand for these for automobile use and for stationary gasoline engines, and they are now put up in mixed assortments in small screw top tins, and are meeting with a ready sale. Number 7 assortment is put up for Ford cars and number 5 for other makes.

Plates and Sheets Show no Improvement

Toronto.

PLATES AND SHEETS. — No improvement in the situation is reported and very little material amelioration is looked for or expected until the crops have been harvested and moved. Transportation has not bettered any and cars are being used for grain, but though stocks are said to be piling up at the mills, many of the mills are closed down and others are not operating to a quarter of their capacity, so that the trade cannot see any possibility of prices declining any. Stocks in dealer's hands are very small and nominal prices are as follows:

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Manila Rope and Twines Unchanged

Toronto.

ROPE AND TWINE.—Demands have been fairly good for rope and twine and prices are firm and unchanged.

Pure Manilla basis is still 35½ cents and sisal 22½ cents.

Iron and Steel; Deliveries Uncertain

Toronto.

IRON AND STEEL. — Stocks on hand of iron and steel are still particularly small and deliveries uncertain.

Dealers report "no change," and absolutely no improvement in conditions.

No alternations have been made in prices here but dealers think that an advance of from two to three dollars per ton is extremely likely to take place in prices to cover increased costs, due to freight rates, but jobbers seem to be waiting for the "other one" to take the initiative.

Prices are as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and lighter	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 50
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 00
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 50
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	6 75
Hoop steel	6 75

Steel Wire Brushes Advanced Ten Per Cent.

Toronto.

STEEL WIRE BRUSHES. — There has been a ten per cent. advance in the prices of steel wire brushes and these goods are inclined to be scarce.

Horse Blankets Moving Out Well

Toronto.

HORSE BLANKETS. — These are said to be moving out well for fall and prices are firm on all lines. The jute blanket, lined pretty nearly to bottom and quilted with stitched stayons and shaped at the neck, seems to be the best seller.

Goods Made of Wire Are Now Scarce

Toronto.

WIRE GOODS.—There has been a growing scarcity of wire goods of different descriptions and makes and this has extended to wire mesh goods and wire strainers used for straining soups, jellies, etc. Many articles made of wire are affected.

Wire Nails' Price May Go Higher

Toronto.

WIRE NAILS. — No improvement in the supply of wire nails is reported and small sizes especially are scarce and hard to get.

Lead and Zinc Products Show Firmness

Toronto.

LEAD AND ZINC.—There is a tendency towards firmness on lead and zinc products but prices are unchanged. However the market is rather quiet and buyers seem to be holding off and purchasing only small quantities.

Quotations on principal lines are as follows:

Lead pipe, list, per lb.		0 17
Do., over 8 in., list, per lb.		0 19
Lead traps and bends	....	add 30%
Lead wool, lb.	....	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	....	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, lb.	....	0 43
Solder, strictly, lb.	....	0 35
Solder, commercial, lb.	....	0 33
Solder, guaranteed, lb.	....	0 39
Solder, wiping, lb.	....	0 33
Lead waste pipe, list, per lb.		0 18
Zinc sheets, per lb.	....	0 19

Waste Materials Brisker, But Unchanged

Toronto.

WASTE MATERIALS. — Trading in waste materials has been more brisk this week but prices generally are the same.

Scrap lead and tin are reported to be in demand and aluminum and yellow metals have been quiet.

Prices are as follows:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, pe rton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Automobile tires	0 02½
Heavy lead pipe	0 05¾
Tea lead	0 03

Ingot Metals Trading Brisker

Toronto.

INGOT METALS. — The feature of the market this week has been tin which has declined on outside markets, though unchanged locally.

LEAD.— This is said to be firmer and holding steady; the supply is greater but demands would soon absorb it. Prices are on basis of ten cents.

COPPER.—The market is said to be stronger and demands are good. Quotations on casting are still 24 cents per pound.

TIN.—This metal continues to be erratic. At the close of last week there was a sharp advance on London markets followed by a decline. New York markets were lower by nearly two cents.

Local quotations are from 56 to 58 cents.

ANTIMONY. — The market is quiet but prices are unchanged and it is quoted at 10 cents.

SPELTER. — Not very much business is reported in spelter. American interests are said to be repurchasing from London dealers. Prices continue firm at 10 3-4 cents.

ALUMINUM — Foreign metal is still being offered at lower prices than asked by home markets. It continues firm at 37 to 39 cents per pound.

LONDON MARKETS

LONDON, Sept. 2.—The feature of this week has been the new lists on harvest tools and scythes for spring delivery showing an advance of from fifteen to twenty per cent. Cultivators, hand seeders, sprayers, etc., are also revised upwards considerably. A big advance in price has taken place on barrel churns and stoveboards, washboards, jack chain and horse-shoe nails are also higher.

Business in London and surrounding districts continues good and an exceptionally good fall trade is confidently expected. Crops have been extra good in this district and conditions are excellent.

Builders' hardware, housefurnishing hardware and farm supplies are all in good demand.

White Lead Sales Fair; Prices Firm

London, Ont.

WHITE LEAD IN OIL.—Sales of white lead in oil have been very good for this period of the year and no change in prices is reported. Prices: Pure, tons, $20.45; less tons, $20.80. Elephant brand, $20.95 and $21.30 respectively.

Seasonable Demand For Linseed Oil

London, Ont.

LINSEED OIL.—The price of this is unchanged this week and sales have been seasonable though at this time of the year there is not as a rule much demand. Prices are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	2 00	2 03
3 to 5 barrels, gal.	1 99	2 02
6 to 9 barrels, gal.	1 97	2 00

Less barrels add 15 cents gal.

Turpentine Prices Show No Change

London, Ont.

TURPENTINE.—No change is recorded in turpentine and prices ruling in local markets are as follows: 1 barrel lots, $2.60 per gal.; 2 to 4, $2.59; 5, $2.75.

Putty Unchanged; Prices Firm

London, Ont.

PUTTY.—Prices are ruling firm on putty, and though no change in prices has taken place it is understood that the whiting used in the manufacture has been difficult to obtain in any quantity for some time. Prices are:

	Per	100 lbs.
Standard, 100-lb. drums	....	8 30
Do., 25-lb. drums	....	8 55
Pure, 100-lb. drums	....	10 80
Do., 25-lb. drums	....	11 05

Steady Demand For Window Glass

London, Ont.

WINDOW GLASS.—The demand for window glass has been a steady one and with new building under construction it appears as if demand will continue. No change of price has taken place and the following are present discounts: Single diamond, 15 per cent. off list; double diamond, 15 per cent. off list; cut lights, 40 per cent. off list.

Next Season's Prices For Hay Forks, Harvest Tools

London, Ont.

HARVEST TOOLS.—Booked orders for next season for harvest tools, hay forks, etc., are being accepted for spring shipment at 50 and 10 per cent. off list.

Rope Sales Continue Seasonable

London, Ont.

ROPE.—Seasonable sales are reported on rope and the harvest and farmers' needs have taken care of large requirements this season. The price is holding firm and unchanged, and the following are quotations: Pure manila, 35½ cents base; beaver manila, 28 cents; New Zealand hemp, 28 cents; sisal, 22½ cents.

Scythes Prices Advance For 1921

London, Ont.

SCYTHES.—Booked orders for 1921 spring shipment on scythes show higher prices of from 10 to 15 per cent. New quotations are as follows:

Cast Steel, $20 doz.; Clipper, $21; Excelsior, $22; Double Beaded, $21.50; Bush, $20.50; Cutlery Steel, $22.

Barrel Churns Advanced About 33 1-3%

London, Ont.

CHURNS.—An advance of approximately 33 1-3 per cent has taken place on barrel churns. Raw materials, both lumber and steel, are said to be the reason, and new prices are as follows:

No. 0, $12; No. 1, $12; No. 2, $13; No. 3, $14; No. 4, $16; No. 5, $19.

Soles and Heels Decline About 10%

London, Ont.

SOLES AND HEELS.—Lower quotations are made on leather soles and heels again and reduction amounts to about 10 per cent. Following are new prices on some of the best sellers:

Soles—No. 43½, misses, $1.85 doz.; No. 37½, women's, $2.15; No. 31½, boys', $2.90; No. 121, men's, $4.05; No. 122, men's, $3.70; No. 123, men's, $3.55.

Heels—No. 80, ladies', $1.20 doz.; No. 81, ladies' $1.05; No. 52, men's, $1.15; No. 51, men's, $1.30.

Ten Per Cent. More Asked For Washboards

London, Ont.

WASHBOARDS. — New and higher prices are being quoted on washboards, all materials entering into the manufacture of these having advanced considerably. New prices are: Zinc, $6.50 per doz.; glass, $8.75 per doz.; pony, $3 per doz.

Higher Prices on Steel Jack Chain

London, Ont.

STEEL JACK CHAIN.—Another advance has been made on steel jack chain and new prices are about 10 per cent. higher and chain is now selling at list plus 55 per cent.

Horse Shoe Nails Now One Cent Pound More

London, Ont.

HORSESHOE NAILS.—New prices on Montreal Rolling Mills' horseshoe nails show an advance of one cent. per pound and following are new prices on boxes of 25 pounds:

No. 4, $10 per 25-lb. box; No. 5, $5.25; No. 6, $5; No. 7, $4.75; No. 8, $4.75; Nos. 9 to 12, $4.50. Less 10%.

Leather Skate Straps; Fall Price Unchanged

London, Ont.

LEATHER SKATE STRAPS.—The prices of leather skate straps for fall have not been reduced and they are quoted at: $1.60 per doz. pairs in sizes 19 to 21 inch; $1.90, 24 inch; $2.20, 27 to 29 inch.

Drills and Sprayers Higher For Spring

London, Ont.

CULTIVATORS, SPRAYERS AND DRILLS.—New higher prices are out for spring booking on the Eureka line of seed drills, cultivators and sprayers, the advances ranging from 5 to 25 per cent. New prices are as follows:

Garden Seed Drill No. 1, $11.25; Combination Seeder and Cultivator, No. 2, $13.75 each; Cultivator, No. 4, $5.50 each; Cultivator No. 8, $6.75 each; Cultivator, No. 10, $7.25 each; Dry Powder Sprayers No. 108, $11 doz.; Bucket Pump, No. 109, $6 each; Compressed Air Sprayers, galvd., No. 110, $7.75 each; Compressed Air Sprayers, brass, No. 111, $10 each; Tin Well Sprayers, No. 112, $6.75 doz.; Glass Jar Sprayers, No. 114, $12 doz.; Tin Continuous Sprayers, No. 115, $12 doz.; Galvanized Continuous Sprayers, No. 116, $12.50 doz.; Eureka Cyclone Grass Seeders, $22 doz.

Stove Boards; Higher Prices

London, Ont.

STOVE BOARDS.—Higher prices are out on stove boards and the wood lined are now selling at 10 per cent. above list.

Nails in Demand, But Are Scarce

London, Ont.

NAILS.—There is a continued good demand for nails but the supply keeps scarce and jobbers are behind on their orders. Prices are unchanged and are, for wire, $6.25 base; cut, $7.50.

Star Skates Sell 30% Off List

London, Ont.

SKATES.—Fall orders for skates are now being shipped out and the Star skate is selling at 30 per cent. off list.

Silverware Sells Well; Prices Are Unchanged

London, Ont.

SILVERWARE.—There have been good sales of 1847 Rogers and Community ware plated goods, and the demand is keeping up and stocks are low. A good fall trade is expected in these goods and no changes in price are announced.

Lanterns Having Ready Sale

London, Ont.

LANTERNS.—A good demand is being experienced for various styles of lanterns and long and short globes are both

being quoted in the plain tin at $15 a dozen.

Good Demand For Tie-out Chains

London, Ont.

TIE-OUT CHAINS. — These lines have been having a good sale and prices are as follows:

	Size 1/0	2/0
20 feet, doz.	16 50	17 00
30 feet, doz.	23 00	26 00
40 feet, doz.	30 00	33 00
50 feet, doz.	37 00	41 50

Less 20%.

WINNIPEG MARKETS

WINNIPEG, Sept. 1—Business in the hardware trade continues to be exceptionally good for this season of the year. If goods can be secured a big fall trade is anticipated. Many prices on hardware commodities which have been firm for some little time have given way to higher ones this week. A greater number of hardware items have advanced in price during the past few days than there has been for months. Nearly all lines of builders' hardware have been marked with higher prices. Higher prices are coming through on all enameled ware, sheet iron ware, galvanized ware, etc. Cut and wire nails are still scarce and therefore no decline in price is looked forward to. The stove trade continues to be very active and the manufacturers are finding it hard to fill orders, due to shortage of material, and prices are bound to be raised on account of the higher costs to the manufacturer for brick linings, coke, pig iron, etc. Steel products are still in big demand with little or no supplies coming in, and it does not look as if there will be any decline in prices for some time. The outlook is still bad for Canada plate and nothing but a famine is expected this fall for this particular line. The market at the present time is entirely cleaned up.

Among the commodities on which higher prices are given are: Handled axes, cross-cut saws, hand saws, wood saws, rules, grindstones, fixtures, lock sets, store door handles, thumb latches, barn door latches, hat and coat hooks, screw pulleys, awning pulleys, tinners' rivets, plow pulleys, foot scrapers, coil chain, well wheels, sad irons, boiler stands and certain lines of cutlery.

Unable to Fill Stove Pipe Orders

Winnipeg.

STOVE PIPES.—On account of the present famine in Canada plate it will be impossible to take care of the demands of the present season for stove pipes. There has been an excessive call from all parts of the country and manufacturers are putting forth every effort toward filling orders. There is a limit to the amount of Canada plates that can be secured, and some manufacturers are cutting up large sheets to make into stock, even at a loss. Prices are bound to hold steady and are very liable to advance.

Nails Very Scarce; Prices Remain Firm

Winnipeg.

NAILS.—Only very small quantities of either cut or wire nails can be procured by the jobbers from the mills. Prices remain firm in view of the fact that production is so small at the present time. There has been no change during the week on either cut or wire nails, cut nails selling at $7.65 per keg and wire nails at $7 per keg f.o.b. Winnipeg.

More Money Charged For Buck Saws

Winnipeg.

BUCK SAWS.—An advance of price is registered on buck saws. The new price is apprximately 10 per cent. higher. The following prices are quoted. Nos. 1 and 2, 45 per cent. advance on the list.

Nests of Saws Advance Ten Per Cent.

Winnipeg.

NESTS OF SAWS. — New revised prices have been placed on nests of saws and are approximately 10 per cent. higher. The new quotations received this week are: No. 117, 25 per cent. advance on list price; No. 23, 25 per cent.

Increased Prices on Compass Saws

Winnipeg.

COMPASS SAWS.—An advance has been made in the prices of compass saws and they vary from 10 to 15 per cent. higher. The following are this week's quotations:

No. 108 x 12 in., $8 per dozen; 14 in., $8.40; 16 in., $8.80.
No. 2 x 12 in., $10.80 per dozen; 14 in., $11.20; 16 in., $11.80.
No. 25 x 12 in., 25% advance; 14 in., 25%; 16 in., 25%.
No. 19 x 12 in., 25% advance; 14 in., 25%; 16 in., 25%.

Grindstone Fixtures Advanced in Price

Winnipeg.

GRINDSTONE FIXTURES. — Grindstone fixtures have advanced approximately 10 per cent. in price and they are in fairly good demand. Fifteen inch are quoted at $11.20 per doz., and 17 inch at $11.90. No. 4 ball bearing are priced at $26.25 per doz.

Big Demand For Fire Arms and Ammunition

Winnipeg.

FIREARMS AND AMMUNITION.—There has never been greater demands than at the present time for guns and ammunition. Regardless of the higher prices, plus the heavy tax imposed by the budget, there seems to be a bountiful request for these goods. Prices are holding very firm and no reductions have been made on any of the standard or special lines.

Rope Demand Good and Prices Firm

Winnipeg.

ROPE.—There is still a good demand for all kinds of rope without any change in price. The demand for binder twine has decreased as the season is well under way. Prices remain unchanged and are to be found on current market quotation pages.

Screw Pulleys Advance Ten Per Cent.

Winnipeg.

SCREW PULLEYS.—Many lines of builders' hardware have advanced this week, due to the higher cost of raw material. The following prices are quoted:

No. 45 x 1 in., 85c per dozen; 1¼ in., 90c; 1½ in., $1.10; 1¾ in., $1.30; 2 in., $1.65; 2¼ in., $2.10; 2½ in., $2.25; 3 in., $3.45.
No. 44 x 1½ in., $2.10 per dozen; 2 in., $2.45.
No. 36 x ½ in., $1.15 per dozen; ¾ in., $1.50; 1 in., $1.95.

Awning Pulleys Also Up 10%

Winnipeg.

AWNING PULLEYS.—Awning pulleys have also been advanced in price this week and are quoted as follows:

Japanned

No. 74 x ¾ in., $1.05; 1 in., $1.15; 1¼ in., $1.40; 1½ in., $1.75; 1¾ in., $2.40; 2 in., $3.20.
No. 174 x ¾ in., $1.40; 1 in., $1.75; 1¼ in., $2.25; 1½ in., $3.20; 1¾ in., $4.50; 2 in., $6.95.
No. 76 x ¾ in., $1.45; 1 in., $1.75; 1¼ in., $2.10; 1½ in., $2.95; 1¾ in., $4.15.
No. 75 x 2 in., $3.35; 2½ in., $4.65; 3 in., $6.40.
No. 77 x 2 in., $5.20; 2½ in., $6.95; 3 in., $9.35.

Galvanized

No. 173 x 1 in., $2.40; 1¼ in., $3.20; 1½ in., $4.50; 2 in., $9.00.
No. 176 x ¾ in., $2.25; 1 in., $2.70; 1¼ in., $3.15; 1½ in., $5.15; 1¾ in., $8.50; 2 in., $10.25.

Range Boiler Stands Again Revised Upwards

Winnipeg.

BOILER STANDS.—Prices are marked higher this week on range boiler stands and the demand is fair for the standard sizes. Following are this week's prices:

12 in., $3.00; 13 in., $3.15; 14 in., $3.25; 16 in., $3.50; 18 in., $4.00; 20 in., $4.50; 22 in., $5.00; 24 in., $5.50.

Turpentine Declines Fifty-five Cents Gallon

Winnipeg.

TURPENTINE.—There has been a decided reduction in the price of turpentine this week. It is quoted to-day at 55 cents lower than last week. There has been a good supply received during the past few days and the market being slightly flooded is probably the cause for the big reduction in price. This week's price is $2.90 per gallon in barrel lots.

Rivets' Lists Higher; Discounts Unchanged

Winnipeg.

RIVETS.—A new list of prices has been issued by the manufacturers on tinners' rivets but no change is made in the discount, which is 20 per cent. off the list prices. New list prices are as follows:

Black

8 oz., list 32c; 10 oz., list 36c; 12 oz., list 41c; 14 oz., list 45c; 1 lb., list 48c; 1¼ lb., list 54c; 1½ lb., list 62c; 1¾ lb., list 67c; 2 lb., list 72c; 2½ lb., list 83c; 3 lb., list 96c; 4 lb., list $1.20; 5 lb., list $1.30; 6 lb., list $1.50; 7 lb., list $1.75; 8 lb., list $2.00; 10 lb., list $2.20; 12 lb., list $2.64; 14 lb., list $3.08; 16 lb., list $3.52; 18 lb., list $3.78; 20 lb., list $4.20.

For tinned tinners' rivets use same list and discount plus 10 cehts per pound for tinning.

PITTSBURGH MARKETS

PITTSBURGH, Sept. 2. — Pig iron seems to have been advanced to a standstill, as the market is now very quiet, with almost no inquiry at all, and buyers very generally are saying positively that they will buy no iron except what they absolutely must have for immediate requirements. The furnaces, however, do not seem to have expected any large buying movement and thus, perhaps, are not greatly disappointed. The offerings have been light and some furnace interests state that in the recent movement they scaled down the inquiries in many cases, offering only half the tonnage inquired for. Since last report prices for Bessemer and basic grades have been established. As noted a week ago, last sales had been at $47 for Bessemer, and $46.50 for basic, f.o.b. valley furnaces. Sales of both grades have since been made at $48.50, and although the lots sold were small the transactions are regarded as establishing new market prices. Foundry remains quotable at $50, to which it jumped recently from $46.

The furnaces may be entirely right in their contention that pig iron is scarce and that production is likely to fall short of requirements, but the factor of buyers having no confidence in the market will certainly count for something, as that will move consumers to draw upon stocks and thus reduce the requirements. There is also the point that with many foundries activity has fallen off, new orders being scarce, and some of the high priced iron bought of late has been simply averaged with much lower priced iron previously bought, so that the cost of producing castings has been much less than it would be if nothing were used but iron bought at present prices.

Coke Steady

Connellsville coke has shown a remarkable indisposition to recede from its extremely fancy prices. There have been three adverse influences, a slight decline in coal prices, an improved car supply, resulting in Connellsville coke production increasing, and a greater disinclination on the part of furnaces to buy. For several weeks Connellsville furnace coke for spot shipment held at $18 to $18.50, while a week ago we reported the market at $17.50. In the past few days the market has been stronger, there being sales at $18 as well as at $17.50. One furnaceman reports buying coke at both prices in the same morning.

As to foundry coke, the quotable market remains at $19 to $19.50 for spot, the range that has obtained as the regular market for several weeks. There has been some change in quality, but that is all. At $19.50 one can get a fairly good coke now, while three or four weeks ago $19.50 coke was rather indifferent, and $19 coke was difficult to distinguish from ordinary furnace grade.

Semi-finished Steel

Several sales of sheet bars have just been made at $67.50, Pittsburgh, though the total tonnage bought did not amount to much. Previously the market was about $70, some sales having been made at that, and others at a shade below. A month ago the market was $75. The remarkable thing is not that sheet bars have declined, but that they have declined so little, for the circumstances are such as to show that the mills are yielding in prices very grudgingly. The majority of the producers are not willing, but anxious to sell sheet bars, whereas recently it was a great favor to sell sheet bars at $80 or $90. It should be noted also that billets have been sold freely, at least in the east, on the basis of $60, Pittsburgh, and before the war billets and sheet bars ran at approximately the same price. There is no material difference in the cost of manufacture, and for producers anxious to sell sheet bars to hold out for a $7.50 differential shows that they are in no very yielding mood. There is hardly any demand for sheet bars, as the sheet mills are fairly well covered, and consumers of sheets who would like to make conversion contracts, buying sheet bars and having them converted, cannot at this time find any mill willing to make the conversion, so there is no use buying the bars. Slabs are said to be held by mills at $65, but that is purely nominal as mills could not begin to pay the price. A few weeks ago a plate mill was in the market with a bid of $50 for slabs, but did not get any.

Finished Steel Holds Up

In face of a relatively light demand the independent mills hold up their prices, showing no disposition to recede to the level of the Steel Corporation prices, and many of them even tell customers that the prospects are of advancing prices. Few, if any, customers are convinced, there being too many indications that prices of commodities in general are in a receding mood, and that demand for steel is not going to be heavy until fundamental conditions improve. The mills evidently intend to squeeze as much profit out of the present situation, one of scarcity, as they can, and to reduce prices would be to jeopardize the business now in books There are cancellations as it is, and price declines would of course provoke more. As illustrating the temper of mills, recently a large independent interest sold several lots of plates, aggregating no large tonnage, at 3.25c, and has since put its price up to 3.50c, probably to "protect" the 3.25c business, though it is evident that 3.50c cannot be secured. In sheets some very fancy prices are going, as there is scarcely anything offered. The leading interest sold its second half tonnage months ago and on account of restricted operations it will require until some time in February to complete the business taken. The independents, as a rule, sold only for third quarter, but a recent count is said to show that the independents, on an average, are sold not only through November, but 41 per cent. into December, and thus it is exceptional for an independent to offer any sheets. Demand is light in point of tonnage, but is easily sufficient to support what market there is. Despite cancellations the mills are in strong position. Thus, while the automobile industry has cancelled a good bit of sheet business, one finds that the mills that for years have made a specialty of automobile finishes are very busy. The explanation appears to be that the automobile trade had gone to other mills to eke out supplies, taking almost anything down to common black, and when the trade found it needed less it simply cancelled the outside tonnage, so that at the reduced operation now promised for the automobile trade, say 60 to 70 per cent. of capacity, it will still keep its regular sources of sheet supply busy.

Shipping conditions at the steel mills continue to improve. There is much

more tonnage being moved than a month or two ago, but the distribution is still poor in that there are many embargoes. A mill may be shipping its output very comfortably, but at the same time some customers may be getting full supplies and others practically nothing. The mills as a whole reduced their stocks of steel slightly in August, while during July they were adding to stocks. In many cases mills are shipping considerable tonnages out of stock, but at the same time are adding nearly as much to stock, out of current production, the idea being to keep the steel relatively fresh.

More Co-operation Between Town and Country is Needed

Renfrew Mercury Believes that the Farmers' Co-operative Store with Its Proposed Fifty Million Dollar Turnover Jeopardizes the Livelihood of the Retail Merchants in the Smaller Towns.

(From The Renfrew Mercury)

THE important event of the week in South Renfrew was the visit of Mr. J. J. Morrison, the secretary of the United Farmers of Ontario. Mr. Morrison is a man of pleasant personality, a nice man to meet, and a thorough democrat. The "Mercury" has devoted a great deal of space to the U. F. O. picnics and particularly to Mr. Morrison, as we believe a great many of our readers are deeply interested in what he had to say.

Much that Mr. Morrison said was admirable, and the "Mercury" is in substantial agreement with a great many of his proposals and arguments looking towards a more democratic method of parliamentary representation. At the same time we feel that throughout the greater portion of his addresses Mr. Morrison made the mistake of assuming that every man's hand was against the farmer, and that therefore the farmer's hand should be against every man.

This is certainly not the case. As a matter of fact the working people of the towns and cities are feeling the pinch of conditions fully as much, if not more than the farmers to-day, and, while they may not feel like subscribing fully to the Farmers' platform, they are willing to go a good part of the way with any organization that will curtail the privileges of the big interests and make living conditions easier for them. But Mr. Morrison decries a People's Party, yet Hon. Mr. Drury, Hon. Mr. Smith, and other members of the Cabinet have openly advocated it.

We feel that in some instances if Mr. Morrison's arguments were followed out to their logical conclusion it would not be for the best interests of the country at large. Mr. Morrison deplores the depopulation of rural Ontario, and yet he must realize that hundreds of young men and women are drawn to Toronto every year by the large mail-order houses with their immense factories and warehouses employing thousands. Rather than discouraging this, is not the Farmers' Co-operative store, with its proposed fifty million dollar turnover, encouraging it at the expense of the smaller towns and villages? Is not the business of the province becoming centralized in Toronto? We are not pressing this point simply for the sake of argument, but because we feel that what is wanted is greater co-operation between the town and the country, and not a desire on the part of one to succeed at the expense of the other. In urging the farmers to send their money away to Toronto, Mr. Morrison is seriously interfering with the business and jeopardizing the livelihood of the retail merchants in the small towns that are a necessity and convenience to the farming community. If this movement to build up the city of Toronto is encouraged, eventually, although perhaps not immediately, towns like Renfrew will dwindle to mere villages or cross-roads, a condition which we feel no farmer is anxious to see brought about.

It is not desirable at this time to enter into a lengthy discussion of Mr. Morrison's addresses. At the same time we could not help feeling that they were very largely a class appeal, and not as broad as we had hoped they would be. We all realize that agriculture is the basic industry of the country and every man is glad to see it prosper, yet is any lasting good going to come to the country by setting up rural against urban communities, and sowing seeds of distrust of one another among the people? It is a mistake to take too seriously the jokes and jibes of the writers in the city press about the hayseeds and other things. They are often said in jest and who know and appreciate the sterling worth of the tillers of the soil of this Dominion.

Production and Shipments Improved

The Iron Age this week states: To an increasing extent the steel trade is taking account of factors that bear on the future course of demand and of prices. While some producers, long used to thinking in terms of a seller's market, talk of passing on the cost increment due to the 40 per cent. increase in most iron and steel freight rates, others dwell on the final effect on their own market of the changes going on in other industries.

With an unwieldy accumulation of unfilled orders still existing in most finished material lines, such cancellations as have come on automobile and shipyard account have not been a market factor. But there is the keenest interest throughout the market in any development bearing on the Steel Corporation's price policy for 1921 and railroad buying apparently is waiting for a cue.

The American Steel & Wire Co., whose wire nail price and that of independent makers have shown a wide spread, has put out a new card of nail extras as of Aug. 16, with no change of base. The new extras are more nearly in line with relative costs than the old—an adjustment which the independent wire companies made as far back as February. At Cleveland new wire nail prices represent the advance in freight rates from Pittsburgh to Cleveland, being 24c. per 100 pounds above the Pittsburgh base instead of 17c.

Similarly a new National Tube Co. card on oil country pipe, which is sold at delivered prices, shows advances to the extent of the increases in freight rates to the different zones. While independent producers' prices are $10 a ton above those of the Steel Corporation on oil country goods, an advance by the former is looked for, to cover the new freights.

The Chicago market, which particularly reflects the railroad situation, has been notably quiet apart from nuts and bolts and wire products. Here and there foundries in that district are curtailing operations and some of them will soon be in need of new orders. Railroad demand there has not yet developed in sufficient volume to offset the curtailment of automobile, tractor and allied work. Gauged by cancellations and suspended shipments, a number of Detroit automobile plants are operating at about 50 per cent. of capacity, while two of the largest are running full.

Production and shipments have improved in the leading steel-making centres, and Pittsburgh reports some reduction of mill stocks and nearly a complete clean-up of stored cars in railroad yards. This has caused a suspension of the Pennsylvania Railroad's embargo on shipments west of Pittsburgh from Aug. 22 to Aug. 26.

Eastern makers of blots, nuts, rivets and spikes have advanced prices about 7½ per cent. At Cleveland higher bolt and nut prices are considered likely also.

Are You Cashing in on Paint Sales?

One of Biggest Seasons in History of Trade Has Been that of 1920 —Will the Demand Continue and Will Profits Still Be Large?

Written for Hardware and Metal by A. H. ILLSEY.

WHO sells the most paint in town? Who's making the most profit? Perfectly logical questions, these, for the hardware merchant. Can you answer them to your own satisfaction? Are you the lucky merchant, or is your opposition?

The year 1920 will write its record with pride in so far as paint and varnish sales are concerned. Never, in the history of prepared paint selling, has more success been achieved, both in point of gallonage and in the totals registered on the sales records of the Canadian paint manufacturer. It has been a great year, truly. Has it been a great year for you, and if not is it possible still to cash in on this big profit-yielder?

THE VARNISH MAN'S LAMENT

By H. D. MAYNARD

What makes a varnish sweat,
Blotch, bloom, blister, bubble, and crawl,
And ofttimes run and sink away?
Why does it crimp and chip and drape?
When is it fat? How can it rust?
Are questions I'm asked almost every day.

And should a varnish pull,
Drag, silk, perish, rot or festoon,
Will it corduroy or even alligator?
Can it lap and scale and liver?
How does it sag? What makes it wrinkle,
Like the skin upon an over ripe tomato?

When is a varnish lousy,
Specky, foggy, seedy, ropy or smoky?
And does it sometimes pucker and flake?
How can it chill and pit and peel?
What makes it crack? And should it foam?
And it's curtains if I make just one mistake.

A survey of some phases of the situation should be interesting. When the year dawned it carried with it a very great element of uncertainty. Although a year had elapsed since the roar of guns had ceased in Europe there was unrest and evidence of unrest. And prices were still so high. Would the consumer buy paint at these high prices? Am I justified in buying a spring stock, or shall I wait for lower prices? Such were the questions asked, among many others. The average Canadian hardware dealer, it may be assumed, answered these questions for himself, even though ordering was deferred in some instances and placed orders for his average requirements. His confidence, where so placed and exercised, was justified as subsequent returns revealed; trade was so remarkably good that he cashed in generously. And if he exercised his initiative the chances are that he cashed in bigger than he had hoped for—much bigger.

Things That Helped

There were several outstanding reasons why hardware merchants should have reaped profits from the sale of paint and varnish, and the accessories that go with them.

For the past two seasons there has been a real effort to educate the public into the advantages of using these products. This had been arranged and conducted by a committee of paint and varnish manufacturers known as the "Save the Surface Committee." Their object was, in a nutshell, to popularize the use of paint and varnish all over Canada, and in doing this the adoption of a slogan that hits the nail on the head admirably, "Save the Surface and You Save All," has proven itself one of the best that has ever been applied to the popularizing of any commodity. The advantage of this to the hardware merchant rested in the fact that the public mind was prepared for the campaign which he, the dealer, could link with in a special sense, picking up the customer when in a frame of mind and desire that made actual selling possible.

The idea caught. It spread. Wise dealers linked up their own local publicity in a way that made a well-rounded and complete appeal, and in this way sales grew and stocks were reduced. Repeat orders had to be forwarded to the various warehouses, and until well into midsummer paint makers were busy, night and day, executing the special and regular orders received.

Great was the need for paint everywhere. Not only was outside protection needed; the interior of homes and offices, of halls and schools and public buildings, all needed, and many of them decidedly, the protective qualities imparted by paint and varnish. And so, following up the above-mentioned publicity, many cashed in big on their paint department.

There is Time Yet

Time was when the selling of prepared paint was thought possible, in an extensive way, only in the spring and summer months. That idea has long since been relegated to the scrap heap of "has-beens." With proper direction, the paint department can be made to more than "earn its salt" twelve months out of twelve. It is being done to-day in many parts of Canada and the expansion of a certain paint department in a Western Canada city, in point of late

Changing Conditions

including an additional 10,000 square feet of floor space and installation of new machinery, enable us to now give

Prompt Delivery on Muresco

DURING the past year, owing to a combination of conditions, including the difficulty of getting raw materials and an enormous demand for Muresco, we were obliged to ask the dealers to be patient with us in the matter of delivery.

We wish to express our appreciation of the support and patience extended to us by the hardware dealers of Canada and are pleased to announce that as a result of the addition of 10,000 square feet of floor space and the installation of additional machinery, combined with the easing up of the raw material situation, we are now in a position to fill all orders for Muresco promptly.

We strongly urge dealers to book for Fall and Spring as early as possible. Prices are guaranteed.

fall and winter sales, has been truly remarkable. What has been accomplished there can be accomplished elsewhere, and in the small town as well as in the city.

Fall sales of paint are dependent upon the initiative of the hardware merchant, to a very great extent. He has the best of arguments. The fall weather is usually clear and bright. Flies have had their "fling." The bats and the gnats are pretty well gone, and then, to cap it all, the winter winds and sleet and hard snow interspersed with rains play such havoc with unprotected surfaces that the arguments in favor of painting are most appropriate and timely. Backed up with judicious advertising in the local papers, the personal letter and the personal appeal will bring their own reward. But to attain these results the matter must be taken in hand early. It is not too soon to revise one's mailing lists and to get rid of the deadwood, for it is not profitable to be spending postage on John Smith, who has died, and so on. A good live mailing list pays, but an unrevised one does not—it wastes postage, stationery and time.

What of Prices?

Are prices likely to be re-adjusted this fall? A natural question. It is only possible, at present, to point out some of the difficulties. From these one may draw his conclusions.

Within the past few weeks there has been a steady lowering of the linseed oil basis. Fully fifty cents per gallon was lopped from the price within thirty days. And some expect that the price will be maintained considerably below the two dollar mark. Turpentine, too, has declined materially. Pig lead has been held without change, however, and there has been a steady maintenance of the basis on many other lines entering into paint manufacture.

One of the greatest worries the paint maker has to-day is that of obtaining supplies. Shipments are slow even when the material can be secured, but one point stands out prominently within recent weeks and months, and that is the difficulty of obtaining all the raw materials required to manufacture a given finished product. With only part of the required material in hand, it is impossible to adopt and use substitutes and there has been an increasing complaint on the part of manufacturers in this regard within the past three or four weeks. While one or several important raw materials are available, one or several others might be unobtainable.

Stocks, say the paint men, have been quickly liquidated. This means that, while supplies are abundant enough to meet regular needs, there is not a great surplus.

The container situation has developed into prominence within a short while past. Steel and tinplates are very scarce and the added demands of the canners for tin cans have seriously taxed the can makers' facilities. Everyone is crying for cans and on all sides reports coincide regarding scarcity.

Demands will likely continue heavy. Is it possible to overtake the havoc wrought by five years' neglect in one year or two? The deferring of paint and varnishing to a large extent during the war created a condition that cannot be overtaken in a hurry. Painting must be done and there is therefore likely to be so great a demand for it as to absorb large quantities of material for a long time to come. Railway equipment, houses, factories, bridges, public buildings, vessels and steamers, and a multitude of things require this protection regularly. Are prices likely to decline greatly? The law of supply and demand has been brought into prominence greatly and in a general way has worked out as expected. As long as factories are working overtime to supply the paint and varnish needs of the country, and under the somewhat awkward conditions above recited one may best judge for himself.

The Brush Department

Canada Has Best Grade Brushes

Canadian Manufacturers Now Produce Brushes Which Are Not Only the Equal of Imported Goods But Brush Exports from Canada Are on the Increase While Imports Fall Off.

CANADA takes second place to no country in the making of brushes. Obviously this claim refers to quality rather than to quantity. But even as to quantity it may surprise many to know that production of brushes and brooms in Canada is on a very large scale. While the industry has been long established in this country imported goods have had a big sale, the Canadian article having had to meet competition based on the fictitious superiority of imported goods. In some industries the war revealed Canadian potentialities, with the result that better articles have been produced. In the brush industry the quality of imported articles was equalled in Canada before the war but the war brought the fact home to the people.

Prior to the war Canada was importing brushes and brooms to the value of practically $700,000 a year. In 1914 the imports were $691,215. The following year they dropped to $409,932 and in 1916 to $365,994. In 1917 they were up again to $577,068 and for the year ending March 30, 1918, they had increased to $670,623. Figures for the month of April, 1920, show imports of paint and varnish brushes from the United Kingdom valued at $310 and from the United States to the value of $1,826. There were no imports of these brushes from Japan for April, 1920. Canada's total brush imports for the month were as follows:

	1919	1920
From United Kingdom	$ 3,266	5,893
" United States	26,611	45,710
" Other Countries	12,339	13,725

Canada's exports of brushes show a much larger increase over last year than do the imports, which is a favorable sign indicating that the Canadian product is finding its way into foreign markets in increasing quantity. Figures of total exports of all brushes for the month of April are as follows:

	1919	1920
To United Kingdom.....	$284	3,796
To Australia	172	2,255
British South Africa		1,602
Newfoundland		902
Other Countries	1,058	23,088
Total	$1.557	31,643

These figures showing the large increase in exports of Canadian-made brushes in 1920 as compared with 1919 confirm the fact that the Canadian product is now not only the equal of "imported" goods in our own market but is working its way into the trade of other countries to compete with their domestic products which formerly were looked upon as being of the highest quality to be had in Canada.

Canadian Quotations in New York Funds Cause Indignation in the British West Indies

The Canadian Trade Commissioner in the British West Indies has received complaints from a number of firms in different islands of the British West Indies to the effect that Canadian business firms are demanding payment of

BOECKH'S

Steel-Grip Rubber Set Flat Paint

Boeckh's are those superior made paint brushes which improve painting and give general service with complete satisfaction to their users.

Each brush is made to fulfill all the requirements of an ideal paint brush. The bristles are firmly held in a rubber setting and cannot possibly come out. To give additional security and durability the steel-grip feature is added.

The long, durable bristles give splendid wear and save breaking in new brushes. Remember the wild boar's head in the Boeckh trade-mark.

Boeckh's Paint Brushes have so often proved their superiority to the public in general that it is now a case of not "What brushes will I buy?" but, "Where can I get Boeckh's?"

Every Brush Guaranteed

The Boeckh Company, Ltd.

Toronto, Canada

Established 1856

The bristles can't come out.

If interested tear out this page and place with letters to be answered.

their accounts in New York funds. They are highly indignant and express the opinion that in view of the Preferential Trade Agreement between Canada and the British West Indies the Canadian exporters to the British West Indies should make quotations in Canadian currency.

One large importing firm in Barbadoes said that after giving a large order he found that payment was demanded in New York funds. He immediately cancelled the order and placed it with a British firm which gave him the benefit of the English exchange in remitting. It is pointed out that the tariff preference is given to England as well as Canada and the English do not ask for quotations in United States funds.

Another complaint coming from the British West Indies is that certain Canadian firms when written to regarding business refer the British West India inquiries to their agents in New York city. They say that if Canadian firms propose to do business through New York houses, they may as well deal directly with New York themselves.

Canadian Gypsum for Cuba

Major H. A. Chisholm, Canadian Government Trade Commissioner in Havana, Cuba, writes as follows:—

"If Canada manufactured sufficient gypsum plaster the Cuban market could consume many times the quantity imported from Canada at the present time, which amounts to some 2,000 or 3,000 barrels a month. It appears that a good deal of the building plaster imported into Cuba from the United States is manufactured from gypsum mined in Canada. I should think that Canada has a good opportunity to build up a new industry in the manufacture of gypsum building plaster for Latin-American countries."

How Hardwaremen Advertise Paints--No. 23

THE protective value of paint is again emphasized in this ad. by Hendershot Hardware, Mt. Forest, Ont., which states that what clothing is to the man, paint is to the property. Unprotected houses and barns, wagons and machinery cannot resist exposure to sun, wind, frost and rair it is stated. A point is made of the fact that rust and decay cost more than paint and varnish. This appeal is particularly effective at this time of the year when farm implements will be put away for another season. A coat of paint will help to preserve their usefulness for many years. Special appeals are directed for painting around the farm and inside the home, in this ad.

Protect Your Home

What clothing is to man, paint is to property. Unprotected houses and barns, wagons and machinery cannot resist exposure to sun, wind, frost and rain. Rust and decay cost more than paint and varnish—that's why the use of Good Paint is wise economy.

SHERWIN-WILLIAMS PAINTS and VARNISHES

AROUND THE FARM

Sherwin-Williams Paint (Prepared) SWP for the farmhouse. Covers most, looks best, wears longest. Ask for a color card—48 attractive shades.

S-W Barn Red—a rich durable red that spreads easily and covers well over rough lumber

S-W Wagon and Implement Paint—protects the wood and metal of wagons, farm machinery and implements and tools, from rust and decay. For Buggies use S-W Buggy Paint.

S-W Buggy Paint—Nine beautiful colors, for porch furniture, boats, flower-pots, swings, garden implements, etc.

INSIDE THE HOME

S-W Brighten-Up Finishes include a paint, varnish, stain or enamel for every household use.

S-W Family Paint, 25 attractive colors. For cupboards, tables chairs, etc

S-W Inside Floor Paint quick-drying and durable. 10 colors.

S-W Flat-tone—a durabe oil-paint for the artistic and sanitary decoration of interior walls and ceilings. It is made in 24 beautiful shades that dry with a soft velvety effect. Can be washed without injury.

FINISH AND RENEW FLOORS WITH FLOGLAZE

NEGLECT DESTROYS

Neglect leaves porch and veranda floors open to the attacks of wind, sun, rain, snow and countless foot-steps. No other surface receives the same amount of wear and abuse as a veranda or porch floor.

FLOGLAZE PROTECTS

No other surface or floor needs the same amount of protection. Floglaze for floors protects, preserves and maintains a hard wearing, glossy appearance, that makes the floor a surface to be proud of. Can also be used on interior floors.

HENDERSHOT HARDWARE

The Luxeberry Painter Says:

"When I see nice interiors spoiled with a poor or unsuitable finish, I am reminded of the old saying: 'You can't make a silk purse from a pig's ear.' I always use Berry Brothers' Varnishes, Stains and Enamels because they are uniformly fine and produce interiors that I am proud to refer to as my work."

This is the verdict of all discriminating varnish buyers and is why "Berry" brands sell so readily.

Weekly Paint Markets

MONTREAL

MONTREAL, Sept. 2.—The only change in the paint market this week is a slight reduction in linseed oil values amounting to 5 cents a gallon. This reduction will principally affect future shipments. The prospects for fall trade are very good. The uses for varnishes are ever increasing. Prices in general hold firm with very little change.

Outlook For Fall Paint Market Good

Montreal.

PAINTS.—The paint market is unchanged this week and manufacturers predict that present prices will hold. The outlook for the fall is very good and Hardware and Metal is informed that a big demand for paints for the fall and spring is expected. The prosperous season that the country has just experienced will, without doubt, be reflected on the paint market.

Turpentine Prices Remain Unchanged

Montreal.

TURPENTINE. — The prospect for turpentine is very good at the opening of the fall season. The prices are unchanged this week and the market is very firm.

Turpentine—	Imp. Gal.
Single barrels	2 60
Small lots	2 70
(Packages extra.)	

No Changes Reported on Dry Colors

Montreal.

DRY COLOR.—The prices for dry color hold firm this week and no change is apparent for the near future. The demand for the fall is very good and prospects are bright.

Varnish Requirements Steadily Increasing

Montreal.

VARNISHES AND SHELLAC.—The varnish market together with the paint market is brightening up for fall business. Prices remain unchanged. Hardware and Metal is informed by one of the larger dealers in the city that varnishes are gradually taking the place of shellac and that it would not be surprising in the future to find shellac almost out of date. At the same time there are purposes for which shellac can be alone used but this is only on a very small scale. The indications are that varnishes will gradually take over the requirements of shellac, which will mean larger demands for varnish.

Putty Quotations Below; Are Still Accurate

Montreal.

PUTTY.—There is no change in the price of putty this week. The market is firm and quotations given below hold steadily.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Linseed Oil Market Is Slightly Lower

Montreal.

LINSEED OIL.—There is an easier feeling on the market this week for linseed oil. Quotations are about 5 cents lower; $1.80 per gallon is quoted for linseed oil for future shipments. Bottled stocks are quoted at $1.85. The market is decidedly easier in this line, and Hardware and Metal is given to understand by some of the big dealers that a gradual decline in price may be expected until normal is finally reached. This change will not be sudden. It may fluctuate for some time but the feeling is that the market is pointing towards normal prices again.

Raw—	Imp. Gal.
1 to 4 barrels	1 80 — 1 85
3 to 4 barrels	....
Boiled—	
1 to 4 barrels	1 82½ — 1 87½
3 to 4 barrels	....

NOTE—Owing to fluctuations seed markets jobbers, generally, are not quoting.

TORONTO

TORONTO, Sept. 4.—There appears to be a weaker tendency on the part of turpentine and linseed oils, though stocks on hand are small in both cases. Lower prices are quoted but dealers do not see any justification for it and belief is expressed that both will be higher.

There are few if any price changes in the paint market and white lead and putty are ruling firm, as are also dry colors and prepared paints.

Glass is firm and unchanged and the expectation is common that it will not be any cheaper this fall.

The demand for paint products though less is still good and the trade are satisfied with past results and look with confidence to the balance of the season.

White Lead in Oil Remains Unchanged

Toronto.

WHITE LEAD.—No change in white lead in oil has occurred and prices are unchanged.

Pure in ton lots is $20.35 per 100 pounds with 35 cents per 100 pounds added for less quantities.

Putty Sales Steady; Prices Firm

Toronto.

PUTTY.—The demand though not large is being maintained and prices are firm and steady. Standard is quoted at $8.55 per 100 pounds in 25 pound irons.

Prepared Paints in Good Demand

Toronto.

PREPARED PAINTS AND VARNISHES. — The past month is always regarded as a dull or slack one in jobbing circles, but this year it has been fairly busy and amount of sales has been good. No change of prices on ready-mixed paints or varnishes has taken place and none is looked for although the opinion is expressed that prices will remain firm and market looks as if it would stiffen. General overhead expenses keep on increasing and a lessening in the cost of some ingredients has been counterbalanced by other costs.

Shellac Prices Are Inclined to be Firm

Toronto.

SHELLACS. — The demand for these has been good and prices are inclined to be a little easier. Orange is selling at $8.30 in gallon jugs; other prices are: 1-2 gallon, $8.40; quarts, $8.60; pints, $8.85 per gallon, half pints $7.45 per dozen; gills $4.35 dozen and midgets $2.05 dozen.

Paint Brush Sales Good and Prices Firm

Toronto.

PAINT BRUSHES. — Business continues good in the various lines of paint brushes and though travellers have been

More Business from the Home

For all Glidden Dealers. *And for you* if you carry Glidden Products. With such a leader as Jap-a-lac Household Finishes, including everything the housewife needs and with the complete line of Glidden Green Label Varnishes you will have quality first and then the kind of reputation that keeps the profitable sales coming thick and fast.

Once started Glidden advertising will hold the public's attention. You quickly have a business asset when you associate your store with Glidden. This is a good time to act—Glidden business is *all the year round* business.

THE GLIDDEN COMPANY, Limited

Toronto, Ontario

Branches at Montreal and Winnipeg

If interested tear out this page and place with letters to be answered.

off the road during the past month the volume of sales through orders sent in through the mail has been surprisingly large. Prices are firm and manufacturers say they can see no signs yet of brushes becoming any cheaper although they may not advance much more.

While bristles from Russia and Poland have of coourse been off the market, the black China bristle has been available in fair quantities but it has been the high cost of lumber which is responsible as much as anything probably for recent increases in the price of paint brushes, as lumber which used to cost manufacturers forty dollars a thousand now costs them about one hundred and thirty.

No Indications of Cheaper Glass

Toronto.

PLATE AND WINDOW GLASS. — No change is recorded in prices, though there is an expectation that the higher freight rates will have the effect of an increase on glass before very long.

Jobbers say there are indications of a possible shortage in the near future, as the factories do not appear to be catching up to their orders and have been delayed over material.

There is said to be little chance of any Belgian glass being available as their output is being taken up in Europe and the English market is using all they can get of the Belgian supply. The demand in local markets has been good and is likely to continue as there is a lot of building which has been held back. Present discounts are 15 per cent. box lots.

Linseed Oil Has Weaker Tendency

Toronto.

LINSEED OIL.—Very little oil is said to be available just now and the market is firm. Untl the new flaxseed crop is marketed prices on seed will not be settled and forecasts as to future prices or tendencies are easier when it is known what the price of seed is going to be and the extent of the crop.

Present quotations are apt to vary but the following are general prices asked:

Linseed Oil—	Raw
1 to 2 barrels, gal.	1 90
3 to 5 barrels, gal.	1 89
10 barrels and over, gal.	1 87
	Boiled.
1 to 2 barrels, gal.	1 93
3 to 5 barrels, gal.	1 92
10 barrels and over, gal.	1 90

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market; less than barrel lots are 15c per gal. higher than single barrel price.

Turpentine Shows Decline; Stocks Small

Toronto.

TURPENTINE. — A decline from last week of ten cents per gallon is shown on turpentine though stocks on hand are small and little could be had on local markets. Further supplies are expected. Exchange rates affect turpentine and they have been easier of late.

1 bbl. lots, per gal.	2 50
2 to 4 barrels, per gal.	2 49
5 gals. lots, per gal.	2 65

Antimony Mines at Lake George

A correspondent at St. John, N.B., writes that an expenditure of $750,000 in the development of the antimony mines at Lake George, about twenty miles from Fredericton, N.B., has been forecast by the president of the North American Antimony and Smelting Co., Ltd. The president estimated that shipments of the ore would be commenced early in the coming autumn.

Making Profit from Credit Customers

This Article is Useful to Hardwaremen—It Suggests Systems for Enabling a Closer Check to be Kept on Credit Business

SOME good points in how to deal with credit accounts, are brought out by C. C. Miesen, in the "National." "I know," he says, "that most dealers prefer to do a strictly cash business, but there are a great many who find it necessary to cater to a charge trade. A necessary evil, they call it, which must be permitted because of its trade-holding value.

"The dealer who does a charge business is threatened constantly with the grave danger of allowing to certain customers a greater amount of credit than it is possible to collect, or at least, to collect easily.

"It did not take me long to discover that safe credit merchandising depends largely on keeping records that tell from day to day how much credit is granted. Our books always are in balance and it is a simple matter to glance at them to find out whether a customer has reached his predetermined credit limit which always is listed at the top of his account.

The foundation of our system really is our recapitulation sheet. All daily transaction of every nature are accumulated on it—cash sales, charge sales, money received on account, invoices received, checks paid, bank deposits, in fact all the figures of the day's business are listed and totaled before posting to the various accounts in the ledger.

"In the extreme left hand column amounts from all the charge sale slips are first listed and totaled. In the next all items on the charge sale slips are likewise listed and totaled.

"When all the other entries have been made the totals of the various columns are posted to accounts of the general ledger according to instructions printed at the head of each column.

"Thus it will be seen that the system is a complete double entry set of books, that the re-cap sheet acts as a distributing journal.

"Postings to the customer's accounts are made from the sales slips.

"One leaf in the ledger binder, which is arranged alphabetically, is devoted to each customer's account. When the account becomes active a statement is addressed and placed in front of the ledger leaf where it remains all through the month. It is posted at the same time as the ledger from the sales slips which are always arranged alphabetically the first thing each morning. After the posting is completed the difference between the total debits and credits is compared with the difference of the totals of the debit and credit posting media, to see if the work has been done correctly.

"As the postings are made to the customers' ledger daily and the balance on every account is extended at every posting, we can tell instantly just how every account stands.

"In the general ledger is listed the amount of merchandise bought, the amount of merchandise sold; accounts payable; accounts receivable; bills payable; bills receivable; express; interest; proprietor's personal account; investment account; donation account; office supplies; light and heat; rent; salaries; profit and loss account; and other expense accounts. These accounts give such complete information about the business that it is possible at any time to draw off a detailed financial statement which is valuable in dealings at the bank and in making out the income tax report.

"From my experience extending over quite a period, I am convinced that one of the effective ways to promote business is to offer credit wisely and judiciously. But this cannot be done unless the dealer has constant and accurate knowledge about every account on his books through figures."

PAINT SALESMAN WANTED — FOR NEW Brunswick Territory, by one of the largest manufacturers. State age, experience and present position. Box 207, Hardware and Metal.

Ramsay's for Results

"The Right Paint to Paint Right"

The profits lie in continued sales. It's easy to make one-time sales. But collecting the multiplied effect of selling the right goods comes from the sale of Ramsay's Paints and Varnishes. The satisfied users come back to you for more and for other products, besides.

There is a Ramsay Product for every use—sell it to customers for the car, the garage, the house, inside and out, and many other purposes. Remember Agate Varnish Stains, made from the well-known Agate Floor Varnish, in eight beautiful shades, also natural.

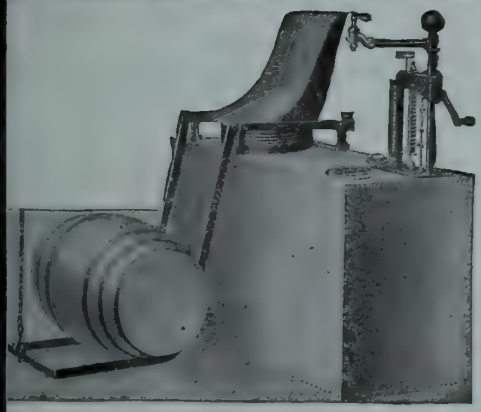
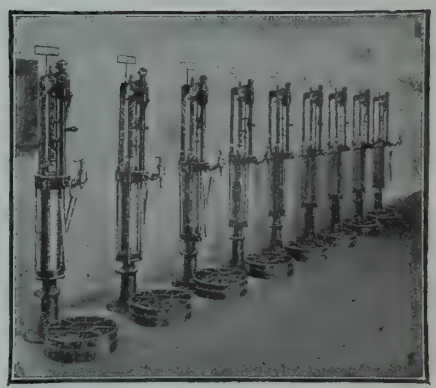
Paint Sales That Pay a Profit



One unit or as many as you want, in a compact row

You want a profit on every sale, and you should have it. But with the present high cost of paint oils you stand a big chance of losing your profits, unless your methods of handling are systematic and free from loss of time, labor and oils.



Pumps on Sales room Floor. Tanks in basement where ver convenient.

BOWSER ESTABLISHED 1885

Paint Oil Storage Systems

prevent paint oil losses. The pumps measure accurate quantities: no over measure, no leakage, no spilling, or evaporation. Everything is exact, systematic and saving. The sooner you install a Bowser System the sooner you will begin to reap the profits from proper storage equipment.

Have You Met Tommy and Betsy?

SURELY you know this charming couple. If you don't recognize them at first sight, look again. You've seen them in one of the leading magazines. Perhaps it was in Everywoman's World, MacLean's, Canadian Courier, Toronto Saturday Night, American, Cosmopolitan, Pictorial Review, Woman's Home Companion, Good Housekeeping, or House Beautiful.

Their pictures have been appearing to the number of some six million copies from month to month for more than a year. Look for them! Each time they tell a different story — a different domestic drama. They are always making their home additionally happy by doing over an old piece of furniture with "61" Floor Varnish; made in eight lustrous, semi-transparent wood-stain colors.

How about the Tommies and Betsies in your town — will they buy their "61" and other Pratt & Lambert Varnish Products of you?

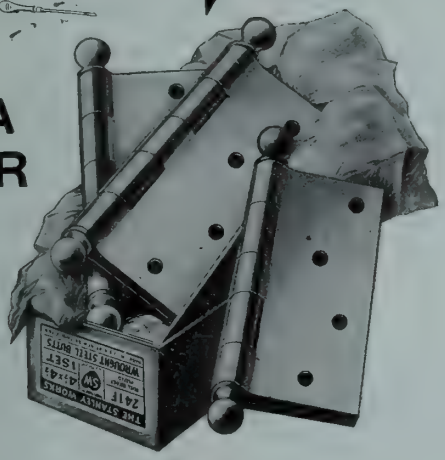
TO A DOOR



YOUR customers are looking for a solution to the problem of warping, bending, sagging doors. Why not let them know the remedy? Suggest the use of 3 STANLEY WORKS Butts to a Door.

THE STANLEY WORKS BUTTS

Come packed three in a box in addition to the regular packing of one pair to a box. Few are the contractors and carpenters entering your store who cannot be won over quickly to the "3 Butt" method of hanging a door.

The Third Butt holds the door in alignment. Your trade will be pleased with the satisfactory results they will obtain with the third butt, and you will increase your butt sales 50%.

We have a folder, R31, entitled "3 Butts to a Door." Let us send you a quantity imprinted with your name and address.

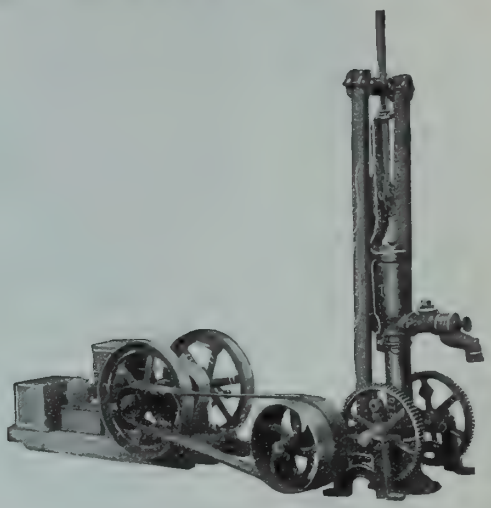
Beatty Bros. Limited Bulletin



A "Giant" for Heavy Pumping

When you want a Pump Jack to handle heavy work and stand up, day after day, you can bank on the "Giant."

It is unusually strong and substantial in every part, and has a great advantage in its patented design.

There is no shaft running through the centre of the Jack, so the pump standard can be placed on dead centre.

D. E. STATTERS.

Mr. D. E. Statters works under direction of Ontario branch in Northern Ontario. He calls on Hardware Trade and also handles BT stable equipment. He has met with great success in both lines. He is well known as an enthusiastic checker player.

There is, therefore, absolutely no side strain against the pump rod. The "Giant" exerts a direct vertical lift.

It has three strokes, 1⅛" drive shaft and four wide spread feet to take all the weight without strain on the standard.

It is made for use with big pump standards and to do heavy work.

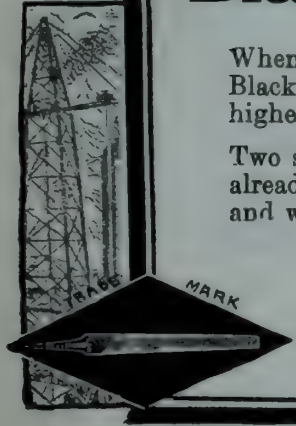
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

Stephens'

REGISTERED TRADE MARK

Celebrated Wa-Ko-Ver Stain

Wa-Ko-Ver beautifies all woodwork and literally wears like iron. Wherever there are worn floors and scratched woodwork you can safely recommend Wa-Ko-Ver Stain to restore its freshness. This reliable, trustworthy stain has long since won the confidence of consumers. It gives full value in service and creates consumer-satisfaction in the goods and confidence in the store that sells it.

This established reputation makes Wa-Ko-Ver Stain a pleasure to sell. A good display in your windows or on your counter reminds the housewife and keeps it moving.

How to Test Advertising

THE man who doubts the power of advertising belongs in the same class with the man who refuses to believe that the world is round simply because he can't get off somewhere at a distance and see its roundness for himself.

The merchant who fears to attempt advertising because he figures it as an "expense" is blind to his own interests. I personally know several men who, because they once tried advertising to the extent of a cheaply printed hand-bill and didn't find it necessary next morning to call on the police to keep the crowds of eager buyers from swamping their store, loudly and solemnly aver that "advertising doesn't pay."

Advertising *does* pay.

The most successful merchants are the merchants who believe most thoroughly in advertising and who practice their belief.

But advertising, in order to pay, has got to be *intelligent* advertising.

The day of hashed-over superlatives — "best goods," "lowest prices," "best stock in town," "greatest bargains ever heard of," and so on—has passed.

People have learned to distinguish the *truthful* advertiser from the blatant behind-the-times storekeeper who believes that, so long as *he* claims to have the best goods on earth, or under the earth, or within wireless distance of the earth, people will break their necks trying to get to his counters in the forefront of the crowd.

Put some *brains* into your advertising.

Don't let the office boy write your announcements in between his other duties.

Don't doubt the business-getting and business-building power of intelligent and informative publicity — and you will find that advertising *does* pay.

—*Jerome P. Fleishman.*

OWL
BABBITT METALS
A composition of pure virgin Metals with unusual wearing qualities. Always specify Owl Brand. Made in the West by
THE OWL METAL CO., LTD.
WINNIPEG, MAN.

MILBRADT LADDERS

are made in many styles and to fit all kinds of Shelving. They are made to order.

Write to J. H. Ashdown Hardware Co., Ltd., Winnipeg; Marshall-Wells Co. Ltd., Winnipeg; or direct for Catalogue and Prices.

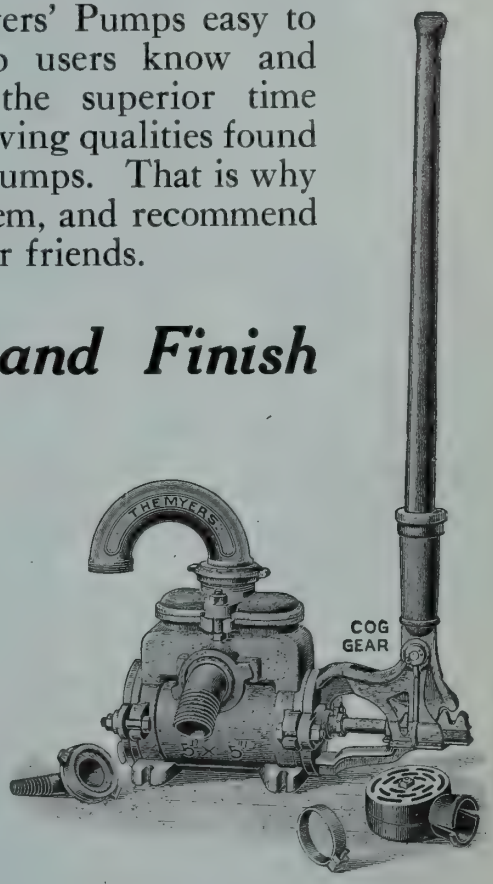
Myers' Force Pumps

Have Solved the Pump Problem

Myers' Cog Gear Double Acting Force Pump for filling Thresher Tanks, Washing Out Boilers, Irrigation Purposes, Pumping Water from Trenches, Shallow Wells, Cellars, Barnyards, etc., is an easy-working pump built for service. Dealers find Myers' Pumps easy to sell. Pump users know and appreciate the superior time and labor-saving qualities found in Myers' Pumps. That is why they buy them, and recommend them to their friends.



Materials, Workmanship and Finish

In these pumps are to be found the very best of materials, workmanship and finish; this combines to assure thorough satisfaction and long life to goods made under such conditions. Among the many advantageous features that this pump is noted for are: Compactness and strength for size and weight, large and direct waterways, ample valve capacity and easy operation enables the pump to throw an abundance of water with a minimum of labor. The cog gear head is reversible and can be used at either end.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

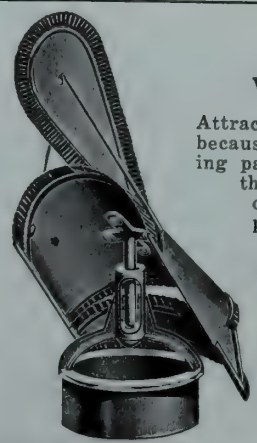
For Solidifying Sales and Preventing Lost Accounts

For solidifying sales, and preventing lost accounts by keeping the trade "lined up," a weekly message to the whole Canadian hardware trade through Hardware & Metal will prove productive and profitable.



O-Rib-O

Volcano Chimney Top

Attracts the customers and closes sales because the Deflector—the lower slanting part shown—receives wind through the sloped opening directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys. Sells readily for homes, stores, churches, factories and as a ventilator for barns and warehouses.

Barrett Roofings, Cements Industrial Paints etc.

THESE Barrett Products are widely advertised in farm and technical publications throughout every province. The demand created by this advertising, *plus* the requirements of thousands of users who have already proved the superiority of these products, means easy sales for dealers who are alive to the opportunity.

We can fill your orders promptly, if you send them *now*.

Everlastic "Rubber" Roofing

THIS is the biggest selling roll roofing on the Canadian market.

It is popular with users, because moderate price and long service mean sound economy.

It is popular with dealers, because quick sales and satisfied customers mean larger profits and more business.

Long years of manufacturing experience and the use of carefully selected materials insure the uniform high quality of Everlastic "Rubber" Roofing. It is *always* good.

Everlastic "Rubber" Roofing is made in three weights: light (1-ply), medium (2-ply) and heavy (3-ply), and put up in rolls containing 108 square feet. Nails and cement are packed with each roll.

Everlastic Liquid Roofing Cement

FOR renewing the life of old and worn-out felt and "rubber" roofing, Everlastic Liquid Roofing Cement is positively without an equal. It is easy to apply and forms a new wearing surface that is smooth, tough, waterproof and so durable that it makes the old roof good for several years of extra service.

Although Everlastic Liquid Roofing Cement is a comparatively new product, roof owners have been quick to recognize its value and it is a big seller everywhere.

If you want to save money for your customers you should sell them this remarkable Barrett Product.

Everlastic Liquid Roofing Cement comes ready for use in packages of various sizes, ranging from 1 pint cans to 40-gallon barrels.

The Barrett Trade-Mark stands for high quality products, moderate prices and fair dealing.

It pays to handle goods bearing the Barrett label.

Other Barrett Products are Creonoid (Fly Oil) Lice Destroyer and Cow Spray, Elastigum Plastic Patching Cement, Everjet Elastic Carbon Paint.

ST. JOHN, N.B. HALIFAX, N.S. SYDNEY, N.S.

MEAKINS BRUSHES

Profitable Sales

and repeat orders will reward the dealer who stocks Meakins famous Rubber Set Brushes. The "man on the street" knows that satisfaction and Meakins brushes are synonymous. He knows that the bristles will stay in; that these brushes can be used on delicate work, with the utmost confidence that the bristles will not adhere to the surface of the work. That Meakins Brushes are made from selected materials by skilled workmen.

Write now for particulars that will multiply your business.

Write for catalogue.

"McDougall" Well Pumps

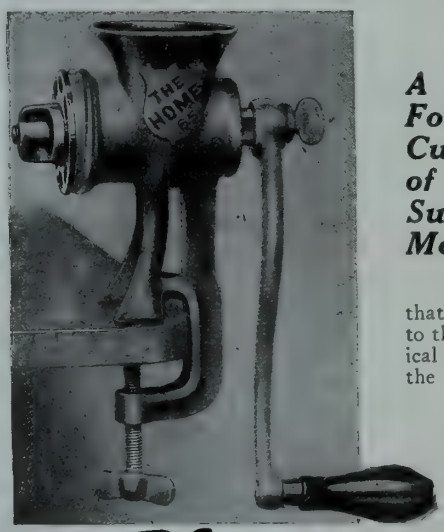
A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

Manufactured by

The R. McDougall Co., Ltd.
Galt, Canada



A Food-Cutter of Superior Merit

that sells easily to the most critical customer—the

Maxwell

"HOME 65"

QUICK—CLEAN—WATER-TIGHT

Open-end cylinder makes it easily cleaned.
Cuts any kind of Food.

Home 65: Family Style. Home 55: A Smaller Model
Made in Canada—Superior to any imported

CARTER'S

Carter's Genuine Dry Red Lead

A pure, uniform and economical paint and preservative for metal work, steam pipes, etc.

Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity.

Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for prices on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

The Carter White Lead Company of Canada Ltd., 91 Delorimier Ave., Montreal

Artistic Bath Room Fixtures

Beautiful Everlasting White Porcelain Enamel

ON SPECIAL IRON

Stronger than China, outwears all Imitation Paint Enamels or Celluloid finishes, at a price within the reach of all.

American Enamel Products Co.

CHICAGO, ILL.

For Low-Priced Cutlery

"ACME" BRAND, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

"ACME" fulfils the demand for low-priced satisfaction cutlery.

Our Canadian representative at Toronto will be pleased to show samples to you, or have his traveller call on you. Let us demonstrate, through a trial order, the excellent goods we furnish and their fast selling qualities.

Have you our new No. 5 Catalogue? Let us mail you one.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

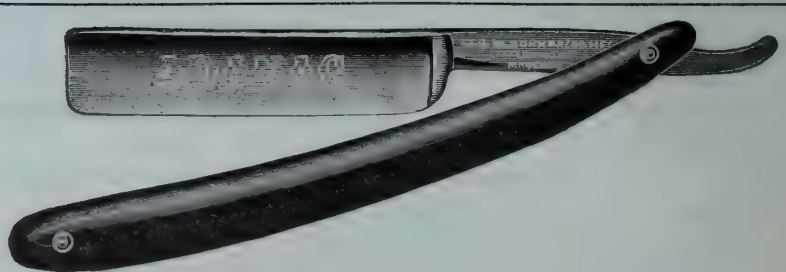
Price Doesn't Make a Razor



Men have paid as high as ten dollars for razors which were a keen disappointment.
And they have paid only two or three dollars for G. W. Korn's Razors which were a keen delight.
The difference is more in the **treatment**, than in the **steel**—anyone can buy good steel.
G. W. Korn's razors are made by **razor experts**, not "general cutlery makers."
A complete line with an established reputation.

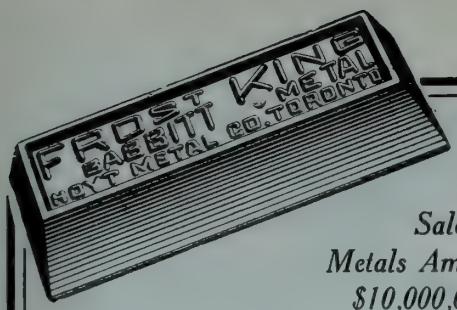
Canada Office: 140 McGill Street, Montreal



The Annual Sales of Hoyt Metals Amount to $10,000,000 !

Frost King

That Hoyt Metals are preferred by men of experience is well established by the enormous annual sales of these efficient metals. Frost King is popular with metal users everywhere and is well known for its high anti-friction quality, unequalled endurance, and always cool-running characteristics.

Hoyt Metal Company
Montreal TORONTO Winnipeg

"HERCULES" SASH CORD

Has a reputation in the Canadian market, thoroughly established for the last eighteen years.

Compares in quality with the best imported brands, but is considerably lower in price.

Tests made by Strength of Materials Laboratory (University of Toronto) prove our claims as to quality.

All wholesale hardware dealers carry Hercules Sash Cord.

Manufactured in Canada

"Alloyed under the Stanley Process"

for general service

LIONROYAL BABBITT

MADE IN CANADA

We warrant that no other Babbitt at the price will perform as well in so many different classes of bearings, and are ready to prove this in any case by trial installations in competition with any metal of its type.

The secret of its success is in the method of its alloying. It is produced under the Stanley Process, which is controlled exclusively by us throughout the Empire. Try it and be convinced.

MONTREAL

If interested tear out this page and place with letters to be answered.

DISSTON LEVELS

Disston Levels are made from specially treated hardwood stock—wood that has been scientifically cured in the Disston plant, so treated as to allow the least possible warp. It is admitted that Disston Levels cause less trouble from warping than any others.

The House of Disston has developed the most perfect level adjustment on the market. The turning of two small screws enables anyone to true up the bubble. This is a most simple arrangement to offset the almost inevitable slight variation due to heat, cold, dampness, etc.

Disston Levels are made as carefully and as expertly as Disston Saws, and are guaranteed right as are all Disston Brand products.

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

Think What It Means To Sell Valves With A 56 Years' Reputation

Fifty-six years ago the standard of valve value was definitely established by Jenkins Bros. Since then a host of inferior imitations have appeared on the market, but by strict adherence to the original high standard and by constantly striving to improve upon it Jenkins Bros. have still the undisputed lead in valves of merit—**guaranteed** for service by the Diamond Trade Mark cast on the body.

The more particular your valve customer may be the more confidently you may recommend the valve with the Diamond Trade Mark.

And the Diamond Trade-Marked Valve line is complete—a dependable valve for every purpose.

WHY DO YOU ADVERTISE

When You Are Behind In Deliveries?

THIS seems to be a very natural question, and the answer involves the discussion of a vital policy of this business—a policy that is fundamental.

If we were building a business for to-day our policy would vary from day to day with the temporary changes with which every business has to contend.

But we are building for the time to come and we hope that this business will become many times greater than it is to-day. Without the proper foundation it would undergo violent changes dependent upon temporary national, local or even imaginary conditions.

If we should permit ourselves to become inflated with self-confidence when business conditions are favorable, restricting our selling and advertising activities, and go down in the dumps when conditions are not so favorable, this business would not amount to any more than the existing conditions would make of it.

We say right now, without reservations, that we hope, regardless of how aggressive and efficient our manufacturing department may be, that it will never be able to catch up with our selling organization.

If our efforts should be halted in the middle of the road in times of liberal buying to wait on the manufacturing department, there might come a time when the manufacturing department would have to suspend operations while waiting on the sales organization.

With such a policy we would be running around in a circle, disorganizing one day and reorganizing the next.

The greater the demand for our product, the quicker the turnover for merchants; and the more frequent the turnovers, the larger is the volume of profit.

In this business advertising is a sales policy—the same as our policy of maintaining a sales organization—and we might as well consider the elimination of one as the other. Neither will be eliminated, as this business needs both if we are building for the future.

We hope the idea will never creep into this organization that there will be any let-up in aggressive methods, which might suggest that when business is good there is no occasion for work and when business is poor it is too hard to get.

We constantly have in mind that the American people are much more concerned in their own affairs than in ours, and if we should restrict our selling and advertising activities they will begin to forget us—and this would be our fault.

We are going ahead with the idea of increasing the present momentum in favor of our goods; and if conditions should turn face about, our dealers and ourselves will be in a better position to hurdle obstacles than if we originated a policy for each condition as it arose.

If interested tear out this page and place with letters to be answered.

"I forgot"

Two words which take oil profits from you. Two remedies

EVERY day men drive up to your store for hardware. Often their oil is low. But while you sell them the hardware they never think about the oil—and a few miles further on, they buy it *somewhere else.*

Why not sell them the oil they need at the time and also sell them a 15-gallon drum for their own garage? This business might just as well be yours as the dealer's "somewhere else."

Here are two ways to make sure that your customers are constantly reminded of their oil needs.

Keep your stock of Gargoyle Mobiloils in plain sight. Most automobile, truck, tractor and motorcycle owners know that the red Gargoyle means Correct Lubricating oils.

Hang our Chart of Recommendations in a conspicuous place on your wall. This assures customers that you have the oil for every make of automobile, truck, tractor or motorcycle.

The results from these two sales-helps will surprise you. Many dealers have found a marked increase in profits by using them.

GARGOYLE

Mobiloils

A grade for each type of motor

Imperial Oil Limited

Marketers of Gargoyle Mobiloils in Canada

BRANCHES IN ALL CITIES

Chart of Recommendations for AUTOMOBILES

(Abbreviated Edition)

How to Read the Chart

The Correct Grades of Gargoyle Mobiloil for engine lubrication are specified in the Chart below.

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

These recommendations cover all models of both passenger and commercial vehicles unless otherwise specified.

Where different grades of Gargoyle Mobiloils are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and onstitutes a scientific grade to Correct Automobile Lubrication.

If your car is not listed in this partial chart, consult the Chart of Recommendations at your dealer's, or send for booklet, "Correct Lubrication," which lists the Correct Grades for all cars.

DEALERS:

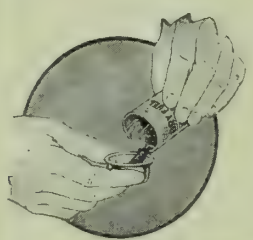
This year Motorists *must save* on their tires. Profit by this! Sell famous Adamson Vulcanizers—repair their own tubes and casings, permanently and *cheaply*.

Adamsons sell fast because everybody knows what they are: Easy to operate, Sure in their work, Use common gasoline, and cost least to buy and operate.

Write us for these Displays and other Adamson Dealer Helps—FREE

ADAMSON
VULCANIZERS

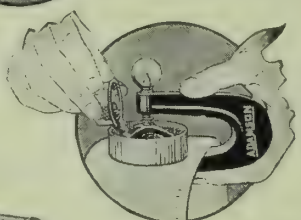
The Big Sellers for 1920-1921



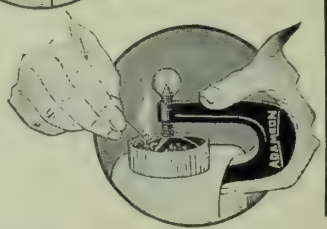
MODEL "E" 5-MINUTE VULCANIZER

It takes just five minutes—on the road or at home—to repair a tube puncture *permanently* with this light and handy Vulcanizer. Use Adamson Dry Fuel or common Gasoline.

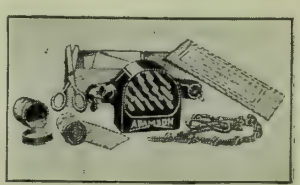
Empty a measure of Dry Fuel into the Model "E"—



—Touch a match and the Fuel burns with a hot glow—no flame. Gasoline can be used instead of Dry Fuel if desired.

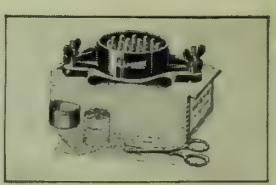


Complete outfit includes Vulcanizer, 12 Patches, can of Dry Fuel, Measuring Cup and Directions. Extra box of 12 Patches, 25¢; Extra can of Dry Fuel, 50¢. **$1.75**



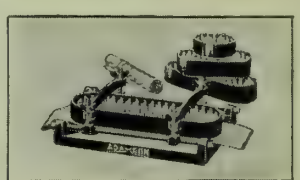
MODEL "U" **$4.00**

Complete outfit for repairing tubes and cases. Mends tread cuts; prevents water from getting into the fabric; keeps tires in condition; doubles the mileage.



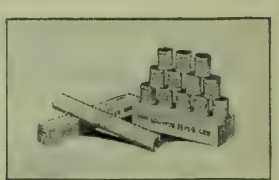
MODEL "T"

Complete outfit for repairing inner tubes only. **$3.00**



MODEL "S"

Complete outfit for private garages and repair shops. Mends tubes and casings. **$20.00**



ADAMSON REPAIR GUM

Essential for best results with any portable vulcanizer. Perfect adhesion without use of cement.

SOLD BY ALL JOBBERS

ADAMSON MANUFACTURING CO.

HAMILTON, CANADA

If interested tear out this page and place with letters to be answered.

IF YOU had the time to note the tire equipment on automobiles these days, you would believe, as we do, that

1920 IS A DUNLOP YEAR

¶ The ascendancy that shows on our sales record, naturally tallies with the "road" record.

¶ You may not know where rubber comes from, but after a purchase you'll soon know that it goes into *Dunlop Tires.*

¶ Try *"Traction"* or *"Ribbed."* The verdict on these two exceedingly popular tires is—

1. That the Quality Never Varies.
2. That the Mileage Keeps Adding Up.
3. That the General Serviceability is Matchless.

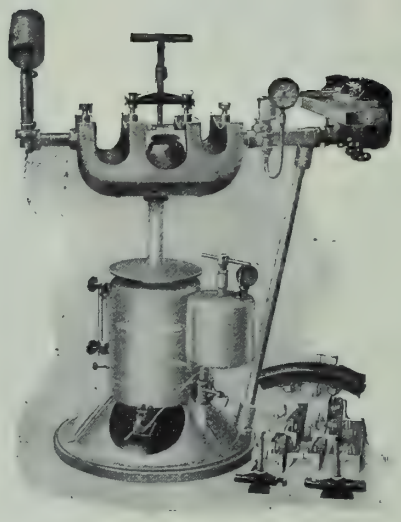
Northern Electric

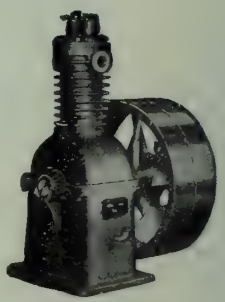
Profit-Producing Equipment for Every Garage



HAYWOOD MODEL L VULCANIZER

—handles each and every injury to which a pneumatic tire or tube is liable including tread cuts, sand boils, fabric breaks, rim cuts, loose beads and blow-outs and replaces small sections of worn tread.

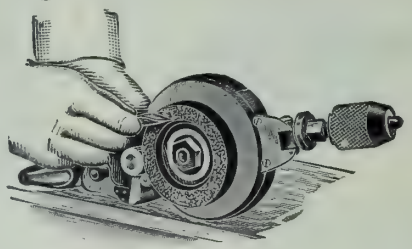
Its range is remarkable—FIVE TIRES AND FOUR INNER TUBES CAN BE CURED AT ONE TIME. The Model L will handle all the work two men can get ready for it—It will turn out $75.00 worth of work in a day when operated to capacity.



With the Model L are supplied all necessary bead plates and clamps and a set of working tools.

TEMCO GARAGE OUTFITS

—eliminate hand-work, thereby speeding up production. The outfit consists of the Temco Model B Portable Electric Drill with Emery Wheel and Valve Grinding Attachments and comes with cord and attachment plug, ready for use.



A single control switch right near the handle, starts, stops, and reverses the motor at any time.

CURTIS AIR COMPRESSORS

Pure Air for your customer means good service because oil ruins tires and, AIR FREE FROM OIL, means fewer blow-outs—fewer punctures—greater tire mileage—less repairs, saving the customer many dollars up-keep every month.

The CURTIS is the only compressor whose design and construction give a guarantee for pure air—AIR FREE FROM OIL.

NORWESCO PRODUCTS

For Every Purpose

Skalex, the radiator cleaner
Carbonox, the carbon remover
Iron Cement
Valve Grinding Compound
Rim Graphite Coating
Color Varnishes
Rim and Gasket Shellac
Never-Burn, Engine enamel
Utility Black, retouching enamel
Neatsfoot Clutch and Brake Compound
Mohair Dressing and Lining Dye

Why It Pays To Stock Only *One* Brand

WHY should you stock four or five brands of radiator repairers when you can get **one** that is **guaranteed** to do all that any of the others will do?

Carrying several brands scatters your capital, reduces your profit and slows up your turnover. That's why thousands of the most successful dealers concentrate on

SE·MENT·OL
(LIQUID AND POWDER)

the original, self-acting radiator repairer. Because one can of SE-MENT-OL is enough for the largest cooling system, they have found it unnecessary to stock several sized different cans—thereby reducing investment and increasing their profits.

Because this efficient, one-sized brand (Liquid or Powder) retails at only 75 cents, millions of cans are being sold—making quick turnover **sure.**

You run no risk in selling your trade SE-MENT-OL—it has an iron-clad **guarantee** to repair cooling system leaks quickly and permanently. SE-MENT-OL Liquid, kept in the radiator, will keep the cooling system leak-proof for the life of the car.

The next time a customer asks for SE-MENT-OL or any other NORWESCO product, don't lose the sale by not having it in stock—see to it that you've got it.

A Selling Point That Sells

Kopper King Spark Plugs are anti-fouling and rust-proof. This is a selling feature that really appeals to the car owner. A Kopper King Plug will not rust into the cylinder head.

This enables you to sell your customers a Spark Plug that ensures freedom from trouble.

The Kopper King is a Salesbuilder — once a car owner buys his first one, he will, in future, enthusiastically specify Kopper King Spark Plugs throughout.

Rust-proof

A heavy coating of copper protects the body of the plug. This prevents carbon deposits; carbon under electrical heat will not adhere to copper.

KOPPER KING

Kopper King Spark Plugs ensure you a better margin of profit than any competing plug. They meet every requirement. Once sold, they stay sold.

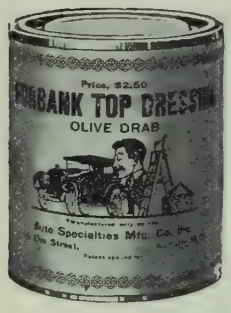
Four Profitmakers



Liquefied Para Rubber Basis

Burbank Top Dressing

Re-dyes light-colored tops, giving a new, fresh appearance. Rubberizes and waterproofs.

Re-Knu Lining Dye

Re-dyes and re-finishes the top lining—a fast color covers all stains and discolorations.

Mohair Top Dressing

will give the shabby, leaky, weather-beaten top that new appearance and durability. It re-dyes, weatherproofs and re-rubberizes the fabric, leaving it soft and pliable.

Drab Lining Dye

It re-dyes and re-finishes the inside top lining a fast light color, giving it that fresh and new appearance. Covers all stains and discolorations.

Dealers—If your jobbers cannot supply you, write to us direct for our liberal proposition

Meeting Competition Sales

of batteries is no problem to the dealer who sells

North Star Batteries

When you have the North Star line to offer you can look your customer square in the eye and say: "Here, sir, are batteries of proven dependability—every North Star battery is guaranteed if used under ordinary conditions to give a stronger spark and last longer than any other battery manufactured in Canada."

There Are Wonderful Sales Possibilities

for North Star batteries in your territory. In addition to their superior quality, which alone makes them the best battery to sell, the price is an important sales factor. You will find the prices on the North Star line such that there is a worth-while profit from their sale.

Ask your wholesaler or jobber, or write direct.

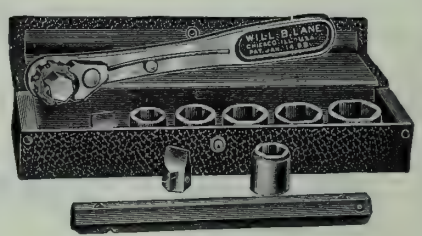
Canada Dry Cells Limited

WINNIPEG, MANITOBA

Lane's Handy Auto Ratchet Tools

A popular quick-selling line that interests your customers at once because of their ability to perform tasks where other wrenches fail.

The line comprises the "Standard" and "Ford" Sets of the Lane "Unique" Ratchet Wrench, the Lane "Super-Unique" Ratchet Wrench Set and the "Unique" Off-Set Ratchet Screw Driver.



FORD SET

SUPER-UNIQUE SET

STANDARD SET

All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

A line that meets many requirements and presents unusual selling opportunities for the dealer.

M&S

The Plug with the Hotter Spark

The ball point of the "M&S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high-grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

No.	Models
500	½" Standard
501	⅞" Standard
502	⅞" Long
505	⅞" Long with Chevrolet Terminal
506	½" Long
504	Regular Porcelain
505	Chevrolet Porcelain

Dealers—The "M&S" plug is standard equipment on the new Overland "4". Ask your jobber for them.

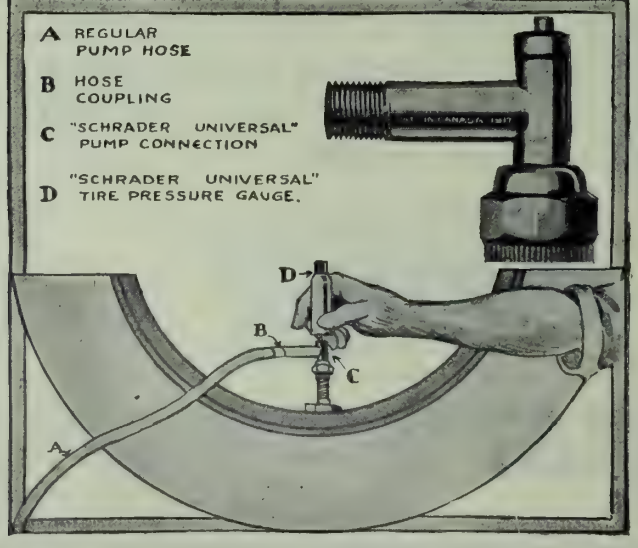
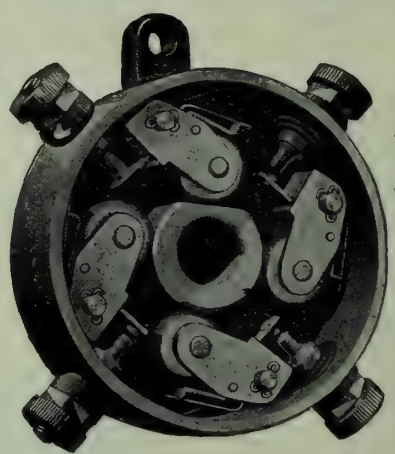
Test Tire Pressure With Pump Hose Connected

SCREW the Schrader Universal Pump Connection to the regular hose-coupling of either hand or power pump, and you can use the Pressure Gauge without removing hose from valve. This saves you a lot of time and trouble. You simply place your pressure gauge over deflating pin. This handy little device costs only 65 cents, but it adds greatly to your convenience.

SCHRADER UNIVERSAL PUMP CONNECTION

Made in Canada by
A. Schrader's Son, Inc.
334 East King Street, Toronto
London, Eng., New York, Chicago





It Means Hot Snappy Spark at the Right Instant!

Would you pour gasoline on the ground? That is just what you are doing when you try to operate your car with faulty ignition. Every misfire means that much fuel thrown away. With the Duplex every charge of gas drawn into the cylinder of the motor is ignited, at the right instant, by a hot, snappy spark, giving a maximum of power with a minimum amount of gasoline, insuring a smooth-running motor with added power.

Due to the positive contact and accurate firing period of the Duplex, your motor will accelerate instantly from low to high with a constant purr, as found in the highest priced motors, and be throttled down so as to barely turn and yet run smoothly.

O.P.W.

Trade Mark Registered

"Paints and Varnishes for Every Purpose"

Concentrate
On Outside Fall Painting

Help your customers remember to buy O.P.W. for outside work—only a short season remains. Many of them mean to do these outside jobs before cold weather.

See that they do—don't let outside work be put off until too late. Display, advertise and talk outside painting with O.P.W. Paints and Varnishes.

Make the most of the remaining outside season. Concentrate on O.P.W. for outside work until cold weather when the inside decorating begins. This concentration makes prosperity for your paint department.

Let Us Show You Why O.P.W. Agents Prosper

O.P.W. Paints make sales
And give lasting service
That never fails.
Raise your paint sales 100%
With O.P.W. — It's permanent.

The Paint that Makes Paint Selling Profitable

It's so easy to sell Martin-Senour 100% Pure Paint and Varnishes! Because the Quality is there—**guaranteed** quality— and behind it a carefully-thought out system of sales-making publicity that keeps the M. S. demand always at full tide.

We invite you to investigate the M. S. Agency proposition and to analyze the big possibilities of our dealer co-operation plans.

Do You Give Back 85c or 10c Change Out of Your Customer's $1 ?

Ask for the Attractive Aladdin Revolving Display Stand. Free with one gross of Aladdin Dye Soap.

Dealers who overlook this sales feature of Aladdin Dye Soap, are throwing away good money that could very easily be made to rest in their own Cash Register.

When a customer asks for a cake of Aladdin Dye Soap, it may mean one 15c sale; and you might hand back 85c change from their dollar. But right here is an easy opportunity to expand the 15c sale into a 90c one. Suggest to the customer that she make a selection of colors and keep five or six cakes of Aladdin Dye Soap always on hand.

Explain the convenience of having Aladdin handy to quickly wash a new color into a faded fabric. To make stockings match a gown, or shoes match stockings. Draperies, as well, are made bright and attractive with Aladdin Dye Soap.

It is so simple and so satisfactory to use, no one need hesitate to wash an Aladdin color into the finest garment. There is a rich field here for the dealer-salesman who will make use of suggestions to double his sales.

Order a gross of Aladdin Dye Soap and ask for the handsome Revolving Display Stand free. It makes sales itself, displays them in an attractive way and connects your store with the extensive advertising now appearing in daily newspapers in Canada.

UNIVERSAL CUTLERY

Well Made — Well Known
Easy to Sell — Best to Own

A manufacturer may know that his goods are the best ever, but unless he comes out in the open and says so with force and frequency, nobody else will know it. Letting people know that quality is in the goods is just as important as putting it there.

There is quality in the "Universal" line—there is confidence in the "Universal" name—the name is firmly fixed in the public mind.

That word works as a silent salesman for every merchant who carries the line. It advertises the dealer's good faith, imbues his clerks with enthusiasm, helps lead the halting customers across the finish line accompanied by a joyous jingle in the cash register.

THE FRICTION WRENCH WITH THE INSTANT · GRIP

to be found only in an

ALLEN

It has no teeth, *no springs, no lost motion; not a ratchet wrench; mechanically correct and reversible.*

The moment you place the ALLEN-FRICTION wrench over a nut or a bolt it grips INSTANTLY, and is in the correct position to tighten or loosen. The fact that this wrench operates with an INSTANT GRIP instead of a tooth and pawl like a ratchet wrench, makes it possible to operate the handle in the smallest and most inaccessible working space.

The ALLEN-FRICTION wrench eliminates all these undesirable features and thus increases its efficiency, taking care of adjustments to be made in places where an ordinary wrench could not be operated.

You will find an ever-increasing demand for these tools only due to their efficiency in many varied uses and their durability under the most severe tests.

Illustration at the left shows our No. 31 Set which consists of: One Friction Wrench Handle, Spark Plug Socket, Short Extension, Long Extension, Screw Driver, Universal Joint, and Thirty Pressed Steel Sockets of the following sizes: 5/16-Inch Hexagon, then in 32nds to and including 1 1/32-Inch, also 1 3/32, 1 5/32, 1 9/32-Inches Hexagon and 17/32, 21/32 Inches Square.

Each set packed in a nicely varnished, hardwood box, with spaces for each character.

Illustration at right shows our No. 9 Set which consists of: One Friction Wrench Handle, Spark Plug Socket, Short Extension, Long Extension, and Eight Pressed Steel Sockets of the following sizes: 13/32, 17/32, 19/32, 11/16, 23/32, 25/32, 31/32 and 1 5/32 Inches Hexagon.

Each Set Packed in a nicely varnished hardwood box, with spaces for each character.

UNITED STATES SHIPPING BOARD EMERGENCY FLEET CORPORATION

HALIFAX, N. S.

OFFICE OF THE AGENT WHEN ANSWERING REFER TO FILE.....

April 26th., 1920.

FROM: C. S. Nye, District Agent,
United States Shipping Board,
Halifax, N. S.

TO: R. L. Graham, Esq., Manager,
Consumers Cordage Co., Ltd.,
Dartmouth, N. S.

SUBJECT: - Towing hawser supplied S.S.'Lake Ellithorpe'

Dear Sir:

Complying with your request relative to the test given the 15" towing hawser you supplied us for the purpose of towing our S.S.'Lake Ellithorpe' from Halifax to Portland, it is with much pleasure that I submit to you the following facts.

The S.S.'Lake Ellithorpe' while en route from Fowey, England to Portland, Maine with a cargo of twenty-eight hundred tons of China clay, became totally disabled by the loss of her propellor, on March 7th., during a heavy galethirty miles south-west of Sable Island and after a very hard struggle, during which time she very nearly stranded on the bars of Sable Island, she was successfully picked up by and towed to Halifax by the Furness Liner 'Maplemore' arriving in Halifax, Friday, March 12th.

On the arrival of the 'Lake Ellithorpe' at Halifax, it was found that in order to install a new propellor, it would be necessary to discharge her cargo in order to place her in drydock, as the construction of the ship and the nature of her cargo would not permit her being safely tipped to install the new wheel and it was therefore decided, in order to save time and enormous expense in discharging and reloading the cargo, to tow the 'Lake Ellithorpe' to her destination, Portland, Maine.

The S. S.'Eastside' owned by the United States Shipping Board, arrived in Halifax on March 16th, and instructions promptly given the Eastside to tow the 'Lake Ellithorpe' to Portland.

DIVISION OF OPERATIONS
UNITED STATES SHIPPING BOARD EMERGENCY FLEET CORPORATION
HALIFAX, N. S.

OFFICE OF THE AGENT WHEN ANSWERING REFER TO FILE.....

April 26th., 1920.

R. L. Graham, Esq., Manager,

Subject: Towing Hawser.

2 -

As neither the 'Eastside' or the 'Lake Ellithorpe' had the proper towing equipment, it was decided by the Masters of both these ships that in order to insure the safety of both ships in undertaking the tow, that a 15" hawser should be supplied and it was therefore ordered from your Company and as I understand turned out and delivered in record time aboard S.S.'Lake Ellithorpe' approximately twenty-nine hours from the time the order was given.

The instructions for the 'Eastside' to tow the 'Lake Ellithorpe' to Portland were revoked however, and the 'Eastside' proceeded on her voyage to New York, but on the arrival of the Shipping Board S.S. 'Western' Comet'at this port on March 28th., instructions were given to the 'Western Comet' to tow the 'Lake Ellithorpe' to Portland.

The 'Western Comet' after completing necessary minor repairs at this Port, left Halifax with the 'Lake Ellithorpe'in tow at 3.30 P.M. Wednesday, March 31st., the weather conditions being ideal at that time and the tow arrived at Portland Lightship, at the entrance of Portland Harbour at 6 P. M. Friday April 2nd., which I believe is very near record run for a tow of this kind, having completed the voyage from Halifax to Portland in approximately fifty hours.

There can be no doubt as to the excellent quality of the material used in manufacturing this hawser and it was pronounced by both the Masters of the 'Western Comet' and 'Lake Ellithorpe' as being one of the finest pieces of rope they had ever seen and I sincerely trust it will prove of much valuable service for towing purposes in the future.

Very truly yours,

C. S. Nye,
DISTRICT AGENT.

CSN/S.

Hubbell Attachment Plug No. 5467

for heavy duty: interchangeable: non-breakable

The Edison base screws into any standard lamp receptacle, without twisting the cord.

The cord is attached to the cap, which has two brass blades, set tandem. These plug into two slots in this base, where they are firmly gripped by two phosphor bronze contact springs, set in individual arcing chambers. Shock or short circuiting is impossible—a strong even contact is assured.

The Cap alone is used when connection is to be made with a flush receptacle or current tap, the blades plugging into any standard tandem or Hubbell T-slots.

The hard, tough composition prevents breakage, and excellent material with honest construction further insures their long life.

In the Hubbell Line, Plugs, Caps and Receptacles are interchangeable not only with Hubbell but with specialties of any other standard manufacture. And the line is complete—write us for full information.

Like every other Starrett Tool, the Starrett Vernier Height Gage sells on its "working points"—the extension for the movable jaw, allowing reverse measurements to be made from either the top or bottom side of jaw—the attachment for taking inside measurements which could not be easily made in the ordinary way.

And above all, the fine standard of Starrett workmanship—a standard maintained through forty years of successful effort to give mechanics "tools a little better than were made before."

It's because this standard *has* been maintained that an ever-increasing number of mechanics are relying on Starrett dealers to supply their tool needs.

Write for free copies of "The Tools Mechanics Buy," a book that's full of "working points."

Story for Week Dated Sept. 11, 1920 Being No. 22 in the Series

The E. B. Eddy Co.'s Modern Mill for Making Mechanical Pulp

ABOVE is a picture of the modern steel and concrete building within which the E. B. Eddy Company reduce raw logs of spruce and fragrant balsam to pure wood-pulp by the mechanical process. There are two processes for making wood-pulp; the mechanical process is the simpler. In a forthcoming article the more elaborate process also used by the Eddy Company will be described.

Within the building shown are two main halls. In one—called the Motor Room—there are five 1,200 horse power motors making 240 revolutions per minute. They are each connected to three 3-pocket New England grinders—the formidable machines which in a minute or two can turn a solid log of wood into a gray liquid.

Before they enter the building by way of the long conveyor which you can see sloping up from the right-hand side, the logs are cut in two-foot lengths. They come to a ruthless machine which strips the bark from them, and are then dropped into a flume by which they float softly along to the more terribly ruthless grinders. Driven each by 400 horse power, the grinders in a few minutes reduce solid logs to a thin watery fluid, gray in color—mechanical pulp in fact, in its first stage—which can be strained and pumped through pipes to other parts of the plant.

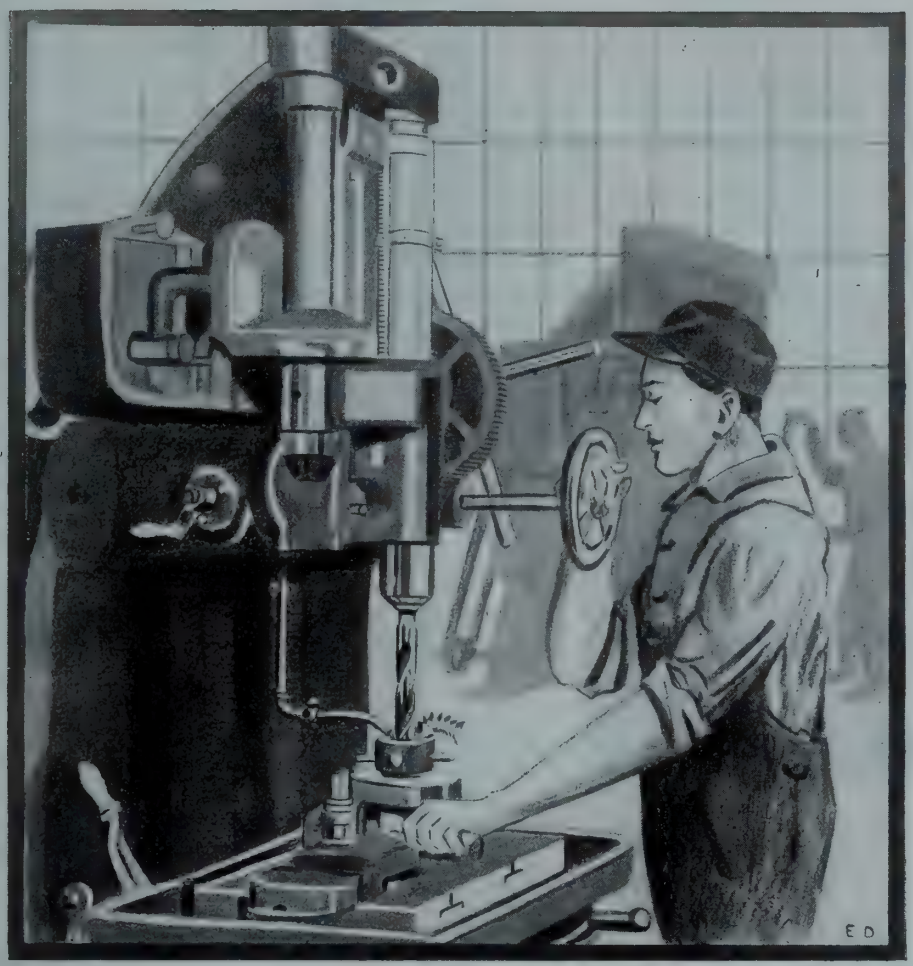
Butterfield Tools



The Name Machinists Look For

Butterfield's high speed and carbon twist drills, gear- and milling-cutters, reamers, taps, dies, and other tools, have always been the choice of the most experienced and discerning tool-buyers and machinists. To the machinist — especially the piece-worker—the extra production that Butterfields give means much in pay or promotion.

Their well established, strong hold with buyers and users of good tools has ever made them a welcome part of hardware tool departments. If you handle Butterfields the news soon spreads among buyers of good tools.

Facts About Baseburners

Baseburners produce results which are self-evident.

The presence of heat needs no explaining —it can be seen—and felt.

The volume of heat is governed by the amount of fuel used and its quality. The application of that heat is as simple as A.B.C.

The heat is produced from coal—it passes down the back of heater to its base; thus it is a Baseburner: The base becomes heated and radiates this warmth to the floor.

When the floor is warmed, the house will be warm.

At the present time, with Coal both high in price and scarce, the Baseburner is more acceptable since it gives just the desired amount of warmth and is so well controlled as to limit its consumption of fuel to the amount of space required to heat.

The Baseburner, therefore, wastes nothing. Consumers are recognizing this fact. They are buying Baseburners to meet the fuel shortage. While saving fuel they add a larger measure of attractiveness and brightness to the Home.

Dealers are in a position to make this fall a profitable one from Baseburner Sales.

Baseburners will be in demand—display them now.

These three Baseburners are your logical selection—we can ship quick. Write our nearest Branch for particulars of our stock.

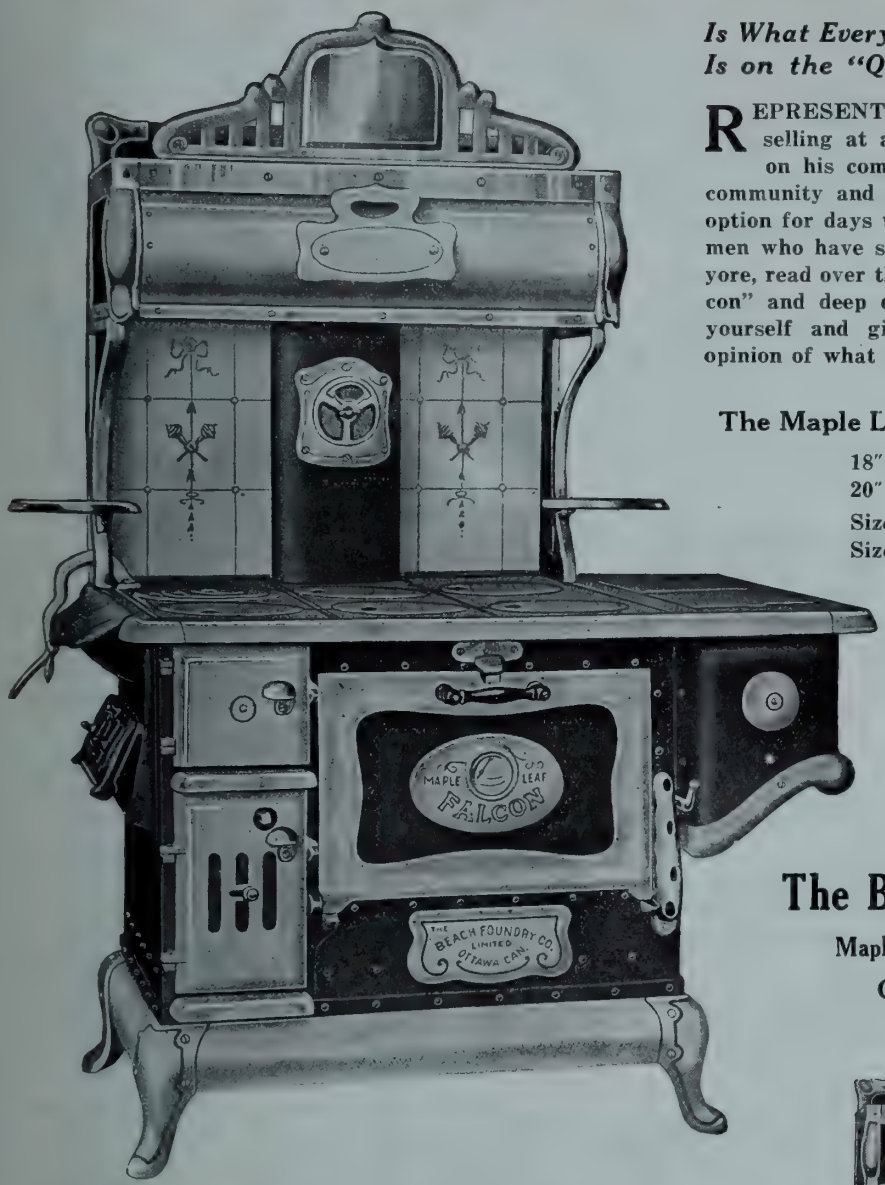
The New Maple Leaf "FALCON"



Is What Every Hardware and Stove Merchant Is on the "Qui Vive" for News of Just Now.

REPRESENTING the utmost in stove value and selling at a price that gives the dealer the edge on his competitor. Sold to only one dealer in a community and he, who gets his say in first, has the option for days to come. You men of experience—you men who have sold stoves by the hundreds in days of yore, read over this description of the Maple Leaf "Falcon" and deep down in your heart—be truthful with yourself and give us your own honest and candid opinion of what you think of the Maple Leaf "Falcon."

The Maple Leaf Falcon is made in two sizes

18" oven 18 x 19 x 12½
20" oven 20 x 19 x 12½
Size of top for 18" 43½ x 27
Size of top for 20" 45 x 27.

HAVE YOU OUR FULL LISTS AND PRICES OF STOVES AND RANGES? SHALL WE SEND THEM TO YOU?

The Beach Foundry Co., Ltd.

Maple Leaf Ranges, Stoves and Heaters

OTTAWA CANADA

A Few of the Construction Features of the "Falcon"

A.—Note height to which front key plate may be raised, allowing scuttle of coal to be emptied freely without use of shovel or poker.

B.—Heavy sectional perpendicular fireback. All other linings also heavy and almost perpendicular.

C.—Large combination draft and poker door opening.

D.—Duplex grates that may be removed through grate opening for replacing with wood grate (note letter N) or for any other purpose, without disturbing the firebox linings. Also note improved cog gudgeons.

E.—Very large ashpan.

F.—Drop closet door.

G.—Combination check draft with key to close off flue and opening for air intake.

H.—Improved sliding direct draft damper, giving full control of heat units to oven or chimney flue.

I.—Key plate top. Covers and short centres heavily ribbed. Sectional reducing cover.

J.—Large oven made in two sizes, 18 x 19 x 12½ in., or 20 x 19 x 12½ in.

K.—Improved attachment for spring oven door balance. Door held down by spring when open and held tight in place by spring when closed.

L.—Rubberoid oven door handle—always cool.

M.—All nickel parts plain, high finish, easily kept clean.

N.—Special wood grate replaces duplex grates for burning wood only.

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

Eight of Every 13 Motorists Use

IMPERIAL

Polarine

MAKES A GOOD CAR BETTER

OVER 62% of the motor cars that pass your door are lubricated with Imperial Polarine.

Motorists depend on dealers along the way to supply their needs. They know the quality of Imperial Polarine is the same everywhere.

This passing trade alone creates a big market for Imperial Polarine. And in addition there is a steady demand by automobile and tractor owners in your territory.

Altogether you have right at your door a market already developed for hundreds of dollars' worth of Imperial Polarine each year—for you make a minimum profit of 33 1-3% on every sale.

Make your store headquarters for Imperial Polarine. Carry a complete stock. Imperial Polarine is sold in three grades for cylinder lubrication. Imperial Polarine, Imperial Polarine Heavy, and Imperial Polarine A. Also Imperial Polarine Oils and Greases for effective transmission and differential lubrication.

Put up in half-gallon, gallon and four-gallon lithographed sealed cans, 12½-gallon steel drums, half-barrels and barrels.

691 out of 700 with Canuck Shot Shells

The dependability of Dominion Ammunition was again demonstrated when E. F. Woodward of Houston, Texas—shooting Canuck Shot Shells—won the high average of the Toronto Exhibition Tournament.

789 out of 800 with Canuck Shot Shells

was also Mr. Woodward's score as winner of the high aggregate, including the handicap event.

Scores like these, made in competition with the World's best trap shooters, are conclusive evidence of the accuracy and dependability of Dominion Canuck Shells.

These are the shells your customers want—the shells you should push in your sales of ammunition. Be sure you are fully stocked on the Canucks, Regal, Sovereign and Crown—all dependable Dominion Ammunition.

Check up your stock to-day, and if not complete get in touch with your jobber.

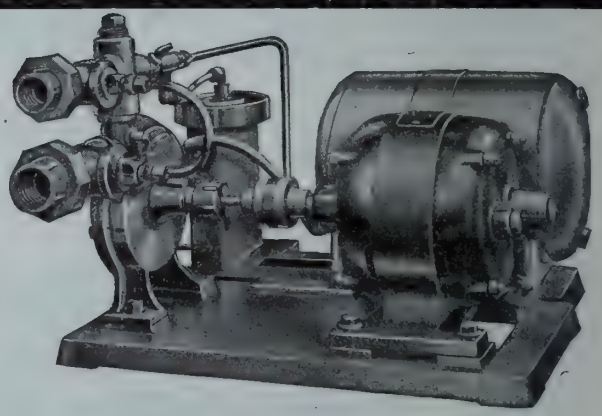
Westco Tankless Water System Costs the Farmer Less— Easier for You to Sell



Made-in-Canada

A careful buyer and a shrewd judge of values, the farmer will buy a Westco Tankless Water System in preference to all others once its low cost features are properly placed before him.

Explain to him the reasons why a Westco is cheaper to buy, install, and maintain. Suggest, as well, a few of its advantages—the no-storage tank feature, the time, trouble, and labor it saves him; point out the advantages of having running water in his kitchen, bathroom, dairy, barns, etc. The farmer will quickly realize its value.

The Westco System is giving splendid service in homes in the suburban and rural districts and on farms where electricity is available. It is a small, compact system—weighs less than 100 lbs., is 16½" long, 14½" wide, and 11" high. It operates noiselessly, and yet will pump 300 to 500 gallons per hour.

It is entirely automatic. Open the tap—pump starts. Close tap—pump stops. There is nothing to get out of order, as it has no gears, no valves, no belt, and is self-lubricating. *It has only one moving part*—the impeller in the pump.

The Westco abounds in features vitally interesting to farmers and rural residents. Let us tell you how you can make big money handling this splendid system. Write us at once for particulars.

Freight Advances Mean Higher Hardware Prices

Larger Advance Granted Canadian Railways Than Manufacturers and Wholesalers Were Expecting — Effect Will Be Felt Many Times Over in Manufacturing and Distributing Process — Heavy Hardware Lines Will Feel It the Most—"Insincerity on Part of Government to Allow Increases," Says R.M.A. Secretary

ANOTHER contributing factor in maintaining high prices on hardware and other commodities is the advance in freight rates which have just been allowed Canadian railways by sanction of the Board of Railway Commissioners. The advance amounts to forty per cent. in Eastern rates and thirty-five per cent. in Western rates, effective on Monday, September 13. After December 31 the increase in Eastern Canada is reduced to thirty-five per cent. and in Western Canada to thirty per cent.

Simultaneously passenger rates all over the country are advanced twenty per cent. as long as they do not exceed four cents per mile. This increase is effective only to December 31, after that date for six months a ten per cent. increase is authorized. Following July 1, 1921, passenger rates return to those in force at present. Increase of fifty per cent. in sleeping and parlor car rates and an increase of twenty per cent. in the rate on excess baggage is also granted. Authorization is also given for an increase in freight on coal as follows: East and West 10 cents per ton on rates under 80c; 15c per ton on rates from 80c to $1.50; 20c per ton on rates over $1.50. Incidentally it may be pointed out that the majority of coal is carried at the higher rates. Cordwood, slabs, mill refuse rates are advanced 10 per cent. No extra charge is made on sand, gravel, crushed stone or for special services incidental to transportation, such as switching, demurrage, weighing, etc.

How It Affects Hardware Lines

An official of the Canadian Manufacturers' Association informed Hardware and Metal that the bulk of hardware goods is transported as 5th class freight. This class includes paints and varnishes, wire goods, enamelware, etc. The rate on this class of freight was formerly 31c per 100 lbs. in carload lots on a run from Toronto to Montreal. Under the new rates the charge will be 43½c per 100 lbs. Thus the increased freight on a 100-lb. keg of nails transported from Toronto to Montreal is 12½c. The increase in freight charges on a carload shipment between these points would be $37.50.

Some iron and steel products move under the commodity rate which is lower than the 5th class. Brushes are 4th class and where the rate was formerly 39c per 100 lbs., the rate is now 54½c per 100 lbs. on a run from Montreal to Toronto. Brooms and woodenware lines, such as ladders, etc., are in the tenth class, the rate on which between Montreal is now 31c per 100 lbs. where formerly it was 22c.

Increase Figures Several Times

It is evident that the increase in rates will be reflected more than once in the final price of the manufactured article. Coal rates are higher and the hauling of raw materials to the factory will cost more. Then increased freight rates for moving it from the manufacturer to the other distributors in the regular channel of trade will be felt several times over. Raw material coming in from the United States will not feel any further advance than that put into effect by the U.S. railways last month.

In presenting their case before the Board of Railway Commissioners, the C.M.A. pointed out that the increase in rates would give the Canadian Pacific Railway a surplus of $21,000,000. The C.P.R. officials replied that the surplus would not be more than $12,000,000 and that this did not include the income tax to be paid and other charges which would eventually leave them with a deficit of some $60,000.

Did Not Expect Such a Big Advance

Manufacturers generally have admitted that the railways were entitled to some consideration, but some surprise is expressed that the increase is so extensive. The railways asked for a straight

40 per cent. increase throughout the whole country and got 40 per cent. in the East and 35 per cent. in the West. Some manufacturers stated to Hardware and Metal that the most they had anticipated was a 30 per cent. advance.

Will Maintain High Prices

"The general effect will be to maintain the high price tendency," said Mr. W. H. Lamont, of H. S. Howland Sons & Co., who added that the advance might increase the purchasing power of the community through the medium of higher wages to railway employees. It is evident, however, that the effect will be felt in the final price to the consumer on all commodities. Another wholesaler expressed the opinion that prices would shortly be due for a drop and that the recent freight advance would just about even things up.

The 20 per cent. advance in passenger rates will also be reflected indirectly in commodity prices for it is a factor in increasing manufacturers' and wholesalers' costs of distribution.

Heavy Lines Feel Increase Most

Heavy lines of hardware, such as glass, iron and steel are expected to feel the advance more than will the smaller commodities, for the increase is concentrated on fewer articles in their case. However, even the smallest lines will be affected. In confirming this opinion, Mr. Boddington, of the James Morrison Brass Mfg. Co., stated to Hardware and Metal that lines such as valves which are small and can be packed compactly, are greatly affected, due to the heavy rates which must be paid on the raw materials in their various stages of transportation.

Insincerity on Government's Part

W. C. Miller, secretary of the Retail Merchants' Association, stated to Hardware and Metal that the advance has been made despite the strenuous opposition of every line of trade. "In my estimation it is a direct insincerity on the part of the Government to allow such increases," said Mr. Miller. The merchants as a class feel that they are the ones who feel the imposition the most for they are forced to face the buyers and make explanations for high prices.

"It might have been worse. We will have to grin and bear it," was the only statement to be had from Thos. Marshall, head of the traffic department of the Board of Trade.

J. J. Morrison, secretary of the United Farmers of Ontario, did not take the judgment with as good grace. "We may appeal against it," he said.

Since 1914 freight rates in Eastern Canada have increased 99.85 per cent. and in the West by 68.75 per cent. The Canadian Pacific Railway will, it is said, reap about 60 per cent. of the benefit from the increase.

An Appeal May Be Made

There is said to be a strong probability of an appeal being taken by interests opposed to the increases, including Manitoba and Saskatchewan and the Boards of Trade of Toronto and Winnipeg. In the event of such an appeal the increased rates will be stayed until the appeal is heard.

Views of Montreal business men are that the increase was inevitable and that there is no alternative but to pass it on to the ultimate consumer. "I am absolutely in favor of the increased rates," said C. H. Smith, president of the Quebec branch of the Canadian Manufacturers' Association. "The railways are the arteries of trade and commerce and we must maintain the railroads at their maximum efficiency for the sake of business."

Windows of fall hunting goods, such as this, will help to stir up the sporting interest in your customers. Some stuffed animals, and a generous display of guns, ammunition, hunting garments, etc., can be arranged effectively with some pictures or advertising matter.

Executive Urges Paint Legislation

"Save the Surface" Campaign Discussed—Effort to Have Manufacturers' Names Placed on Paint Containers—Plans for Next Convention—Definite Decision Regarding Fees.

A MEETING of the executive committee of the Ontario Retail Hardware Association held at Toronto this week dealt with a number of important association matters, including arrangements for next convention, paint legislation, membership fees, program for next convention, new service department for members.

Secretary MacPherson, with whom arrangements have been made to become the permanent secretary of the association, devoting his whole time to the business of the association, has been completing plans for the member's new price book, which is to become part of the service department of the association. Disappointment was expressed regarding the small number of returns received from a questionnaire sent out to 1.040 hardwaremen, of whom only 151 had replied up to the time the meeting was held.

Of this number, 126 expressed themselves as willing to take on the new service and pay the fee of $15.00 required to maintain a permanent secretary. A number of dealers in responding emphasized the fact that the unsettled condition now existing made it even more necessary than ever that the association should have a permanent secretary who could take up and deal with the many perplexing problems which are confronting the retail trade at the present time.

An important decision was reached at the meeting whereby it was decided to maintain the present membership fee of $5.00 per year, which gives full membership in the association, including the convention, collection letters, lien notes, etc. For an additional $10.00 members may also receive the new price book service. This will leave it optional with members of the association as to whether or not they wish to take on the price book service. The new price book, which has been described in detail in a previous issue of Hardware and Metal is now being compiled and complete details will be placed before the membership at the next convention. It was pointed out that this price book service is only one of many services which are contemplated for members of the association, and that later on there may be the addition of the special advertising service department for retailers, freight audit bureau, and it was even suggested that up to a certain point some co-operative buying arrangement might be worked out on certain lines of goods.

Features at Convention

Co-operative buying, chain stores, mutual fire insurance, mutual plate glass insurance, overhead cost, profit sharing with clerks, promise to be among the head-liners on the convention program to be held in Hamilton during the third week in February.

Messrs. Mills and Wright of the executive committee were given authority to make arrangements for an exhibit hall in Hamilton and it has been suggested that perhaps the Drill Hall could be secured for the next convention and thus provide larger quarters for the exhibits. It was also suggested that the meeting and exhibits could be held in the one large building, and that owing to the additional room exhibitors of motor trucks, auto accessories, etc., would be supplied with greater space for featuring these lines.

Co-operative Buying—Chain Stores

An effort will also be made to secure a number of educational features for the convention along the line of window dressing, practical selling talks, etc. It was decided to ask a representative from a Western Canada association to address the meeting on co-operative buying and mutual fire insurance as carried on in the Western provinces. It was also decided to invite a representative of the Winchester Chain Store System to attend the convention and outline the Winchester Chain Store System and how it is working out.

Save the Surface Campaign

The Save the Surface campaign came in for considerable discussion. Geo. May of West Toronto informed the executive that he had attended a meeting of Save the Surface Committee in Toronto some time ago, and had been suddenly and unexpectedly called upon by Mr. Henderson, as a representative of the Ontario Retail Hardware Association, to give an expression of opinion regarding the campaign and indicate whether or not the campaign would secure support from the Ontario Retail Hardware Association. When asked as to the nature of the support expected, both Messrs. May and Caslor, who had attended the meeting, indicated that their impression was financial support. This suggestion was emphatically turned down by the executive, who stated that while they were in sympathy with the paint manufacturers in any movement which they may carry out to increase the sale of paint they did not feel that as retail hardwaremen they should contribute to a campaign of this kind any more than they should contribute to a campaign affecting any one of dozens of other lines which are equally as big or bigger lines than the paint department in the hardware store.

One member of the executive emphasized the fact that while the paint and varnish department of his store is an important and a large department it is only one of many departments and he could not see why the Ontario Retail Hardware Association should be expected to contribute to a sectional campaign of this kind.

Another member of the executive objected seriously to the manner in which the advertising arrangements of the Save the Surface campaign was being carried on in his city, whereby the names of master painters in his city were allowed to be run on the same page as the Save the Surface advertising, whereas the advertisements of hardware dealers in the same city were not allowed to run on the same page. This, it has been explained to him, was the result of the Master Painters' Association contributing to the fund and financially supporting the Save the Surface movement.

After considerable discussion the executive declined to suggest a contribution towards the campaign, but passed

Georgia Senate Passes Bill Governing Sale of Mixed Paints

ATLANTA, Ga. The Georgia Senate bill No. 63, just passed, according to "American Paint Journal," provides that whoever shall expose for sale, or sell within the state any paint which is labeled or marked in any manner so as to tend to deceive the purchaser as to its nature or composition, or which is not accurately labeled, shall be guilty of a misdemeanor, and for each offence shall, upon conviction thereof, be punished by a fine of not less than $25 and not more than $100. or by imprisonment in the county jail not exceeding 60 days.

The bill provides also that the label shall clearly and distinctly state the name and residence of the manufacturer of the paint or the distributor thereof or of the party for whom the same is manufactured. The quantity contained in the package, in the case of liquid or mixed paints, must be designated in United States standard gallons or fraction thereof, and in the case of paste or semi-paste paints, such as commonly sold by weight, to be shown by weight avoirdupois.

The enforcement of the act comes under the duties of the pure food and drug inspector of the state.

a motion of sympathy with the movement.

Labeling of Paints

A lengthy discussion took place regarding analysis of ready mixed paints as discussed at the last hardware convention. The members were of the opinion that there should be some method by which retailers could convince their customers that the high price paints were really better than the cheaper grade paints which are being sold extensively by fail order houses and department stores. At the present time the department stores advertise that their ready mixed paints are made by "leading paint manufacturers in Canada" and the department stores offer equally as strong a guarantee as any retail hardware merchant is enabled to offer under the present conditions. In addition to making these strong claims the department stores sell their paints at prices anywhere from 30 per cent. to 50 per cent. below the prices of the retail hardware merchant. Those who have been watching the department store advertisements during the past few months note that they repeatedly refer to the fact that the paint which is being offered for sale at such a low price is made by "leading Canadian paint manufacturers." This is creating the impression in the minds of the public that the regular high grade paints made by the leading paint manufacturers is being put up under the private brand of the department store or mail order house, and owing to the large purchasing capacity of the latter firms they are able to buy the regular high grade paints and sell them at prices anywhere from 30 per cent. to 50 per cent. lower than retail merchants are selling a similar product.

The fact that the department stores and mail order houses are selling huge quantities of these paints in all parts of Canada cannot be disputed. It is also known that farmers' clubs and other purchasing organizations have plans under way for purchasing large quantities of certain lines of paints for sale to farmers and other members of various clubs.

Unless some check is put upon the claims made by these various organizations retail hardware merchants feel that if they are to continue taking a deep interest in paints and varnishes they must have some way in which to distinguish between the high grade products which they are selling and the cheaper lines sold by department stores and mail order houses, and for which the latter make equally as strong claims as the retailers are able to make.

At the convention in Hamilton last February many retailers were of the opinion that the analysis on the can would perhaps overcome the difficulty. On the other hand, despite the fact that the association when unanimously on record for legislation making it compulsory to place the analysis upon the package, it is a question whether or not this would altogether suit the purpose, owing to the many varied products used in the manufacture of paints and the inability of the average purchaser of paints to distinguish between the quality or suitability of the ingredients which would be covered in the analysis.

After a lengthy discussion it was felt that legislation making it compulsory for the name of the manufacturer to appear on all paint cans would at least help the retail to overcome the present difficulty. The department stores and mail order houses advertise extensively that the cheap paints which they are selling are made by leading paint manufacturers. If it was made compulsory for the paint manufacturer to have his name appear on the package the retailers and the public would at least have the satisfaction of knowing who prepared the paint and whether or not it was made by one of the leading makers as advertised by department stores and mail order houses. It is known that at least some paint manufacturers are in sympathy with a movement of this kind and have expressed themselves along these lines.

The executive unanimously decided to ask for legislation making it compulsory for the manufacturer of paint products, etc., to have his name appear on all packages. The retailers will request that the label shall clearly and distinctly state the name and residence of the manufacturer of the paint. This name would appear in addition to the name of the department store or the mail order house if the latter wished their name to appear on the package.

The point was brought up that at least one large department store and mail order house would then make their own ready mixed paint, but it was the unanimous opinion that this particular company is rapidly heading towards that point at the present time and that it will only be a matter of a few years until they will be making their ready mixed paints the same as they are now making a great many other hardware lines. Even if such were the case this company would also be compelled to place their name on the label as the manufacturer, and accept responsibility for the contents of the package.

The suggestion was also made that if some satisfactory remedy could not be found that it might be possible to work out a plan on a co-operative basis whereby the members of the association could purchase some line of paints that would enable them to meet mail order and department store competition. It was also decided to write to all Canadian paint manufacturers asking them for an expression of opinion regarding this matter and to place on record all information thus received, and also the names of any manufacturers who do not appear to be disposed to assist the retailers in overcoming their present difficulty.

The report of the secretary shows the membership to be the largest in the history of the association and it is showing continued growth. The financial statement was also the best on record and the association is now on a good sound basis with an exceedingly bright outlook for the future.

Meeting of Paint Men Called for September 15

A meeting of the Canadian Paint, Oil and Varnish Association has been called for Wednesday, Sept. 15, at Montreal.

Death Announced of E. Temple Jamieson

There died at the Ross Memorial Hospital in Montreal, on August 31, E. Temple Jamieson, youngest son of the late R. C. Jamieson, founder of R. C. Jamieson and Company, Ltd., and of which company the late Mr. Jamieson was a director as well as secretary-treasurer.

Mr. Jamieson was only in his 39th year, having been born in Montreal in 1882. His illness had extended over several months. Educated at the Montreal High School and at McGill University, Mr. Jamieson entered, in 1901, the paint manufacturing firm headed by his father and joined the office staff. In the year 1908 he was appointed secretary-treasurer, which position he held until the decease. Mrs. Jamieson and three daughters are left to mourn his loss.

Cutlery Quickly Absorbed

Montreal.—In speaking with a prominent jobber in Montreal he referred to the speed with which the trade absorbs quantities of cutlery from the Old Country. "We may get 100 dozen of the best line of pocket knives, but the same melt away very quickly and we are quickly out of stock again," said this informant.

This indicates that the retail trade is handing out considerable quantities of cutlery right along and that there is an indication of many styles and sizes of various knives which have become popular. The high prices do not seem to have dampened the enthusiasm of the average consumer for a good pocket knife. These conditions of course apply largely to other lines of cutlery such as table knives, butcher knives, etc. At the same time indications point to a gradual improvement in the receipt of such lines as are wanted by the trade, and in the past six months, this informant stated, there has been a decided improvement.

Hope to Have Eight Mills in Operation

"Baldwins, Limited, hope to have eight mills in operation within two months, all at Ashbridge's Bay," Sir George Wright, vice-president of the company, said Saturday, as he was leaving Toronto for England. Sir George has been in Toronto for several weeks organizing the plant.

"We have sufficient electric horsepower from Niagara to run the eight mills," said Sir George, "and we have been assured by Sir Adam Beck that within the next year we will be able to obtain sufficient power to run any extensions that we may care to make.

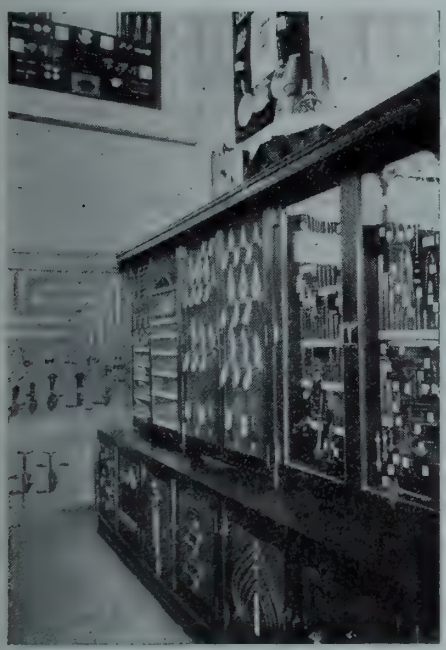
"We intend to put down sufficient mills to supply the whole of Canada with black plates, tin plates, galvanized sheet metal, and black sheet."

Suggestions to Improve Store Display

Store Display is Important Factor and Should be Studied—Some Novel Suggestions Carried Out in Winchester Chain Stores in United States—Salient Features Revealed in These Views—A Place for Everything—Using Neat Cards to Assist the Shopper

SOME unique features of store display are carried out in the furnishing of the Winchester chain of stores in the United States. Display in the store windows and interior is one of the most important factors in modern merchandising and the trade can make good use of all suggestions which can be made along this line.

Herewith are reproduced three photographs of the store interior of the New Haven Winchester store. The first picture shows a novel idea of utilizing wall space for neat and attractive displays.



No. 2

Along the front of what might be termed the mezzanine floor is a row of display boards with samples of various lines and neatly printed cards attached. Individual display boards are centered in wall panels along the side of the store. These can be made by attaching samples to a board covered with green baize. One of these boards is devoted to fishing tackle and it will be noted this supplements the display in the showcase on the main floor. Another board is devoted to automobile lines including pumps, mirrors, etc. The boards along the front of the mezzanine floor show displays of small hardware, padlocks, precision tools, etc. It will be noted that where no samples of hardware lines are on the boards, a card appears drawing attention to various departments, such as sporting goods, aluminum ware, etc.

No. 1

The second picture shows an attractive display of precision tools, plasterers' and bricklayers' tools, auger bits, etc. This display uses not only glass fronted wall cases and samples on the doors of cabinets underneath but also a display arranged on the store wall. Above this display are the wall boards referred to.

The third picture shows the display carried out in the household goods department. Tables, racks and wall cases are used and it will be noted that generous use is made of neatly printed cards to indicate the various lines handled in this department. The first table has a display of bread, cake, and flour boxes and canisters. The second carries a display of polishes, mops, oil cans with a card stating "Things to make Cleaning Easy." A section of the wall cases is devoted to janitor's supplies.

No. 3

Editorial Comment

SMALL PART OF AUTO REVENUE SPENT ON ROADS

A SPEAKER at one of the noon-day luncheons at the Canadian National Exhibition made the statement that the Dominion Government was receiving fifteen million dollars of customs revenue annually from imported automobiles and accessories and was spending only four millions on good roads. This is an important matter to the retail hardware trade of Canada, for the condition of a country's roads is largely an indication of its progressiveness. In the United States, despite the fact that many national highways have been constructed and that good roads are to be found in practically every section of the country where travel is indulged in, yet every year large sums are still expended on roads. Ontario has a program for good roads building as have many of the other provinces, but the trouble is that the aid promised by the Federal authorities falls far short of what is required. It is a splendid thing for tightening inter-provincial bonds and to foster trade and wholesome recreation to increase the grants for the improvement of highways.

RADIAL DEVELOPMENT WILL NOT DEPOPULATE RURAL DISTRICTS

MUCH editorial opinion has been expressed recently, in connection with the encouraging of the Hydro radial scheme, that such development would depopulate the rural districts in favor of the larger centres. Premier Drury says there is a direct connection between the crowding of population from the rural districts to the large centres and Hydro power and radial development. The contrary view from that expressed seems to have more basis. The city to-day draws population from the rural districts because it offers more attractions to comfort and pleasure-loving people. Taking these attractions to the rural districts will encourage those now in those districts to remain where they are and will also be responsible for taking some city people out to the rural districts where they will be enabled to enjoy greater freedom, and where they will still be within easy reach of their place of employment. It is in the interests of the rural districts that electric lines should carry their people and their produce to town and bring back those things essential on the farm. This plan would be a mutually profitable arrangement. The rural district needs the city and vice versa, so that the encouragement of better and quicker communication between them will be in the interests of both.

BRITISH COLUMBIA HALF-HOLIDAY

NOW that the summer season is over, it is interesting to note that the Province of British Columbia has enacted a law whereby all places of business, with the exception of confectionery, drug and fruit stores, restaurants and places of amusement, are compelled to close one-half day a week throughout the year from one o'clock noon until six o'clock the following morning. The day on which the half-holiday is to be observed is to be decided upon by a vote of the electors in each electoral district at the annual civic elections. The day can only be changed by vote at these elections and proper notice must be given by advertising. This half-holiday does not apply to weeks wherein another holiday occurs. The half-holiday generally observed is Wednesday, but there are a few towns where places of business close other days in the week, even on Saturday. The hour for closing in the evening is six o'clock with the exception of Saturday. There are some towns, Vancouver for instance, where stores close every evening at six, including Saturday.

Open Season for Fall Hunting in Ontario

Following are the 1920 regulations respecting the shooting of game in the Province of Ontario:—

(1) **Open season.**—No person shall hunt, take, kill or destroy

(a) **Deer.**—For territory north of C. G. Railway (formerly G.T.P. Ry.), see Order-in-Council, May 20, 1920.

(b) Any moose, deer, reindeer or caribou in that part of Ontario lying south of the French and Mattawa Rivers, except from the 5th day of November to the 20th day of November, both days inclusive.

(c) Any moose, deer, reindeer or caribou throughout that part of Ontario lying north and west of the French and Mattawa Rivers, except from the 25th day of October to the 30th day of November, both days inclusive.

(d) Any partridge before the 5th day of November, 1920, and thereafter except from the 5th day of November to the 20th day of November in each year, both days inclusive, and no person shall take, kill or have in possession any more than five partridge in any one day, and no more than ten partridge in any one year; no grouse, pheasant or prairie fowl before the 5th day of November, 1923, and thereafter except from the 5th day of November to the 20th day of November in each year, both days inclusive.

(e) **Woodcock.**—Any woodcock, except from the 15th day of October to the 15th day of November, both days inclusive.

(f) No quail or wild turkey, black or grey squirrel before the 1st day of November, 1923, and thereafter except from the 1st day of November to the 15th day of November in each year, both days inclusive, and no person shall take, kill or have in possession, more than six quail in one day or 25 for the season.

(g) **Wild geese.**—Any wild goose except from the 1st day of September to the 15th day of December in any year, both days inclusive.

(h) **Duck.**—Wood and eider duck before the 15th day of September, 1923, and thereafter except from the 1st day of September to the 15th day of December, and duck of any kind except from the 1st day of September to the 15th day of December in any year, both days inclusive.

(i) **Shore birds.—**Band-tailed pigeons, little brown cranes, sandhill cranes, and whooping cranes, swans, curlews and all shore birds except those mentioned in clause ii, before the 15th day of September, 1928.

(ii) **Plover, snipe, etc.—**Black-breasted and golden plover, wilson or jack snipe and the greater and lesser yellow legs, from the 1st day of September to the 15th day of December in any year, both days inclusive.

(j) **Capercailzie.**—Capercailzie before the 15th day of September, 1920, nor thereafter except from the 15th day of September to the 15th day of December, both days inclusive.

(k) **Hares.**—Hares may be taken by any means at any time between the 15th day of October and the 15th day of November and between the 23rd day of December and the 2nd of January following, and may be taken at any other time by any other means than shooting.

(2) **Cotton-tail rabbits.**—Notwithstanding anything in this Act a wood-hare or cotton-tail rabbit may be taken, killed or destroyed in any manner by the owner, occupant or lessee of any land upon which it causes actual damage.

(3) **Special provision as to shooting game put or bred by any person on his lands.**—Notwithstanding anything in this Act a person who puts or breeds or imports game upon his own land for the purpose of breeding and preserving the same and his licensee, may hunt, take or kill any such game from the 1st day of October to the 15th day of November, both days inclusive; but the onus of proof that the game were so put or bred shall rest on the person hunting or killing the same. 3-4 Geo. V. c. 69, s. 10.

Beaver, Otter, Muskrats, etc.

(1) **Beaver and otter.**—No beaver or otter shall be hunted, taken or killed or had in possession by any person before the 1st day of November, 1916, and after such date the hunting, taking or killing of beaver and otter shall only be permitted during such periods and on such terms and conditions as may be prescribed by the Lieutenant-Governor in Council, 5 Geo. V. chap. 20. (See Order-in-Council, page 70.)

(2) **Muskrat.**—No muskrat shall be hunted, taken or killed or had in possession of any person in that part of the Province lying south of the French and Mattawa Rivers except from the 1st day of March to the 21st day of April, and in that part of the Province lying north of the French and Mattawa Rivers from the 1st day of April to the 21st day of May.

(4) No muskrat shall be shot or speared at any time nor shall any muskrat or beaver house or beaver dam be cut, speared, broken or destroyed at any time, and no trap shall be set or placed closer than five feet to a muskrat or beaver house.

(5) **When destruction of muskrats lawful.**—Nothing in this section shall apply to any person destroying any of the animals in defence or preservation of his property, or to prevent the destruction of muskrats by any means, at any time, in the vicinity of dams or drainage embankments where there is a probability of injury being caused by them to such dams or drainage embankments, but unprime skins so taken shall not be offered for sale or barter except under the authority of a permit issued by the Deputy Minister, and the fur dealer possessing such skins must hold the permit so issued and forward the same to the Department when applying for permit to ship out of the Province or to dress or tan the skins.

(6) **Onus of proof.**—The onus of proving the justification under the next preceding subsection shall be on the person destroying any such animals.

(7) No fisher, marten, mink or raccoon shall be hunted, taken or killed or had in possession of any person between the 15th day of April and the 1st day of November following.

(8) **Beaver doing damage.**—The Deputy Minister may at any time by order in writing direct the taking or killing of beaver by an overseer or other officer named in the order in any designated locality in Ontario in which, in the opinion of the Deputy Minister, beaver are causing damage to a highway or to private property, but all beaver so taken or killed shall be duly accounted for and handed over to the Deputy Minister. 3-4 Geo. V. c. 69, s. 11.

Sunday

Hunting on Lord's Day.—No person shall on the Lord's Day hunt, take, kill or destroy any game, or use any gun or other engine for that purpose. 3-4 Geo. V. c. 69, s. 12.

Deer

(1) **License necessary for hunting deer.**—No person shall hunt, take, kill, wound or destroy any deer, moose, reindeer or caribou except under the authority of a license.

(2) **Cow moose, fawns, etc., not to be killed.**—No person shall at any time hunt, kill or take any cow moose, or any other moose, reindeer or caribou under the age of one year.

(3) **Number of deer, etc., which may be killed.**—No resident shall, during any one year or season, kill or take more than one deer, and no non-resident shall during any one year or season kill or take more than one deer, and no person shall, during any one year or season, kill or take more than one bull moose, reindeer, or caribou, but this shall not apply to deer which are the private property of any person and which have been killed or taken by him or by his direction or with his consent in or upon his own land.

(4) **Aggregate kill.**—Two or more persons hunting together and holding licenses may kill an aggregate of not more than one deer for each member of the party.

(5) **Restraint of dogs.**—No owner of any dog, known by the owner to be accustomed to pursue deer, shall permit such dog to run at large during the close season for deer in any locality where deer are usually found.

(6) **Idem.—**Any person harbouring or claiming to be the owner of such hound or dog shall be deemed to be the owner thereof; and any dog found running deer during the close season shall be deemed to be at large with the permission of the owner and may be killed on sight by any person, and he shall not be liable to any penalty or damage therefor. 3-4 Geo. V. c. 69, s. 13.

(7) **Flesh and skin not to be wasted.**—No person who has taken or killed any bird or animal suitable for food shall allow the flesh thereof to be destroyed or spoilt, and no person who has killed or taken a fur-bearing animal shall allow the skin thereof to be destroyed or spoilt.

News of Western Canada

Retailers Lack Enthusiasm in Their Profession

Public Must Be Educated to Realize That Retailer Represents the Most Economical and Efficient Method of Distribution of Merchandise to the Consumer—Merchant Called Upon to Repel Onslaughts from All Sides

Vancouver, B.C.—Speaking on the important subject of organization among retailers, Dr. W. J. Hindley, chairman of the publicity and education board of the Washington State Retailers' Association, recently addressed a gathering of retailers in Vancouver.

In explanation of the word "tact," Dr. Hindley told the Canadian R. M. A., a negro explained "politeness and tact" in this way. This darkey, sent to deliver a package to an apartment, rapped on the door, and received no answer. He rapped again, and a voice said, "Come in." He went in. Still he could see no one. He opened another door, and there was a lady in the bath tub.

"Now," said Mose, in telling of the incident, "I shut the door quickly and said, 'Excuse me, SIR.' "Now," added Mose, "the words 'Excuse me' were politeness, but that word 'SIR' was 'TACT.' "

Lack of Organization

"Gentlemen," said Dr. Hindley, "there are so many points in which our troubles as retailers are common to both sides of the line that I hope the time will soon come when we will act in harmony—your association and ours. The troubles and trials that we retailers have had to endure since the armistice have been, in a large measure, due to the fact that as a class we have not been organized. It is more and more necessary for the retailer to educate the public to the fact that the retailer represents the most economical and efficient method of distribution to the consumer. If we don't educate the public to our usefulness, we will simply, as a class, be exterminated—eliminated, like any of the past examples of creatures that have failed to adapt themselves to their environment.

"We have not had, as a class," continued Dr. Hindley, "sufficient esprit de corps—sufficient enthusiasm about our profession. The impression has got abroad that anyone with three thousand dollars and an empty store can start as a retailer, and make a go of it, without brains, and without training.

"That is why," he went on, "that Dun's and Bradstreet's show that 90 per cent. of those who initiate a retail business go broke. The retailers are especially under attack from all sides at this time."

Retailer on Defensive

Mr. Hindley explained the reason in this way. During the war the patriotism of the people made them accept all the prices and conditions that were imposed. But they all looked with longing to the day of peace, expecting that pre-war conditions would again apply and that prices would tumble and markets readjust themselves. The fact, though, was that from the armistice prices on all commodities soared—wages sky-rocketed — raw materials went up. The people simply revolted and protested against the H.C.L. With raw materials high, and labor's further demands, the manufacturer had to charge more for his product. The public does not know the manufacturer. With prices up, freight up and credits extended, the wholesalers and jobbers had to pass this accumulation of increases on to the retailer together with increased freights, increased selling expense, increased fares of travellers, etc.

"The retailer meets the public and is the collector of all this," declared Dr. Hindley; "nobody likes a collector."

"And in Canada," Dr. Hindley remarked, "the Government is making the retailer the collector of the taxes as well."

"Have the retailers ever gone to the press, whose very existence depends on these same retailers' advertising, and given them real information about retail problems, and co-operated with them in doing some educational work along the lines of the function of the retailer?" asked the speaker, adding: "they have not."

Then, he said, the farmers had completed a wonderful organization. Likewise, the labor people, as witness the various Government departments devoted to labor and agriculture—and the Government appropriations made toward their interests. The retailer had been passed by, simply by reason of his state of un-organization. This, too, in spite of the fact that the retail trade employs more men and women than any other single class—and pays more taxes.

"A small boy was once asked," said Dr. Hindley, "what was the cervical column? He said 'the cervical column is the backbone.' Everybody has one. They think with one end of it, and sit on the other."

The retail trade had been spoken of as the backbone of the community.

"But up-to-date," said the speaker in closing, "the retailer has been the sitting end of the backbone, and it's time he woke up and took his proper place at the other end."

Imperial Oil to Locate Distribution at Brandon

Location of an Imperial Oil Company distributing plant at Brandon has been announced. The cost has been estimated at between $250,000 and $300,000 for property, plant, office buildings, etc. The city of Brandon has agreed to close one street and three lines to enable Imperial Oil to build its plant on the site selected. Notice of the City Council's formal consent has been forwarded to the company. The general office building in connection with the plant will serve the company's needs for the western part of Manitoba and the eastern part of Saskatchewan. The intention is to erect the plant during 1921.

CANADA LEADS IN EXPORTATION OF SAFETY RAZORS

The imports of safety razors (including blades and blanks), into the United Kingdom from Canada during July, 1920, exceeded those of any other country.

The number of dozens imported from Canada was 690,128, and the total value £32,443, as compared with the total imports of 915,256 dozens, valued at £66,169.

The imports of hardware from Canada were 341 cwt., valued at £2,893.

Hon. C. C. Ballantyne Speaks of Big Exports

Federal Minister Sees Big Growth in Store—All Lines Steamers Already Receive Capacity Cargoes—Convinced that Bigger Business Obtainable When Shipping Available

MONTREAL. — "I was particularly impressed with a large delegation of lumber men who waited on me while I was at the coast, who convinced me, by their statements, that Canada was losing a large amount of export lumber business owing to the lack of ships and facilities. The first of these handicaps is now being overcome by the Government providing ships, and the question of a large lumber-assembling wharf will have the immediate attention of the Government. I expect all the Pacific coast ports to show development, particularly the Port of Vancouver. It will be, in my opinion, in the very near future, one of the most important national ports."

This sums up the enthusiastic manner in which Hon C. C. Ballantyne, Canada's Minister of Marine, referred to the outlook for export as viewed by him during a recent trip to British Columbia. Continuing, the minister said:

"I am of the opinion that export trade from British Columbia is only in its infancy. In addition to the splendid C.P.R. fleet, the Dollard, Blue Funnel and other lines, the Government are at present running ships from Vancouver to Australia and New Zealand, and also to the United Kingdom. These ships have so far had no difficulty in obtaining large cargoes both ways. The Canadian Government Merchant Marine, which is the operating company, will put on a service to India on November 1. They have under consideration, also, running ships from B. C. points to West Africa, South America, and the West Indies. The Government will have, when their ships are completed, sixteen ships in commission, of 120,000 net tonnage tons. All these ships will be operated from B. C. ports. Some are oil-burning boats and some are equipped with refrigeration plants."

In referring to conditions throughout the Canadian West, the Hon. Mr. Ballantyne said that business men had reported conditions active, and general optimism was expressed.

The Future of Steel Prices

Readjustment May Not Occur Before Next Spring—Effect of Improvement of Transportation on Iron and Steel Industry.

ACCORDING to the "American Metal Market," there is considerable discussion now in the various branches of the general iron and steel trade as to how long the present high prices will last. When "high prices" are mentioned the reference is of course to the prices of the independent steel mills, not to the prices of the Steel Corporation, which remain those of the Industrial Board schedule, first effective March 21, 1919. There is such a gap between the Steel Corporation and the independent prices, ranging from $13 to, say, $75 per net ton, that no one thinks about the Steel Corporation prices declining.

Interest in this subject of independent steel prices declining has been stimulated of late by two facts, the decreased demand and the stiffness with which independents are holding to prices, their tendency being to advance rather than reduce prices. One might have expected that when declines came they would appear first in the form of a gradual sagging, but with the demand decreased and prices stiffening the present indication is that when the decline does set in it will be in the form of sensational drops rather than in the form of a gradual sagging.

How Long Will This Last?

Among many who have thought the subject out the question really takes the form, "How long will present conditions and prices last?" The idea in the minds of these observers is that there will be a definite event, a clearly marked time, for the decline, hence the great question is, When?

On this subject there is quite a variety of opinion, while also many observers regard the question as too puzzling to admit of any attempt at answer. In some quarters the effort is made to gauge the amount of business now on books of independents, and after allowing for the new business that must trickle in from week to week, no matter how dull the market, set a time when the business will run out and the mills definitely seek orders. Sometimes the conclusion is reached that the headway will carry the mills clear through the winter, leaving it that next spring or early summer the "readjustments" will occur.

In other quarters it is denied that there can be any assurance of present conditions lasting any particular length of time, that they may as easily last twelve months as one month. The argument is that the position of buyers can change overnight, and that when there is a change of position it does not necessarily confine itself to the withholding of orders, that it may go farther and involve cancellations, and even still farther, involving resales. Thus there is a delightful variety of opinion from which to select, the only difficulty presented being in making the selection.

An interesting question bearing upon the whole matter is what attitude is really represented in a mill when it holds to its price or even advances its price, as some have been doing, whether that means that the mill is in a strong position or feels that the business it already has is in such jeopardy that all thought of booking additional business must be abandoned for the sake of protecting the business already in hand.

Another interesting question is the effect upon business generally, and upon the mental position of buyers, of an improvement in transportation conditions. Improvement has occurred, is occurring and will probably extend farther. On the one hand this may make buyers plan for larger business, and on the other hand it may relieve their minds of fear of scarcity and make them resolve to get along with smaller stocks. The writer has successively put this bare question to a very large buyer of steel products and a very large seller, each with much experience, and each was unwilling to express any opinion either way.

What Afterwards?

It may look like going around by Robin Hood's barn, but in the writer's opinion this matter of how long present conditions and fancy premium prices will last ought to be considered, in part, by reference to another matter, that after we have had what readjustment is before us we are going to have a period of good, sound and active business. Few men can be found who will assert that the next big thing in iron and steel is going to be a prolonged industrial depression. The readjustment in the minds of most men will be in a large sense a preparation for another and a safer and saner active period. If so, if men can look as far ahead as that, why put the beginning of the readjustment so far ahead? It hardly seems unreasonable to assume that there are but two alternatives, either that we are going to have a healthy readjustment quite soon, getting ready for more activity, or we are going to get into a period of prolonged and drastic readjustment, so great that one should not expect to see clear to the end of it.

Auto Supply and Repair Men of B.C. Join R.M.A.

The auto supply and repair men of British Columbia, who met together in March and decided to throw in their lot with the Retail Merchants' Association, are now enjoying the full benefits of the association, as their trade section is now a materialized fact.

Events in the Trade

Business Changes

Alsack, Sask.—Alsack Hardware Co. has been sold to E. K. Moffatt.

Midale, Sask.—J. V. Flury hardware is selling out.

Joseph Stokes Rubber Co. to Erect Plant in Canada

The Joseph Stokes Rubber Company, Ltd., Trenton, N.J., has purchased three acres adjoining the Grand Trunk Railroad, at Welland, Ontario, Canada, upon which a factory to manufacture hard rubber goods, plates and cells for batteries, etc., will be erected.

Canadians Purchase Tool Steel Company

Welland, Ont.—The plant of the Dillon Crucible Alloys, Limited, Welland, has been purchased by the Canadian Atlas Crucible Steel Co., Limited, and Canadian interests will be strongly represented in the company, as well as on the Board of Directors.

Atlas products will now be made in Canada.

The general sales office of the company will be at 133 Eastern Avenue, Toronto, Ont., with a warehouse in conjunction, and branch warehouses and sales offices at 326 Craig Street W., Montreal, also at Winnipeg, Man.

New Collingwood Factory

Collingwood.—The first sod of the new factory of the Imperial Steel & Wire Co. was formally turned by Deputy Reeve William Williams, in the presence of members of the Municipal Council, the Chamber of Commerce, and other business men. Lt.-Col. J. A. Currie, president of the company, said the new buildings would be much larger than those destroyed by fire in May, 1919, while the plant would be so expanded as to give an output of about 200 tons of wire products per day. Contracts for the building, Lt.-Col. Currie also said, have practically been awarded, local firms being the successful tenderers. Construction will be proceeded with immediately.

Whitby Seeks Industry

Negotiations are understood to be in progress between the Mauson Motor Company and the town of Whitby for the location of a plant in that municipality. An attempt is being made to interest Whitby capital in connection with the enterprise. The company proposes to make 1,500 motor cars a year. A campaign has been under way for some weeks to sell stock to Toronto capitalists.

Western Ontario Notes

Mr. and Mrs. E. H. Hillhouse, of Clifford, Ont., motored to Caledonia to vist with friends and then went on to Toronto where they attended the Exhibition.

* * *

Mr. and Mrs. H. S. Derbyshire, of Wheatley, have returned after spending a most enjoyable week motoring through the Niagara district.

* * *

Mr. and Mrs. T. B. Shillington, and family, of Blenheim, Ont., were recent visitors with friends at Exeter, Ont.

* * *

In the big Western Ontario Bowling Tournament held at Ridgetown, Ont., W. H. Goodhue, of Ridgetown, took an active part not only in the play, but in welcoming the visitors.

* * *

W. J. Heaman, merchant at Exeter, Ont., has been doing some record bowling recently. In the Scotch doubles tourney played at Exeter for the South Huron trophy his team won capturing no less than four games. In the Scotch doubles at Seaforth his team captured third prize.

* * *

Following a vacation of two months with friends at Palmyra, Wisconsin, Silas Reed, of Exeter, Ont., has joined the sales staff of the W. J. Heaman Hardware at Exeter, Ont.

* * *

Work on the new million dollar factory to be erected by the Ruggles Motor Truck Co., of Alma, Michigan, at London, Ont., will be commenced within thirty days. Construction would start sooner but great difficulty is being experienced in obtaining both steel and concrete.

* * *

A. W. Orton, of the Orton Motor Co., Ltd., Petrolea, was in London this week and stated to Hardware and Metal that manufacturing at the firms Canadian branch will be commenced this fall. The firm is arranging for a big exhibit at London Fair which opens Monday.

* * *

Negotiations are well under way for the location at London, Ont., of a half million plant for the manufacture of malleable iron castings and specialties for automobiles and motor trucks. An official announcement will be made shortly by the Chamber of Commerce.

* * *

H. R. Hawkey, hardware merchant at Winnipeg, who was killed in a motorcycle accident, was formerly employed at the Cowan Hardware in London and was well known in the city.

* * *

Following an illness of only a few days with appendicitis the death occurred at Exeter, Ont., of George H. Hoikey aged 34. He was a native of Crediton, Ont., and for twelve years was with W. H. Heaman and had full charge of the hardware store while Major Heaman was overseas with the 160th Huron Battalion. He was one of the most active members of Exeter Odd Fellows and the funeral which was held under the auspices of the lodge was very largely attended.

* * *

Earl Knight, of the sales staff of the Purdom Hardware Co., at London, Ont., has returned to work after having been ill for two weeks.

* * *

Robert Stannard has joined the sales force of Charles W. Summers & Son hardware, at London, Ont.

* * *

G. E. Tudor, of the Purdom Hardware Co., has returned after spending a very pleasant vacation at Grand Bend.

* * *

George Blinkhorn has resigned his position in the hardware of Charles W. Summers & Son, at London, Ont., to become assistant pricer with the Hobbs Hardware Co.

* * *

Major George W. Stacey, formerly of St. Thomas, sailed from Montreal on Wednesday on the steamer Scandinavian for England, where he now resides. He had been in Canada for some weeks in connection with official business.

* * *

The Purdom Hardware Co., of London, has completed arrangements for a big demonstration to be held at the Western Fair at London all next week. As a result of the splendid success attained at former fairs the firm has decided this year to keep two demonstrators at work during the exhibition, and has fixed up a most attractive display booth.

Electric Washer Industry

Manufacture of an electric washing machine will be commenced in Ontario by Universal Utilities Corporation, which has its headquarters at Alpena, Mich. This machine has been shown in Canada, and the manufacturers propose to make them in this country. They hope to begin production within the next two or three months if possible. One of the western Ontario cities will probably be chosen as a manufacturing location.

Windsor Joins Move for Government Gas Control

Windsor. — Endorsing the resolution passed at the recent conference on the application of the Union Natural Gas Co. for increased rates, Windsor City tonight unanimously decided to join in the move for Government control of the natural gas supply.

Kitchener Man Dies While in Dentist's Chair

Kitchener. — Lincoln Kuehner, foreman at the Dominion Tire Plant, died suddenly in a dental office here while he was being prepared for the operation of having some teeth extracted. He was 43 years of age and is survived by his wife and three sons.

United States Trade With Canada

United States trade with Canada for the 12 months ended July reached a total of $1,156,488,145, an increase over the corresponding period ended July, 1919, of $261,658,855. United States sales to Canada were $881,147,000, an increase of $186,289,285, while United States purchases from Canada were $537,000,000, an increase of $75,363,570.

Getting Rags From Europe to Make Building Paper

Montreal.—A considerable business is being done at the present time in the shipment from European countries of large quantities of rags for the manufacture of felt building paper, roofing slates and patent roofing. The rags are brought over in varying quantities by steamer, reaching Montreal, and this year a large local paper concern has, in return, begun the shipment of quantities of rags of a different grade collected on this side of the Atlantic, for the purpose of manufacture into articles for which a demand here is not readily available.

British and U.S. Imports

During June the imports into Canada from the United Kingdom amounted to $24,000,000, and exports thereto $33,000,000. From the United States the imports were worth $88,000,000, the exports totalling $46,000,000.

Sheffield Steel Products, Ltd.

The directors of the Sheffield Steel Products (Ltd.) have announced that the plant being installed at Templeborough will be capable of turning out 15,000,000 table knives a year. There are 500 cutlery manufacturers, big and little, in Sheffield. Hence, with this new plant at Templeborough, the cutlery output at Sheffield soon will be enormous.

Fisher Body Extension

Large additions to plant are be- made by the Fisher Body Company at Ford City, manufacturers of motor car bodies. The contract for the construction work has already been placed.

Death of Paper Manufacturer

John MacFarlane, a veteran paper manufacturer, died early this week at his home in Montreal, aged 79. The late Mr. MacFarlane entered the paper manufacturing business many years ago. After working, as a young man, with several paper companies, he joined the old firm of Angus and Logan. This, in time, developed into the Canada Paper Company, Ltd., and of this firm he organized the Toronto branch in 1880 and stayed there as manager for nearly two years. He later became a partner in the firm and eventually was chosen its president, retaining this position until his retirement in 1912. Among other things Mr. MacFarlane was a member of the Montreal Board of Trade.

Several Cities Revert to the Standard Time

Kitchener.—Daylight saving time, which has been in vogue here and in Waterloo since the beginning of last May, terminated Sept. 5 and standard time came into effect. It is likely that a referendum will be submitted at the municipal elections in January on the question whether daylight saving should be adopted annually in the two towns.

Galt.—This city, on Sept. 5, reverted back to standard time, and all churches held their services by it last Sunday.

Kingston.—On Sept. 5 daylight saving, which has been in effect in Kingston since May 1st, ceased for the year and the city reverted to standard time.

Brockville. — Brockville reverted to standard time on Sept. 5th, after having used daylight saving time for the past three months.

Increase in Street Car Fares in Winnipeg

Winnipeg, Sept. 4.—The Public Utilities Commissioner, of Winnipeg, Man., has issued an order authorizing an increase of one cent in the rates of fare on all cars of the Winnipeg Electric Railway Co. The following rates to become effective on September 1, 1920: Cash fares 7 cents; 4 tickets (good all times) 25 cents.

A CORRECTION

In an article dealing with the advance on enamelware, tinware, etc., appearing in last week's issue of Hardware and Metal, error was made in quoting the original discounts in Japanned ware and heavy galvanized ware with the result that the extent of the advance was not as stated. Japanned ware was formerly list plus 25 per cent. and is now list plus 33 1-3 per cent. Heavy galvanized ware was formerly list plus 35 per cent. and is now list plus 50 per cent.

Ford Co. in the East

Lancaster, N.B., has been selected as the site of one of the three assembling plants that have been decided upon by the Ford Motor Company in various parts of Canada. The entire scheme will involve the expenditure of approximately $5,000,000.

Nickel Corp. Enlarges

Erection of a $3,000,000 addition to the Sudbury plant for the production of monel metal will be undertaken by the International Nickel Corporation of Canada, in connection with which tenders are being received.

Merchants Will Prosecute Fraudulent Bankrupts

Montreal. — The work of the Merchants' Association of Montreal was brought under review in a report submitted by E. E. Wallace, the president, at the annual meeting held here today. It was stated that only $800 is required to complete the fund of $10,000 organized by the association for the prosecution of those who fail fraudulently either in Montreal or in Quebec Province.

Open New Agency

Montreal.—A. Gibson Brown and his brother, A. L., have opened an office at 207 St. James St., Montreal, under the name of A. G. and A. L. Brown & Company. This firm will conduct a general business as manufacturers' agents.

John A. Frazer Honored

At its last meeting on Thursday last, September 2, the Montreal Publicity Association unanimously elected John A. Frazer, sales manager Lewis Bros., Ltd., and an enthusiastic member of the association, as its president for the ensuing year. Mr. Frazer has already decided upon an energetic programme for the season, and his friends will wish him the best of success.

Canadian Export Trade

Canadian export figures for the first four months of the present fiscal year were: $56,445,119, against $90,328,285 for the corresponding period of last year. Imports in 1920 totalled $27,373,971, against $27,799,712. The trade balance in Canada's favor in 1920 was $29,071,148, against $62,528,573 for the corresponding four months of 1919.

Lewis Brothers, Limited, Montreal, have issued a new discount and dealers' net price list applying to their No. 51 catalogue of automobile supplies. Prices on this are effective from September 1, 1920, and any hardware dealers desiring a copy of this new discount and price list or a copy of the catalogue may have one by applying to the company at Bleury Street, Montreal.

Newsy Notes From Here and There

Montreal.—T. H. DeShriver, president T. H. DeShriver and Company, Auckland, New Zealand, was in Montreal this week calling on manufacturers whose lines his firm handles in the Pacific Dominion, and will be here for a short time.

* * *

Montreal.—Among visitors to the Toronto Exhibition this week were Tom Houghton, sales promotion manager, the Martin-Senour Company, and R. S. Daly, manager lead department; F. B. Pierson, representing Otto Bernz Company, manufacturers of plumbers' tools, etc, Newark, N.J., was a caller on the Montreal trade this week.

* * *

Montreal.—Victor Gagne, Lewis Bros., Ltd., spent his vacation partly in motoring through parts of Quebec and the Northern States.

* * *

Montreal.—Archie MacFarlane, of A. MacFarlane & Co., Ltd., left on Wednesday for England, where he will confer with his principals whose lines he sells to the Canadian trade. A. H. Jenkins, of A. C. Leslie & Co., is away in the North Country, enjoying his vacation.

* * *

Montreal.—Hon. Phillipe Roy, Canadian commissioner to France, came to Montreal this week from Quebec. Mr. Wittl, with the Gem Leather Goods Company, Milwaukee, Wis., was in Montreal this week making trade calls. Morris Wheeler, Canadian representative for Sargent & Co., was in the city for a few days; H. E. Haynes, Savage Arms Corporation, called on the Montreal trade during the week. Dufresne, of Lewis Bros., Ltd., is away on his vacation "seeing New York."

* * *

Montreal.—Hon. C. C. Ballantyne has been visiting in Montreal for several days past, where he delivered addresses. His Majesty's senior trade commissioner, Capt. E. J. Edwards, has been paying a visit to Newfoundland, part of his territory, and returned this week to Montreal.

* * *

Jarvis, Ont.—E. T. Carter, hardware merchant in Jarvis, Ont., was a visitor at the Canadian National Exhibition this week.

* * *

Toronto, Ont.—W. B. Gillespie, London, Ont., representative of Brandram-Henderson, Ltd., in Western Ontario, was a visitor at the Toronto branch of this company last week.

* * *

Toronto.—The following were among the visitors to Kennedy Hardware Co. during the second week of Exhibition: E. Patterson, representative of Jamieson & Patterson, Fordwich, Ont.; Thomas Rath, representative of Tweed Hardware Co., Tweed, Ont.; R. G. Boyd, Victoria Harbor, Ont.; Harry Connor, representative of Connor & Jones, Marmon, Ont.; J. J. Larrie, Maple, Ont.

Toronto.—Hardware merchants visitors to H. S. Howland, Sons & Co., while in Toronto during Exhibition, included the following:

Roy and Son, Earlton, Ont.; F. Bodwin, Kettleby, Ont.; Jones and Taylor, Amherstburg; H. R. Appleyard, Humberstone; M. Houston and Son, Nashville; R. Sellers, Brown's Corners; A. G. Snider, Vandorf; W. J. Simpson, Stroud; F. Blair, Galt; Sergeant and Son, Westwood; Hobble and Son, Brantford; M. Ezard, Clairville; N. B. Coleman, Desbarats; R. Blain, Brampton; Russel Simmons, Dundalk; S. H. Thompson, Cherrywood; Mr. Holt, Torrance; Geo. Teasdale, Laskey; H. S. McIntosh, Locust Hill; Carnegie Bros., Port Perry; Chas. Sargeant, Claremont; W. J. Smith, Shelburne; Revilly and Son, New Toronto; William Beatty, Parry Sound; J. E. Smilay, Tory Hill; Geo. E. Earle, Haliburton; H. W. Rowden, Cobalt; Christie Bros., Owen Sound; Jamieson and Patterson, Fordwich; H. Long, Port Credit; F. Clegg, Niagara Falls; H. A. Carpenter, Trafalgar; B. R. Brown, Lansing; Cressman, Ltd., Peterborough; O. B. Henry Drayton; J. Druar, Rostock; S. E. Jeffery, Teeswater; W. W. Leonard, Lakeeldfi; S. E. Eakins, Millbrook; C. Sargent, rep., Claremont; P. J. Bentley, rep., Millbrook; R. J. Walkin, Tottenham; Hopkins Mark & Co., Kinmount; W. W. Horn, Hampton; J. Pattison, Ceylon; H. E. Solomon, Grand Valley; J. Everist and Son, Scarboro Junction; A. B. Damude, Fonthill; E. E. Annis, Brougham; Bothwell Mfg. Co., Bothwell; Highland Creek Supply Co., Highland Creek; E. Prosser, New Toronto; J. W. Perkins, Woodstock; J. Smiley, Woodstock; D. Stinson, Omemee; O. Schmidt, Akron; W. J. Patton, Blackstock; W. J. Addison, Edgar; Jas. Holmes, Woodstock; D. Becker, New Hamburg; Mr. Drummon, Holstein; Huehm Bros., Heidleburg; S. L. Adolph, Listowel; J. H. Newall & Co., Ahmic Harbor; C. Mercer, Elizabethville; J. R. Brown & Son, Janetville; C. W. Stockford, Attwood.

Will Support the Protest Against 'Phone Increase

Ottawa, Sept.—Representatives of the Ottawa Board of Trade, Kiwanis Club, Retail Merchants' Association and Rotary Club, at a meeting recently under the auspices of the Ottawa Board of Trade, unanimously decided to tender the strongest support to the municipalities fighting the proposed rate increases asked by the Bell Telephone Company. A resolution setting forth the determination was passed without a dissenting voice, and after Mr. C. F. Sise, vice-president and general manager of the company, had set forth the company's reasons for the application.

Organizes New Branches of R.M.A. in Eastern Ontario

J. C. Campbell, secretary of the Ottawa and Eastern Ontario district of the Retail Merchants' Association, recently made an automobile trip through the eastern part of the province, organizing and generally furthering the interests of the retail trade in many small centres. He was accompanied on part of his trip by Henry Watters of the National Association and U. J. Gosselin, organizer. New branches were opened at Winchester, Chesterville and Cardinal, Ont., and the way was paved for the establishment of six additional branches in different places some time next month. On the trip, altogether 80 new members were gained for the association, and merchants generally were impressed with the useful work being accomplished by the association, and were very optimistic in regard to future retail trade conditions.

Thinks There is Big Future for Automobile Supplies

London, Ont.—A. W. Orton, president of the Orton Motor Co., Ltd., of Denver, Colorado, which is locating its Canadian branch factory at Petrolea, Ont., sees a tremendous future for hardware merchants and everyone who has anything to sell that auto and truck owners need.

"In spite of all the progress that has been made," he stated to Hardware and Metal, "the auto business is still in its infancy. There is a real need in the world for automobiles and auto trucks and everyone who has anything to do with the manufacture either of trucks, autos or accessories realizes the possibilities for business. The farmers are seeing in thousands that the auto is a vital factor in their business and they are buying in such numbers that the factories cannot keep up with orders. I am looking for two big developments in Canada, one will be the steady expansion of the demand for autos and auto accessories and the other will be the construction of millions of dollars' worth of new highways. This last will partly be a demand from auto owners for better highways and with improved roads will come a still greater demand for autos. Every auto and every truck that is made requires accessories and this end of the business is growing at a rate that only those who are closely in touch with it can appreciate."

Hardware Letter Box

MAJESTIC RANGE

E. O. Lindelblam & Co., Scotsguard, Sask.—Can you tell us who are Western distributors for the Majestic Range, and who are the manufacturers?

Answer.—The Majestic range is manufactured by the Majestic Mfg. Co., 2014-2020 Morgan St., St. Louis, Mo., and handled in Western Canada by McLennan, McFeeley & Co., Vancouver, B.C.

VACUUM CLOTHES WASHERS

J. A. Pringle, Arden, Ont.—Can you inform us who makes these?

Answer.—The article you mention can be had from the following firms — Vacuum Clothes Washers: Stewart, Skinner & Co., Worcester, Mass.

Smith, Phillips Mfg. C., 420 N. Sangamon St., Chicago, Ill.

Pirrung Mfg. Co., 4436 Greenview Ave., Chicago, Ill.

Metal Barrel Co., Galesburg, Ill.

L. D. Berger Co., 59 N. 2nd St., Philadelphia, Pa.

STEAM DISHWASHING MACHINES

The Sackville Hardware Co., Sackville, N.B.—Can you tell us where we can purchase steam dishwashing machines?

Answer.—T. S. Blakeslee & Co., Ltd., Sarnia, Ont.

Fearless Dishwasher Co., Rochester, N.Y.

McClary Mfg. Co., Toronto.

Success Dishwashing Machine Co., Wooster, O.

Insinger Co., Stenton Ave., Philadelphia, Pa.

CHISEL HANDLES

G. Wilford Campbell & Son, St. John, N.B.—Will you be good enough to give us the names of firms in Canada and the States who make chisel and drawknife handles.

Answer.—The following are makers:

Canada Spool & Bobbin Co., Ltd., Walkerton, Ont.

The Dainville Mfg. Co., Ltd., Dainville, Que.

Williams & Marvin Mfg. Co., Deep River, Conn.

Windham Handle Co., South Windham, Conn.

Buck Bros., Millbury, Mass.

McGrillis Handle Co., Norwalk, Ohio.

Piqua Handle & Mfg. Co., Piqua, Ohio.

COMBINATION PIPE WRENCH

W. C. Auld, Youngstown, Alberta.—Can you give us name of firm in Erie, Pa., who make combination pipe wrenches?

Answer.—Erie Tool Works, Erie, Pa.

Erie Mfg. and Supply Co., Erie, Pa.

Erie Stamping & Mfg. Co., Erie, Pa.

Jarecko Mfg. Co., Erie, Pa.

Lakeside Forge Co., Erie, Pa.

Reca Mfg. Co., Erie, Pa.

Reno Mfg. Co., Erie, Pa.

All above m[illegible]nches, but we believe the first named is the firm you require.

SILEX WOOD FILLER

J. B. Crawford Estate, Dutton, Ont.—Can you inform us where we can purchase Silex Wood Filler?

Answer.—Stewart & Wood, Ltd., York St., Toronto, can supply above.

QUEBEC HEATER WITH OVEN

Filton Hardware, Sault Ste. Marie, Ont. — Who make Quebec stoves with ovens attached?

Answer.—Among stove firms making these are the following:

The Thos. Davidson Mfg. Co., Ltd., Montreal.

The McClary Mfg. Co., Ltd., Toronto.

Burrow, Stewart & Milne Co., Ltd., Hamilton, Ont.

Findlay Bros. & Co., Ltd., Carleton Place, Ont.

The Beach Foundry Co., Ltd., Ottawa.

United States Trade with Canada

Ottawa. — United States trade with Canada for 12 months ended with July reached a total of $1,156,488,145, an increase over the corresponding period, ending July, 1919, of $261,658,855. United States sales to Canada were $881,147,000, an increase of $186,289,285, while United States purchases from Canada were $537,000,000, an increase of $75,363,570.

Storage Battery Plant for Toronto

Toronto. — The Wilkinson Plough Works have sold the northern part of their land fronting on Wiltshire Avenue and running back to the Grand Trunk tracks, immediately west of the Canadian Allis-Chalmers plant, to the Willard Storage Battery Company, for $70,000. The site has an area of three acres and the purchasers intend to start at once on the erection of the first unit of a series of buildings for the manufacture of their batteries in Canada. It is understood that this industry was secured for Toronto through the instrumentality of Industrial Commissioner Cousins. The land sale was negotiated by the Realty Service Company.

This makes the fourth storage battery plant to locate here.

Canadian Export Trade

Canadian firms who would like to receive information about trade opportunities overseas should notify the Commercial Intelligence Branch of the Department of Trade and Commerce that they are interested in export trade.

ENVOYS EXTRAORDINARY

—From London "Punch"

Prime Minister (To Bolshevist Delegates:) "Happy to see you, gentlemen. But would you mind going round by the tradesmen's entrance, just for the look of the thing?"

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

CLARK HEATERS

The Chicago Flexible Shaft Company, 5,600 Roosevelt Road, Chicago, Ill., is featuring a double use for the Clark Indestructible Steel Heater.

This heater burns the Clark carbon brick, its efficient heat lasting, it is said, 12 to 14 hours, with no flame, smoke or

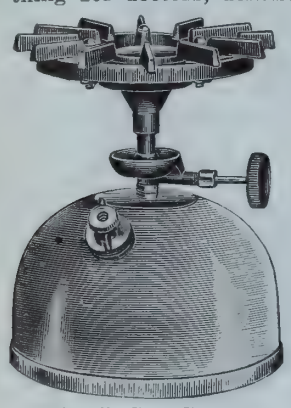
Clark Steel Heater

odor. Quick and easy to operate, ready for use in five minutes and keeps passengers comfortable in open or closed cars.

The same heater can be placed under the hood on opposite side from carburetor to keep the engine warm when car is standing in garage or in the street. This does away with starting troubles common in cold weather.

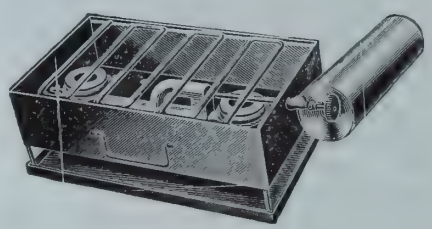
NEW OIL AND GASOLINE STOVES

The American Gas Machine Co., Inc., of Albut Lea, Minn., are manufacturing the "Kero-Gas Stove" which is said to be handy for light housekeeping and just the thing for doctors, dentists etc.



"Kero" Gas Stove

It consists of a brass fount finished in polished nickel with 6 1-2 inch stand on top for kettle, will burn either gasoline or coal oil, being furnished with a tip for each; it holds about a quart, sufficient for 6 to 8 hours burning, is compact and handy, size being 6 1-2 inches diameter, height 8 inches. Another line of theirs which should appeal to campers, automobile and motor boat owners is the "American Kamp Kook," which is designed especially for outdoor cooking and is said not to be af-



"Kamp Kook," Open

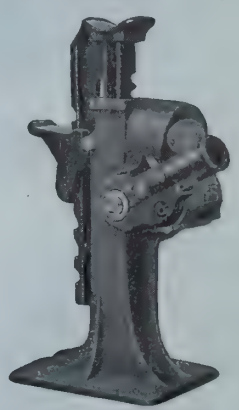
fected by wind. The Kamp Kook burns ordinary gasoline and eliminates all fuel worries. It burns about three hours on one filling and is very com-

"Kamp Kook," Closed

pact, all parts being enclosed in case, measuring 14 1-2 x 8 x 3 1 2 when not in use. Weight is 8 pounds.

DUFF AUTOMOBILE JACK

The Duff Mfg. Co., Pittsburgh, Pa., are offering a new universal auto jack No. 411 for which they claim special features. It has a handle twice as long as the ordinary one, making it easy to operate



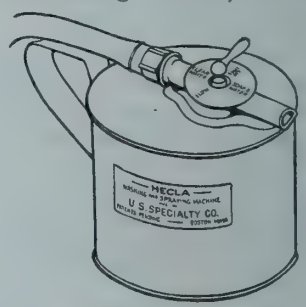
Duff Automobile Jack

with increased leverage and avoiding soiled clothing. When not in use handle uncouples to half its length. The jack is said to operate with a long or short stroke as desired and with handle inclined at any anggle, making it especially suitable for cars with gasoline tank or other obstructions in rear.

The range of adjustment possible is from 4 to 18 inches and capacity 1 1-2 tons.

HECLA WASHING AND SPRAYING MACHINE

The U.S. Specialty Co., Boston, Mass., are putting a new apparatus on the market which they say is equally useful for spraying plants, shrubs and trees, for cleaning and spraying poultry houses, disinfecting rooms, for washing



Hecla Spraying Machine

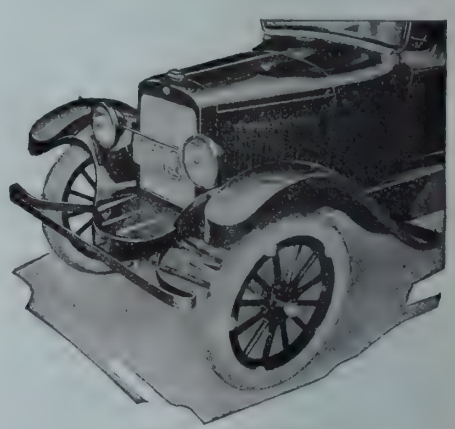
down house and store fronts and floors and also for cleaning automobiles.

The machine is in the form of a can with valve control and hose is fastened to it as shown in illustration. The soap or disinfecting fluid or powder is placed in can and tap and valve turned on. A turn of the lever stops the soap and produces a stream of clear water for rinsing.

THE WAYNE BUMPER

The Wayne Bumper Co., Fort Wayne, Indiana, is manufacturing and distributing a new bumper which has been endorsed by the Willys-Overland Co. as the best spring bar bumper for the Overland "4."

The makers claim that it is strong



Wayne Bumper

and durable, looks neat and is easily attached in six minutes without removing any part of car or drilling of holes. All the attachments, including bolts, brass, etc., are covered by the pan covering the springs, giving the bumper the appearance of an original part of the car.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

MOST of the changes that have taken place this week are in goods that will be shipped out next spring such as garden tools, sprayers, lawn rollers, hay rakes, and harvest tool handles, scythe stones, etc.

Turpentine and linseed oil is lower in price but "Hardware and Metal" understand that the American flax crop is considerably below previous estimates and linseed oil is expected to go higher.

Cotton rope, sash cord and waste are quiet and some expect a decline.

Advances are made on grindstone fixtures, stove pipes, injectors and grease cups and higher prices are quoted on claw-bars and sash weights. Some lines of saddlery hardware are marked higher. Stoves seem likely to advance at any moment.

The increased freight rates announced this week are higher than was generally expected by the trade and the effect will be felt in many hardware lines especially among the heavier class of iron and steel products and in white lead, paint and oils and to a less extent on lighter goods. The opinions of many manufacturers and jobbers on the subject are given in "Hardware and Metal" and when the facts have been digested it will be possible to judge better what effect the new rates will have on prices generally.

Many lines are still very scarce and while the railroad situation is said to be better, deliveries of raw and finished or partly finished materials from U.S. steel mills are still a very long way behind and production is hampered in many industries.

Wire nails are very scarce as are also Canada plates and galvanized sheets and bar iron and steel.

Business is a little quieter and collections are said to be satisfactory.

MONTREAL MARKETS

MONTREAL, Sept. 10.—Hardware market prices are still changing, and almost without exception these changes record increases. There is a little easier tendency on two or three commodities, cotton goods being quiet, and, some think, due for a decline. Lead products are easier and ingot metals are lower in price due to exchange readjustment and also due to lower prices on some of these at producing points. Advances are made on various lines including stove pipe dampers, stove boards, coal hods, grindstone fixtures, wash tubs and pails of galvanized make, and new discounts are effective, as already stated, on various enamelled and other wares. Stove pipes are marked higher. Injectors and ejectors, grease cups and other kindred lines are revised through a change of discounts. Food chopper prices are higher, as is also some saddlery hardware. All oils are firm at recent advances, as is also gasoline. It is anticipated that an early change will be made on nail "extras." Canada plates are still scarce and dear. Stoves are likely to advance at any moment. Sad iron handles of various numbers are marked higher. Frying pans are higher, as are also claw bars and sash weights.

The present condition of trade is satisfactory, there being activity in country orders. Industrial plant demands are more limited, however, but altogether there is quite a brisk demand.

More Sheets to Come But Prices Hold Steady

Montreal.

SHEETS AND PLATES.—Prices on galvanized and black sheets are still held unchanged. There is a decided improvement, however, in the arrival of supplies of English sheets, and this means that the trade will be entitled to at least some relief in the way of increased offerings of sheets. Eventually, but probably not for some time, this ought to mean an easier price to the trade. Transportation by water routes is said to be favorable at the present time.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Old Material List Holds Quite Steady

Montreal.

OLD MATERIAL.—Owing to the better demand for old scrap, and especially for heavy iron waste material, there has been a better undertone and a brisker movement of these lines to foreign buyers. Whether this will continue is not definitely defined as yet, but there will perhaps be a higher price available for what the old metal trade has to offer if this outside demand continues at present prices. There is not a great deal of old scrap arriving from outside buying points.

Solders Take a Tumble; Lead Products Easier

Montreal.

LEAD PRODUCTS in general are easier in tone and this is due to a weakening of the basis for pig lead. While no new quotations are at hand on lead sheets or lead pipe these may come later. Bar solders are lower to the extent of 2 cents a pound all around, and wire solders, too, are lower in price. There is a fair demand in limited quantities for these products.

Lead pipe, per 100 lbs.	17 00

Advance Is Made on Stove Pipe Dampers

Montreal.

STOVE PIPE DAMPERS.—Cast stove pipe dampers have been advanced in price, 5 inch selling at $17 per gross; 6 inch at $18.25, and 7 inch at $25.

Prices Marked Up on Grindstone Fixtures

Montreal.

GRINDSTONE FIXTURES. — Grindstone fixtures have been advanced in price and are now selling at: No. 1, $10 per dozen; No. 2, $10.80; No. 3, $12; No. 4, $23.50.

Wash Tubs of Steel Costing Trade More

Montreal.

GALVANIZED TUBS.—In accordance with the advance made for various wares ordinary galvanized wash tubs are now selling as follows: No. 1, $19.84 per dozen; No. 2, $21.60; No. 3, $24.54.

Galvanized Water Pails Have Been Marked Up

Montreal.

GALVANIZED PAILS.—The following prices apply on galvanized pails in accordance with the recent advance for various stamped wares. Flaring, No. 11, $7.20 per dozen; No. 12, $8; No. 13, $9.12; No. 14, $10.56. Dufferin, No. 12, $6.40; No. 14, $7.20; No. 16, $8.16.

Stove Pipe Prices Definitely Higher

Montreal.

STOVE PIPE.—Owing to the recent advances made on sheet metal goods, and as a direct result of the scarcity of Canada plate, stove pipes have been advanced. Six inch "Ideal" are now priced at $26.46 per 100 lengths, and 7 inch at $27.28 per 100.

Various Brass Goods Registered Advances

Montreal.

VALVES, INJECTORS.—Present discounts on a number of Penberthy valves, etc., are revised as follows: Injectors now carry a discount of 40 per cent., ejectors, 55 per cent., water gauges, No. 1A and 2A, 40 per cent.; No. 81, 84, 88, 81G, 84G, 88G, add 20 per cent. to the list. Air cocks are 5 per cent. off. Grease cups 33 1-3 per cent. off, oil cups No. 300, 301 and 303, 5 per cent. advance, and lubricators No. ½, $11.80 each, and No. 1, $14.35 each. Oil cups No. 305 and 304 are now priced at net list.

Food Chopper Prices Take on New Advance

Montreal.

FOOD CHOPPERS.—New list prices are effective on Maxwell line of food choppers. Model No. 5 are now listed at $22, and No. 6 at $36; No. 7, $50 per doz. Jewel No. 15 are listed at $31; No. 25, $35; No. 30, $50. The trade discount on both lines is 20 per cent.

Saddlery Hardware Now on New List Basis

Montreal.

SADDLERY HARDWARE.—A new list has been issued, No. 97, indicating new prices on Eberhard saddlery hardware. The above list is now in effect showing some advances on various lines.

Prices Iron and Steel Hold on Steady Basis

Montreal.

IRON AND STEEL.—Prices have remained steadily unchanged on bar iron and steel. The undertone is firm, however, and there is every likelihood that there will be continued difficulty in obtaining required sizes if workmen remain away from the mills indefinitely. In the meanwhile the country trade has remained active and there will be a continued demand for bars from this source, doubtless.

IRON AND STEEL

Iron finish machinery steel		$5 05
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		5 50
Sleigh shoe steel		5 50
Tire steel		5 20
Toe calk steel, per 100 lbs.		5 90
Band steel		6 00
Harrow tooth steel		5 15
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 65
Refined iron, per 100 lbs.		5 65
Mild steel		5 00

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Coal Oil Unchanged; Gasoline Sells at Advance

Montreal.

OIL AND GASOLINE.—There is a steady demand for coal oil and prices remain steady but unchanged, ordinary grade being quoted at 31 cents per gallon. Gasoline, at the advances made recently, is actively selling and oil companies state that there is no let up in the request from the trade. Motor grade is quoted at 43½ cents, and illuminating at 48½ cents per gallon. Lubricating oils are seasonable sellers at the 5 to 6 cent advance made recently.

Change Is Anticipated in Nail Differentials

Montreal.

NAILS.—It is expected that there will be an early revision of the "extras" on nails, and this means that while the basis may not be changed, there will be an actual advance for many sizes. Before the end of the week there is strong probability that this may be effected in trade circles here, and if this is done the United States basis will perhaps be adopted. Some sizes of wire nails are still difficult to obtain. The base price on standard wire is held at $6.40 per keg and that on cut $6.90.

See Little Hope of Getting Canada Plates

Montreal.

CANADA PLATES.—Latest advices are to the effect that there is little encouragement to the trade regarding an early receipt of Canada plates in such quantities as the trade requires. Stove pipes will be dear this fall, and have, in the manufactured grades, already advanced. There is a brisk demand for the plates just now.

Stoves Will Soon Cost Trade Somewhat More

Montreal.

STOVES, RANGES.—Prices will soon be higher on various stoves and ranges. That, at any rate, is the strong probability. Already odd lines of these have been revised upward in one or two quarters, and this is very definitely in accord with recent advices appearing in the columns of Hardware and Metal. Just what the average increases will be it is impossible to say definitely, but it is very probable that 5 to 10 per cent. will be added, and in some cases perhaps more. The new freight rates effective next week will be a new feature not previously considered, and the dealer, in any case, will be faced with higher costs to lay the goods down from the manufacturer, regardless of whether manufacturers' costs from this source are at once affected.

Quiescent Condition Surrounds Rope Market

Montreal.

ROPE AND CORDAGE.—Prices have been without change during the past week, pure manila rope basis being 35½ cents, British and New Zealand or beaver manila, 28 cents, and sisal 22½ cents. Some expect that there will, of course, be an increase of price to cover added charges for rail transportation, but this is not yet decided or figured out definitely.

Complete Revision Made; All Ware Prices Higher

Montreal.

WARES.—The advices given last week relative to the advances made by manufacturers for wares covers a comprehensive list of products including enamelled wares, stamped and picced wares of plain, retinned and japanned finishes. Tubs and pails, fire shovels, galvanized ware, coal hods, stove boards, etc., are in the list, and the advances, as before stated, are due to the high prices and scarcity of the raw material. Revised discounts on the various wares will be found elsewhere in the current quotation lists.

Range Boilers Steady; Stocks Reported Ample

Montreal.

RANGE BOILERS.—It is stated that, while there has been no recent advance in the basis for range boilers, this has been the result of fortunate buying of raw material on the part of the manufacturer months ago. The undertone is steadily firm and supplies are said to be adequate to take care of the needs of the trade.

Sad Iron Handles Take on New Prices

Montreal.

IRON HANDLES.—New high prices are effective for sad iron handles, the following quotations being given out by the jobbing trade: No. 3, per gross, $37.50; No. 5, $25; No. 10, $28.

Frying Pans Higher; Some Net Prices Here

Montreal.

FRYING PANS.—In accordance with the advances made on various ware, frying pans of steel make are selling at the following advanced prices: No. 00, $3.12 per dozen; No. 0, $3.75; No. 1, $4.70; No. 2, $5.30; No. 3, $6.

Demand For Rifles and Guns; Are Costly

Montreal.

FIREARMS.—Various advances are made from time to time, jobbers state, on some grades of firearms, although no definite or concerted advance has been made. Regardless of the high prices obtaining and the tax now imposed on these "luxuries," as they are classed for Government purposes, it seems to have no effect on the output. There is a good sale for these lines, and as stated the market is very firm and advancing from time to time.

New High Prices Rule on Claw Bars

Montreal.

CLAW BARS.—An advance has been made in the jobber's price on claw bars which are now selling at $15 per 100 lbs.

Sash Weight Prices Take on New Advance

Montreal.

SASH WEIGHTS.—Another increase in the price of sash weights has been registered here, and solid are now selling at $6.25 per 100 lbs., and sectional at $7.50. This is the second advance in a short while.

Easier Undertone on Most All Ingot Metals

Montreal.

INGOT METALS.—Prices have eased considerably on nearly all ingot metals. This is due, very largely, to the change in exchange rates, and if this softening continues there will perhaps be lower quotations still.

TIN.—This is easier at 54-55 cents a pound, and there is a steady though seasonably limited volume of business.

COPPER.—Half a cent has been lopped off the price of both electrolytic and casting grades, the former now selling at 24 cents and the latter at 23½ cents.

LEAD.—Virgin lead is easier in price, due to declines in primary centres. The present price is ruling around 9¾ cents, while re-melted lead is half a cent cheaper.

ANTIMONY.—A full cent a pound has been lost on this, the week's quotation being 9½ cents in jobbing circles.

SPELTER.—This has lost a quarter of a cent. per pound, the quotation now being 10½ cents.

ALUMINUM.—Thirty-seven cents a pound is quoted on this, and there is a steady, though limited, demand for the product.

TORONTO MARKETS

TORONTO, Sept. 11.—While details of advances in prices are perhaps less this week than usual there are a good few changes. The feature of the week is the announcement of the amount of the increases in freight rates. This was expected, but it is larger than was generally anticipated. What effect it will have on hardware prices is not fully known as yet, but the matter is dealt with in another place in this issue.

Most of the changes in prices that have taken place this week are in goods to be shipped next spring, such as sprayers, garden tools, hay-rakes and harvest tool handles, scythe stones and lawn rollers which show an increase up to 25% above previous prices.

Ready roofings are higher in price and gasoline and axle greases show a higher level. Glass lamp founts advance about 25%.

Business is generally a little quieter though it is expected with so many travellers off the road during the time the Exhibition is on, but bookings for next spring delivery in various lines are coming forward satisfactorily.

The demand for fall goods, stoves and heaters, firearms and ammunition continues good.

Shortages still exist among many lines; and sheets and plates, iron and steel, wire and wire nails are among the articles which it is especially difficult to get delivery of. Large head American roofing nails are still very scarce.

Collections are said to be very satisfactory.

Brass Goods Unchanged; Demand Quieter

Toronto.

BRASS GOODS. — The demand for brass goods—valves and compression work—has fallen off somewhat, though volume of business is seasonable. No change in prices is reported and quotations on principal selling lines will be found on current market pages.

Oakum and Waste Firm But Unchanged

Toronto.

COTTON WASTE AND OAKUM.—Sales of these have been seasonable and prices rule firm and unchanged. No alteration is expected and prices are as shown on current market quotation pages.

May Book Rope at Present Prices

Toronto.

ROPE AND TWINE.—Business is quieter and the bulk of this season's trading is finished in rope and twine, except sorting up orders.

In booking for next season's requirements it is possible that orders may be taken at present prices, subject to any decline. This plan used to be followed but has been abandoned since the war started and bookings have been without quotations on the rising markets.

If orders are booked at present quotations it would seem to indicate that manufacturers do not anticipate prices going any higher.

Present prices are as follows:

Pure Manila, basis 35½c per lb.; Beaver Manila, basis 28c per lb.; New Zealand Hemy, basis 28c per lb.; Sisal, basis 22½c per lb.

Nails Scarce and May Advance

Toronto.

NAILS. — Though no advance has taken place here on nails, it is not regarded as unlikely that higher prices may be asked shortly. Stocks are low and many sizes are extremely difficult to obtain. The new freight rates are regarded as almost certain to affect the price of nails, added to which a new list of extras is out on U.S. markets. Quotations here are unchanged but buyers may find it difficult to purchase any quantity at present prices.

Coal Oil and Gasoline Firm

Toronto.

COAL OIL AND GASOLINE. — No change in price of coal oil has taken place but an advance as soon as increased freight rates take effect would not be surprising.

Prices for Royalite are 29½ cents gal. and Polarine 32½ cents.

Gasoline is quoted at 42 cents per gal. net.

Sheets Firm and Scarce, Black and Galvanized

Toronto.

BLACK AND GALVANIZED SHEETS.—No improvement is noted in deliveries of black and galvanized sheets, and notwithstanding optimistic headlines regarding more cars and increased production, etc., the fact remains that the whole sheet metal industry is approximately six months behind in making deliveries.

With increased demand from all classes of industry a much larger production must take place before any relief is afforded.

Prices are unchanged, though nominal, and what effect the increases in freight rates will have on prices is at present unknown.

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45

12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Tendency For Higher Woodenware Prices

Toronto.

WOODENWARE.—The demand for all classes of woodenware this season has taxed the supply and prices are continually being revised upwards. Most makes of washboards were recently increased in price and higher quotations are in force on clothes pins, step and extension ladders, butter bowls and bake and ironing boards.

Ice cream freezers for next spring have been increased in price and practically everything into which lumber enters has had to bear increased costs.

Higher Prices on Ready Roofing

Toronto.

READY ROOFING. — Practically all makes of ready roofing have been advanced from 10 to 20 cents a square, depending on qualities. The advances, manufacturers say, are on account of increased cost of materials and high prices that have to be paid for wool rags used in the felt.

Garden Tools Higher For Spring

Toronto.

GARDEN TOOLS.—Higher prices are quoted on garden tools for next spring and various articles such as rakes, hoes, lawn rollers, sprayers, etc., show an increase in prices up to 25 per cent. beyond this season's prices, indicating that prices are not likely to be any lower on this class of goods.

Harvest Tool Handles and Hay Rakes Higher

Toronto.

HARVEST TOOL HANDLES. — Advances of different amounts have taken place on hay rakes and harvest tool handles for next season's booking. Scythe stones are also marked up in price.

Pliers and Wrenches Moving Out Well

Toronto.

PLIERS AND WRENCHES.—There is a good sale at the present time for pliers and wrenches, both for machinists' use and motorists' kits and the Crescent line of pliers, which have been scarce till recently, are now available in better quantities.

Lamp Founts 25% Higher in Price

Toronto.

LAMP FOUNTS.—American one-piece lamps, assorted sizes, three dozen to barrel are now 25 per cent. higher in price.

Five Per Cent. Increase in Folding Lunch Boxes

Toronto.

FOLDING LUNCH BOXES. — The Canadian make of folding lunch boxes have been increased in price 5 per cent.

Wrought Pipe Still Firm and Scarce

Toronto.

WROUGHT PIPE.—There is said to be no improvement in the supply of black and galvanized wrought pipe. Skelp is ruling firm at the mills and transportation shows very little signs of mending. While there is a shortage and orders given months ago have not been filled there seems to be a hesitation and holding back on the part of buyers although it is anticipated that present prices may go even higher with the added cost of higher freight rates.

Latest quotations are as follows:

Standard Buttweld Pipe

No Change in Pipe Fittings

Toronto.

PIPE FITTINGS—The demand for fittings continues, though it has dropped a little. Dealers are short in stocks and have been trying to catch up on back orders and fill up on sizes that have been short and hard to obtain for the past few months. No change in prices has been reported and latest quotations are as follows:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Supply of Stoves Less Than Demand

Toronto.

STOVES AND RANGES—There is said to be a good demand for stoves and ranges for fall and manufacturers are shipping out as fast as they are able with production limited by scarcity of raw material and difficulty in securing

same through delays in transportation and other causes. It does not look as if we can expect to see any lower prices on stoves for some time to come.

Axle Greases Now Costing More

Toronto.

AXLE GREASE — An advance has taken place on the prices of axle grease and it adds about a cent to the cost per pound. This conforms to the recent advances on the different grades of lubricating oils.

Heaters Moving Well; Both Oil and Electric

Toronto.

ELECTRIC AND OIL HEATERS — The approach of cooler evenings and early mornings has, as it always does, stimulated the sale of oil heaters and electric radiators. These are moving out well and the portable heater of the Majestic type is especially a favorite.

Uncertainty in Iron and Steel Market

Toronto.

IRON AND STEEL—The iron and steel market seems to be in an unsettled condition at the present time and though no changes have as yet taken place in prices it is a pretty general opinion that an advance is bound to come and that it has been held back, and that present prices, high though they may appear in comparison to those of a few years ago, are lower than present conditions warrant.

Stocks in hand are low and supplies are being offered by U.S. mills, but at prices that buyers here cannot touch, as they say the day has gone by when they would buy at any price.

The Steel Corporations claim that the railroads have hampered business and strikes have kept prices up, but that there are quantities of steel waiting to be shipped.

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 00
Common bar steel, ¼ in. and heavier	5 50
Common bar iron, 3-16 in. and lighter	6 00
Common bar iron, ¼ in. and heavier	5 50
Angle base	5 50
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 00
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 50
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Firmness Shown in Lead and Zinc Products

Toronto.

LEAD AND ZINC PRODUCTS — Firmness is being shown in prices of lead and zinc products, and although foreign lead is being imported in fair quantities no weakening of home markets is announced.

Quotations on principal lines remain unchanged.

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 33
Solder, guaranteed, lb.	0 39
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Dullness Reigns in Waste Materials

Toronto.

WASTE MATERIALS—Reports indicate that the market for waste materials keeps dull and quiet. In metals, steel scrap has had fair trading, with yellow metals the slowest. No change of consequence is noted. Following are average prices:

WASTE MATERIAL

To. 2 busheling	$13 00
Stove plate, pe rton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Heavy lead pipe	0 05¾
Tea lead	0 03
Automobile tires	0 02½

Demand Dull For Ingot Metals

Toronto.

INGOT METALS—Exceptional dullness has been the rule for the past few weeks in all ingot metals. Little change has taken place and tin alone has been active.

TIN—This metal has been in better demand and lower prices have been quoted on home and foreign markets. Local quotations are from 53 to 55 cents per pound.

LEAD—Lead has been firmer on local markets. Imports continued to arrive but lower prices on London markets have not affected New York or home markets, and local quotations are on basis of ten cents.

COPPER—There does not appear to be any shortage of copper and the market is characterized by dulness.

Prices for casting copper, 24 cents per pound.

ANTIMONY—Stocks are said to be adequate, but lighter with a little more demand, and quotations 10 cents.

SPELTER—Not much demand is reported and price is round 10¾ cents.

ALUMINUM—Imported aluminum is said to be available in larger quantities, but prices remain about 37 to 39 cents.

LONDON MARKETS

LONDON, Sept. 9.—Business is reported good here this past week. Among the articles which have been advanced in price are hay knives, ash sifters, brass headed tacks, and oiled and annealed wire. Lower prices are quoted on linseed oil and turpentine.

Prices generally are pretty firm and fall lines are moving out freely. Among them particularly are oil and electric heaters, stoves and stove accessories. Builders' hardware is also in good demand. Nails are in demand but are very scarce.

Ready roofing is finding a steady sale and is higher in price.

Collections continue good.

Good Sale and Decline in Turpentine

London, Ont.

TURPENTINE. — This has been having a good demand locally, and prices are down ten cents per gallon.

New prices are: 1 bbl. lots, $2.50 per Imp. gal.; 2 to 4 bbl. lots, $2.49 per Imp. gal.; 5 gals., $2.65 per Imp. gal.

Nails Selling Briskly; Local Stocks Low

London, Ont.

NAILS. — Both wire and cut nails are meeting with a brisk sale, but stocks of same are very low locally, and dealers are experiencing great difficulty in filling orders.

Prices remain for wire $6.25 base; cut, $7.50 base.

No Change in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL. — There is no change in prices of white lead in oil, and the demand here has been seasonable. Quotations are:

	Tons.	Less tons.
Pure	$20.45	$20.90
Elephant	20.95	21.30

Putty Is Still Having Good Sale

London, Ont.

PUTTY. — Dealers are having a fair demand for putty, which shows no signs of weakening. Prices are as follows:

Standard 100 lb. drums, $8.30 per 100 lbs.; 25 lb. drums, $8.55. Pure 100 lb. drums, $10.80 per 100 lbs.; 25 lb., $11.05.

Window Glass Unchanged and Firm

London, Ont.

WINDOW GLASS. — No change is recorded in window glass, and discounts are still 15 per cent. off list on single and double diamond, and 40 per cent. for cut lights. Net prices figured at 15 per cent. off are as follows:

	Single	Double
Under 25 inch	$16 91	$19 46
26 to 34 in.	17 68	21 13

35 to 40 in.	18 53	22 44
41 to 50 in.	19 97	25 50
51 to 60 in.	20 91	26 18
61 to 70 in.	22 52	27 80
71 to 80 in.	.....	30 09
81 to 84 in.	.....	38 64
85 to 90 in.	.....	41 53
91 to 94 in.	.....	42 33
95 to 100 in.	.....	49 77

Good Sales for Ready Roofing

London, Ont.

READY ROOFING. — There has been a good demand for ready roofing, and for roofing shingles. Prices are firm and supplies are somewhat limited. Nearly all brands of ready roofing have advanced recently from 10 to 20 cents per roll.

Roofing Nails Are Very Scarce

London, Ont.

ROOFING NAILS. — American roofing nails have been very scarce for some time, and are practically off the market in most districts. It has been almost an impossibility to get even small quantities of these.

New Lists on Pyrex Ware

London, Ont.

PYREX GLASS OVENWARE.—Higher lists are now in the hands of the trade, and discounts remain the same, namely 30 per cent. off list. Sales are good and new prices on best selling lines are as below:

Casseroles—No. 167, $2.50 each; No. 168, $2.75; No. 101, $3.50; No. 102, $2.75; No. 103, $2.50; No. 193, $2.50; No. 194, $3.50; No. 183, $2.50; No. 184, $2.75.

Pie Plates—No. 202, $1.25 each; No. 203, $1.50; No. 1203, $1.75.

Cake Dish—No. 221, $1.25 each.

Bread Dish—No. 212, $1.50 each; No. 214, $2.50.

Utility Dish—No. 231, $1.75 each; No. 232, $2.50.

Bake Dish—No. 120, $2.50 each; No. 121, $2; No. 122, $1.75; No. 123, $1.40; No. 464, $1.40; No 465, $1.75; No. 466, $2.

Custards—No. 423, 35c each; No. 422, 40c.

Gift Set—No. 1216, $10 each.

Less 30 per cent.

Good sale for this line.

Higher Prices on Brass Tacks

London, Ont.

BRASS HEADED TACKS. — These goods are listed higher, and new prices are as follows: Packages of 50, $1.95 per thousand; packages of 100, $1.90 per 1,000; loose, $1,80 per 1,000.

New Prices on Ash Sifters

London, Ont.

ASH SIFTERS. — An advance has taken place on ash sifters, and following are latest prices: Common wood side, $3.75 per doz.; Banner Rocker, $3.65 each; No. 1 Rocker, $6.25 each.

Advanced Prices on Hay Knives

London, Ont.

HAY KNIVES. — These lines have lately undergone revision, and prices are approximately $2.50 per doz. higher. Latest quotations are: Lightning, $17.50 doz.; Heaths, $17.50 doz.; T handle, spear point, $19.00 doz.; L handle, spear point, $19.00 doz.

Twenty-Five Cents Added to O. and A. Wire

London, Ont.

OILED AND ANNEALED WIRE. — This has been very scarce in this district lately and hard to get. A new price is out and is 25 cents per 100 lbs. higher. Net prices are: No. 11, $6.62 per 100 lbs.; No. 12, $6.70 per 100 lbs.

Cow Chains and Stall Fixtures Higher

London, Ont.

COW CHAINS AND STALL FIXTURES. — The new price on cow chains is list plus 25 per cent., and tie-out chains list less 20 per cent. Hollow stall fixtures sell at $2.25 per doz.

Alarm Clocks Are Selling Well

London, Ont.

ALARM CLOCKS. — There is a good sale for all kinds of alarm clocks, and prices of the best known makes are: Good Morning, $1.85 each; Lookout, $2.35 each; Sleepmeter, $2.50 each; Big Ben, $4.00 each.

No Change in Rope; Demand is Lighter

London, Ont.

ROPE. — The demand for this is now much lighter, and sales are slackening. Prices are unchanged, and are as follows: Pure Manila, 35½ cents per lb. base; Beaver Manila, 28 cents per lb. base; New Zealand Hemp, 28 cents per lb. base; Sisal, 22½ cents per lb. base.

Electric Goods Are Selling Well

London, Ont.

ELECTRIC GOODS. — The sales for electric irons, toasters, grills and heaters have been good, and prices of some of the better known lines are as follows: Canadian Beauty irons, $5.84; toasters, $5.84; grill, No. 402, $10.22; Majestic Heaters, No. 7, single coil, $8.34.

Lower Prices Quoted on Linseed Oil

London, Ont.

LINSEED OIL.—New lower prices are quoted on linseed oil and the following are local prices. Demand is seasonable.

	Raw	Boiled
1 to 2 barrels, gal.	1 80	1 83
3 to 5 barrels, gal.	1 79	1 82
6 to 9 barrels, gal.	1 77	1 80

Less barrels add 15c per gal.

WINNIPEG MARKETS

WINNIPEG, Sept. 8—A good number of changes in prices have been made this week, and in practically every instance, it has been an advance. The chief feature has been the increases on wares, as mentioned in last week's markets, that the price on enamelled ware, japanned ware, tinware and galvanized ware would be advanced this week has brought details and a considerable advance has been made on all these prices. Wooden lines and wicker goods also show an increase, extension stepladders having been advanced two cents a foot and ice cream freezers and clothes baskets approximately one-third. Other lines quoted at higher prices are vises, anvils, punches, wire rope clips and thimbles. Scythes for next season are marked higher and hay knives have also advanced in price. Sheet lead has been revised upwards. If shipments of all orders in hand are delivered in good time by manufacturers, a good fall business will be realized, although the price of nearly every hardware commodity is higher and costs are constantly advancing. Collections are still improving.

Wire Rope Clips Advance Slightly

Winnipeg.

WIRE ROPE CLIPS.—The price has been advanced slighty this week on wire rope clips and they are quoted as follows:

¼ in., 8½c; 5-16 in., 9c; ⅜ in., 11c; 7-16 in., 13c; ½ in., 17c; 9-16 in., 20c; ⅝ in., 21c; ¾ in., 30c; ⅞ in., 40c; 1 in., 47c; 1⅛ in., 71c; 1¼ in., 79c; 1⅜ in., $1.35; 1½ in., $1.42.

Anvils Advance Approximately 25%

Winnipeg.

ANVILS.—This week the price has been revised upwards on the price of anvils and is approximately 25 per cent. advance on last quotations. New prices are as follows:

Vulcan

No. 5, each $12; No. 7, $14.50; No. 8, $16; No. 9, $18; No. 10, $20; No. 11, $22; No. 12, $24; No. 13, $26; No. 14, $28; No. 15, $30; No. 16, $32.

Peter Wright

60 to 69 lbs., 31c per lb.; 70 to 79 lbs., 30c; 80 lbs. and over, 29c.

Farrier's Clip Horn, 30c per lb.

Blacksmiths' Vises Revised Upwards in Price

Winnipeg.

VISES.—The price has been advanced on blacksmiths' vises this week and though there is a fair demand, the supply is none too good. The following prices are quoted:

Peter Wright up to 40 pounds, $17.50

each; 45 to 100 pounds 40 cents per pound.

Ice Cream Freezers 25 Per Cent. Higher

Winnipeg.

ICE CREAM FREEZERS. — Owing to higher prices being charged for material used in the manufacture of ice cream freezers the price has been advanced approximately 25 per cent. This weeks prices are:

Blizzard

No. 2, each $5.15; No. 3, $6.20; No. 4, $7.50; No. 6, $9.40.

Gem

No. 4, each $8.20; No. 6, $10.25; No. 8, $13.30; No. 10, $17.40; No. 12, $21.

Crown

No. 10, each $33; No. 14, $37.50; No. 18, $53; No. 24, $60; No. 32, $73.50.

Enamelled Ware Prices Advance

Winnipeg.

ENAMELLED WARE. — The price has been advanced approximately 15 per cent. on enamelled ware. The scarcity of sheet metals, combined with the higher cost of material and labor is given as the reason. New discounts on these goods are:

Pearl ware 2 1-2 per cent advance on list; Diamond ware 40 per cent. advance on list; White ware 22 1-2 per cent. off list.

Stamped Ware Revised Upwards in Price

Winnipeg.

STAMPED WARE.—The same conditions exist in regard to stamped ware as enamelled ware and the price has been advanced about the same proportion.

Stamped ware—Plain 20, 10 and 2 1-2 per cent. off; retinned 15, 5 and 5 per cent. off.

25 Per Cent. Advance on Galvanized Wash Tubs

Winnipeg.

WASH TUBS. — Galvanized wash tubs are in big demand but stocks are not equal to the demand. Galvanized sheets are hard to procure and are high in price necessitating higher prices for manufactured articles made from sheets. This weeks quotations for galvanized wash tubs are:

Light—List plus 72 1-2 per cent.

Heavy—List plus 62 1-2 per cent.

Coal Hods Are Up in Price

Winnipeg.

COAL HODS.—The price has been advanced this week on both galvanized and Japanned coal hods. The following prices are quoted:

Galvanized—List plus 102 1-2 per cent.

Japanned—List plus 92 1-2 per cent.

Japanned Ware Also Advances in Price

Winnipeg.

JAPANNED WARE. — The price of Japanned ware has been raised approximately 15 per cent. and like all other goods manufactured from sheets are hard to get on account of the scarcity of raw material.

Prices quoted this week on Japanned ware is 45 per cent. advance on the list.

Wire Nose Guards Advanced in Price

Winnipeg.

WIRE NOSE GUARDS. — Higher prices are asked for wire nose guards and following are latest prices on principal lines:

No. 41—$3.20 per dozen.

No. 11—$4.65 per dozen.

No. 3—$3.30 per dozen.

Pieced Tinware is Higher in Price

Winnipeg.

PIECED TINWARE. — The scarcity of tin sheets and the higher cost of same to the manufacturers is no doubt the cause of higher prices on pieced tinware.

Pieced tinware is quoted this week at 90 per cent. advance on the list.

With copper bottoms 105 per cent. advance.

Railroad milk cans, list plus 50 per cent.

Factory milk cans, list plus 82 1-2 per cent.

Milk cans or oyster pails, list plus 90 per cent.

Milk pans, list plus 90 per cent.

Sheet Lead Up Two Cents Per Pound

Winnipeg.

SHEET LEAD.—A change has been made in the price of sheet lead this week and is higher although the tendency was for a lower price. The prices quoted are 15 cents for full rolls and in less than full rolls 16 cents per pound.

Higher Prices for Solid Punches

Winnipeg.

SOLID PUNCHES.—There is a good demand for solid punches and stocks are in fair shape. The higher cost of raw material and the scarcity of same necessitated the raising of the prices. Nos. 1 to 6 are quoted this week at $1.80 per dozen.

PITTSBURGH MAKETS

PITTSBURGH, Sept. 9.—Producers, dealers and consumers in all branches of the general iron and steel market, including coke, pig iron, semi-finished steel and finished steel products, unite in declaring that there is a condition of quietness if not of absolute stagnation. Coming on the heels of the ending of the July-August midsummer period, which is traditionally a dull one, the situation today is important and suggestive. The markets ought to be growing more active. Looking back to June, one can now see that the markets have grown more and more quiet as time passed, and the fact that what is normally a dull season of the year was passed through seems to have had nothing to do with it.

There is nothing in the technical position of the markets that would presage any increase in activity in the near future. Producers are moderately well sold up and consumers are moderately well covered. No large number of producers will run out of orders in the near future, requiring them to force sales, while buyers are unlikely to be forced to buy heavily for quite a while to come. The attitude of producers is that of "standing pat" on prices as there is nothing to be gained by trying to stimulate activity. The position of buyers is that they will buy only for absolutely known wants in the near future, and as they are already covered, in the main, the current purchases are very light.

Pig Iron

The pig iron markets are stagnant, particularly in the western Pennsylvania and valley district. Men are discussing now how it happened that foundry pig iron recently was shoved up $4 a ton to $50 valley. As there has been little buying at the new price the advance does not seem to have done the producers much good, and it may prove to have done them harm by straining the patience of consumers to the breaking point. If the furnaces had left the market at $46 they might have pulled the consumers along and gotten them to buy from time to time. One man who is practically neutral as between buyer and seller, but very well posted, remarks that the advance was simply a sort of notion, so many furnacemen having made up their minds it would look nice to have pig iron advance to the round figure of $50, and it is known that quite a number of bets were made as to whether or not pig iron would reach $50. Bets can be collected even if little pig iron can be sold. The same observer just referred to remarks that the southern furnacemen seem to have handled their market with more skill. They got the price of pig iron at Birmingham up to $42 at the end of last April, and they have held it there steadfastly, though sometimes obtaining delivery premiums. When northern iron started advancing over again there was afforded a wider field for the sale of southern iron, of which the southern furnaces have been taking advantage. For instance, years ago the alignment of prices became such that Birmingham iron could rarely get into Pittsburgh, being shut out by valley iron, but even with the advance in freights Birming-

ham iron can beat valley iron for Pittsburgh delivery by over $2 a ton, the freight Birmingham to Pittsburgh being advanced from $5.70 to $7.60, making southern iron at $42 Birmingham $49.60 delivered Pittsburgh. Valley iron, on the other hand, at $50, furnace, is $51.96 delivered Pittsburgh. The Pittsburgh consumer may not buy southern iron, but he is deterred from buying valley iron unless he needs a small lot for very early delivery, in which case the price matters very little.

A fair conclusion is that there will be a prolonged deadlock in the pig iron market, with only very light transactions. A certain amount of iron has been sold and bought, and the question is whether the producers will first need orders or the consumers will first need iron. For a long time past production and consumption have balanced, while the present outlook is that production will increase and consumption will decrease. Unless fundamental conditions change, therefore, it would look as though sellers will have to come into the market first, and necessarily with cut prices, but this may not be, possibly, until several months have elapsed.

Steel Prices Unchanged

The gap between Steel Corporation and independent prices is not being narrowed, despite the dullness of the market. In the past week or two there have been little cases of price declines and also little cases of price advances, on the part of some independents. The point seems to be that when there is competitive business the price declines while when there is no business a mill ing by doing so and makes safer from may mark its prices up, as it loses nothing on its books. It is about a year now since there first appeared a distinct difference between Steel Corporation and independent prices, the difference in creasing until substantially the maximum was reached last February or March, since when there has been practically no change, taking the general average of the market. Expectations used to be entertained that the phenomenal and almost unbelievable condition of there being two markets would be terminated by a gradual sagging of the independent prices. The course of the market recently indicates that nothing of the sort will occur. There will be no sagging, but rather the prices will be maintained to the last moment, the banners waving and the band playing. The independents still talk of there being further price advances, and have even revived talk of the Steel Corporation being about ready at last to advance its own prices, which have been maintained without change since the Industrial Board adjustment of March 21, 1919. While there is no official statement, there is an intimation from New York, possibly inspired, to the effect that the corporation has no intention of advancing its prices. Now would be the time of all times for the corporation to advance its prices, for by the recent advance in freight rates its costs are increased by about $50,000,000 a year in increased freights it pays on materials assembled at its various plants and on shipments between plants. The corporation gets a part of this back, however, possibly a fourth or a third, in that it makes a greater profit on such material as it sells on the "Pittsburg basis" to point taking a lower freight from the producing mill to the point of delivery. The $50,000,000 a year is approximately equal to the rate at which the corporation accumulated surplus during the first half of this year, after paying charges and dividends. However, the corporation does not necessarily need to accumulate surplus all the time, having a good surplus now, while its book-keeping has been particularly conservative, large sums having been written off lately, keeping the property account down.

Keep Your Mailing Lists Live and Business Won't Stand Still

Time and Money Spent on Keeping Up-to-Date on Customers Bring Good Results in Many Businesses—Want Slip and Card Index Systems Prove Their Value — Novel Ways of Getting Across Appeals Tried Out by Many Merchants

HAVING planned his mailing list, and having made definite arrangements to constantly add "live names" as these may present themselves from time to time, the dealer faces a still greater problem. Viewed in the light of recent retailing progress, it is most important, and very often the most perplexing problem.

In short, how is the dealer to classify the thousand, or five thousand, or ten thousand names that he keeps on file for follow-up by mail, for the purpose of securing added patronage for his establishment?

A merchant is called upon to exercise keener insight and greater ingenuity in properly classifying the multitude of names on his mailing list than is required in gathering these names from the various sources.

Recent events have given added significance to this phase of retail salesmanship. A general shortage of newsprint, more acute in certain localities, has resulted in considerable reduction of advertising space in local newspapers, with the effect that many merchants have been compelled to either reduce their space allotments, or to temporarily abandon their local newspaper advertising campaigns.

A Direct Campaign

A situation of that kind, even if a temporary one, is apt to bring tragic results to the dealer, unless the latter is prepared to meet the emergency with a bullet-proof mailing list. With the aid of a well-gotten-up, well-classified mailing list, the dealer can put on an intensive, well-directed direct mail campaign which can appropriately take the place of newspaper advertising.

The sales manager of one of the largest retail concerns in Ontario, known throughout the country for his progressive methods, is of the firm belief that direct-by-mail advertising, as it is practised by a number of enterprising merchants, is to-day the most important factor in salesmanship.

"Direct mail," he says, "is rapidly coming to the fore as the most important selling factor of this era. It occupies first place, in contradiction of the theory that has been accepted for years that the printed advertisement as applied to newspapers and magazines was the most potent appeal aside from the salesman himself.

"There is rarely a sale or event of any importance that we plan that does not carry its share of direct mail work. It may be anywhere from one hundred to ten thousand letters or circulars but they are placed where we believe they will produce, and they do.

"The newspaper cannot do everything. It cannot add the personal touch that can be put in a letter or well edited circular and I firmly believe that your percentage of sales are larger in proportion to circulation than the newspaper."

Mind you, this man is not minimizing the importance of local newspaper advertising. The concern he represents has been a consistent advertiser since its birth, but the point he stresses is that other merchants are apt to minimize the importance of direct mail in making their sales campaigns successes. And he adds very aptly:

"The ordinary method — the first thought in relation to any sales event is how big an advertisement will carry? It should be—how many people can we

reach? And then study to reach these people."

The last sentence best characterizes the efficient mailing list. It is not to be a mere list of names. An efficient mailing list ought to be well clasified. Each group in the classification represents a certain class of customers, or prospective customers. One group is accustomed to buying a certain quality of merchandise, while the other group is accustomed to buying merchandise of a lower and cheaper grade. Another group of prospects can be relied upon to be immediate purchasers, while those in another group cannot be relied upon to buy until a year or more has elapsed.

Proper Classification

These and many other groups enter in the making of a complete mailing list, and they must be properly classified and filed away for ready reference. Some dealers have found it advisable to divide their lists into two classifications. One consists of the names of regular customers. The other is the prospect list, consisting of the names and addresses of people who must be consistently followed-up before they can be turned into faithful and consistent customers of the particular establishment.

It will be seen that the latter group will demand a different soft of letter from the one sent more or less regularly to the regular trade. Dealers have found that a different letter is usually required for each group, in order to make possible the most appropriate personal appeal.

Although a mailing list serves its purpose best when it brings a reasonable quota of immediate sales, the dealer should not lose sight of the fact that an efficient mailing list is really a persistent builder of future business. Once a man or woman has gotten his or her name on the mailing list every effort should be made to follow up the prospect consistently for as long a period as is necessary.

This is best illustrated by the experience of a prominent New York merchant who recently inaugurated a novel idea at his establishment. He instructed the members of his sales force to take the name, address and birthday of every child accompanying a customer to the store. This information is noted on a separate slip, which is handed to someone in the manager's office at the end of the day. The information is transferred to a card, which is filed away according to the birthday.

On each birthday, the child whose name is entered on one of these cards receives a handsome birthday greeting card from the merchant. This continues on each successive birthday, up to the time the youngster reaches maturity, and independent buying power. By that time the merchant has won over a regular customer, and a very faithful customer at that.

"When I first inaugurated the idea," the merchant told the writer, "people thought that I was making a flier for infant trade. Though that partly was my purpose, my chief aim was to begin building up trade for the next twenty years. I thought the best way of doing this would be to start building up my prospective list for twenty years to come."

At the time this article is being written the merchant has on file something like five thousand names of youngsters, each of whom receives a birthday greeting card, and each of whom is counted a prospective customer.

There are many other classifications. Some dealers have a separate file for those of their customers and prospects who are known to be salaried people, others who are in business for themselves, those who own their own homes, and so down the list.

Must be kept Up to Date

The mailing list should be constantly revised, so that changes in addresses, due to removals, can be duly noted. Names of those who have removed from the territory, the names of deceased persons, should be eliminated immediately.

One western concern uses a very simple method of continually checking up its mailing list. This firm has the most complete list of any in the same territory. It includes practically every purchaser in the district, all properly classified. The merchant can tell in a minute whether John Jones is a regular customer, whether he is a home owner, whether he owns an automobile, whether his business has progressed during the year, and whatever the size of his family is.

Commissioned Canvassers

After going through the effort and expense of compiling this list the merchant faced the problem of keeping it up to date in every respect. He thought the matter over and he devised the following plan; he divided the territory into districts. In each district he engaged the services of a correspondent, usually some professional man or woman who has lived in the particular district a good many years and who has gotten to be on intimate terms with a good many of the residents.

He sent printed blanks to these correspondents, offering to pay them for as many names and as much data about these people that they can send in from time to time. This method is now being used by a number of merchants throughout the country.

The correspondents are asked to furnish the concern with information concerning deaths, births, fires, weddings, and other personal events in their territories. The following instructions are printed on each blank:

"After the information reaches you this report should be made out at once and promptly mailed to us. When a citizen dies, we want to remove the name from our mailing list. When a child is born or a couple married, we want to congratulate the fortunate parties, and solicit their patronage for such goods as we can furnish. When a fire occurs we want to express our sympathy and offer our aid. Please get all this information to us at the earliest possible moment."

Having lined up his prospects, the dealer is by no means done with his work. A number of people who have been solicited by mail have made some purchases. The problem now is to hold this new trade. This is the final test of an efficient mailing list.

It never pays to lose sight of your customers or your prospects. There are certain things these people are going to purchase to-day, to-morrow or the day after to-morrow. You feel that you are entitled to the sale. If you only knew more or less definitely what these people will want to buy it would make it easier for you to direct your fire.

The Card Index System

This is not very difficult of accomplishment. A simple card index will do the trick. On each card is noted the name of the article or the kind of article each customer bought in the past, not forgetting to include such details as size and selling price.

This task can be delegated to your salespeople. The salesperson can record on separate cards the buying habits of each of his or her customers, and any additional information necessary—whether the customer is a charge or cash customer, whether he or she is a quality or quantity buyer, and whether he or she is very particular about special requirements regarding service and delivery.

There are some people who are actually insulted at the mention of a bargain sale, while others will buy heavily when a bargain sale is held. The latter will be very much interested in any announcement to the effect that low quality goods will be disposed of at very much reduced prices. Here are two different appeals to be taken care of by your correspondent.

This system has no application to those on your mailing list who have not as yet made any purchases at your store, but it is true that a great many prospects have gone through the store without making any purchases for the simple reason that they cannot find the article they want, or the quality of material that they desire particularly.

The "Want Slip" an Aid

With the aid of the "Want Slip" system this class of prospects can be turned into regular customers. This method has been tried by a number of dealers, in each instance with success.

The dealer supplies his salespeople with special "Want Slips." On each the salesperson notes the name and quality of article someone asked for but which could not be supplied. Any article called for and which is not carried in stock or is "out" must be entered on

(Continued on page 68.)

Equalizing Paint Sales Throughout the Year

Popular Sentiment for Spring Painting is Unfortunate and Difficult to Change—Even Distribution Would Result in Better Painting—Fall is Good Painting Season—Get Customers to Examine Buildings Thoroughly.

WHILE the effect of advertising campaigns and dealers' efforts have been rewarded to some considerable extent in balancing up the volume of paint trade and distributing it a little more evenly over the twelve months of the year, yet popular sentiment encouraged by years of practice has made the spring a more active season in paint selling than any other. The only way in which this tendency will be overcome is not to take business away from the spring season to spread it over other months of the year, but to develop new sources of business for other seasons in order to even up the demand. The aim of effort now being directed to increase paint selling is to show the dealer where he may develop new business instead of putting the paint stock away on the back shelf when the fall season approaches.

It is very unfortunate that the condition described has become so prevalent for when the big rush for painting comes in the spring not only are the dealers' capacities overtaxed but also these of the master painters, with the result that many people turn in to do their own painting in the spring when they cannot secure a painter and the tendency is to encourage amateur painting. Needless to say this tendency does not encourage the best results from painting. Efforts to even up the sale of paint throughout the year will also help to overcome this difficulty and the volume of paint sales will increase accordingly.

For fall and winter paint sales it is necessary for the dealer to make the most of every opportunity to make a sale. He and his store salesmen should be thoroughly acquainted with the uses to which paint may be put profitably during the fall and winter months and then make suggestions over the counter and arrange displays along this line.

Fall Months Good for Painting

September, October and November furnish splendid painting weather. In fact any time when the air is free from fog, mist, rain and snow, and whenever it is not too cold to work out of doors, conditions are right for good painting. Then also from a protective viewpoint the "paint before winter" propaganda is a good idea as it gives buildings paint protection when most needed. A house needs its protecting cost of paint more in the winter months than in any other season of the year. Many of your customers who were unable to secure painters to paint the house last spring have possibly postponed the work and now are saying, "Oh, we will leave it until the spring so the house will look nice and fresh for next summer."

Get after that customer and show him that it may be just as hard to secure painters next spring as it was last spring, and that, furthermore, paint is worth more in protective value during the winter than at other seasons. Recent advertising campaigns have been emphasizing the importance of paint for protective purposes, not only for beautifiers. Paint is needed most in the winter for protection so this is good argument to use on customers who are procrastinating.

It is said to be easier to keep dampness out of wood by applying the paint when the weather and surface are dry in the fall than it is to get the dampness out in order to paint it in the spring.

Indoor Painting Comes Into Big Season

Then of course winter is an ideal time for all indoor painting, varnishing, enamelling and staining, for the house is heated to a uniform temperature and thoroughly dry and the many inside jobs that create a demand for wall coatings, enamels, stains, varnishes, etc., are ready to be invited.

The can of paint is being recognized more and more as a necessity to every household and it is easy to sell the "touching up" specialties when the housewife is reminded that at this time of the year the home should be prepared for winter days when there is more entertaining than in the summer outdoor vacation months.

Business Not Invited Seldom Comes

The gospel of paint even as we know it today is distinctly a development of the past decade and it is through advertising so effectively preached that this gospel of paint has wrought wonders throughout the country. In sections where paint was seldom used, it is now a matter of course. In sections where it was generally used, the uses have been greatly extended, all due to advertising.

The year-round paint selling idea is both profitable and practical from every standpoint, —but will not just happen. It must be created by co-operative effort, judicious advertising by the manufacturer and merchandising hookup by the dealers.

Many customs of the past have been discarded because of the power of suggestion given us by advertisements which we read. The layman seeing paint advertised only in the spring of the year is naturally inclined to believe that spring is the right time for him to do his painting job, but this seasonable character of the paint trade can be changed by educational advertising, appearing continuously in season and out, showing the property owners that painting may be done satisfactorily in all seasons of the year.

To Test Grey Land for Oil Gas or Coal

Collingwood.—The Blue Mountain Gas & Oil Company, which has applied for a Provincial charter, proposes to make a test of the section of the county of Grey immediately west of Collingwood for oil, gas or coal. Leases and options have been secured on several thousand acres, and a contract for drilling operations has been awarded to Henry Cable, an experienced oil driller.

South Africa Wants Canadian Window Glass

The shipments from Canada to South Africa last year of window glass have brought many inquiries for possibility of regular supply, but the manufacturers are not now shipping overseas. The dealers and builders claim that the Canadian window glass is a much superior article to any ever handled. And it is perfectly obvious that at a higher price than that of Belgium or the United Kingdom, a fair amount would be purchased by a certain class of the trade, who are prepared to carry on a missionary work for the use of a better class article.

Canada and Britain Big Markets of U.S.

Washington. — Department of Commerce figures published to-day show exports from the United States to Canada during July totalled $98,484,423, while imports from Canada were $42,720,420. Exports to Great Britain were $128,894,945, and imports $46,523,662.

OPEN SEASON FOR FALL HUNTING IN ONTARIO

(Continued from page 43)

Shooting Deer, Moose, Etc., in Water Forbidden

No person shall hunt, kill, take or molest any deer, moose, reindeer or caribou while in the water.

Water Fowl

(1) **Hunting ducks, etc., from sailboats.**—No wild duck, goose or other water fowl shall be hunted, taken or killed from a sail boat, yacht or launch propelled by steam or other power, and no person shall hunt, kill, or wilfully chase or put to flight any wild ducks or other water fowl that are more than 200 yards from the shore or natural rush bed thick enough to conceal a boat, or from a water line bounding private property.

(2) **Illegal contrivances.**—No swivel gun, or gun of any kind of a larger bore or gauge than eight, and no contrivance for taking or killing wild swans, geese or ducks, known as sunken punts or batteries, shall be used at any time.

(3) **Blinds or decoys.**—No blinds or decoys for use in hunting duck or other water fowl shall be placed at a greater distance than 200 yards from the shore or a natural rush bed thick enough to conceal a boat, or from a water line bounding private property, and all decoys shall be removed from the water during the hours in which shooting is prohibited, and no person shall set out more than one flock of decoys and no flock of decoys shall consist of more than 50, and no two flocks shall be placed nearer each other than 100 yeards.

(4) **Limit of number of duck.**—No person shall take or kill more than 200 wild ducks in any one year. 4 Geo. V. c. 46.

(5) The purchase or sale of wild ducks, wild geese or other water fowl, snipe, quail, woodcock and partridge is prohibited.

Poisons, Traps and Contrivances

15.—(1) **Poisons, use of, prohibited.**—No person shall take or kill any game by the use of poison, or a poisonous substance, or expose poison, poisoned bait or other poisoned substance in any place or locality to which any game or any dog or cattle usually has access.

16. **Shooting at night.**—No person shall discharge any gun or other firearm at any game between sunset and sunrise. 3-4 Geo. V. c. 69, s. 16.

Shooting for Hire Forbidden

17. **Hired hunters.**—No person shall for hire, gain or reward or hope thereof, hunt, kill, or shoot any game, or employ, hire or for valuable consideration induce any other person so to do.

Eggs

18. **Eggs not to be taken.**—No eggs of any game bird shall be taken, destroyed or had in possession at any time by any person, except such persons as may hold a permit from the Minister to engage in the business of propagating game birds. 3-4 Geo. V. c. 69, s. 18.

Masks and Disguises

19. **Masked or armed persons in neighborhood of preserves.**—Any person being masked or disguised and carrying or having in his possession any gun or other firearm near any preserve or shooting ground, or, in close season, near any place where game is usually found shall be guilty of an offence against this Act. 3-4 Geo. V. c. 69, s. 19.

Automatic Guns

Automatic guns prohibited.—Subject to the regulations, no shot gun of the description known as "automatic" in which the recoil is utilized to reload the gun shall be used in the killing of game. 3-4 Geo. V. c. 69, s. 20.

(1) **Certain employees not to carry fire arms.**—No person employed in any lumber camp or in connection with the construction or maintenance of any railway or public work shall have in possession in the vicinity of such lumber camp, railway or other public work, any gun or other fire arms except as may be authorized by special license.

(2) **Nature of license to do so.**—The special license may be subject to such terms as the Minister may direct, and the ordinary hunting license provided for in this Act shall not be deemed to be a license under this section. 3-4 Geo. V. c. 69, s. 21.

Private Preserves—Propagation for Stocking Purposes

(1) **Protection of private preserves.**—Where a person has put or bred any kind of game upon his own land for the purpose of breeding and preserving the same, no person knowing it to be such game shall hunt, shoot, kill or destroy it without the consent in writing of the owner of the land.

(2) **Innocent Contravention.**—This section shall not prevent any person from shooting, hunting, taking or killing upon his own land, or upon any land over which he has a right to shoot or hunt, any game which he does not know or has not reason to believe had been so put or bred by some other person upon his own land. 3-4 Geo. V. c. 69, s. 22.

Trespass in Pursuit of Game

(1) **Entry on grain crops. Entering on lands after notice not to do so.**—No person shall at any time enter with any sporting implements in his possession, or permit his dog to enter, into any growing or standing grain without the permission of the owner, and no person shall at any time hunt, shoot or with any sporting implement in his possession go upon any enclosed land of another after having had notice not to hunt or shoot thereon.

(2) **Penalty.**—Every person who contravenes this section shall be guilty of an offence against this Act.

(3) **Notice to trespassers, how given.**—An owner or occupant of land may give such notice

(a) Verbally or in writing.

(b) **Sign-boards where hunting forbidden.**—"By maintaining sign-boards at least one foot square, on or near the boundary of the land intended to be protected, or upon the shores of any water covering the same or any part thereof, containing a notice in the following form, or to the like effect:—'Hunting or shooting is forbidden.' Such sign-boards to be not more than 80 rods apart." 4 Geo. V. c. 46.

(4) **Unauthorized putting up or interfering with notices illegal.**—Any person who, without authority, puts up or causes to be put up any such notice on any land of which he is not the owner, or to the possession of which he is not entitled, or who tears down, removes, injures, defaces, or interferes with any notice lawfully put up shall be guilty of an offence against this Act.

(5) **Common law rights preserved.**—Nothing in this section shall limit or in any way affect the remedy at common law of any such owner or occupant for trespass.

(6) **Marsh lands.**—For the purpose of this section, land, the boundary line or any part of the boundary line of which passes through a marsh or swamp, or any land covered with water, or land without sufficient trees or obstructions to prevent any post hereinafter mentioned being clearly visible from the nearest post on either side thereof, shall so far as respects that part of the boundary line which so passes be deemed to be wholly enclosed within the meaning of this Act, if posts are maintained along such part at distances which will permit of each being clearly visible from the next post. 3-4 Geo. V. c. 69, s. 23.

DECOTINT

The Sanitary Cold Water Paint for Walls and Ceilings

DECOTINT is an ideal wall paint—artistic, easy to apply and entirely sanitary. It is the most satisfactory finish on the market for decorating all interior wall surfaces.

It will pay you to stock and recommend DECOTINT. Your customers will be quick to appreciate the superior advantages of this economical wall paint and from among the twenty-two delicate DECOTINT colors, it will be an easy matter for the most critical among them to select the right combination for their particular problem.

Throughout the Spring months, a strong campaign of Consumer advertising will run in all important publications, circulating throughout Canada—Order your Spring supply of DECOTINT now and be one of those to reap the benefit of sales which this publicity is sure to create.

EQUALIZING PAINT SALES

(Continued from page 60.)

Avoid any suggestion that painting be done at one season rather than another, but push some item in your paint department every week.

Advertise continually in your local papers. Put the right kind of copy into small space and you will get them coming.

Get Customers to Inspect Property

One suggestion which has been followed by a Western Ontario dealer to stir up additional enthusiasm in the fall is to suggest to customers that they make a "close up" view of their premises in order that minor indications of the necessity for painting may be emphasized. When you find a customer showing any inclination towards painting, yet who seems inclined to delay the matter for superficial or trivial reasons, ask him to examine his buildings closely. Too many property owners stand across the street, look over their property, and say: "Oh, I guess it looks good enough, I'll let it go for another year." When he takes this attitude both of you lose, the one in business and the other in depreciation.

Selling paint for preservative purposes is like selling articles of labor-saving value, a distinct service to humanity is rendered, and it pays to sell the idea rather than to dicker over a matter of price.

Advertise to your customers the necessity of examining buildings closely. A little attention in the fall may render the house much more comfortable during the winter months and possibly help to keep the fuel bill down. This is an important consideration under present circumstances.

If paint is applied merely for appearances a man will be much more inclined to stand off and be pretty well satisfied with his home. It is therefore evident that this customer must be educated to use paint for protective purposes and then he will examine buildings much more closely and more often. He will then be convinced that it is not a good policy to wait until he considers he must paint. Thus the old fallacy about painting in the spring will be largely dissipated for property owners will see the advantage of painting whenever signs point to the danger of leaving the buildings exposed to climatic conditions.

Thieves Visit Canada Paint Co.

Toronto.—The premises of the Canada Paint Co. were broken into on Labor day and ten cases of paint had been piled by the doorway in readiness to be removed in a truck, according to the police.

William Collins, watchman of the factory, was making his rounds when he discovered that a sash on the window of the paint shop had been removed. On looking into the shop he claims to have seen the three men carrying a case of paint.

Collins hurried to a telephone and informed the police. An inspector was in the station at the time, and he motored to the factory in time to meet the men coming out of the building.

Natural Gas Shut Off in St. Thomas

St. Thomas.—The housewives of Belmont and of Westminster and Dorchester townships are up in arms over the closing down of the supply of natural gas, the shut-off occurring Wednesday evening. The difficulty arises through a number of consumers refusing to sign an agreement for a proposed increase in service rates from 35 to 85 cents per thousand feet, it is stated. The matter may result in a petition being forwarded to the Ontario Government asking for investigation of conditions and prompt relief.

Incorporations

The Canadian Edison Appliance Co., Ltd., Toronto, Ontario, has filed notice of incorporation with a capital stock of $50,000 by Arthur A. Tritsch, 171A Keele St.; William H. Wallbridge, 19 Melinda St.; William H. J. Tubb and others to manufacture safety razors, cutlery, etc.

With a capital stock of $200,000, Finch & Anderson, Ltd., Toronto, has been incorporated to manufacture automobiles, motors, engines, etc., by Frederick G. Finch, Frank G. Anderson and others.

How Hardwaremen Advertise Paints--No. 24

THE futility of using cheap grades of paint is again emphasized in this paint advertisement by The Manville Hardware Co., Ltd., Prince Albert, Sask. It illustrates a man in the frame of mind which is experienced at some time or other by practically every user of paint —namely debating the question as to whether it is better to buy good quality paint or poor paint at cheap prices. A paragraph is then devoted to barn paint, shingle stain, wall finish, stains and varnishes. It states that "the demand for both economy and appearance will be satisfied if the outbuildings are painted with — barn paint." In regard to shingle stain it says, "Preserve your shingles with shingle stain which not only beautifies but penetrates deeply into the wood, preventing decay." Prices are quoted on each line.

The Luxeberry Painter Says:

"The 'SAFETY FIRST' slogan should not only teach us to watch and guard against physical danger, but against the smaller foes that threaten our social life. I always think of this when buying varnish. Berry Brothers' brands are my 'SAFETY FIRST' refuge, their use is riskless."

This earned confidence is what makes the great and always growing demand for "Berry" Finishes.

WILLIAMS' SUPERIOR DROP-FORGED CLAMPS

THERE'S a Williams Clamp for every purpose.
If it's extreme strength and heavy service—Williams' "Vulcan" line provides both.
11 sizes, ¾ to 12½ inches capacities.
If it's general utility—without need for maximum strength—Williams' "Light Service" line will fit the case, 8 sizes, 2 to 12 inches capacities.
If it's stability and utility—medium service—Williams' "Agrippa" line offers the solution. 7 sizes, 4 to 18 inches capacities.
If it's Tool Room work requiring comparatively small openings of jaws—Williams' "Vulcan" Tool Makers' line should be chosen. 4 sizes, 1 to 4 inches capacities.
All are made of a special, high-grade steel. After forging they are submitted to a refining process, or "heat treatment," which increases their stiffness and strength and reduces the liability of springing.

Weekly Paint Markets

MONTREAL

MONTREAL, Sept. 10.—Prices on linseed oil and turpentine have been marked down this week and this is due to the better condition of stocks as regards supplies. Seed in the crushers' hands has improved in volume, and there is not a great deal of demand from consumers. Turpentine arrivals have been better and this has caused a decline of price. Otherwise there have been no reductions or advances for the other staple or special lines. Dry and oil colors are steadily firm. White lead in oil is quiet and there is little movement of putty. This is perhaps the quietest period this year for general paint commodities and there is not a great deal of likelihood that the next week or two will be greatly different. All in all costs are as high as they were, manufacturers assert, such reductions as have been made on one or two raw materials being offset by higher costs for many others. It is expected, too, that the new increased freight rates will have served to further increase production costs, new materials, as well as finished products, being subject to these increases.

Linseed Oil May Reach $1.50 Mark

Montreal.

LINSEED OIL.—Prices have again softened on linseed oil and this is due, in part, to the receipt of seed in quantities that are in excess of actual present requirements. At the same time some assert that stock is well distributed and that there is little excess quantity of flax in any one group of hands. Some believe that oil prices may reach the $1.50 level, while others think there will be little further recession. The higher transportation rates may have an offsetting effect on prices. Reports from the American Western States have not been so rosy as to this year's seed yield, and this has had the effect of introducing a new factor. Present business is of a limited nature and quotations range from $1.60 to $1.75 per gallon on the raw, with usual differentials.

	Imp. Gal.	
Raw—		
1 to 4 barrels	1 60	1 75
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 62½	1 77½
3 to 4 barrels	....	....

Turpentine Is Less But Basis Fluctuates

Montreal.

TURPENTINE.—Some jobbers are in receipt of larger stocks of turpentine and as a consequence they have reduced prices to the trade. The barrel quotations are now ruling as low as $2.40 per gallon, while others are above $2.50. Tendencies are affected by the arrivals from week to week, but there has been, for some weeks, a lowering of the basis appreciably, and it is probable that still further reductions may be made.

	Imp. Gal.	
Turpentine—		
Single barrels	2 40	2 50
Small lots	2 50	2 60
(Packages extra.)		

White Lead in Oil Continued on Basis

Montreal.

WHITE LEAD IN OIL.—The reported business on this commodity is limited, but this is looked for just now. Supplies are available in fair quantities and the undertone is changed but little, although outside pig lead is easier in price. While there is a favorable tendency on the ground in oil product, owing to the lower prices prevailing on linseed oil, it is claimed that the relation of this to the cost of producing the finished product is not large and some confidently assert that there will be no lower price for the immediate future. Five ton lots are still quoted at $19.50 per 100 lbs., ton lots at $20 and smaller quantities at $20.35.

Putty Holds Steady; Sales Are Limited

Montreal.

PUTTY.—Trade requirements do not seem to be great at the moment and this line is quiet. Sales are made on a unchanged basis and there is ample stock to meet trade needs. Whiting, according to some reports, has been more readily available, although Hardware and Metal understands from a very reliable source that the English whiting workers are still not producing as they were before the war. As this whiting is very extensively used for making putty here, the dependence of jobbers on the product is considerable.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Change May Be Made, But Glass Now Quiet

Montreal.

GLASS.—The market conditions as at present existing are quieter than they have been. There is some movement of supplies to the trade, notwithstanding, and the outlook for activity this fall is quite encouraging. Discounts on box glass remain at 15 per cent. to the trade, but there is a possibility that a change may come in the near future, in which event there would be an advance. It is expected that the revision in railway freight rates will have some effect on price basis.

TORONTO

TORONTO, September 11.—The paint market is reported a little quieter this week, but volume of sales for the time of the year and the fact that many of the travellers are off the road is said to be very fair. Many out-of-town customers are up for the Exhibition this week.

The effect of the changes in the freight rates have not yet been manifested, but it is expected that it is liable to affect the paint market and will likely cause some changes in glass prices.

Prices on white lead in oil and putty are firm, with tendency to be rather higher than lower, and fall orders are good for these lines. Turpentine is unchanged and lower prices are quoted on linseed oil on which, however, latest reports show a firmer tone, due to revised estimates and reduced quantities of flax crops. Glass is firm and indications are for higher rather than lower prices.

Prices Firm on White Lead

Toronto.

WHITE LEAD IN OIL.—Prices on white lead in oil are unchanged and appear steady. The demand is normal and little change is expected for a while unless the higher freight rates cause a readjustment. Quotations are as follows:

White Lead—Pure, tons, $20.35, less, $20.70 per 100 lbs.; Elephant, genuine, tons, $20.85, less, $21.20 per 100 lbs.

Ready-mixed Paints Firm and Unchanged

Toronto.

READY MIXED PAINTS.—The sales of ready mixed paints have been good,

"Save the surface and you save all" *Paint & Varnish*

One Glidden Kind Calls for Another

The result is a steady Glidden demand. A good reputation created by constant advertising brings in the first orders. Then good results, coupled with *continued* advertising, keeps them coming.

Glidden Endurance Paint is a *new* kind recently added to the Glidden line. The same Glidden quality that vessel owners, and manufacturers generally, have used for nearly 50 years is now available to the home owner.

If you are not already familiar with our special paint proposition, write us to-day.

THE GLIDDEN COMPANY, LTD., Toronto, Ontario
Branches: Montreal and Winnipeg

If interested tear out this page and place with letters to be answered.

and with the fall a good deal of outdoor painting is expected. Prices hold firm without change.

Putty Prices Unchanged and Demand Good

Toronto.

PUTTY.—The demand continues good and good sales for fall are reported. There appears to be no chance of lower prices and whiting is still scarce and high in price. The following prices hold good.

Putty—Standard, in 100-lb. drums, $8.20 per 100 lbs.; 25-lb. drums, $8.55.

Rosins Show Easier Tendency

Toronto.

ROSIN.—Like turpentine, rosin is affected by rates of exchange and an easier exchange has the tendency to make lower prices on rosin. Stocks are fair but not heavy, and quotations are 10½ to 10¾ in barrel lots.

Glass Prices Firm; May Advance

Toronto.

GLASS.—Window glass prices are firm with every indication of advancing before long. It is expected that freight increases will mean an addition to prices and supplies at plants do not seem to warrant any hope of prices being any lower at mill. Discounts remain at 15 per cent. off list for case lots in single and double diamond.

Linseed Oil Lower But Prices Stiffening

Toronto.

LINSEED OIL.—Prices have been on the decline, due it is said, to lessened trading and better supplies, but the latest reports show that market is stiffening, due partly to reports to hand indicating that the American flax crop was over-estimated to the extent of two and a half million bushels. The higher freight rates will also have an effect of an added cost to the price of oil, so it is hardly regarded as likely that prices will go any lower than at present and they will advance as the market gets firmer. Present quotations are:

	Raw	Boiled
1 to 2 barrels, gal.	1 80	1 83
3 to 5 barrels, gal.	1 79	1 82
10 barrels and over	1 77	1 80

Turpentine Unchanged; May Go Higher

Toronto.

TURPENTINE.—Prices are unchanged on turpentine from last week, and it is thought that the bottom of the decline has been reached for the present. Higher freight rates will add, it is expected, another 2½ cents per gallon more to cost of turpentine and stocks on hand are not over large. Quotations are as follows: In barrel lots, $2.50 per gal.; 5 gallon lots, $2.65.

Review of Markets and of World's Production of Tin

About Half of World's Supply Mined in the British Empire

MR. FRANK MERRICKS, C.B.E., an English authority on tin, says that about one-half of the worlds supplies of tin is mined in the British Empire, the chief producing country since 1891 being the Federated Malay States, says the "Daily Metal Reporter." The other tin-producing countries of the empire are Cornwall, Nigeria, Australia and South Africa. The principal foreign tin-producing countries are Bolivia, the islands of Banca and Billiton in the Netherlands, East Indies, Siam and China. Prior to 1891, the tin output of the empire was confined to Australia, British Malays and Cornwall, the value of the Australian production being £9,879,539, while that of British Malaya was estimated at £5,400,000. The value of the Nigerian output is becoming important, and to-day exceeds that of Australia. The output of tin in British Malaya has fallen during the last few years, and in 1919 amounted to only 36,867 tons, as against nearly 50,000 tons in 1914. Simultaneously tin production in Bolivia, Siam and China has increased, so that the proportion of the world's tin supplies produced in the British Empire is not so large as it was until quite recently. The empire's tin output, however, is still more than ample for her own needs, and must also be drawn upon by other countries that are large users of this metal. Most of the tin mined in British Malaya is refined in the smelters of the Straits Trading Company at Singapore. These tin smelting plants are the largest in the world, and deal not only with the produce of the F.M.S., but also with ore shipped to Singapore from Siam, the Netherlands, East Indies, South Africa and Australia. The exports of tin from Singapore are consequently much greater than the actual production of British Malaya.

In Nigeria the existence of tin on the Bauchi plateau was known to the natives long before the arrival of the British, while it became known to Europeans as long ago as 1885, at which date, however, the country was too unsettled for prospecting. An official mineral survey was undertaken in 1903, tin mining was started in 1906, exports of tin concentrate were first recorded in 1907, and in 1918 82 tin mining companies were operating in the northern provinces of Nigeria, mostly on the Bauchi plateau. Up to the present, the highest recorded export tonnage for any year is 9,966 long tons of ore in 1917, the figure for 1918 being 8,29 4tons. In Australasia, Tasmania is the largest producer of tin, followed by New South Wales and Queensland, while small quantities are obtained in Victoria and in the northern territory. A large proportion of the output in New South Wales is won by dredging in the Tngha, Emmaville and Glen Nines divisions. Bolivia is the second largest tin producing country in the world. Before the war, most of her output of "barilla," or tin concentrates, containing 60 to 65 per cent. of tin, went partly to Germany and partly to the United Kingdom for smelting. In 1919, over 27,000 tons of tin ore were imported into this country from South America, the average annual output being about 8,300 tons. The ore is sent to Singapore for smelting, and the product comes into commerce as "Straits" tin. China's production is also reported to have increased considerably in recent years. The chief locality of production is Kochiu, about 22 miles from the French railway from Yunnan to Haiphong. The ore is smelted mainly in native furnaces to a metal of about 90 per cent. to 92 per cent. purity, and is then sent to Hong Kong, where it is refined, part of the product being returned to China for consumption there, and the remainder being exported.

KEEP MAILING LIST ALIVE

(Continued from page 59.)

one of these slips, and the same handed in at the office every morning. The name and address of the person asking for such article, or articles, is also noted.

In the office each slip is checked up. It is also determined whether the article is in any of the following groups: "Don't Want," "Can't Get," "On Order," "Will Order" or "In Stock." This information is transferred to a weekly report, and checks made against each article, to determine the number of times customers have asked for them during the week. If there is a sufficient demand every effort is made to put the article on sale immediately, and letters are directed to those who desire to purchase them.

One dealer who has been very successful with this system states:

"Our Want Slips have provided a sensitive gauge to public demand. They have enabled us to add to our stock many a new line of merchandise which was not carried before and thus enabled us to satisfy many an increased demand. Such a policy is advisable for every store, big or small, not only because of the profit derived from the sale of the added merchandise, but—what is vastly more important—because of the prestige it builds for the institution, stamping it as the place 'where you can get new things first.' The advertising value of such an impression can scarcely be overestimated."

TORONTO CANADA

Unusual Selling Points

Carbalox is a product of the electric furnace so fast and cool cutting as to be particularly adapted to the rapid cutting and polishing of metals.

Being available in handy rolls, it reduces cost of production because the workman, keeping a roll at hand, uses as desired without waste or loss of time in cutting.

Little Visits Beatty Bros. Limited Bulletin With BT Dealers

Interior of Store, Turnbull & Cutcliffe, Brantford

Window Display, Turnbull & Cutcliffe, Brantford

Daisy Churn

Handle Many BT Products

Turnbull & Cutcliffe, of Brantford, Ont., make excellent use of the BT lines in their business.

As will be seen from the photographs, they stock five different types of BT Washing Machines; Pumps; Wringers; Churns and Butter Workers. They have now been handling BT products for over three years — in increasing volume each year.

They are noted for good window displays and on several occasions have had their windows shown in the hardware trade papers.

As will be noted, their window carried a display of the BT Daisy Churn and Butter Worker when these photographs were taken.

The Daisy Churn

The Daisy Churn is the standard article on thousands of farms.

All over Canada—and abroad as well—Hardware Dealers are selling them year by year. For its popularity there are many reasons.

The dealer likes it because it is easy to sell and remarkably easy to put together.

The customer is attracted by the beautiful finish in the first place and then becomes a firm friend because of its working qualities. In addition to the beautiful oak barrel and the greatest care and skill in every detail of its manufacture, the Daisy has a great advantage in the patented vent. This saves the operator from stopping the churning to let off the gas.

Place your churn orders now for spring delivery. Oak staves are scarce and it will pay to make sure of your spring stock.

Beatty Bros. Limited

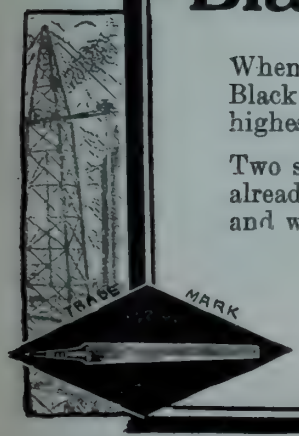
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.
Owned and Operated by Nicholson File Co.

Stephens'

REGISTERED TRADE MARK

Silkstone Flat Wall Colours

For beautifying homes all the year round. Silkstone is not merely a "spring re-decorator," but an all-the-year staple that housewives are buying for the home whenever the spirit moves them to "do the walls."

The housewife is "sold" on Silkstone because she knows that it is cheaper than wall paper and can be washed without rubbing off. The soft, silky finish has an appeal for the home-lover. Silkstone out-wears all other wall coverings.

The economical side of Silkstone; its beauty and its durability and gratifying service are all factors in the splendid sales it enjoys. It sells profitably—learn what's in it for you in an agency.

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

"Another SIMMS Paint Brush"

That is the experience of dealers who handle the famous line of SIMMS Better Brushes.

The customer who has once used a SIMMS Brush, will not be satisfied with any other make.

TRADE SIMMS SET IN RUBBER MARK

Paint and Varnish Brushes

are popular because they give real service to the user. The indestructible rubber setting, reinforced by a steel ferrule, holds the bristles so that they CANNOT loosen and come out.

That is why every purchaser of a SIMMS brush is a sure repeater—and THAT is why the SIMMS line is the most profitable line of brushes you can possibly handle.

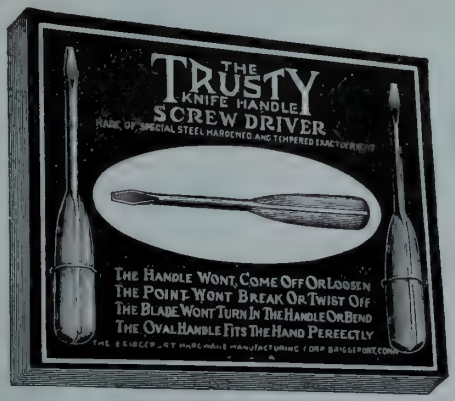
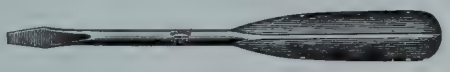
"A Popular Pattern at a Popular Price"



Knife-Handle Screw Drivers are the most popular of all. But the well-known makes are now too high priced for the average user.

Thats why we brought out THE TRUSTY —a New Knife-Handle Screw Driver which fills every demand for a Knife-Handle Driver at a *popular price.*

It is lighter and better balanced than the higher-priced patterns, made very strong, blade-tempered from end to end, and practical for every purpose, except hammering on the butt end, which is impractical for any driver, as it makes the end very rough for the hand.



The TRUSTY is TRUSTY—The handle won't come off or loosen. The point won't break or twist off and the blade won't turn in the handle or bend. The oval handle fits the hand perfectly.

Packed in both *regular* and in *handsome display boxes* which display the goods to the best advantage and make quick sales.

Please order through your Jobber.

You are in the very heart of a great, big, profitable market for Columbia "Hot Shot" Dry Batteries

FALL tractor plowing—silo filling—grinding—woodsawing—pumping—think of the thousand and one all-round uses of a gas engine on the farm! Every one of these engines *must* run on electric ignition, and the need is for the new and better *battery* ignition—the Columbia "Hot Shot" Current.

A big market for Columbia "Hot Shot" Ignition Batteries, and the profits are yours for the taking. Columbia "Hot Shot" is **a single dry ignition battery of many cellpower** which is the one adequate, enduring and economical source of ignition current. Stock up with "Hot Shot" Nos. 1662 and 2562, and increase your trade with the Gas Engine users.

Canadian Made for Canadian Trade.

TRADE M MARK

Roofing and Building Papers That Continually Boost Your Store

Building Papers, Tarred Felt, Sheathings and Tar Products, and Wrapping Paper of all kinds that give service in use, reflecting credit on the dealer and inspiring confidence in all the lines he sells—that's the McArthur line.

Drop us a line for an interesting little booklet on Roofing Materials. It will tell you of each one of our lines—reasons why they sell, and serve the consumer so that you hold his future trade.

We cannot tell of all the lines here, but for instance, "Black Diamond" Tarred Felt is pure wool tarred roofing felt, from selected woollen rags saturated with pure coal tar, producing the most durable roofing felt possible to make.

PINK'S LUMBERING TOOLS

The Standard Tools in every province of the Dominion, New Zealand, Australia, etc.

We manufacture all kinds of lumber tools. Light and Durable.

LONG DISTANCE PHONE No. 87.

Send for Catalogue and Price List.

Sold throughout the Dominion by all Wholesale and Retail Hardware Merchants.

THOS. PINK COMPANY, LIMITED

Manufacturers of Lumber Tools

Pembroke **Ontario**

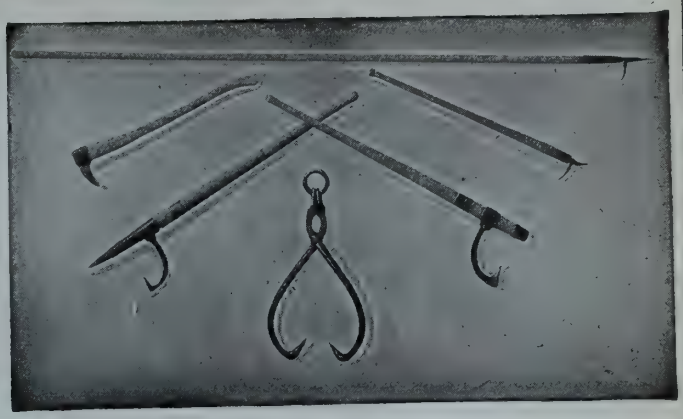

Fig. 117

"McDougall" Well Pumps

A Standard in Every Community

This represents one of our best features in Well Pumps. The cog gear head is a distinct advantage over pump heads where links and friction guides are a necessity.

A minimum amount of labour for producing maximum results is a distinct selling advantage.

Manufactured by

The R. McDougall Co., Ltd.
Galt, Canada

The Megantic Broom Mfg. Co., Ltd.

Manufacturers of Brooms and Clothes Pins

Lake Megantic, Que.

Our clothes pins are made and designed to stay on the line. And they do. Dealers know that by the way housewives are asking for them. Made of the best wood, that insures against splitting. Splendid profits and customers' satisfaction assured to the dealer selling them. Write our nearest agent.

AGENTS: Bovin & Grenier, Quebec. Delorme Frere, Montreal. J. Hunter White, St. John, N.B. H. D. Marshall, Ottawa. Harry Horne Co., Toronto. Tomlinson & O'Brien, Winnipeg. Oppenheimer Bros., Vancouver. McFarlane & Field, Hamilton Canada. Pyke Bros., Halifax, N.S.

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

If interested tear out this page and place with letters to be answered.

An Axe is as Strong as its Handle

STILL'S

—will give you a stronger working tool, for **STILL'S HANDLES** are made from the best of Canadian Woods.

The sale of

STILL'S HANDLES

far exceeds all other makes.

There's a reason.

Axe, Pick, Sledge and Hammer Handles, Cant Hook and Peavie Handles.

It pays to sell **STILL'S.**

ARROWHEAD SAWS

Vanadium Steel

Are called "Standard of Canada" because they have been the choice of skilled workmen since they first entered the market.
Arrowhead Saws are perfectly tempered, hang right, are set right and sell right. Cross-cut Saws, Hand Saws, Buck Saws, and Circular Saws.

Our Catalog is a guide to profit; your name and address will bring it.

Ontario

TRIMO

The Trimo Pipe Cutter can be converted into a one-wheel or three-wheel cutter by substituting wheels for rolls or rolls for wheels. When making changes care must be taken to replace cotter pins which must always be in place to give proper service.

The Trimo Monkey Wrench is built for strength, especially adapted for heavy work and railroad use.

Trimont Mfg. Company

How to Save Gasoline

The No. 1 Fire Pot has the highest degree of heat generating power with the smallest consumption of fuel. The saving in gasoline alone will soon pay the cost of the Fire Pot. The No. 1 is the greatest general utility Fire Pot made and is favorably known to all mechanics. The tank is made of seamless drawn steel, with large funnel and filler plug, and the powerful burner is swiveled so that the flame can be placed where needed. Jobbers supply at factory price. Send for catalog.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 125 and 500 lb. containers

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

HARDWARE AND METAL

is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

O.P.W.

Trade Mark Registered

O. P. W. boosts the paint sale,
Never let it wait;
Now's the time to order:
Hurry up the freight.
Or'er now by 'phone or mail,
To delay is tempting fate.

"Save the surface and you save all" *Paint & Varnish*

"Paints and Varnishes for Every Purpose"

Inside Information for Sales of Outside Paint

Many of your customers are putting off outside fall painting. Many of them will put it off until too late, unless you jack them up. See to it that they get their O.P.W. now for outside work. Call their attention to the jobs that must be done in the short remaining season.

With the completion of outside painting and the beginning of cold weather things will be breaking just right for you to encourage inside decoration. By the way, have you ordered your inside paints and finishes? Are *you* prepared?

O.P.W. Dealers Prosper—Are You One?

"HEATRAY"

—the National ELECTRIC heater that's a producer of big sales

EVERY "Heatray" that has been sold is selling several more because of its absolute dependability and its efficiency.

The "Heatray" makes every corner a cosy corner. It is portable, adjustable and convenient, meeting in every way the needs of the Canadian people for an auxiliary heater in the home.

Are you taking advantage of our splendid National advertising? The "Heatray" was demonstrated to hundreds of thousands of people at the Canadian National Exhibition.

If your jobber can't supply you, write direct.

TORONTO - CANADA

A Sales "Stunt" *that turns the trick*

A progressive general merchant of the West, who has made a notable success in the retail business, passes along this simple little selling scheme, that he has tried out with good results.

On top of his counter-case beside the cash register he has arranged a miniature home scene.

A doll's house with the front wall removed shows the interior four rooms nicely arranged with doll's furniture, and, in each room, a cut-out cardboard figure of the O-Cedar maid is seen polishing some article of furniture or using the O-Cedar Mop on the floors and woodwork.

At the side of the house, stands the garage; with the little toy auto standing at the door, a bottle of O-Cedar back of it, and the O-Cedar maid with her pleasant smile putting the finishing touches to its gleaming surface.

This merchant says the whole arrangement only took him a few hours to make, but—this little pantomime that he has staged by his cash register (where the customer invariably sees it as she waits for change)—has sold hundreds of dollars' worth of O-Cedar Polish. It acts as a reminder and silently suggests the use of—O-CEDAR.

HARDWARE AND METAL, September 18, 1920. Volume XXXII., No. 38. Published every Saturday at Toronto. Yearly subscription price, $4.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

Tighten the Windows and Doors

WITH coal hitting around the $17 and $18 mark there will be less carelessness among householders in the matter of weather-stripping their windows and doors. It is just as important to prevent heat from escaping and cold from entering as it is to shovel coal into the furnace.

An Ounce of Prevention is Worth a Pound of Cure

To display weather strips now is to get your customers thinking of them early. Sort your stock with the following lines: **"Frost King," Felt and Wood, Regular and Clincher Type, Bronze Strip 1¼ inches wide.**

We also carry a complete line of door checks, including the **"Corbin," "Yale and Towne," "Sargent" and "Richards-Wilcox."**

"America" Trolley Hanger

Largest Hanger Sales in the Dominion

The America is easily the most popular for warehouse, factory, garage and barn doors. America operates in the Hatch Trolley Track—the only track supported by the famous corrugated track brackets. Much stronger and better than the plain track brackets.

The America moves smoothly on tandem trucks and hardened roller bearings. Apron 6 in. long, 3¼ in. wide. This efficient hanger appeals to customers because of the simple adjustments, anti-friction, forged steel yokes, and ability to stand hard usage.

With each pair of Hangers are included two End Caps, Bolts for Hangers and Lag Screws for Brackets.

Packed one pair in a box complete with Screws and Bolts.

Weight per dozen pairs, without Brackets, 95 pounds.

Plymouth Rope

Manila Fiber Is a Product of the Wild Banana Plant Grown Exclusively in the Philippine Islands

The first essential in a rope is good material; second, good workmanship and a knowledge of rope construction that the fiber may be properly combined into a good whole, possessing strength, utility and service.

Manila fiber which is grown exclusively in the Philippine Islands is the best material for rope-making from the standpoint of strength, flexibility and durability. The plants are cultivated as illustrated above, and after about three years' cultivation some of the stalks are ready to cut. The native operations of cutting, stripping and cleaning the fiber for commercial purposes will be illustrated and described consecutively in a series of educational advertising of which this is the first.

Because of its dependence upon soil cultivation, moisture, sunshine and the degree of care exercised in the processes of gathering and cleaning, the quality of Manila fiber varies to a considerable extent, so that while a rope may be called "Pure Manila," it is not a safe indication of quality. The quality of Plymouth Rope is high-grade and is uniformly maintained.

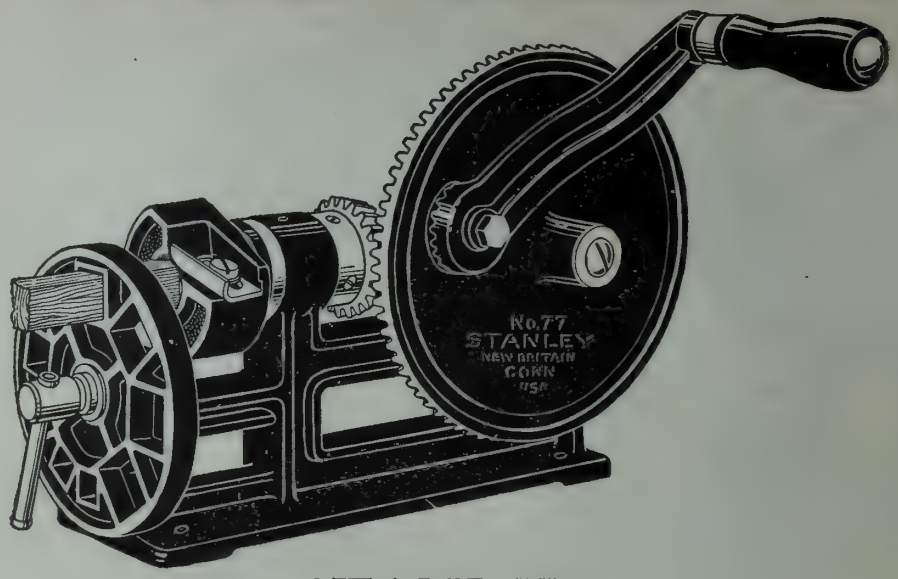
Stanley Tools



STANLEY
DOWEL AND ROD TURNING MACHINE
No. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them, and, furthermore, of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy.

A Profitable Tool for you to Carry.

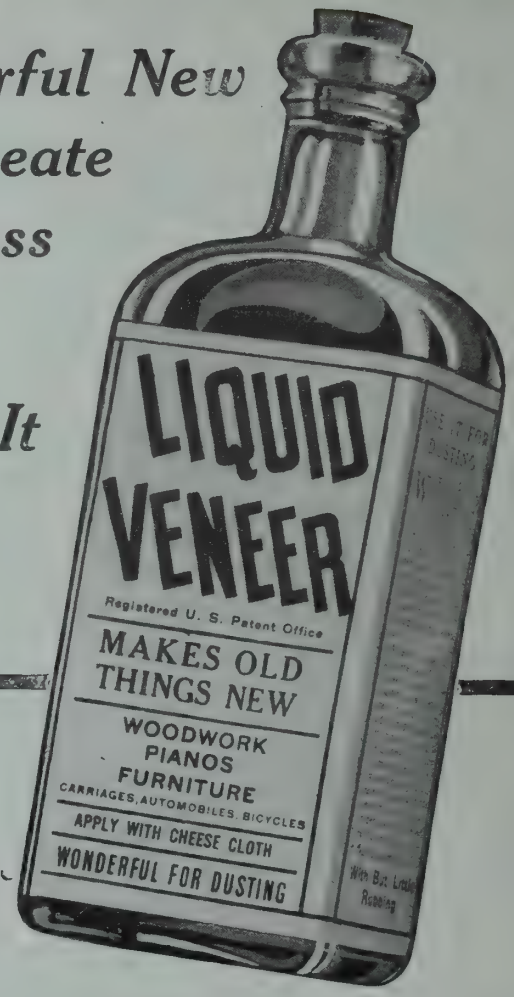
LIQUID VENEER

This Wonderful New Use Will Create More Business For You!

Read About It



Advertised More Heavily Than Ever This Fall!

MADE IN CANADA

This is the big, new message to Canadian housewives, **your customers:** Treat **any** floor mop with Liquid Veneer. It will instantly convert it from an oily, greasy mop into a wonderful **cleansing, polishing** and **sanitary** device. Liquid Veneer neutralizes and overcomes the oil. It leaves floors as spotlessly clean and beautifully polished as your piano.

Make **any** mop a Liquid Veneer Mop! Once your customers see the wonderful improvement in their floors resulting from the use of Liquid Veneer, they will use **nothing else.** Get them to try it.

IMPORTANT! Any customer desiring a new mop should be shown the new Liquid Veneer Mop. It sells itself. No mop has so many wonderful improvements. Let us send you descriptive matter.

If you want **free** display material for window display, write us. You can make a beautiful Liquid Veneer window that will instantly stimulate business.

GOODELL-PRATT

1500 GOOD TOOLS

All-Steel Mitre Boxes

We have been able to secure many new features in these All-Steel Mitre Boxes which are beyond the reach of the Mitre Box constructed the usual way.

The first point of superiority is—no breakage, therefore no expense for repairs.

They are built upon the same principle as the great Steel Bridges—with rigid, interlocking trusses which take the strain longitudinally—the strongest construction in the world.

At the same time, this Mitre Box is more convenient in use and the work can be accomplished more rapidly and easily than with other Mitre Boxes. For example, the saw when elevated is held in place by a spring lock, instantly released by a slight downward pressure. The lever carrying the saw can be swung from 45 to 90 degrees either right or left. It locks automatically in the right place. A length gauge can be quickly set in position for cutting duplicate pieces of any length up to 20 inches.

These are some of the striking advantages of Toolsmith Mitre Boxes—one of the Goodell-Pratt line of small tools including more than 2,000 items—the most famous line of hand tools in the world.

More Sales With Butterfield Tools

They Satisfy

Sales of a well-known, strongly established product like Butterfield Tools mean much more than the single sale accomplished. Butterfield Tools are marked and a connection is formed between the well-satisfied consumer and the store where he bought the satisfaction. He comes back. He buys Butterfield again and again, and his confidence in the store leads to the purchase of other lines.

Butterfield superiority has a multiplying effect on the merchant's business.

HULL IN 1851

Story for Week Dated September 18, 1920 Being No. 23 in the Series

Interior of the Eddy Co. Mechanical Pulp Mill

THIS is the interior of the building illustrated in last week's issue of this series. The three machines in the foreground, which look like siege guns elevated for action, are three of the great grinders. Between the two nearest grinders are piled logs of spruce and balsam which go into the machines solid, and come out liquid. The grinders get hot and steam as if boiling during the process, but the heat is due only to friction. Great stones, like millstones, do the grinding. There are no iron teeth of any kind. The logs are simply pressed hard by hydraulic rams against the revolving grindstones, and in a minute or so the become pulp. The stones do such hard work that they last only six or seven months—a year at the very longest. From the grinder the pulp goes to the strainers which free it from rough particles. It can then be pumped away for use in the manufacture of paper, and indurated ware after undergoing further improving processes

For This Great Building Year—

It Keeps Cold Out
It Keeps Heat In

That's the big question that every thinking dealer should ask when his customer takes his purchase under his arm and goes toward the door. The amount of one sale may be small, but the profit one customer may bring into your store throughout the years is what really counts in building your business.

STAR HACK

"Will he come back again?"

EVERY time you include extra satisfaction in the package of goods you sell a customer, you have wrapped up the seed of repeat sales that will grow into a larger business.

Star Saws in the famous green box have been the standard hack saws in the hardware and supply trades for 37 years, because no other saw begins to give the same results in cutting all kinds of metal under all kinds of conditions.

For years Star Blades have been as staple in the trade as sugar in a grocery store. They are the kind of business-builders on which wise dealers always standardize.

Star Hack Saws are now sold by Clemson Brothers, Inc., Middletown, N.Y., who have made these famous saws since the beginning in 1883.

This new policy of selling our own product enables us to give both trade and consumer a more direct and effective service than ever before. We stand behind our product to help you in every way to make it profitable.

Our large national advertising on Star Hack Saws, which has been making these saws more than ever the largest selling blades, will be continued on a larger, broader scale than ever the coming year.

When ordering through jobbers, be sure to specify "Star" and accept no substitutes. Send any inquiries or direct orders to our factory, address and they will have every attention.

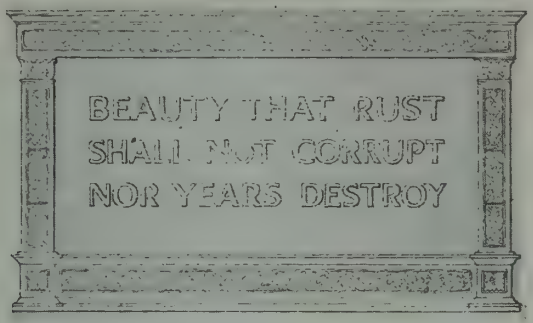
Detail of Carnegie Library, San Francisco, with Armco American Ingot Iron window grill.

ARMCO

TRADE MARK

AMERICAN INGOT IRON



THIS iron comes as a new inspiration to the metal craftsman.

It says to him that the beauty he has created and the work he has fashioned with infinite care will endure for many times the life of other similar metals.

The purity of American Ingot Iron is a strong defence against rust. Exposure to rain, snow, cold, and heat—the natural foes of iron—proves that Armco withstands the severe attacks.

No other commercial iron is so dense in texture. Impurities separate the molecules of ordinary iron and permit the easy access of corrosive elements. Such impurities are practically eliminated by the process of making Armco American Ingot Iron, and it is extremely difficult for rust to eat its way into and beneath the surface.

Carnegie Library, San Francisco; all sheet metal and iron grills on windows are of Armco Brand. Geo. W. Kellam, Architect.

This purity also makes it most suitable for welding, for receiving enameling coats, and for the transmission of electric current.

Our research and engineering departments will be glad to tell you whether or not you should use Armco Brand of American Ingot Iron.

THE AMERICAN
ROLLING MILL COMPANY
Middletown, Ohio

American Ingot Iron
Resists Rust

The trade-mark ARMCO carries the assurance that products bearing that mark are manufactured by the American Rolling Mill Company with the skill, intelligence, and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for them. The trade-mark ARMCO is registered in the U. S. Patent Office.

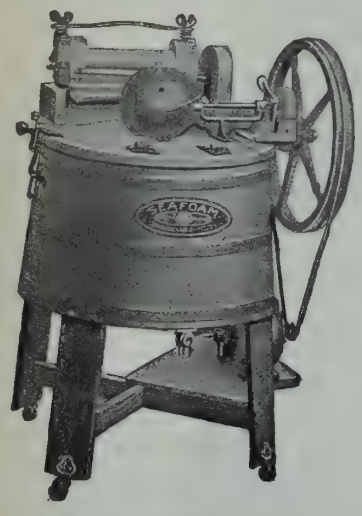
Quality Eventually Wins

The Seafoam Electric
WASHING AND WRINGING MACHINE



STYLE "A"--DOLLY TYPE

REVERSIBLE WRINGER. WASHES AND WRINGS AT SAME TIME OR SEPARATELY—ALL BY POWER.

1-6 H.P. Splash Proof Motor.

Style "B"—For Engine Drive.

Time proves whether confidence in an article is justified. Advertising will create a demand, and the more spent for publicity—undoubtedly the greater the demand. But unless the article advertised is truthfully presented to the buying public, and has real value and merit, it will not survive the test of time. This applies particularly to household utilities, which are expected to do the work demanded of them, efficiently and for a reasonable length of time, and to be free from intricate and delicate parts likely to get out of order.

Our thirty-five years' experience has taught us what home laundry equipment must be to sell and satisfy—to give value for every dollar spent. Washing machines are not parlor ornaments. They are labor-savers, and must be priced to be within the reach of the average householder.

Our assortment embraces washing machines for hand power, water power, electric power, engine drive—are designed to meet the demand of every purse—are common-sense, practical washers of established reputation. They are simple, durable and practically trouble-proof. Jobbers sell and recommend them.

The man who made this blue-print wants your advice

Behind every blue-print drawing lies a long series of experiments to get it right.

Wherever metal parts are being made to fit together or wherever repair work is being done on them, these blue-prints are as indispensable as a time table to a traveler.

As a far-sighted merchant you ought to know something about these blue-prints, particularly those of mechanisms being built or repaired in your trading area.

Very often you will find that your expert advice is wanted on screw-thread practice — to determine how to get the right screw cutting tools for the right job.

If you or your outside salesman can sit down with engineers or repair men and tell them what *they* can do with the various types of threading tools in the GTD line to get better machine building or repairing — you will develop a desirable class of trade which many good stores are not now reaching.

WHEN all advertisers demand their money's worth, all publications will provide circulation reports verified by the Audit Bureau of Circulations.

It is one of the mysteries of the advertising world that while all manufacturers demand verification of weight and quality in the material purchased, some of them still buy advertising space without knowing what they are paying for.

Such advertisers, however, are now exceptional. Most of them demand verified A. B. C. circulation statements before placing contracts.

In the case of Hardware and Metal the demand is immediately met. Hardware and Metal is the only hardware member of the Audit Bureau of Circulations in Canada.

May Absorb Increase in Freight Rates

Non-Commital Attitude of Many Manufacturers Until Full Effect is Established—Advance on Bar Iron, Mild Steel and Nails This Week May Presage Further Advances Due Partly to Freight Increase—40 Per Cent. Increase Amounts to About 52 Per Cent. on Shipments From U.S. on Which Exchange Figures

THE Dominion Government has declined to grant a stay in the order of the Board of Railway Commissioners granting the Canadian railways the right of increasing their freight and passenger and other rates, so that all obstacles have for the time being been removed and the higher rates have been in effect since the beginning of this week. However, the act provides for an appeal to the governor in council and judging by opinions held by manufacturers, jobbers and retailers in some parts of the country, notably the West, this plan may be followed.

For the present the rates are in effect and it is as yet difficult to say to what extent the higher rates will affect prices of hardware commodities. A number of wholesalers are inclined to the opinion that the full effect of the increase will not be felt for some weeks yet, possibly a month, when they will know to what extent the new rates will affect their costs.

As to what effect the higher rates will have on trade in general is largely a matter of conjecture, according to a statement made to Hardware and Metal by the representative of a large Canadian steel goods manufacturing firm. Insofar as the effect on prices he stated there was no question that the products of his company, which form a number of the basic lines of the hardware trade, will have to bring higher prices. In his case the bulk of goods are sold f.o.b. mill and the firm does not therefore figure the freight on the finished article. However the freight on bars, pig iron, sheets, etc., to the factory and on coal consumed therein is also advanced, though this increase, it was stated, is not expected to amount to much on the individual product.

Advances This Week

An advance of 25c per cwt. on bar iron and mild steel is about the only advance recorded this week which can be even partly attributed to higher freights, and there is some difference of opinion as to further price changes as result. One opinion is that it is too early to figure the effect of higher freight rates while others expect further advances as result of this condition in the very near future. Nail prices have also advanced this week and it is significant that the recent advance in the United States was largely due to higher freight rates.

As we go to press an announcement comes from Montreal that paint manufacturers are preparing to absorb the increased costs of freight in both eastern and western Canada.

As pointed out to Hardware and Metal, it is quite evident that if the railways are to get added revenue to successfully conduct their business, the amount required will be levied upon the people of Canada in the form of an added tax, for everyone is a consumer and everyone will pay their share in proportion. Generally speaking the matter is not regarded as any serious handicap by manufacturers who state that they have been faced by greater obstacles in the past and have overcome them.

Mr. Butterfield, of B. & S. H. Thompson Ltd., Toronto, pointed out that while the advance is 40 per cent. in freight rates on Eastern lines, yet in the case of sheets, bars, etc., brought into Canada from the United States, the increase will really amount to about 52 per cent. due to the necessity for prepayment in U.S. funds of such freight coming into Canada. The rate on car load lots of such shipments was 27c per cwt. and is thus advanced to 38c per cwt. without the exchange for U.S. funds.

"The man who has already sold his product will have no comeback but on future sales the increased freight rates will be felt. Steel and iron products will have to bear a percentage of the increase according to their weight," said Mr. Butterfield.

May Absorb Increase

E. C. Boeckh of The Boeckh Co., Ltd., Toronto, stated that the increase will serve to maintain firm prices on brushes and an advance is questionable, the possibility being mentioned that the firm might absorb the amount of the increase. If this plan were followed it would

apply to pretty well all shipments as most of the firm's business is done on a freight prepaid basis. Mr. Boeckh pointed out that the increase will be felt to a considerable degree in the manufacture of brushes owing to the fact that long hauls are required in most cases on bristles, lumber, wire, etc.

Bigger Increase Than Westerners Figured

Western hardware jobbers and retailers have expressed the opinion that while the rates may be acceptable in Eastern Canada where the average haul is less than in the West, that they consider any increase over 25 per cent. is too high. The higher rates applied at this time are considered to be an added handicap owing to the fact that the West is just now buying supplies for the winter season and the crop is just beginning to move. One hardware jobber stated that owing to the number of times the freight would be multiplied on some articles the increase would amount to more than it looks on many articles before they reach the consumer. It was pointed out that building in the West has been very backward for some time, and that the higher rates will not serve to encourage the resumption of building construction. Of course the effect of increasing the circulation of money through the medium of higher wages to railway employees must be considered in this and similar connections.

Effect on Paints, etc.

In discussing the freight increases and their probable effect on the price of prepared paints, white lead, etc., with R. H. Monk, chief chemist and a director of McArthur-Irwin, Ltd., Montreal, it was thought that, while the higher freight charges would not help matters any, in so far as actual costs to deliver a given product are concerned, there would be little if any increase of price.

"In figuring this out on a hundredweight of a given product," said Mr. Monk," and on the basis of a 40 per cent. increase, this will amount to about 15 cents per 100 pounds. This would cover, say five or six gallons of material, and I presume that, at present in any case, manufacturers will absorb this small increase. It does not seem that there will be any advance for this reason just now."

Why Prices Steady

Some have been looking for declines on paints and kindred lines. These have not materialized, nor are they likely to, according to Mr. Monk. Aside from the fact that linseed oil and turpentine are lower, there have been advances for such lines as dry colors. These increases have been manifesting themselves several times since the first of the year, and colors of various kinds are selling, Mr. Monk stated, very near the cost mark. "They have to be sold on an average basis," was his comment, "and altogether there is little margin in some of these lines."

"Pig lead has been quite firm, and any temporary fluctuation of price has been brought about, partly, as a result of exchange rates easing. There is a little uncertainty just at the moment on lead, but the market does not give promise of changing to any marked extent. I do not think that United States' prices will decline greatly—if at all—in any case not more than perhaps 25 cents or 50 cents per 100 lbs. Just at the moment this is a little undefined."

Mr. Monk further pointed out that, between the placing of orders for lead and its arrival, and then the corroding of the same, there was a considerable delay of from one to two months. With regard to supplies of tin and iron containers it was pointed out that there was a turn for the better in so far as delivery is concerned, but some sizes are still scarce.

September is the next best month to June in which to sell gifts for the bride. This business is now in full swing, and is this year assuming very large proportions. Window displays such as this will help to acquaint passers-by with the fact that gifts for the bride can be purchased to good advantage in the hardware store.

Successfully Linking the Old and New

A. Workman & Co., Ltd., Ottawa, Has Been in Hardware Business for Seventy-six Years—Modern Fixtures and Methods Combined with Old Established Mail-Order Trade with Farmers in Outlying Districts Make Interesting Business—Auto Accessories, Blacksmith and Mill Supplies Are Chief Lines—Window Displays, Advertisements, Courteous Salesmen Important Factors in the Business.

THE name of Workman has for a great many years been closely identified with various branches of the hardware trade, and the present retail business carried on in Ottawa under the name of A. Workman & Company, Ltd., does full justice to the memory which the name recalls in the minds of those who have been acquainted with its history during the seventy-six years, since 1844.

The present retail store, of which Mr. Thos. Workman is president, and which is under the management of Albert Whillans, indicates that though an old established firm, A. Workman, Ltd., has kept pace with modern developments in the merchandising of hardware. The store occupied by the company is modern in every respect, being outfitted with up-to-date wall fixtures, display cases and other furnishings. The whole building of three storeys is occupied, the store being on the main floor and reserve stock on the two floors above, machine supplies on the 2nd floor and wooden pulleys, runners, etc., on the 3rd floor.

Machine and blacksmith supplies and contracting work, on a big scale, represents the chief business engaged in. The Workman Company, on account of its history and reputation, still receives a large volume of business from farmers in outlying districts, some of which comes from a great distance. A mail order business extends over the territory from Parry Sound to Montreal. Many relatives of the original Workman family are still engaged in branches of the hardware trade, one of whom is one of the heads of the firm of Frothingham & Workman, Ltd., of Montreal.

Auto Accessories an Important Line

Automobile accessories are one of the important lines in the city retail business of the store. This department was started five years ago and has grown rapidly since its inception. Advertising through the medium of newspaper advertisements and window displays is credited with helping the development of this department. In fact the statement was made to the representative of Hardware and Metal by A. A. Whillans, managing director of the company, that "advertising built the auto accessory department."

A question as to whether the old established name and the long history behind the company were responsible for securing much business to-day was asked Alex. Workman, vice-president of the company. The reply was that the popularity of the name Workman was a help in developing local retail business, and with mail order business from farmers, but that in the larger contracting business it was found that it was more a question of price than anything else. For this reason it is evident that the

Exterior picture of the A. Workman & Co. store, Ottawa, Ont., showing the splendid window facilities at the disposal of the window dresser. It is no wonder the management believes in the effectiveness of seasonable window displays to pull business. "Advertising built the automobile accessory department," said the store manager to Hardware and Metal, and it will be noted a good display of accessories is on view in this picture. Graduated shelves painted white make an effective background, provided the display is not overloaded. In the other window is a paint display, another important line in the store trade. The windows are changed often, and though the store is located just off the main street, much interest is taken in them, as evidenced by the business they bring.

average retailer whose business is restricted to local trade through the store and to business from the outlying districts by mail, it pays to develop a name and reputation which will ensure that customers will stick by them even in the face of competition from mail-order houses and others.

Courteous Treatment of Women Shoppers

The courteous treatment of women shoppers by the clerks is another strong point in the Workman business. This may seem unnecessary with this particular business, in view of the fact that the Workman store with its stock of heavy hardware for blacksmith and mill trade does not appear to cater to women's trade, and also from the fact that the store is not as conveniently located to the downtown district as are other hardware stores. The fact that a number of women customers, living considerable distance from the store, keep coming to them for household requirements indicates that they appreciate the service given.

Would Rather be Skinned by Workman Than Others

A great many farmers whose grandfathers bought hardware from some one of the original Workmans come long distances to deal at this store. It is significant of the type of farmer found in that portion of Ontario and Quebec surrounding Ottawa, that he is prone to stand by the established ways of his forefathers rather than try anything new, and when in the Workman store some of them jocularly remark that they "would rather be skinned by Workman's than by anyone else."

THOMAS WORKMAN

President of A. Workman & Co., Ottawa, who went from Stratford in 1876, where he had been in the hardware business, to Ottawa to assist his uncle in the management of the Ottawa store of which he is now the head.

Looks After Advertising Himself

Advertising matters are looked after entirely by Mr. Alex. Workman, who finds advertisements in the local papers worked in conjunction with window displays to be an effective medium for moving stocks, particularly if something special can be offered. Much business is attributed to the window displays. The store is fortunate in having windows well suited for attractive displays, and even though the store is located just off one of Ottawa's main streets, the windows pull well when they are required to do so. It is significant that good window dressing will pull results under such circumstances.

Stocktaking Without Closing the Store

Stocktaking generally lasts over a period of about three months from January 1st, and the store remains open

One side of the Workman store showing the up-to-date display fixtures used to show the stock. Though the big end of the business is in heavy hardware consisting of blacksmiths and mill supplies, yet shelf hardware is by no means neglected as will be seen. The manager's office and accounting department overhead are shown at the rear of the store. The showcase on the left, part of which is showing, is devoted to automobile accessories, the next contains flashlights and boat lights. A good look at this picture will show that every opportunity is taken advantage of to display the goods and yet the general impression is that it is not overdone.

throughout. Mr. Whillans explained that night and day shifts are necessary to complete stock-taking in this time, though their stock is very much heavier than the average. The first operation is to start men where packages are full, in the reserve stock section. A book listing "Goods Sold from Stock Taken," is opened as well as a book listing "Goods sold from Stock not taken." In this way a record of every piece of stock moved after stock-taking has started, is recorded in these books and by a comparison and some figuring the work is fairly accurate.

Address to Late King Edward by Founder

Hanging in the office of Mr. Thos. Workman, of the A. Workman Hardware Co., Sparks Street, is a photographic reproduction of an address which was presented by the founder of the firm, the late Alex. Workman, to the late King Edward, when, as Prince of Wales, he visited Ottawa in 1866 and laid the corner stone of the old Parliament Buildings on August 31.

Mr. Workman was Mayor at the time and presented the address in his official capacity. When the corner stone of the old Parliament Buildings was removed after the fire in 1916, the civic address was discovered in an excellent state of preservation. Mr. Hunter, Deputy Minister of Public Works, thinking Mr. Workman would appreciate this reminder of his late uncle, sent him a photograph of the address. And Mr. Workman certainly did appreciate it. The original address is now back under the new corner stone.

A. A. WHILLANS

Managing director of A. Workman & Co., Ottawa, Ont., who has the reputation of being one of the best posted hardwaremen in Canada. His father, ex-Alderman Whillans, was also with the firm prior to his death.

Great Record

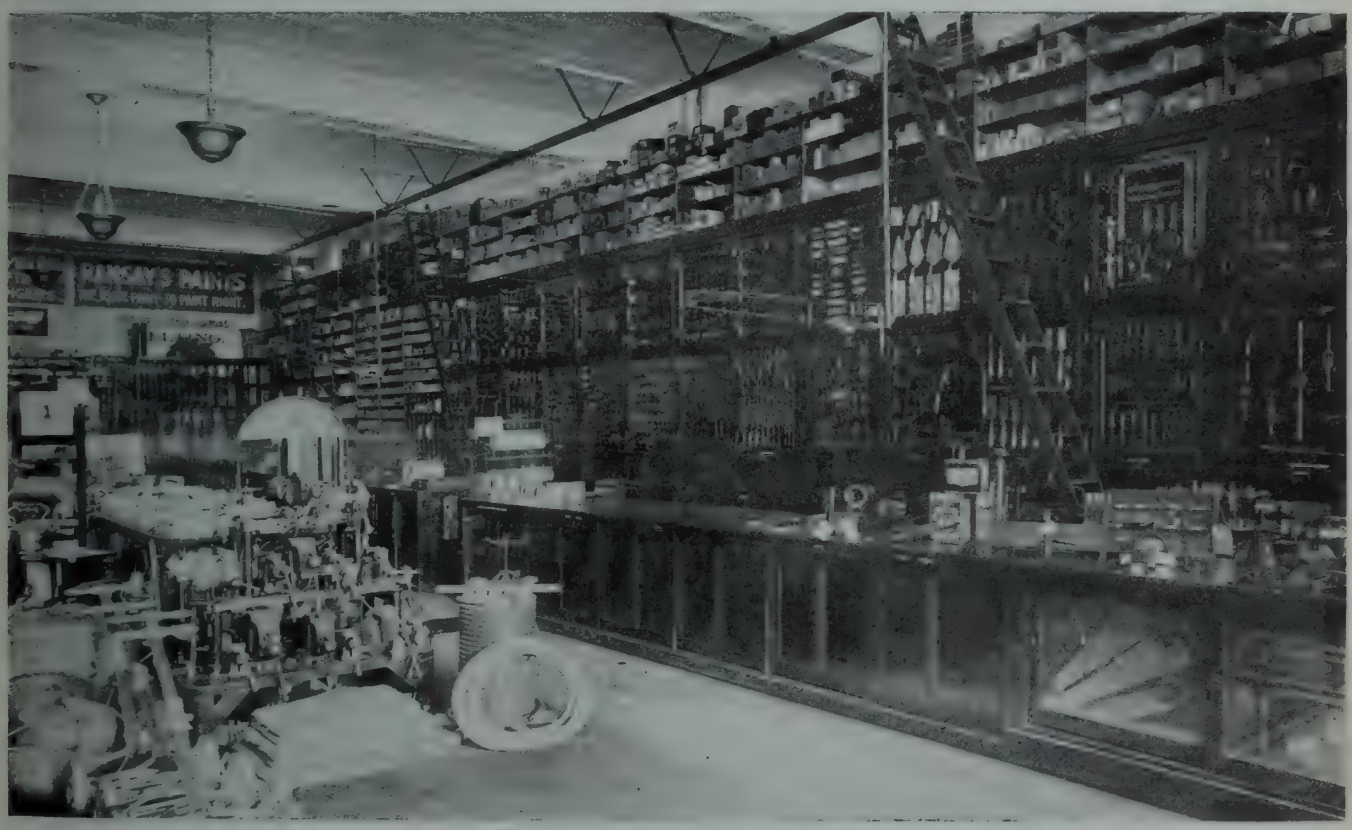
The Workman firm has reason to be proud of its name and reputation, for it dates away back to the year 1844 (76 years ago), when its founder went to Ottawa from Montreal and opened business in the old stone store on Rideau Street, corner Mosgrove, which till some 25 years ago used to be a civic landmark.

Mr. Workman started in partnership with Mr. Ed. Griffin, but Mr. Griffin retired a few years later and Mr. Workman carried the business on in his own name. Shortly after starting in Lower Town he built a fine three-storey stone store on Wellington Street, west of Kent, and occupied the upstairs as a dwelling. Ths store was one of the imposing edifices of Ottawa of that day.

Was Leading Citizen

Mr. Workman was a very progressive

(Continued on page 43.)



The other side of the Workman store, showing how the large stock of shelf hardware is kept neatly and easily available. Wall cabinets have samples of various lines fixed to the door fronts and above the cabinets are shelves for reserve stocks of lines kept in each section. Glass-fronted sections in the counters are also used to display saws and other lines. Vises, builders' hardware and other heavy lines are shown to some extent on a table in the centre of the store. Some lines of automobile accessories will be noted at the side of the counter where they can be handily picked up by the customer or referred to by the salesman.

Editorial Comment

AN IMPORTANT FACTOR IN CANADA'S INDUSTRIAL LIFE

THE Canadian National Exhibition, closing last week, marked the introduction of another important factor in helping along the period of re-adjustment to normal conditions in Canadian industry. The annual fair is truly national in scope, judging by the extent of its exhibits, the interest it aroused and the attendance which was attracted from all parts of Canada. This year the motto was "Work and Prosper," and the spirit of the event was that only by diligent effort on everyone's part can this country uphold its status among the nations of the world. Great interest was taken in the exhibits, even greater than in past years according to many exhibitors. This was probably because of the growing tendency to discriminate a little more in buying than has been the practice of many of the Canadian people in the past few years. Exhibitors as well are said to have taken a greater interest in arranging their booths, probably being more desirous of attracting new business and also through having a greater realization of the value of such an opportunity. Many new lines were also in evidence which indicates that Canadian industry is by no means stagnant. Automobile and accessories, trucks and facilities for improving rural life were prominently shown, along with extensive displays of electrical goods, manufacturing processes, etc. This national fair now attracts over one million persons each year, including exhibitors and visitors from all parts of Canada, and it therefore represents an important factor in the industrial life of the country.

FIRST CHANGE IN NAIL EXTRAS FOR TWO YEARS

THE announcement of a change in extras on nails this week is an important one. So wide is the range and gauge of nails affected that hardware dealers should check closely the new list of extras as outlined elsewhere in this issue. The change constitutes a general revision said to have been made necessary owing to the fact that the various gauges formerly did not bear an equal proportion. Some lines were being listed higher in proportion to others and the result is that no general advance is made. This is the first change in extras since October 22, 1918, and is said to have been made necessary owing to increasing production costs as result of higher freights on raw materials and coal. It also probably reflects the recent movement of United States wire interests to increase by $5 per ton the extras on nails.

PERIOD OF PREMIUM PRICES FOR SHEETS MAY BE OVER

AFTER many long months of scarcity of sheets, and the paying of high premiums to secure them an interesting announcement has been made by President A. T. Enlow, of the Dominion Sheet Metal Corporation, to the effect that a small tonnage is now being offered for the first time this year, for fourth quarter delivery, at prices much below current independent mill quotations. This improvement in the sheet situation has been brought about largely as result of the falling off of demand for sheets for use in the automobile industry. Mr. Enlow makes another interesting prediction—that prices are expected to moderate considerably after the new year.

ANGLING FOR EXPORT TRADE BY NEW MEANS

ANNOUNCEMENT was recently made of a somewhat novel plan for securing export trade as adopted by Italian business houses and which, it is said, is likely to be followed by a similar movement on the part of United States business heads. The plan takes the form of a "Travelling Fair," and in the case of Italy a ship has been chartered by some of the country's leading merchants and loaded with samples from which sales will be made, these being recorded by wireless. The Italian Government is said to have sanctioned the plan and provided a ship for the purpose. The idea has extended to the United States and is said to have that government's sanction now as well. It is said that a syndicate of U. S. merchants and promoters have purchased a ship which will visit no less than forty countries, the trip occupying eleven months of 1921. The price of a passenger's ticket, it is said, will be $10,000.

Framing Ontario's Headlight Law

Experience of Enforcing This Law in New York State Establishes a Precedent for Ontario Motorists—Similar Laws to Become Effective Throughout America—Uniformity is Lacking

IN view of the likelihood of the early adoption of the Headlight Anti-Glare Law in the Province of Ontario, which action will be taken just as soon as final sanction has been given the list of devices now being approved, it is interesting to note some of the advantages and disadvantages which have been apparent in connection with the enforcement of a similar law in other sections. It is likely that the headlight regulations as adopted by certain of the States across the border and which will soon be introduced in Canada by Ontario's action, will shortly be in force throughout America, and this is therefore an important matter to dealers in automobile accessories.

Secretary W. G. Robertson, of the Ontario Motor League, is conversant with the new headlight law which has been made effective in New York state, and points out that at present there is a disconcerting lack of uniformity, and while vehicles equipped in accordance with the New York regulations pass muster in certain States there are others that do not accept the standards, and motorists are obliged to conform to local regulations.

The certificates of approval of headlight devices in New York contain regulations as to the adjustment of these devices which must be conformed with in using them on the road. These regulations include the adjustment of the lamps with respect to the focus of the reflector, the maximum allowable candle power of the lamps to be used with the headlights adjusted to give a horizontal beam, and with the lamps adjusted to give a beam tilted to a certain extent downward toward the road. The specifications are that the beam at a distance of 200 feet ahead of the car and at some point between the road level and 42 inches above it must be at least 1,200 candle-power. The beam 100 feet ahead of the car and 60 inches above the level must not exceed 2,400 candle-power. The beam 100 feet ahead, 60 inches above the level surface, and seven feet to the left of the axis of the car must not exceed 800 candle-power (this represents the position of the oncoming driver when he turns out to pass).

Incandescent lamps at present are of two types, the vacuum and the gas-filled, and it is pointed out that in many cases a higher candle-power can be used with one type than the other without exceeding the specified limits of glare. Most lamps are provided with means for changing the focus of the lamps.

While many home-made devices are used to overcome the difficulty, experience has proved that it pays to use a good commercial device designed for the purpose.

LINKING THE OLD AND NEW

(Continued from page 41.)

citizen and took a keen interest in civic affairs. He became a councillor, and at the time of King Edward's (then Prince) visit in 1866, had the honor of being the city's Chief Magistrate.

Previous to coming to Ottawa he had conducted an academy in Montreal. A number of members of Parliament of the time had been educated by him, and during the session used to drop in and renew acquaintances. This fine old citizen lived to be 94 and died in December, 1892. It is an interesting fact that almost up to the time of his death he daily attended to business.

Memories of 1866

In the early days Mr. Workman was assisted by his son, Alex. ("Sandy"), who was the first Major of the old Ottawa Field Battery which took part in the repelling of the Fenian Raid of 1866. It was about this time that the late ex-Ald. Wm. Whillans, who for many years was a strong figure in the Rideau Street store, joined the staff as bookkeeper. He was with the firm till his death. He was also a prominent figure in civic life and a most respected citizen.

It is interesting to note that his son, Albert, who went to the firm as a boy, is still with the firm as secretary and managing director of the Sparks Street business. Mr. Whillans, Sr., was brought to the firm by Major Workman after the Fenian Raid. He had been the Sergt.-Major of the Ottawa Field Battery.

The Later Firm

In 1876 Mr. Thos. Workman, a nephew, now the controlling spirit of the firm, came to Ottawa from Stratford, where he and his brothers had been in the hardware business, and assisted his uncle in the management of the store. When Mr. Alex. Workman died, Mr. Thos. Workman purchased the business, but retained the old established name. About 20 years ago he sold the Rideau Street store to Mr. W. G. Charleson and made the Wellington Street store his headquarters. He also turned the now greatly increased business into a joint stock company, making Mr. Albert Whillans managing director. Mr. Thos. Workman is president; his son, Alexander, is vice-president, and his son, T. Oswald, is treasurer. Mr. Albert Whillans has the reputation of being one of the best posted hardware men in the country.

About four years ago the Government expropriated the Workman building on Wellington Street. The firm at once built its present fine store on Sparks Street, the property of which runs through to Queen Street. Their new store is one of the best equipped hardware stores in the country.

Fusion of Iron and Steel Interests in Scotland

It has been announced by Lord Pirrie (of Harland & Wolff's, Belfast) that this firm has just concluded an agreement whereby it will acquire a controling interest in Messrs. David Colville & Sons, Limited, iron and steel makers, of Motherwell, Scotland. The purchase price is said to be about £8,000,000. Messrs. Colville's output of steel is the largest in Great Britain; they have huge works in Motherwell and also extensive iron works in Ayrshire. In addition, the combine embraces the collieries of Russell & Co., Glasgow and Lanarkshire.

Canada's Exports to United Kingdom Show Decrease—Imports From U. K. Increase

A notable feature of the present position is the resumption of business with Germany, of which, however, imports from the United Kingdom represent two-thirds of the total value, a distinct change from the pre-war situation.

Imports aggregating £12,209,916 from Russia are also worthy of note.

As regards Canada, it will be observed that whereas exports to the Dominion have increased more than threefold, imports from Canada have fallen away by nearly one-third.

United Kingdom's trade with:—	1919	1920
Canada—	£	£
Imports	48,243,296	33,973,656
Exports	6,270,529	21,169,988
Re-exports	514,306	3,628,412
Total	55,028,131	58,772,056

News of Western Canada

Western Notes

Vancouver, B.C.—The F. R. Murray Co., Ltd., is moving their office to 814-815 Board of Trade Building, 402 Pender Street West.

* * *

Brandon, Man.—John Popkin, of the Johnson Hardware Co., Brandon, and hon. sec. of the Brandon branch of the Retail Merchants' Association, has returned from a visit to England.

* * *

Qu' Appelle, Sask.—Lewis' hardware store was visited by thieves last week, and a small amount of cash was taken.

* * *

Ogema, Sask.—C. S. Benjamin has sold his hardware business to C. Warden.

* * *

Kerrobert, Sask.—Norman Cunningham, of the Herity Hardware Co. has gone to Champion, Alta., where he has accepted a position as manager of a hardware store.

Obituary

Saskatoon, Sask.—George Tucker, of Saskatoon, an employee of the J. H. Ashdown Hardware Co., died in St. Paul's Hospital. Tucker's spine was broken when a car hit and knocked him down Sept. 2.

British America Paint Co., Ltd., Announces Appointment

J. C. Pendray, president and managing director of the British America Paint Co., Ltd., with headquarters at Victoria, B. C., announces the appointment of W. R. Herbert as general sales manager. Mr. Herbert has been sales manager in charge of the prairie division for several years. In his new capacity he will be enabled to develop the sa[illegible] policy and [illegible]es organizations of all the Canadian branches and Oriental depots along uniform lines consistent with climatic or other conditions.

Manager Receives Gift on Leaving Regina

Regina.—W. R. Fulkerson, manager Sharples Separator Co., was presented with a club bag by Regina salesmen on the eve of his departure to attend the salesmen's convention at West Chester, Pa. He left with Messrs. Williams, Sleeman and Grant of the Saskatchewan sales force. Mr. Fulkerson expects to return in October.

FALL SHOOTING REGULATIONS IN MANITOBA

The season for taking of prairie chicken, partridge and grouse in Manitoba will open on October 15 and close October 22, both days inclusive.

The only person exempt from taking out a game bird license is a farmer who resides permanently on his farm.

Has Not Disposed of Business

It was stated in a recent issue of Hardware and Metal that S. L. Loraas of Vanscoy, Sask., had sold his hardware business. Mr. Loraas advises that the source of this information was incorrect and he still retains his hardware business.

Moore's Hardware Ltd., to Succeed J. Littlejohn & Son.

Eston, Sask.—J. Littlejohn & Son have sold their hardware business to Robert Moore and the new firm will be known as Moore's Hardware Ltd.

Mr. Moore is well acquainted with the hardware business, having been travelling representative of Miller-Morse Hardware Co. for approximately five years.

The hardware and tinsmithing departments of W. C. Johnston & Co. have been taken over and Mr. Littlejohn's former store will be remodeled to make it suitable for the hardware and tinsmithing lines.

Features Dealers' Window Display Contest

The national campaign that the Geneva Cutlery Corporation has been using to advertise Genco razors is expected to be of more direct benefit to the individual dealer, by linking his store with the campaign and to this end a window display contest will be featured by this company during the week of November 8th to 13th. One thousand dollars in cash prizes is to be divided among the 46 dealers making the most attractive displays at that time, and the material for dressing the windows will be supplied by the Genco people without charge to the dealer. The week of November 8th to 13th is to be known as Genco Week.

Big Revenue from New Taxation

Luxury and Special Taxes Yield $20,855,859 for Last Five Months Compared with $7,778,-401 for Same Period Last Year—Current Expenditure Also Higher.

So much commotion was caused over putting the Governmental machinery into operation for the collection of heavier taxes from Canadian merchants and others, that the hardware trade will be interested in the following figures showing increase in receipts and comparison with expenditure of the Federal Government.

Receipts from inland revenue, as a result of luxury and other special taxes imposed, have taken a big leap forward. For the five months closing with the end of August, receipts from inland revenue were $20,885,859; during the corresponding months of 1919 they were $7,778,401. For the month of August alone, inland revenue receipts were $5,-807,114; in August, 1919, $1,638,840.

The figures appear in the monthly statement issued by the Department of Finance to-day. For the first time, the statement gives details both of ordinary revenue and ordinary expenditure. For the five months ending August 31, ordinary revenue and ordinary expenditure compare as follows:

Ordinary revenue, 1920, $183,527,579; 1919, $132,386,719. Ordinary expenditure, 1920, $135,675,321; 1919, $97,579,-339.

In explanation of the heavy increases in ordinary expenditure it is explained that this year's figures include the first interest payment on the last Victory loan.

Revenue from income tax during the month of August was $7,481,647, compared with $1,383,849 in August, 1919; from business profits tax, $2,315,946, in comparison with $5,429,161 collected from business profits in August, 1919.

A total net debt after deducting non-active assets, now amounts to $2,234,-496,915.

Hardware Store Sells More Accessories than Garage

How Do You Know?—Because the Hardware Store Proprietor Owns the Garage Too and Keeps a Good Display of Accessories Constantly at Both Places—Value of Attractive Window Displays in Developing Trade.

IN CONNECTION with the sale of automobile accessories through the hardware trade much has been said of the competition which might be found to exist between the hardware store and the nearby garage which was looked to as the logical source of supply of automobile accessories before the hardware trade saw an opportunity and cut in for a large share of such trade. However, there is no garage owner that will admit that the local hardware store enjoys a bigger trade in such lines than he so that it has not been proved conclusively which medium of distribution can really sell the largest volume of accessories.

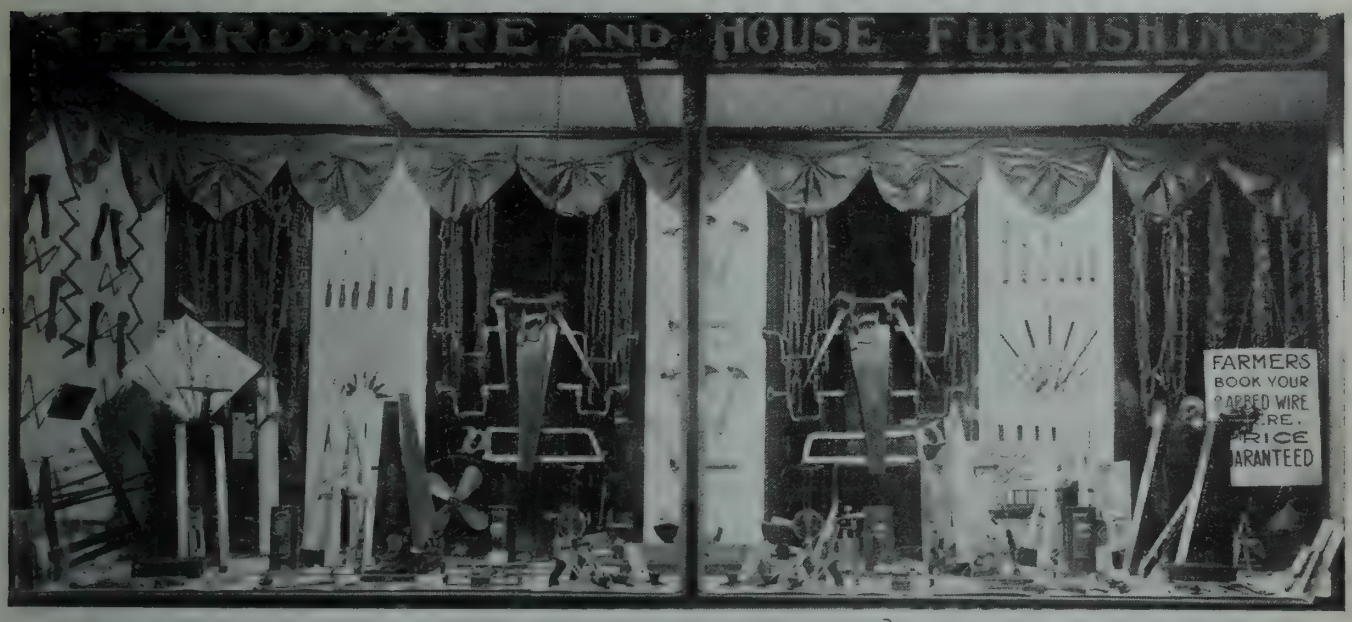
Sells More Accessories Than Garage

In this connection it is interesting to note that N. B. Vickers, hardware merchant of Drumheller, Alta., has a substantial auto' accessory trade through his hardware business, and he does a bigger business than the local garage insofar as accessories are concerned. This is because he happens to be owner of the garage as well and has found from experience that though he has a good display of accessories in both the store and garage, that the former sells for him more accessories.

Mr. Vickers is a pioneer of the district having opened his store in 1911 at which time the railway tracks were first being laid to the town. He opened with a small stock of hardware, supplemented with some general store lines, and later on built a garage. Mr. Vickers stated to a representative of Hardware and Metal that he had great faith in the prospects of the Drumheller district and he is in on the ground floor to take full advantage of developments.

Windows of Great Value

To-day the Vickers store boasts a large and complete stock of shelf and heavy hardware and a department devoted to house furnishings lines. A. Cole, who has been associated with Mr. Vickers for over six years is in charge of the hardware department and is a firm believer in the value of the windows for advertising purposes. Local townspeople are fully aware of the great pride which the Vickers store takes in its windows through frequent changes and close attention to details, and this makes the windows much more valuable for everyone is on the watch for what the Vickers store is advertising to-day. Mr. Cole takes personal charge of the window trimming.



One of the attractively arranged window displays of the N. B. Vickers Hardware, Drumheller, Alta., of which mention is made in this article. Builders' hardware and tools are featured in this display. It will be noted that samples of various tools are attached to wall boards which can be used as a background. A. Cole is in charge of the hardware department and personally supervises the window trims. Great interest has been worked up in the local community over the window trims of this store and this fact renders them much more effective.

Events in the Trade

Incorporations

Toronto.—The Sanitary Sheet Metal Containers, Ltd. (Ont.), have been granted a charter.

Toronto.—Universal Gas and Oil, Ltd., has been incorporated with a capital of $1,500,000, their head office to be at Toronto.

Toronto.—Eagle Oil and Gas Company, has been incorporated with a capital of $500,000, their head office to be at Toronto.

Winnipeg, Man.—Jumbo Metal Works, Limited, have been incorporated with a capital of $300,000, their chief place of business to be at Winnipeg.

Montreal.—The Industrial Equipment Co., Ltd., has been incorporated with a capital of $20,000 to manufacture mining supplies, automobiles and accessories, etc. Their chief place of business to be at Montreal.

Montreal.—The Mercantile Corporation Limited has been incorporated with a capital of $200,000 to manufacture marine, foundry, and mining supplies, automobiles, accessories, etc. Their chief place of business to be at Montreal.

Death of Vice-President of Canadian Asbestos Co.

Henry Berry, Vice-President and General Manager of the Canadian Asbestos Co., died at his home in Montreal on Monday last after a lingering illness. The late Mr. Berry was a pioneer in the Montrea asbestos industry and gave himself over to the prosecution of his chosen work for many years past. During the greater part of his life he was connected with the development of the asbestos industry and under his management and direction many new asbestos products were brought before the Canadian trade. At the same time he found time to be associated with the work of the Canadian Manufacturers' Association and with the Montreal Board of Trade. In his efforts to popularize the use of asbestos products he travelled extensively throughout Canada. Possessed of a strong personality he naturally made many friends. He is survived by his widow and three sons.

Woodstock Clerks Want Weekly Half-Holiday

Woodstock. — The local clerks and salespeople are circulating a petition in an endeavor to have the regular weekly summer half-holiday extended throughout the entire year. It prevails at present throughout June, July and August. The matter will be discussed by the Board of Trade at an early meeting.

Western Ontario News

W. Livingstone, of A. MacFarlane Co., Montreal, is calling on the trade in London and district.

* * *

Chas. West has been awarded heating and plumbing for new $12,000 residence for Sid Swift, at London, Ont.

* * *

E. A. Stokes, of Petrolea, plans to erect a large plant shortly for the manufacture of nitro-glycerine and explosives.

* * *

Homer VanPatter, of Aylmer, Ont., has left for Swift Current, Sask., to join the sales staff of the Swift Current Hardware.

* * *

Charles Talbot, 30 Askin St., London, Ont., wants prices on heating and plumbing, in connection with new $4,000 residence.

* * *

John McTaggart, who formerly conducted a general store at Appin, Ont., has joined the sales staff of the Cowan Hardware, at London, Ont.

* * *

Charles McKerlie, of the Cowan Hardware, London, who recently joined the benedicts, has returned from a honeymoon trip to eastern points.

* * *

T. Swallwell, of the D. H. Howden Hardware Co., London, Ont., has joined the sales staff of the Cowan Hardware, of the same city.

* * *

Work will be commenced at London, Ont., about October 1, on three large new factory buildings for the Service Motor Truck Co., of Wabash, Indiana. These are the first units of a plant that is to cost $5,000,000.

* * *

E. Mackness, who last fall opened a plumbing and tinsmithing business at Watford, Ont., is closing up the shop and removing his stock to a new location in Sarnia.

* * *

The Humid Air Company, Limited, has been formed at London, Ont., and will manufacture the humid air ventilator, a device to be used in connection with the smoke pipe of a furnace, to distribute moisture to various rooms. For the present the manufacturing will be done at the factory of the Dennis Wire and Iron Co.

* * *

In connection with industrial developments at London, Ont., the Utilities Commissioners contemplate extensions of water mains and service into the new factory area at an estimated cost of $200,000.

* * *

The Wright Teale Co., of London, Ont., have arranged an exceptionally attractive window display for the fair this week with a view of interesting the thousands of farmers who are in town in water pumping equipment, bath room equipment and plumbing fixtures. The window is backed up by an equally attractive store display.

* * *

Rapid progress is being made in connection with the extension to the hardware store of Chas. W. Summers and Sons, at London, Ont., and Mr. Summers stated to Hardware and Metal that he expected to begin placing new stock in the building by the end of the month. He reports prospects bright for an exceptionally fine fall business.

* * *

In connection with London Fair, which lasted all this week, the Cowan Hardware Co. had an unusually attractive display window of tools. Excellent results are reported from the window from a sales standpoint. Another good business getter from fair visitors was a window display of cutlery, cut glass and silverware.

* * *

With new factories assured that will employ at least 3,000 men, and an acute shortage of houses already existing, the biggest building boom in the history of London, Ont., is looked for this fall and next spring. Plans are being prepared for a large number of new homes to take care of the demand, and an exceptional business in builders' hardware and tools is looked for by men in the trade.

Morpeth Hardware Suffered Slight Loss in Robbery

It was Thos. J. Hedley, hardware merchant, of Morpeth, Ont., who suffered slight loss from a recent robbery, and not Bateman's Hardware, as formerly stated. Mr. Hedley advises that some small change was taken from the till and a few other small articles. The robbers gained entrance by removing the putty from a rear window and lifting the glass out.

Adds Rolling Mill

The Dillon Crucible Alloys, Ltd., of Welland, Ontario, have installed a 10-inch rolling mill, which is at present in operation. The new mill has a capacity from ¼-inch to 2⅜-inch rods and squares.

Form Page-Hersey Tubes, Ltd.

Page-Hersey Tubes, Limited, has taken over the entire business of Page-Hersey Iron, Tube and Lead Co., Ltd., according to an announcement by President W. W. Near. No change in management has been made.

Bicycle Dealers in Annual Convention

Toronto, Ont.—The fourth annual convention of the Canadian Bicycle Dealers' Association was held in the convention hall of the King Edward Hotel, Toronto. The general features of the congress this year comprised a one-day business session with all delegates as the guests of the association at a luncheon, and later in the day a banquet in the gold room of the hotel, which was provided by the manufacturers and jobbers. The discussions embraced a wide range of subjects and practically every department of the retail bicycle business was examined by the gathering.

It was decided to hold the 1921 convention in Chatham, Ont., the birthplace of the Canadian Wheelman's Association many years ago.

Shipments Displace Sales as Test of Iron and Steel Situation

"Shipments have displaced sales as the true test of the iron and steel situation. As production continues to rise, signifying the progressive improvement of transportation conditions, new buying appears to have further retreated," says the Iron Trade Review. The position of consumers as to supplies manifestly is becoming easier with each passing week. Moreover the spirit of caution on future purchases still runs plainly through the whole market. Against this situation the heavy bookings of producers and the high level of current costs serve to exert a strong stabilizing influence. Furthermore it is a notable fact that apart of the automobile industry, from which the stream of suspensions has not ceased, consumers are taking in the increased tonnage of material without hesitation and are following up their specifications almost as keenly as when the shortage was most acute.

Canadian Fairbanks-Morse Staff Hold Excursion

Montreal.—A very enjoyable moonlight excursion was participated in by 350 employees of the Canadian Fairbanks-Morse Company, Limited, Montreal. The steamer "Three Rivers" left Montreal with the happy party on board and a pleasant sail was enjoyed down the St. Lawrence for several hours. Arrangements had been made previously with the Grenadier Guards Jazz Band to provide music for the evening and they furnished choice selections in order that the "light fantastic" might be enjoyed to the hearts' content of the excursionists. An impromptu program was also rendered, and refreshments served, and the party greatly enjoyed this outing supervised by the local manager, Mr. M. D. Cordell.

AN ACT TO AMEND THE QUEBEC GAME LAWS

By Order-in-Council recently passed, the hunting seasons for animals are as follows:

Moose: from the 20th September to the 31st December inclusively, except in the counties of Pontiac and Temiscamingue, where the hunting of moose will be allowed from the 10th of September to the 31st December inclusively.

Deer: from the 1st September to the 30th of November inclusively.

Caribou: from the 20th September to the 31st December inclusively.

Why Some Rubber Orders Are Delayed

MONTREAL.—In discussing the belting situation with a prominent manufacturer, Hardware and Metal was informed that the difficulty of procuring the requisite duck for incorporating into these products was a serious one. In view of this, orders placed now for some lines and sizes have to await their turn, and "in some cases we cannot promise delivery on such orders for eight weeks," said this informant. "We have been able to make delivery of regular orders placed some time ago, but as regards new business it has to await its turn. Of many lines we have ample stock, but delays will be experienced on other lines."

Must Provide Proper Garbage Receptacles

Chatham.—The board of health unanimously passed an order that all people who do not provide proper receptacles for their garbage by October 1 will be liable to prosecution. The order was passed after listening to a report submitted by the city garbage collector that in a great many cases the proper receptacles were not provided. The order also included that a sanitary inspector call at each house where the people do not carry out the wishes of the board and inform them of the requirements.

Three Rivers Enjoying Business Boom

Trois Rivieres, Que.—According to reports business is good in Trois Rivieres; houses cannot be built fast enough to supply the demand.

Adoption of Unit or Decimal System for Hardware

Montreal.—Hardware and Metal has already referred to the change which some firms are instituting regarding the sale and pricing of hardware, in that a number are adopting the decimal or unit plan. It is a simple matter of changing from one dozen or gross procedure to the single or 100 plan or decimals of 100. Thus, where a given type of shelf or other hardware has been sold and invoiced by the dozen, for instance, it will now be sold at each, or at a price per 100, and, as explained to Hardware and Metal, there will be an adoption of this idea in packing.

As far as can be ascertained this will apply to certain lines of manufactured goods put up in the United States. Already one or two firms have announced to the trade that they are instituting such a plan and while some look for a simplification of the whole system to the advantage of the trade, others are not so sure that it will be all that is desired. It is expected to simplify figuring of prices. Doubtless, as with other innovations which are made from time to time, it will take time to reveal its advantages.

International Harvester Co. Denies Profiteering Charge

Statements issued by the International Harvester Co. and the National Implement and Vehicle Association in reply to the report of the Federal Trade Commission charging profiteering and violation of the Sherman Act, denied that either organization has at any time attempted to fix or maintain prices.

The Harvester Co.'s statement, signed by Cyrus H. McCormick, chairman of its board of directors, said: "It should be noted that the report does not find prices or profits in the farm implement industry excessive, exorbitant or unreasonable, yet the commission's figures on manufacturers' profits greatly exceed this company's net earnings.

"The commission might well have added in its report that, if farmers were allowed the same rate of compensation per hour for labor of themselves and of their families that the manufacturers pay for the production of farm implements, it would be evident that the farmer needs all of the advanced price on farm products to make a decent living. The advance in prices in both cases is due to causes beyond the farmers' or the manufacturers' control."

Canadian Trade Commission Soon to Be Wound Up

Ottawa.—The work of the Canadian Trade Commission, it is expected, will be wound up about the middle of November, the last shipments of goods handled by the commission going out of Canada via the St. Lawrence before navigation on that river has closed. At the present time much of the commission's work is devoted to clearing up the business which has already been arranged for.

Newsy Notes From Here and There

Toronto.—W. H. Cunningham, general manager of the Kasement Skrene Dore Co., and Mr. Nicholson, factory manager, have just returned from a ten-day trip through the Southern States, during which they spent two days at the Kasement factory in Camden, Ack.

* * *

Peterboro.—J. J. Turner, of J. J. Turner & Sons, Ltd., Peterboro, has just returned from visiting Belgium, France and other European points.

* * *

Montreal.—"Dick" Terrill, sales manager Caverhill, Learmont and Company, was in attendance at the Toronto Exhibition.—F.A. Ray, representing Stevens-Hepner Company, Ltd., Port Elgin, Ontario, was in Montreal this week.—Herbert Seybold, of Starke-Seybold, Ltd., returned from a motor trip via Albany and Troy, N.Y.

* * *

Toronto.—The following were among the visitors to Kennedy Hardware Co., Toronto, last week:

J. A. Henderson, Brampton, Ont., J. W. Rock, Norwood, Ont., E. T. Morton. Campbellford, Ont., E. Miller, Aylmer, Ont., Wm. Ough, Aurora, Ont.

Montreal.—J. A. E. Bureau, representing Richardson and Bureau, is callong on the trade in the Maritimes. J. O. Jepson, Hobbs Mfg. Co., Ltd., returned to Montreal after spending his vacation at London and Wiarton.

* * *

Toronto.—The following were among the visitors to H. S. Howland, Sons & Co., Toronto: Jas. Dobson, Bronte, Ont.; A. C. Elliot, Brooklyn, Ont.; H. Long, Port Credit, Ont.; representative of McDonald & Son, King, Ont.; A. C. Salem, Byng Inlet, Ont.; A. M. Beynon, Jefferson, Ont.; D. J. Morish, Highland Creek, Ont.; H. J. Peekir, Proton, Ont.; representative of Spratt & Son, Inglewood, Ont., B. R. Brown, Lansing, Ont., E. A. Dutton, Stouffville, Ont.; representative of Revilly & Son, New Toronto, Ont., J. McEwen, Novar, Ont., J. Little, Fairbanks, Ont., W. Cassidy, Stoco, Ont.; Highland Creek Supply Co., Highland Creek, Ont., E. W. Gordon, Campbellford, Ont., G. C. Charlton, New Toronto, Ont.; representative of Wm. Ough & Son, Aurora, Ont., R. Blain, Brampton, Ont.; J. T. Johnson, Gormley, Ont.; representative of D. Stewart & Son, Thistledown, Ont., S. L. McCabe, Lotus, Ont.

Hardware Exhibits at St. John Fair

Local Hardware Firms Take Full Advantage of Fair—Announcement of Plans for Extending Hydro-Electric Development.

ST. JOHN, N.B.—What is described as the most successful exhibition ever held in St. John, N.B., was brought to a close last week. Hon. W. E. Foster, Premier of New Brunswick, A. E. Schofield, mayor of St. John, and Hon. J. F. Tweeddale, Minister of Agriculture, officiated at the opening. In his opening speech, Hon. Mr. Foster made the first official announcement of the Government plans re hydro development. He stated that plans and estimates were being made by the staff of the New Brunswick Electric Water Power Commission, and that the work was being pushed vigorously. He also stated that the commission expected to call for tenders for some of the most important parts of the work within a very short time, particularly in the vicinity of Musquash.

Every opportunity is to be afforded for suitable sites for manufacturing plants, and with cheap power and favorable conditions they should be able to attract a fair share of new industries.

Mayor Schofield gave a hearty welcome to all visitors to the city, and to the exhibition during the week. "We are going to make a strong effort to have this exhibition an annual event hereafter," he added.

Hon. Mr. Tweeddale congratulated the management of the exhibition upon the excellent showing that had been made. It was his opinion that the people were looking to the Government to develop the water powers of the province.

The demand for stands and booths was much greater this year than on any former occasion. All available space was taken up long before the time limit had expired, and many would-be exhibitors were disappointed in not being able to secure a stand.

T. McAvity & Sons, Ltd., hardware merchants, St. John, N.B., exhibited on a very large scale, occupying no less than four different stands, namely: Hardware, showing the firm's general lines, refrigerators, silverware, sporting goods, etc.; automobile accessories were shown on a stand in the automobile section of the exhibition buildings, and the firm received a lot of good advertising from this display, as they were the only firm who devoted a stand to this class of goods. A full line of automoblie accessories was shown, including tires, chains, camping outfits, wrenches, lamps, batteries, spark plugs, repair kits, gaskets etc. The motoring visitors were very much interested in the display. A stand was devoted to oil stoves and heaters, in charge of Mr. Irwin, who represents the manufacturers, and was demonstrating on behalf of T. McAvity & Sons, Ltd. The fourth McAvity stand was one which created quite a sensation. The valve and marine stand was one of the finest that has ever been seen in St. John. In fact many visitors declared it to be the best display ever shown in Canada. Valves of all sizes and descriptions were exhibited. One valve, the largest ever made in Canada, caused considerable interest. This valve was made to order for the Riordon Pulp and Paper Co., Ltd., Temiskaming, P.Q., is of acid resisting bronze, and is known as a Y blow-off valve.

Some Interesting Exhibits

There was also shown a massive acid resisting bronze sleeve, weighting 16,000 lbs., manufactured for the same company. A big display was also made of acid resisting bronze flanged elbows and tees. Goods were shown that were manufactured for every pulp and paper company in Canada, and the firm boasts that it can equip a mill from the start to the finish. A large trade is being developed in Newfoundland, and at the present time the firm is working on orders from the Anglo-Newfoundland Development Co., Ltd., Grand Falls, Newfoundland. This branch of the McAvity business comes under the supervision of Mr. Clifford McAvity. Mr. Cruickshank is the general manager. The four booths were laid out under the direction of O. Trentowsky, and the advertising manager, Fred S. Stewart.

W. H. Thorne & Co., Ltd., had an attractive stand showing Edison phonographs, in charge of H. Olsen. This stand proved to be very attractive, giving the public a chance to sit down and take a rest, and at the same time hear the latest hits sung by the leading artists.

Other firms making exhibits of interest to the hardware trade, included the following:

Enterprise Foundry Co., Ltd., Sackville, N.B.; McClary Mfg. Co., Ltd.; The McLean Holt Co., Ltd.; Lunenburg Foundry Co., Ltd., Lunenburg, N.S.; Renfrew Machinery Co., Ltd., Sussex, N. B., and Renfrew Ont.; Oxford Foundry & Machinery Co., Oxford, N.S.; Acadia Gas Engines, Ltd., Bridgewater, N.S.; Canadian Fairbanks-Morse Co.; A. R. Williams Machinery Co.; Imperial Oil Ltd.; The Wilson Box Co., Ltd.; T. S. Simms & Co., Ltd.; The Eastern Electric Co.; The Schofield Paper Co.; Bird & Son, Ltd.; Toledo Scale Co.; Murray & Gregory, Ltd.; Haley Bros., Ltd.; The Barrett Co.

Hardware Letter Box

WOOD AND STEEL ROW BOATS

J. E. Meyer, Ayton, Ont.—Kindly let me know where I could procure row boats, also patterns for steel row boats?

Answer.—The following are rowboat makers: The Gidly Boat Co., Ltd., Penetang, Ont.; H. L. Bastien Boat Works, Hamilton, Ont.; Walter Dean Boat Works, Toronto, Ont.; Ditchburn Pleasure Boats, Ltd., Gravenhurst, Ont.; Robertson Bros., Hamilton, Ont.; The J. H. Ross Boat & Canoe Co., Ltd. Orillia, Ont.; W. Watts & Sons, Collingwood, Ont.; The W. H. Mullins Co., 343 Franklin St., Salem, Ohio; all well known makers of steel row and motor boats. Patterns can be secured from The Brooks Boat Mfg. Co., Saginaw, Mich., U.S.A.; H. F. Thompson Boat and Pattern Works, Decorah, Ia.

SHOPPING AND PICNIC BASKETS

Jas. Simmonds Ltd., Halifax.—Can you inform us of manufacturers of picnic and shopping baskets?

Answer.—Canada Wood Products Co., St. Thomas, Ont.; Erie Basket Co., Ltd., Leamington, Ont.; W. T. Glover Mfg. Co., Ltd., St. Catharines, Ont.; P. Pelossa, Longeuil, P.Q.; Rodney Woodenware Co., Ltd., Rodney, Ont.; F. Bibby & Co., Dundas, Ont.; Walter Woods & Co., Ltd., Hamilton, Ont.

* * *

WEATHER STRIPPING

Jas. Simmonds Ltd., Halifax, N.S.—Would you kindly advise us of the names of manufacturers of weather stripping?

Answer.—Weatherstrip Felt; Best Weather Strip Co., Ltd., Hamilton, Ont.; Hollow and Solid Core; Dunlop Tire & Rubber Co., Ltd., Toronto. Metal: Chambers Metal Weather Strip Co., Ltd., Kingsville, Ont.; Eberhard & Wood Mfg. Co., Toronto, Ont.; Higgin Mfg. Co., Toronto, Ont; The Wm. Pain Co., Ltd., Hamilton, Ont.; Triplex Weather Strip Co., Toronto.; Watson Ltd., Brantford, Ont.; Best Weather Strip Co., Ltd., Hamilton, Ont.

DELCO ELECTRIC POWER SYSTEM AND LIGHTS

Madole Hardware Co., Napanee, Ont.—Can you advise us who the "Delco Electric Power System and Lights" people are?

Answer. — Delco Electric Devices: The Diamond Electric Co., Binghampton, N.Y.; Delco Ignition Apparatus and Materials, Lighting Outfits, Auto and Gasoline Engine Starters and Igniters, Diamond Electrical Co., Dayton, Ohio; Canadian agents and distributors: Electrical Systems, Ltd., 173 King Street East, Toronto.

RESTAURANT SUPPLIES

W. T. McArthur & Co., Ltd., Vancouver, B.C.—Can you advise us of names of firms manufacturing retinned steel goods and restaurant supplies?

Answer.—The McClary Mfg. Co., London, Ont., etc.

The Thos. Davidson Mfg. Co., Montreal.

John Burns & Co., Ltd., Montreal.

C. Schilling & Sons, Winnipeg.

Geo. Sparrow & Co., Toronto.

The Gurney Foundry Co., Toronto.

The Wrought Iron Range Co., Toronto.

* * *

METAL SPIRAL STAIRCASES

Smith Hardware Co., Cornwall, Ont.—Will you please give us names of firms manufacturing spiral metal steps and staircases as used in factories?

Answer. — Campbell Steel & Iron Works, Ltd., Ottawa, Ont.

Canadian Allis-Chalmers, Ltd., Toronto.

Canadian Ornamental Iron Co., Toronto.

Dennis Iron & Wire Works Co., Ltd., London, Ont.

C. A. Hutchinson, Montreal.

McGregor & McIntyre, Ltd., Toronto.

The G. B. Meadows Co., Ltd., Toronto.

Sarnia Bridge Co., Ltd., Sarnia, Ont.

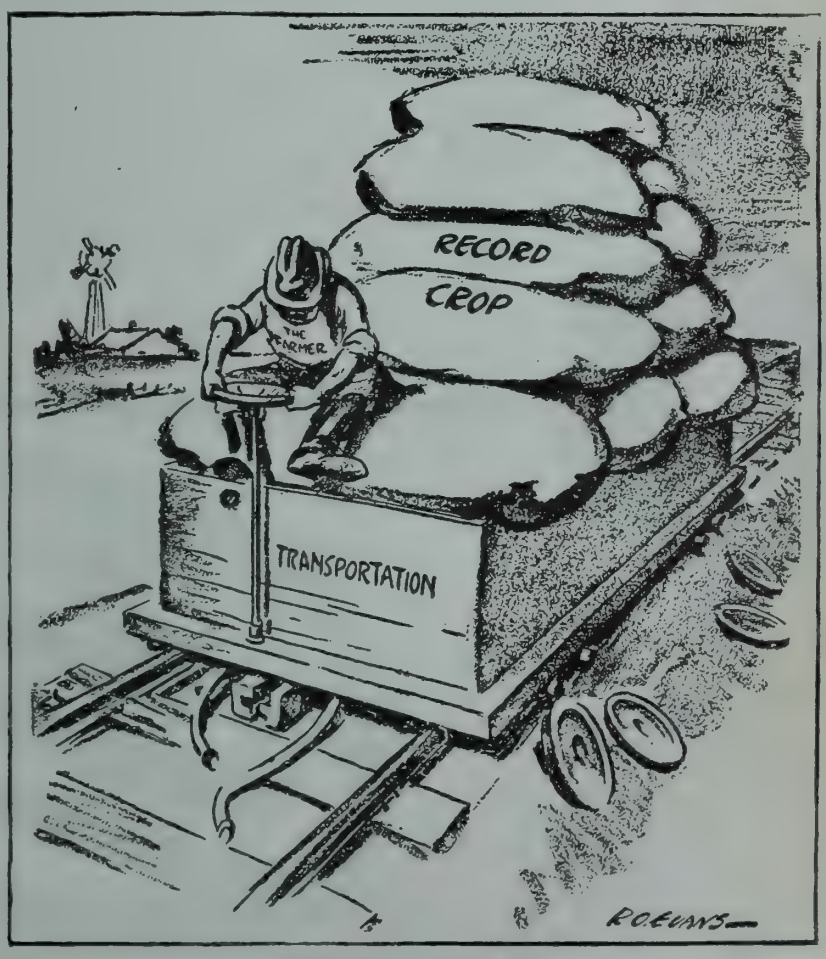
John Watson & Son, of Montreal, Ltd., Montreal.

Ontario Steel Products Co. Has Profitable Year

The Ontario Steel Products Co., with plants at Oshawa, Chatham, and elsewhere, reports profits for the year ended June 30, of $316,000, as compared with $199,000 for the previous 12 months. The company is increasing its capital from $1,500,000 to $2,750,000.

Catalogs and Booklets

The Clover Mfg. Co., Norwalk, Conn., have issued a booklet, "Bulletin No. 80," describing the uses for which the Clover grinding and lapping compound is especially fitted. The booklet is a handy one, not only to mechanics and garage men, but also to all car owners who wish to know something about the cylinders of their cars and the causes of and how to avoid compression leaks. The bulletin contains numerous diagrams and full directions on lapping and assembling piston rings into cylinders, as well as many other hints useful to the man who wants to overhaul an engine.



TO MARKET, TO MARKET—

Have Passed Pinnacle of High Premium Prices in Sheets

Less Lemand from Auto Industry for Sheets Diverts Tonnage Into Other Lines—Prices May Moderate After New Year—Better Production Basis with Improvement of Railway Service.

"WE find that the cessation of the urgent demand for sheets for use in the automobile trade is finally allowing the mills to divert tonnage into other lines and we belive the pinnacle of high premium prices is passed," said A. T. Enlow, president of the Dominion Sheet Metal Corporation, Hamilton, Ont., to Hardware and Metal in reviewing the situation regarding sheets. The opinion was further expressed that the market, as represented by the extreme position of the United States Steel Corporation and independent mills, should gradually come to a common point. Such a movement however would require several months to establish as the independent mills act as a unit in protecting unfilled contracts booked at high prices.

Unless unforeseen causes arise, prices are expected to moderate considerably after the new year, according to Mr. Enlow, who stated that his company was now offering a small tonnage for the first time this year, for fourth quarter delivery, at prices much below current independent mill quotations, plus import charges and exchange.

"We will probably be able to get back to a better production basis soon as the railways continue to improve their service," said Mr. Enlow.

Revision of Nail Extras This Week

First Change of Extras Since 1918—Higher Freights on Raw Materials and Coal Partly Responsible—Reflects Recent Action by U.S. Wire Interests.

THE first change of extras on base quotations for nails since October 22, 1918, has been made this week and represents quite an appreciable advance on a number of gauges, ranging from an advance of 5 cents on a previous extra of 10 cents on 3¼-in. to an advance of 50 cents on a previous extra of $1.00 on 1-in. The change is a general revision due to the fact that the previous list of extras was out of proportion, some gauges being quoted higher in proportion than others. Hence the change is not on the same percentage throughout the list.

Higher freight rates on raw materials and also on coal, combined with the continued difficulty in procuring materials is said to be responsible for this movement, though it may also reflect a similar movement made recently in the United States where owing to increased costs of production attendant upon higher freights it is reported the leading wire interests have decided upon an advance of $5 per ton in its extras on nails. Such action is said to be the first semblance of a price change adopted by the Steel Corporation since March 1919.

This advance in Canadian nail extras has been anticipated since conditions have developed in this country similar to those which made such action necessary in the United States, and references to this have been made in previous issues of Hardware and Metal.

New K. & S. Plant in Production This Fall

Toronto.—The new plant of the K. and S. Tire and Rubber Goods, Limited, on Paton Road, is rapidly approaching completion, and is expected to be in full production in November. The costs of the initial installations for production exceeds $480,000, and the plant is said to represent an investment of over $800,000. This provides for an output of 100,000 tons a year, 300,000 tubes and 1,800,000 rubber bottles and syringes. In the main building there are over 76,000 feet of floor space.

Judges Will Need Three Months to Decide Contest

Hundreds of thousands of replies were received in the $10,000 prize contest recently conducted by the manufacturers of the Eveready Daylo, with the result that the contest department in New York was completely snowed under by the avalanche. It will take the judges, it is said, at least three months to study the returns and make their selection of the 104 prize winning answers that will receive awards ranging from $10 to $3,000.

Is Getting Prompt Delivery of British Sheets

The experience of certain Canadian manufacturers in regard to securing delivery of galvanized and other sheets from England during the past summer, as outlined in a recent issue of Hardware and Metal, is not borne out by others in the trade. We are informed by A. C. Leslie & Co., Ltd., Montreal, that this year they have been able to book a considerable quantity of English sheets, particularly galvanized, and up to the end of August, had delivered over 3,000 tons. Before close of navigation another 2,000 tons is expected. While there are certain English lines which are not available to Canadian buyers at the present time, British sheets cannot be included in this category judging from the experience outlined. We are advised that shipments have been very prompt. It is significant of the desire of British firms to maintain their Canadian connection that they are shipping such material to Canada in the face of higher offers from other countries. It is stated that British firms are giving Canada all the tonnage they can spare and at the lowest figure without having buyers here obliged to pay dumping duty.

British Empire Steel Corporation

Montreal.—Advices received from London indicate that final arrangements have been made for the underwriting of the $25,000,000 8 per cent. preference and participating stock of the new British Empire Steel Corporation.

When Col. Grant Morden, M.P., was in Canada, he announced that this issue would represent the investment of the English interests in the company and now that the details of the merger of the numerous concerns involved have been completed it has been possible to go ahead with the financing arrangements.

It is understood that some of the local interests in the British Empire merger will visit London within the next few weeks.

Ingersoll Negotiating for Another Industry

Ingersoll.—As the result of information given out at a meeting, considerable interest is being manifested in negotiations which have been opened for a new industry. Mr. Bournie, industrial commissioner of the C.P.R., and Charles L. Bailey, of Toronto, Canadian manager of the Jessop Steel Company, together with others directly interested in the industry came here and the proposition was thoroughly gone into at a meeting attended by members of the council, leading business men and manufacturers.

Further reductions in export duties announced by the German Government affect bridge parts, iron boilers, buckles, wire springs, wire brushes, lamps, lanterns, padlocks, door lockers, and firearms.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THE special feature of the week is the new list on wire nails. The prices of "extras" are revised and though some sizes are unchanged there is a considerable advance on others especially in the smaller sizes, but the base price is unchanged. These changes were not unexpected and were forecast by Hardware and Metal two weeks ago, the increased freight rates from U.S. steel mills having affected the price of raw materials.

Bar iron and mild steel have also advanced in price, due, it is stated to freight rates and underproduction. The cessation of the urgent demand for sheets by the auto trade is allowing the mills to direct tonnage into other lines and it is believed that the pinnacle of high premium prices for these goods is now passed and unless unforeseen circumstances should arise prices from now on should moderate on these goods.

Among lines advanced in price are wooden dash churns, washboards, bakeboards and several other lines of woodenware. Electric heaters are costing more, as are curry combs.

Among lines reduced in price are some lines of wrapping twines and garden hose for spring.

Lower prices are quoted on rosin, but turpentine and linseed oil are unchanged. Prices on paint seem likely to remain as they are for the present.

Scarcity continues in pipe and fittings and in galvanized sheets which are in some cases being quoted higher. In ingot metals tin has recovered and lead is a little easier.

Fall goods are selling readily and collections are said to be satisfactory.

MONTREAL MARKETS

MONTREAL, Sept. 16.—Hardware prices are, for the most part, quite firmly held, and there are many changes of an upward nature, new prices being quoted on some important lines. A new list of "extras" on nails has been issued and this means that, while the base on nails is unaltered, the cost of most sizes of nails will be materially greater. Coal oil and gasoline are firm. The rope basis is steady. Twines, due to outside competition, are easier in tone and some are quoted less. Galvanized sheets have arrived in increased quantities but are immediately absorbed and jobbers have advanced prices again, some to the extent of two dollars per cwt. Spring steel is 50 cents higher. Curry combs are now selling at 25 per cent. off the list. Asbestos products are firm and several incline to believe that they will be higher. Stove pipes are higher, 7 inch now being quoted at $28 per 100 lengths. Garden hose for spring delivery will be from 3 per cent. to 5 per cent. less. Polish and polish mops are likely to be higher. Electric heaters are selling well at higher prices. Garden tool discounts have been altered and show an advance. Car movers are higher in price. Lamp burners are ten per cent. higher. Axe handles are firm and scarce and may go up. Cutlery is still firm but more readily available. Flashlights are selling freely. Baseball goods are active and prices firm. Various shovels are firm and scarce. Stoves and ranges are very firm although there has been no general advance here as yet. Chain markets are strong and prices have been withdrawn pending higher quotations.

Gasoline and Coal Oil Firm and Active

Montreal.

GASOLINE, COAL OIL.—Prices have been fully maintained on gasoline and some have expected that these would soon rule higher. The market is firm, and motor grade still sells at 43½ cents, while coal oil is unchanged at 31 cents. It is probable that, with these lines being hauled so far the new freight increases will affect them rather materially, but such change will come a little later.

Old Material Quiet, But Some Movement

Montreal.

OLD MATERIAL.—In a general sense there is very little to report on the market, excepting that auto tires are very low in price, being quoted at 1½ to 2 cents a pound. The movement of scrap steel is somewhat better, a number of manufacturers having opened their plants again. Aside from this the movement is a very limited one and early revival of trade in an extensive way is not anticipated.

Dealer's Buying Prices

Automobile tires	0 01½	0 02
Yellow brass	0 09	0 10

Boiler plate	17 00	18 00

Wares Moving Out and Prices Steady

Montreal.

WARES.—Prices, as recently altered, are ruling steadily, and there is a fair movement of lines to the trade. Particularly is this the case with previously-placed orders, and the season is looked

upon favorably. Naturally the higher cost to lay down raw material for subsequent shipments of raw materials to the manufacturer will, in time, have its own effect on prices, and revisions are probable.

Rope Basis Steady, But Twines Easier

Montreal.

ROPE AND CORDAGE.—While there has been little new in the rope market, hard fibres holding steady, the undertone on twines has been much easier and lower prices are obtainable on some lines of twines. This is due more, it is stated, to outside competition with low-priced goods than because of lower prices on the raw material for reliable stock. In general the binder twine season is finished and it has been an active one. Pure manila rope is quoted at 35½ cents basis; New Zealand and beaver manilla at 28 cents, and sisal at 22½ cents per pound.

Two Dollars Per Cwt. Added to Galv. Sheets

Montreal.

SHEETS AND PLATES. — While there has been a decidedly nominal basis on galvanized sheets for a long while, the definiteness of change comes this week in the announcement by jobbing circles that they have added $2 per cwt. to quotations. This is due to the continued scarcity of some gauges. While improvement has been manifest in the receipt of galvanized sheets from the Old Country, orders in hand absorb shipments even before they have arrived. The undertone is consequently bound to continue strong.

BLACK SHEETS—		
10 gauge	....	10 95
12 gauge	....	11 00

24 gauge	12 15	12 65
22 gauge	11 80	12 30
18 and 20 gauge	11 35	11 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

Spring Steel Up 50c; Bar Iron Unchanged

Montreal.

IRON AND STEEL.—There has been one advance in the list this week, that of 50 cents for spring steel, and on which the base is now $6 per cwt. Bar iron and steel, while ruling firm, are quite unchanged, and there is difficulty from time to time in obtaining the necessary sizes. The undertone is steadily firm.

ADVANCE IN COLORS IN OIL

Montreal.—It is announced that colors in oil have advanced from four to fifteen cents per pound. Further particulars will be given.

IRON AND STEEL		
Iron finish machinery steel		$5 05
Norway iron	13 50	15 00
Single reeled machinery steel		6 50
Spring steel		6 00
Sleigh shoe steel		5 50
Tire steel		5 20
Toe calk steel, per 100 lbs.		5 90
Band steel		5 00
Harrow tooth steel		5 15
Mining tool steel, per lb.		0 24½
Black diamond tool steel, per lb.		0 24½
Black diamond cast steel, per lb.		0 24½
Common bar iron, per 100 lbs.		4 65
Refined iron, per 100 lbs.		5 65
Mild steel		5 00

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Curry Combs Up; Now 25% Off List

Montreal.

CURRY COMBS.—Prices have been revised on curry combs, and this means higher prices. The regular list lines are now subject to a 25 per cent. discount.

Asbestos Products Firmer; May Advance

Montreal.

ASBESTOS PRODUCTS.—Prices are very firm on various lines of asbestos products, and while there are no definite price changes at the moment, manufacturers are of the opinion that increases may come. Higher costs of production are said to be the cause, in large measure. of the strengthening of the market.

Stove Pipes $28.00; Will be Very Scarce

Montreal.

STOVE PIPES.—From all sources the same story is told: "Stove pipes will be scarce this fall." Prices have been firming, and the new price now quoted on 7-inch patent pipes of $28.00 per 100 lengths is a new high level. Canada plates are very scarce and this is not likely, say importers, to be soon relieved. Almost any price is likely to prevail if the present stringency continues, which seems likely.

"Spring" Garden Hose Will Cost Little Less

Montreal.

HOSE.—New lists, to be effective September 20, are being compiled at present and will reach the trade in a few days. These call for a slight reduction of from 3 to 5 per cent. on various lawn and other hose, and this will apply to lines customarily booked in the fall for spring shipment.

Nails Costing More Owing New List "Extras"

Montreal.

NAILS.—An advance effective September 10 on the nail list of "extras" follows the forecast made in Hardware and Metal a week or two ago. The whole list has been changed, and this means that, while the base price remains at $6.40 per keg, the price on nearly all sizes will be materially higher. The new extras will be found elsewhere and it would be well for the trade to make careful notation of the new extras for their guidance and protection. Cut nails still sell here at $6.90.

Despite High Prices Shot Guns and Rifles Sell

Montreal.

GUNS, RIFLES.—The movement of shot guns to the retail trade is continuing active, particularly of single barrel design when they can be procured. A number of these lines are selling more freely than usual despite the high prices and the Government tax. With regard to rifles, Hardware and Metal understands that some of the newer designs which are of small calibre are particularly popular this fall, and are selling more freely than at any time during the past few years. Stocks of some of these are limited and are quickly exhausted.

Polish Mops and Polish To Go Up

Montreal.

POLISH MOPS, ETC.—The market is very firm on leading lines of polish mops and there is every evidence that higher prices will prevail in the very near future. It is expected that an advance will be made on these goods within the next few weeks if not sooner.

Pistols Hard to Get and Prices Hold High

Montreal.

PISTOLS.—One popular line of revolvers has been very hard to procure for the past ten to twelve months, and there is still difficulty in obtaining any stocks. Other lines are to be had, however, in intermittent shipments, and jobbers are having difficulty in getting anything like a complete line. Prices are holding very high.

Ammunition Active and Undertone Firm

Montreal.

AMMUNITION.—The movement of loaded shells and sporting ammunition has been very active for some weeks and still continues. One of the greatest difficulties is that of obtaining the necessary supplies from the manufacturers although by shipping frequently the trade appears to be getting fair supplies. Late "repeat" business may find the jobbers unable to meet all requirements. The prices are holding firmly without change.

Electric Heaters Very Active Now

Montreal.

ELECTRIC HEATERS.—The sale of electric heaters is already manifesting itself very actively. Especially in dis-

tricts and towns or cities where electric power is moderate in cost the movement of these seasonable heaters is specially marked and active. Prices have been somewhat higher of late, and one of the popular sellers which formerly retailed at $12 each is now selling at $15. One jobber who handles these only as a side line stated to Hardware and Metal that his firm had sold several hundred already this fall.

New Higher Prices on Garden Tools

Montreal.

GARDEN TOOLS.—While new prices on garden tools for next year are not available at this writing it is expected that there will be an advance. The new quotations on these goods are expected quoted, which is a new high figure.

New High Prices on Car Movers

Montreal.

CAR MOVERS.—There has been a scarcity of car movers for some time but these are again available in fair supply. On Samson line of movers a price of $90 per dozen is now being quoted and which is a new high figure.

Firm Undertone on Clocks; Are Scarce

Montreal.

ALARM CLOCKS.—For a considerable length of time there has been a decided scarcity of alarm clocks. This applies to various makes, and although manufacturers have been working overtime it has been impossible to supply the demand and many lines are still scarce. The undertone is firm.

Ten Per Cent. Added to Lamp Burners

Montreal.

LAMP BURNERS.—An increase of 10 per cent. has been announced for various lamp burners including also lantern burners. The increase is effective at once.

Best Axe Handles Scarce and Firm

Montreal.

HANDLES. — At the present time there is a reported scarcity of axe handles, particularly of best hickory material. There is a growing scarcity of this desired material and it is doubtful if there will be much improvement in the supply during the present fall season. Prices are unchanged but are very firm.

Pocket Knives Coming But High Prices Hold

Montreal.

CUTLERY.—The arrivals of cutlery from the English market in so far as pocket and pen knives are concerned has shown considerable improvement of late. In speaking with a large Canadian jobber who handles considerable quantities he informed Hardware and Metal that greater attention was evidently being paid the Canadian market than for some time past, and a desired and much appreciated improvement was therefore noticeable in connection with these two lines. Prices are naturally holding firm under the high production cost still existing.

Flashlights Active With Prices Firm

Montreal.

FLASHLIGHTS, BATTERIES.—The popularity of the flashlight seems to be even greater than it was and jobbers report an increased business this fall. "Our sales in these lines are away ahead of last year and bigger than ever," said the manager of a sporting goods department of a large jobber to Hardware and Metal. "Deliveries are also very satisfactory and the quality of these goods seems to be even better than it has been in the past." Prices on batteries and cases are firm.

Some Razors Coming But Prices Are High

Montreal.

RAZORS.—Some lines of razors which have been off the market for a number of years, due to the shortage of material and labor, are now coming into the Canadian market. While the quantities are rather limited and prices very high there seems to be enough demand to absorb such as may be procured. There is a noticeable improvement in the available stock of these lines in common with some other lines of cutlery and the trade will welcome the improvement in view of the forthcoming fall and holiday trade.

Better Baseball Goods Meet With Ready Sale

Montreal.

BASEBALL GOODS.—The movement of baseball goods has been very active during the past few weeks and particularly among the "boy" group. It is a noteworthy fact that the better lines are selling, and even with the small boy, he will pick out a better grade of ball and bat than when prices were much lower than they are now. Stocks are fairly well assorted.

Firm Prices Prevail For Crosscut Saws

Montreal.

CROSSCUT SAWS.—There is at the present time an active inquiry for crosscut saws of various makes. These are holding without change but even at higher prices prevailing there is a healthy sale for various grades. Stocks are said to be fairly satisfactory.

Carving Sets Sell at Record Prices

Montreal.

CARVERS.—It is a notable fact that. although the prices at present quoted on various carvers are abnormally higher than they were, buyers are interested more in the better grade than they are in the ordinary. There is a good show for these lines and jobbers are already in receipt of orders from the trade for supplies for the coming fall and holiday trade.

Horse Blanket Trade Begins in Earnest

Montreal.

HORSE BLANKETS.—The fall demand for horse blankets is active and various new lines are being offered the trade which is usual from season to season. Prices are firm and it is expected that a good season will be recorded.

Active Sale Now For Table Cutlery

Montreal.

TABLE CUTLERY.—The movement of various table cutlery is improving as the fall season approaches. An increasing demand is evident for stainless steel table and dessert knives, and in some cases forks of the stainless variety are being introduced. This line bids fair to have a very wide sale during the coming fall, and several choices of patterns are available. Prices have not receded at all and perhaps will not for some time.

Snow Shovels Active; Possibility of Shortage

Montreal.

SNOW SHOVELS.—Jobbers state that there will be a scarcity of steel snow shovels this fall and that late orders will be difficult to fill. This is due to a scarcity of the necessary material of the proper gauge for making these, and the same condition applies concerning furnace scoops. Grain scoops are not too plentiful although there is a fair supply of these in hand.

Pig Lead Easier; Eases Lead Products

Montreal.

LEAD PRODUCTS.—These in general are easier in tone and this is due to a weakening of the basis for pig lead. While no new quotations are at hand on lead sheets or lead pipe these may come later. Bar solders are lower to the extent of 2 cents a pound all around, and wire solders, too, are lower in price. There is a fair demand in limited quantities for these products.

Lead pipe, per 100 lbs.	17 00
Lead waste, per 100 lbs.	18 00

Stoves Very Firm; Advances Probable

Montreal.

STOVES AND RANGES.—While the undertone continues very firm on various stoves and ranges as well as heaters there has been no definite advance made to the trade recently. This does not mean that advances will not come and this is probable at any time. The difficulty of getting pig iron and also coke coupled with the advance in transportation costs will all have a bearing on the future trend of the market. There is a good movement at the present time.

Ash Sifters Firm; May Soon be Scarce

Montreal.

ASH SIFTERS.—There is a good demand for various ash sifters and particularly for those lines made of galvanized iron. Material for making them is decidedly scarce and in view of this fact it may be difficult to fill orders promptly in the coming weeks.

Chain Market Strong; Some Prices Withdrawn

Montreal.

CHAIN.—While there has been no definite announcement regarding prices on several lines of chain, including electric weld and various coil chain, prices have been withdrawn on a number of lines and there is a feeling that higher quotations will soon be effective. The undertone is very strong and, in common with many other lines of iron and steel products, an advance on this line would not be surprising.

Little Change Made on Ingot Metals

Montreal.

INGOT METALS.—There has been a rather soft undertone on many lines, though changes are limited. Trading is not very active but there has been some movement of consequence.

TIN.—This has been somewhat unsettled owing to the exchange situation, but prices remain as quoted last week, 54 to 55 cents a pound.

COPPER.—While there was a £1 advance in London this week, this has not been reflected here, and quotations remain unaltered at 23½ cents for casting and 24 cents for electrolytic.

LEAD.—This is somewhat easier and lower, due to the exchange rates in part. Local quotations are ranging this week around 9 cents a pound. It is said that English lead may be bought for less money, duty paid.

ANTIMONY.—This is weaker, and large buyers can obtain concessions. The last-quoted price of 9½ cents still obtains.

SPELTER.—This is steady and unchanged with 10½ cents being quoted.

ALUMINUM.—Somewhat easier, with 36 cents per pound being quoted here on ordinary lots.

TORONTO MARKETS

TORONTO, September 16.—Price changes this week are not so numerous as usual, and if it had not been for the new list of "extras" on nails there would not have been anything of very special interest.

The increase on nail prices was not unexpected, and as announced in Hardware and Metal two weeks ago it was anticipated that they might advance in conformity with the increased prices in the U.S. caused it was said by the higher freight rates.

Bar iron, angles and mild steel are advanced in price, partly due, it is stated, to the higher freight rates and partly to the increased prices caused by the strike in Canadian mills.

Among other lines that have higher prices this week are curry combs, wash-boards and various lines of wooden ware and roofing.

Wrapping twines are slightly lower.

A firm tone is noted on pipe and black and galvanized sheets and plates, and though no change in quotations is reported, these lines are still very scarce, and in many cases premiums have to be paid in order to secure stocks.

In metals tin is up again slightly and lead is a little easier.

Business, though a little quieter, is said to be very fair for the time of the year and bookings are satisfactory.

Collections are reported to be favorable.

Belting in Good Demand; Prices Unchanged

Toronto.

LEATHER BELTING.—The demand for different sizes and grades of leather belting continues good and a shortage of the best stocks used in the manufacture of high grade leather belting is reported and apparently there is little prospect of expecting a fall in prices on this commodity.

Discounts remain as before and will be found on current market quotation pages.

Sash Cord Firm and Unchanged

Toronto.

SASH CORD & CLOTHES LINES.—No change is reported in the prices of sash cord, cotton rope, or cotton clothes lines, which remain firm. While the new crop is practically in, it is too early to judge what the effect will be on future prices.

Conductor Pipe Scarce With Other Gal. Goods

Toronto.

CONDUCTOR PIPE, ETC.—With other products of galvanized sheets such as eavetroughing, etc., conductor pipe is still very scarce and hard to obtain and dealers say they could do more business if they could get materials more readily.

Prices on conductor pipe and eavetrough remain 25 per cent. above list and conductor elbows 50 per cent. on list.

Wash Boards Advanced About 10%

Toronto.

WASHBOARDS.—There has been an advance on some makes of washboards due to the increased cost of raw materials and the following are new prices on these lines: Diamond King (glass), $8.75; Neptune, $6.50; Jubilee, $7.15; Newmarket King, $7.15; Western King, (enamel), $9.50.

Clothes Pins Advanced Approximately 15%

Toronto.

CLOTHES PINS.—There has been an advance of approximately fifteen per cent .on common wooden clothes pins and these are now quoted at $2.10 boxed loose in 5-gross lots or in 4-gross lots boxed four dozen to a carton.

New Prices on Majestic Heaters

Toronto.

ELECTRIC HEATERS.—The Majestic make of electric heater is now costing more and present prices on this make are: 1 burner, $11.50; 2 burner, $17.50; less 27½ per cent. discount.

Aluminum Goods Having Ready Sale

Toronto.

ALUMINUM GOODS.—There has been a good demand for aluminum ware and the coffee percolators especially have been very scarce on the market for some time, and at least 25 per cent. higher in price. The aluminum lines that are usually sold in colored cartons with holly leaf designs for the Xmas trade are arriving earlier than usual this season. Prices on all wares are firm.

Higher Prices on Grindstones

Toronto.

GRINDSTONES.—These goods are selling at higher prices and under forty pound weights are now quoted at $5.50 per 100 pounds, and over 40 pounds at $5 per hundred.

Chain Pot Cleaners Advanced 25%

Toronto.

CHAIN POT CLEANERS.—There has been an advance on chain pot cleaners and these are now selling at 25 per cent. higher.

Automobile Pumps Priced Higher

Toronto.

AUTOMOBILE PUMPS.—There has been an advance of 12½ per cent. on Ideal pumps and 25 per cent. on the three cylinder automobile tire pump.

Bake Boards Show Higher Prices

Toronto.

BAKE BOARDS.—Like other lines manufactured from wood, pastry boards with the rim round them are showing the effect of the higher cost of lumber and have been advanced about 30 per cent.

Higher Prices on Curry Combs

Toronto.

CURRY COMBS.—These lines have been advanced approximately 10 per cent. and new prices are given on the following numbers: No. 111, $2 per doz.; No. 121, $2.20; No. 127, $2.90.

Twenty Per Cent. Advance on Cattle Combs

Toronto.

CATTLE COMBS.—An advance of approximately 20 per cent. has been made on cattle combs and they are now selling as follows: No. 98, $2.60 per doz.; No. 100, $3.70.

Samson Roofing Slightly Higher

Toronto.

ROOFING.—Following the recent advance on roofings due to higher cost of raw material, there has been an advance of about 7½ per cent. on Samson roofing which is now quoted as follows: 1-ply roll, $3 per square; 2-ply, $3.50; 3-ply, $4.10.

Black and Galvanized Sheets Hard to Procure

Toronto.

BLACK GALVANIZED SHEETS.—Sheets and plates are said to be as firm as ever, and jobbers are finding it extremely difficult to replenish stocks except at extra premiums. The shortage of plates has not lessened at all, but some jobbers are of opinion that it is largely on account of transportation difficulties as there are said to be fairly good stocks piling up at the mills which they cannot get cars to ship in. Prices are nominal, and below are the ordinary quotations:

BLACK SHEETS

14 gauge	....	$8 95
16 gauge	....	9 00
18-20 gauge	....	9 45
22-24 gauge	....	9 50
26 gauge	....	9 55
28 gauge	....	9 65
3-16 inch plate	....	9 75
¼-inch boiler plate	....	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier		Apollo	
10¾ oz.	$12 00	$12 50	$12 00	$13 25
U.S. 28	11 45	12 70	11 45	12 85
U.S. 26	11 15	12 40	11 15	12 55
22 and 24	11 00	12 25	11 00	12 40
18 and 20	10 70	11 95	10 70	12 10
16	10 70	11 95	10 70	12 10
12 and 14	10 55	11 20	10 55	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Cocoa Door Mats in Demand; Prices Higher

Toronto.

COCOA DOOR MATS.—There is a good demand for cocoa door mats. These goods are considerably higher in price than formerly.

Wrapping Twines Down Five Cents

Toronto.

WRAPPING TWINES.—A slight decline in wrapping twines is noted, and these are now quoted at 5 cents per pound less than the previous price.

Cotton Waste Unchanged; Prices Remain Firm

Toronto.

COTTON WASTE.—There has been no change in prices, which remain firm, and dealers in these products say they do not yet know how prices are likely to be affected. The present demand is fair and prices are as following quotations:

WASTE

Cream, Polishing	....	0 28

Above lines subject to trade discount for quantity.

Slight Advances in Mild Steel and Bar Iron

Toronto.

IRON AND STEEL.—On account of the strikes in the mills east of Toronto and the fact that the mills that are running are charging more for their products there has been in some cases an advance on bars, angles and sheets of twenty-five cents per hundred pounds.

A good many lines and sizes were short previously and the strike will not make matters any easier, and should it be prolonged a very decided shortage in these lines will likely be the result.

The increased freight rates are said to affect prices to the extent of about ten to fifteen cents per hundred pounds, and taking this into consideration together with the high prices asked by the mills it had been expected that an increase of at least fifty cents per hundred pounds might have been looked for.

Some jobbers are of the opinion that further advances are likely when the full effect of the increased freight rates is felt. They think that the Steel Corporation are almost sure to revise their prices before long owing to the higher cost on coal and coke. Latest quotations are as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 00
Spring steel	12 75

Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Compression Bibbs and Valves Unchanged; Firm

Toronto.

VALVES AND BIBBS.—There is no change in brass goods and compression bibbs and valves are holding firm. Jobbers report a fair amount of business for the season of the year, and stocks at present are not reported short. Prices on better known lines are as follows:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Bath cocks, Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%

Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Compression	16%
Quick opening	28%

Stoves and Ranges Firm; Demand Good

Toronto.

STOVES AND RANGES.—The demand is continuing good for these lines, and dealers are finding it difficult in many cases, it is said, to get deliveries. Good business was reported from those firms having exhibits at the Fair. Scarcity of material and delay in transportion is said to be hampering production, and many manufacturers stated that the demand is larger than the output.

Extras for Galvanized, Tinned, Coppered or Brass Plated Nails quoted on application.

Good Call For All Kinds of Asbestos Products

Toronto.

ASBESTOS PRODUCTS.—There is said to be a good demand for all kinds of asbestos products, including pipe coverings and asbestos cement and furnace coverings. Prices are very firm and the market is rising. It is said that the higher freight rates are bound to have the effect of causing an advance in prices, especially in the case of heavier lines such as asbestos cements. No particular shortage is said to exist in these goods.

Plumbers' Oakum Unchanged But Firm

Toronto.

PLUMBERS' OAKUM.— There has been no change in the price of plumbers' oakum and quotations remain about $9.50 per 100 pounds. Demand is steady.

Prices on Pipe Firm; Shortage Continues

Toronto.

STANDARD PIPE.—There is said to be no improvement noted in wrought iron or steel pipe, and there is a continued shortage in many sizes. Supplies are smaller than the demand and many mills are said to be still closed on account of scarcity of skelp and supplies. No change of price has been recorded though it is said that increased freight rates may possibly lead to further adjustments. Quotations are as per list No. 46, which is given below:

Pipe Fittings Are Scarcer, But Unchanged

Toronto.

FITTINGS.—Prices on pipe fittings are steady and unchanged. Stocks are short and deliveries none too easy to obtain, especially in malleables, and if any change in price occurs, it will hardly be in a downward direction. Quotations are:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2-in.	Plus 50%
Do., 2½-in. and larger	8%
Nipples, up to 4-in.	60%
Do., 4½-in. and larger	50%
Do., running thread, 4-in. and under	30%
Couplings, 4-in. and under	30%

Class B	0 30	0 40
Class C	0 20	0 30

Supply of Range Boilers Less Than Demand

Toronto.

RANGE BOILERS.—The demand for these has been steady, and difficulty is being experienced in filling orders as stocks are being depleted and material is scarce. Prices are as yet unchanged but it is doubtful how long they will remain so as raw materials are so much higher in price and very scarce.

Range Boilers—	Standard	Ex.Heavy
30-gallon	$15 00	$18 00
35-gallon	18 00	21 00
40-gallon	20 00	23 00
52-gallon	25 00	29 00
66-gallon	35 00	40 00
82-gallon	42 00	48 00
100-gallon	55 00	65 00
120-gallon	70 00	80 00

Prices Firm on Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—There has been a difficulty in obtaining supplies of galvanized sheets, and naturally corrugated sheets are correspondingly scarce. The situation is not improving to any appreciable extent, and prices are firm and higher prices than the regular quotations are often paid to secure delivery. Latest prices are given below:

Corrugated Sheets—		Per 100 Sq. Ft.
No. 28 gauge	....	12 00
No. 26 gauge	....	12 75
No. 24 gauge	....	18 75
No. 22 gauge	....	22 25
No. 20 gauge	....	26 50
No. 18 gauge	....	32 75

Less 7½%.

Lighter than 24 gauge and wider than 27 inches, 75c a square extra.

New "Extras" List on Wire Nails

Toronto.

WIRE NAILS.—A new list is out on wire nail extras, and the increases are much larger in the smaller sizes which have been especially short for some time, for instance, 2½ inch common, which were 15 cents above base, are now 30 cents, and 1¼ inch, which were previously 65 cents, are now advanced to $1.15 above base. The miscellaneous list has also been changed. The increases are following the increases in the steel trades prices for raw materials. See list pages 58 and 59.

Little Change in Lead and Zinc Products

Toronto.

LEAD AND ZINC PRODUCTS.—Not very much change has taken place in these lines, but slightly easier prices are recorded in solder, but prices vary in different quarters on this commodity. Bar lead is said to be slightly easier, but no change in prices of pipe or traps is recorded.

Quotations on principal lines are:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool, lb.	0 16
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 31
Solder, guaranteed, lb.	0 37
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Waste Materials Unchanged and Quiet

Toronto.

WASTE MATERIALS. — No change in prices is reported in waste trade circles and business in most lines has kept quiet.

There will be an added expense in getting materials to market on account of higher freight rates but to what extent it will influence market prices is not known at present.

WASTE MATERIAL	
No. 2 busheling	$13 00
Stove plate, pe rton	32 00

Automobile tires	0 02½

Ingot Metals Quiet and Inclined to be Firmer

Toronto.

INGOT METALS.—Little change is reported in ingot metals this week. Prices are inclined to be firmer. Tin recovered somewhat while lead was a trifle easier. The demand is said to have been lighter.

TIN.—This metal is reported stronger and quotations ranged from 55 to 57 cents per pound.

LEAD.—The price of lead is a little lower on this week's market and it is being quoted at $9.75.

COPPER.—Copper is reported to be strong in primary markets. Local quotations are costings 24 cents per pound.

ANTIMONY. — Not much demand is being observed and prices range from 10 to 14 cents according to brand.

SPELTER. — This is reported as being quiet and price is still round 10 3-4 cents per pound.

ALUMINUM. — No change in aluminum prices are reported and stocks are said to be fairly large. Quotations are from 37 to 39 cents per pound.

LONDON MARKETS

LONDON, September 16.—Prices are very firm and many new higher prices are expected on account of new freight rates. A new price list is out on wire nail extras.

Higher prices are effective on wood and glass dash churns and also on food choppers and slotted rivets.

A decided shortage is still keenly felt on fence wire, wire nails, roofing nails, roofings, roofing shingles, pliers and many other good selling lines.

Merchants in London and surrounding districts all report a good amount of business. A steady demand for seasonable lines continues.

The Western Fair is in full swing and many hardware merchants are visiting here this week. Several London firms have very attractive exhibits of stoves, hardware, paints, etc., at the Fair.

Collections continue good.

Linseed Oil; Good Demand and Unchanged

London, Ont.

LINSEED OIL.—No changes are reported this week in the prices of linseed oil and the demand is said to be good for the season.

It is quoted as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 80	1 83
3 to 5 barrels, gal.	1 79	1 82
6 to 9 barrels, gal.	1 77	1 80

Less barrels add 15c per gal.

Turpentine Steadier; No Change in Price

London, Ont.

TURPENTINE.—The sales for this commodity have been steady, and no change has taken place in prices which are the same as last week, namely:

1 bbl. lots, $2.50 imp. gal.; 2 to 4 bbl. lots, $2.49 imp. gal.; 5 gal. lots, $2.65 imp. gal.

Wire Nails Cost More; New "Extras" List Out

London, Ont.

WIRE NAILS.—The base price of these is unchanged, but a big advance in extras has taken place. This practically affects all nails and the smaller sizes even more than the larger. The demand continues good for nails, but the shortage also continues. The new list will be found printed in another column. The base price for wire nails is still $6.25, and for cut $7.50 a keg.

Flashlights Having Good Sale; Quoted 33 1-3% Off

London, Ont.

FLASHLIGHTS—At the present time there is a good demand for flashlights and batteries for the same. This is usually a good period of the year for these lines, and the Ever-ready Daylo line is being sold at 33 1-3 per cent. off list.

Demand For Weatherstrip Is on; New Quotations

London, Ont.

WEATHER STRIP.—The cooler days will be with us soon and dealers are preparing for the call for this article. It is moving out fairly well and is being quoted as under.

Wood and Felt—No. 60, 5c ft.; No. 61, 5c; No. 61½, 7c; No. 62, 8c; No. 64, 10c. Less 55/5%.

New Prices on Gem and Universal Choppers

London, Ont.

FOOD CHOPPERS.—The sale for these lines is very good and they are priced considerably above last year's figures.

Quotations on Gem and Universal makes are given:

Gem—	
No. 20, per doz.	28 00
No. 22, per doz.	34 00
No. 24, per doz.	45 00
Universal—	
No. 0, per doz.	30 00
No. 1, per doz.	36 00
No. 2, per doz.	42 00
No. 3, per doz.	58 00

Higher Quotations on Dazey Butter Churns

London, Ont.

DAZEY GLASS CHURNS. — The Dazey glass jar butter churns which have been a very popular seller the last season are now quoted higher. The new prices are as follows: No. 30, $24.00 doz.; No. 40, $30.00 doz.

Wood Dash Churns Advanced in Price

London, Ont.

WOOD DASH CHURNS.—The prevailing high price on lumber has affected these lines along with other woodenware and they now sell for the following prices: 5 gal., $29.50 doz.; 7 gal., $31.00 doz.; 10 gal., $35.00 doz.

Coaster Wagons Sell Well; Latest Quotations

London, Ont.

COASTER WAGONS.—Despite the fact that the season is well advanced the demand for these articles is well maintained and they are meeting with a good sale. The price is list less 35 per cent.

Higher Prices on Slotted Rivets

London, Ont.

SLOTTED RIVETS.—Slotted coppered clinch rivets assorted mixed sizes in paper packages are now quoted higher

and the selling price No. 9, one dozen packages to a carton, is now $1.90.

Rifles and Shot Guns Moving Out For Fall

London, Ont.

RIFLES AND SHOT GUNS.—Fire arms of the well known makes and the popular calibres are having a good sale, although they will cost the user considerably more than last season with the increased costs and the government tax added.

Net prices on the better known lines and calibres are given below.

	Each
Stevens—	
Little Scout	$8 60
Crack Shot	10 50
Marksman	13 00
Favorite	15 70

Mops and Polishes May Be Higher

London, Ont.

O'CEDAR MOPS AND OILS.—There is a very good sale at present for this line of mops and polishes. The present prices are those that have been prevailing for some time and are as follows:

Mops with handle—No. 1, $14.70 doz.; No. 3, $14.70; No. 5, $14.70; No. 14, $14.70.

Polishes—4 oz., $2.10 doz.; 12 oz., $4.20; quarts, $10.50; ½ gal., $16.80; 1 gals., $25.20

WINNIPEG MARKETS

WINNIPEG, Sept. 16.—Higher prices are noted on several lines of hardware this past week, mainly on iron and steel goods and other advances are expected in the course of a week or ten days on account of the increased freight rates. Box stoves are marked up higher. Among other lines advanced are "Rubberset" paint and varnish brushes, steel oilers, railroad milk cans, pump oil cans, floor brushes, butter ladles and rolling pins. Drive well shoes, combination pliers, goggles, pipe vises; and some lines of files are also advanced in price.

Stove pipe is seriously short and has advanced considerably. The market in general has been very quiet the past few days. There is still a great shortage of many staple lines of hardware and it has reached such a stage that the amount of business being done is not at all what it could and should be. The shortage of steel and iron is at the present time a very great drawback to the trade. The supply of wire nails, especially the smaller sizes, is very bad and they are scarce and hard to get.

Higher Prices on "Rubberset" Brushes

Winnipeg.

RUBBERSET PAINT AND VARNISH BRUSHES.—There is an advance of nearly fifty per cent on these lines. This is said to be accounted for by the high prices paid for the raw material coupled with the high cost of manufacturing.

Following are the new prices on the principal lines:

Rubberset Paint Brushes—20 x 2½, per dozen, $4.40; 3, $5.65; 3½, $7.55; 4, $9.45; 5, $12.15; 39 x 3, $8.50; 3½, $11.35; 4, $15.75; 46 x 3, $12.15; 3½, $18.30; 4, $24.75; 35 x 60, $21.50; 70, $34; 80, $45.25.

Rubberset Varnish Brushes—100 x 1, per dozen, $2.50; 1½, $3.15; 2, $4.15; 2½, $6; 3, $6.95. 184XXX—1½, per doz., $7.25; 2, $10.90; 2½, $17.05; 3, $22.70.

Steel Oilers Advanced in Price

Winnipeg.

STEEL OILERS.—Higher prices are quoted on steel oilers, and said to be due to the increased price of raw materials.

Below are the latest quotations:

No. 13, $3.20 per dozen; No. 13A, $3.40; No. 14, $3.75; No. 14AA, $4.70; No. 1150, $3.80; No. 1120, $4.70.

Fifteen Per Cent. More on Railroad Milk Cans

Winnipeg.

RAILROAD MILK CANS.—All milk cans moved to higher figures this week and the increase is about fifteen per cent.

Prices are as follows:

No. 015 x 8, list $5 each; 10, $5.25.

No. 150 x 4, list $4.25 each; 5, $4.50; 6, $4.75; 8, $5; 10, $5.25.

No. 250 x 4, list $4.35 each; 6, $4.75; 8, $5; 10, $5.25.

Advance 50 per cent. on list.

Butter Ladles Show Big Increase

Winnipeg.

BUTTER LADLES.—A sharp advance of practically fifty per cent. has taken place on wooden butter ladles, due to the present price of lumber and the Eclipse line now sells for $1.50 per doz.

Wooden Rolling Pins Advance in Price

Winnipeg.

ROLLING PINS.—Following the advances made on almost all woodenware, rolling pins are now selling at $3.60 per doz. in the number 2, an increase of 60 cents per dozen.

Pump Oil Cans Are Marked Higher

Winnipeg.

PUMP OIL CANS.—Following the advance in all sheet iron wares pump oil cans have been marked up and are now about fifteen per cent. higher, being quoted as follows: Daisy, per dozen, $16.30.

New Price on Comfort Gasoline Irons

Winnipeg.

GASOLINE IRONS.—Another of the commodities manufactured from steel has been revised upwards, and is now about fifteen per cent. higher. New prices on the Comfort gasoline iron are $6.00.

Five Per Cent. Advance on Floor Brushes

Winnipeg.

FLOOR BRUSHES.—The manufacturers have advanced the price of floor brushes about five per cent., due to the higher cost of raw materials. Prices are as follows:

Onyx—No. 73 x 12, per dozen, $20; 14, $23; 16, $25; 18, $28.50.

Revision in Price of Drive Well Shoes

Winnipeg.

DRIVE WELL SHOES.—These have been revised in price and are now sold subject to 25 per cent. discount off list, making an advance of about twenty per cent.

Below is list of prices on these articles.

For Iron Pipe—3 in., list $8 each; 3½ in., $8.50; 4 in., $9; 4½ in., $9.50; 5 in., $11.50; 6 in., $12.50.

Less 25 per cent.

For Well Casing—4¼ in., list $9.25 each; 5 in., $11.50; 5⅝ in., $12; 6¼ in., $13.

Less 25 per cent.

Fifteen Per Cent. Advance on Common Goggles

Winnipeg.

COMMON GOGGLES.—These articles have been advanced about fifteen per cent. and are now being quoted at $3.50 per doz., No. 50.

Armstrong Pipe Vises Marked Up Fifteen P.C.

Winnipeg.

ARMSTRONG PIPE VISES.—Due to the increased costs of iron and steel and higher labor rates, these pipe vises have advanced about fifteen per cent. They are now quoted as follows:

No. 0, each $4.75; 1, $5.60; 2, $8.40; 3, $12.25.

New Price on Swedish Saw Files

Winnipeg.

SWEDISH SAW FILES.—A supply of files for Swedish saws has been re-

(Continued on page 72.)

Extent of Canada's Paint and Varnish Industry

Forty-Five Plants Operating in Canada—Total Assets Total Nearly Sixteen Million Dollars—Nine Million Dollars' Worth of Raw Materials Produced Over Seventeen Million Dollars' Worth of Finished Product—Imports Three Times Greater Than Exports.

Editor's Note—Some interesting statistics of the paint and varnish industry in Canada have just been issued by the Dominion Bureau of Statistics, Department of Trade and Commerce, Ottawa. While these figures deal with industrial conditions during the year 1918, being the latest period for which such figures are available, they will be of interest to the trade as indicating the extent of this industry.

FORTY-FIVE establishments making paints or varnishes or materials destined for use in the paint and varnish industry were in operation in Canada during 1918. The total assets of this industry, including the value of the land, buildings, fixtures, machinery, tools, materials and finished products on hand, together with the operating and trading capital aggregated, $15,784,610.

In 1918, 614 persons were employed in administrative or clerical positions in the paint and varnish industry, and salaries amounting to $921,708 were paid, of which $351,647 went to officers, superintendents and managers, and $570,061 to clerks and other salaried employees. This shows a decrease from 1917 when 667 were thus employed and the salaries paid amounted to $1,072,361, the distribution being $419,816 to officers and $652,545 to clerks. The average number of wage earners as distinct from salaried workers employed in this industry during the year was 1,388, and the total wages paid to these employees amounted to $948,637, or $684 per capita for the year.

The following table shows the distribution of the salaried workers and wage-earners employed throughout the industry when all the factories operated were working with a normal complement of staff:—

	1917		1918	
	Male	Female	Male	Female
Officers, superintendents, managers	139	2	126	2
Clerks, stenographers, salesmen and other salaried employees	375	151	325	161
OFFICE SUB TOTAL	514	153	451	163
Number of wage-earners receiving per week; Less than $10	70	134	242	134
$10, but less than $15	322	38	134	45
$15, but less than $20	535	5	522	7
$20, but less than $25	229	...	229	...
$25 and over	58	...	96	...
WORKS SUB TOTAL	1,214	177	1,223	186
TOTAL	1,728	330	1,674	349

The principal materials used in this industry were valued at $9,203,530, and from them principal products to a value of $17,678,049 were made. Thus the value added to the materials used, by the process of manufacturing, was $8,474,519. Miscellaneous expenses chargeable to manufacturing operations were $2,315,881.

The extensive use of zinc oxide and lithopone as paint pigments is reflected in the figures shown below. Basic carbonate white lead is still used in larger quantities than any other one pigment, but recent advances in the study of paint pigments have shown that zinc oxides and lithopone are very desirable pigments for certain uses.

Raw materials used in the industry are itemized in Table 1 to show quantities and cost.

TABLE 1.—MATERIALS USED IN THE PAINT AND VARNISH INDUSTRY IN CANADA IN 1918

Kind	Unit of Measure	Quantity	Value
OILS—

Item	Quantity	Selling Value
White Lead, Dry	4,030,367 lbs.	$ 473,922
White Lead in Oil	8,456,236 lbs.	1,083,552
Litharge	1,421,686 lbs.	266,974

In 1918 three firms in this industry corroded pig lead to make dry white lead and white lead ground in oil; 10,593,351 pounds of pig lead valued at $874,638 were used in the production of white lead, dry, and in oil, and litharge. Practically the whole of this was made by the "quick process." The quantities made, with their respective selling values, were:

TABLE 2—PRODUCTS MADE IN THE PAINT AND VARNISH INDUSTRY IN CANADA IN 1918

Kind	Unit of Measure	Quantity	Value
Linseed Oil, boiled and refined (Sold)	Gallons	113,256	$ 211,335
Paints in Oil (Ready for use)	Gallons	7,483,893	8,613,973

Asphaltic, Pitch and Tar Products	Lbs.	.....	38,463
All other miscellaneous products	Lbs.	.....	982,280
			$17,678,049

Six other establishments used 1,171,651 pounds of white lead, dry, costing $132,736 for the preparation of 941,013 pounds of white lead ground in oil, having a sales value at the factory of $136,578.

7,483,893 gallons of paints in oil, prepared ready for use, were reported as being manufactured during the year. The total selling value at the plant was stated to be $8,613,973.

A study of white paints carried out during the year in the laboratories of the Department of Trade and Commerce showed that 73 different brands were being offered for sale on the Canadian market. The composition of each was carefully determined and it was found that a great variety of formulas were in use. As pigments, basic carbonate white lead, basic sulphate white lead, leaded zinc, zinc oxide, and lithopone, were found while barytes, blanc fixe, satin white, whiting, asbestine and silica were often present as fillers, sometimes to quite a considerable extent.

The production of varnishes in Canada increased from 1,577,009 gallons in 1917 to 3,317,069 gallons in 1918, the respective selling values rising correspondingly from $2,117,000 in 1917 to $3,764,555 in 1918.

Satisfactory statistics relating to the prices asked for paints and varnishes are only obtainable by reference to the trade journals in which quotations are given for many grades. Cheap rosin furniture varnishes sold at about $1.10 a gallon in October, 1918, while the finest long oil spar varnishes commanded prices ranging up to $5.00 a gallon. Mixed paints at that time averaged about $4.00 on one-gallon-can basis. The products made during the year are shown in Table II.

Exports from Canada of paints, varnishes, and materials used in the paint and varnish industry are given in detail with the export values in Table IV. The total value of these exports in 1919 was $2,112,113.

TABLE 4—EXPORTS FROM CANADA IN 1918 OF PAINTS, VARNISHES, ETC.

Articles Exported	Unit of Measure	Quantity	Value
Cobalt Oxide and Cobalt Salts	Lbs.	588,229	$ 853,737
Mineral Pigments, Iron Oxides, Ochres	Cwt.	15,389	18,377
Paints and Varnishes of all kinds	Cwt.	.....	1,239,999
			$2,112,113

Imports into Canada during 1918 of paints, varnishes, and raw materials used in the industry were valued at $6,309,836. Quantities and values are shown in Table III.

TABLE 3—IMPORTS INTO CANADA DURING 1918 OF PAINTS, VARNISHES, ETC., AND MATERIALS USED IN THE PAINT AND VARNISH INDUSTRY

Articles Imported	Unit of Measure	Quantity	Value
Amyl Acetate and Acetone		.....	$ 2,354
Gums, Amber and Arabic		.....	1,130,508
Flaxseed or Linseed Oil, raw or boiled oil	Lbs.	78,191	12,370
Rosin Oil and Chinawood Oil		.....	771,172
Blanc Fixe and Satin White	Lbs.	7,054,186	92,241
Brocade and Bronze Powders		.....	47,950
Gold Liquid Paint		.....	6,822
Lampblack, Boneblack, Carbon, Ivory Bl.	Lbs.	2,355,364	250,284
Lead, red, dry and orange mineral	Lbs.	896,831	83,752
Lead, white, dry	Lbs.	367,755	30,874
Lead, white, ground in oil	Lbs.	38,642	4,166
Liquid fillers, anti-corrosive and anti-fouling paints, and ground and liquid paints	Lbs.	3,380,035	390,635
Litharge	Cwt.	19,479	170,500
Ochres, ochrey earths, siennas and umbers	Lbs.	3,119,801	66,011
Oxides of cobalt, tin and copper, metallic colors	Lbs.	142,407	73,989
Paints and colors, ground in spirits and all spirit varnishes and lacquers	Gal.	7,665	31,744
Putty	Lbs.	385,589	14,564
Ultramarine blue, dry, or in pulp	Lbs.	427,909	86,740
Whiting, gilder's whit'g and Paris white	Cwt.	209,743	190,162
Zinc white	Lbs.	16,693,824	1,723,396
Varnish lacquers, Japan driers, liquid driers, and oil finish	Gal.	36,240	71,836
Coal Tar Base or Salt (Paranitraniline)	Lbs.	96,458	63,803
Resin or rosin in packages of not less than 100 lbs.	Cwt.	342,552	1,106,145
Turpentine, raw or crude	Lbs.	59,451	4,284
Turpentine, spirits of	Gal.	1,007,029	583,543
Total			$6,309,836

The paint and varnish industry is firmly established in Canada and is making rapid progress, but that there is still great need for protective painting is evidenced by the large number of unpainted structures throughout the country. The very laudable campaign conducted by the paint and varnish makers, under the slogan, "Save the surface and you save all," should have splendid results, and should make for a considerable national economy in building materials.

The survey of the paint and varnish industry for 1919, now in process of compilation, will review the industry in better detail than has been possible heretofore.

Director of Sales States Varnishes and Paints Likely to be Steady

Declines Anticipated by Some Unlikely to Materialize, Thinks Manufacturer—Most Raw Materials Higher Than When Prices Last Figured—Future Business Should Be Excellent.

"EVERYTHING in raw materials, from the label on the can to the contents thereof — with one or two exceptions, are costing more than when prices were figured in January last. I do not see where it is possible to anticipate any decline in prices."

This statement of J. J. Riley, Director of Sales, Flint Varnish and Color Works, of Canada, Ltd., Montreal, sets forth his views, in a nutshell, regarding the immediate outlook as to price and probable tendencies on paints and varnishes for the immediate future. In fact Mr. Riley stated to Hardware and Metal that he did not anticipate early changes in price, and that present schedules will perhaps be in force for a considerable time—possibly the first of the new year in any case.

As stated, it is many months since present prices were made effective. Since that time many advances of price have taken place, Mr. Riley stated, on raw materials. As there are numerous materials used in the manufacture of paints, particularly, these increased costs to the manufacturer have not helped any in promising a gradual lowering of existing prices. It would seem that advances would have materialized during the year, as a result of these raw material advances, had it not been that manufacturers had provided their requirements far in advance, as many and perhaps most firms had done.

Among the items that have advanced in price are those of lithopone. This, while a relatively new ingredient, has been used by paint manufacturers for many years, and it is the basic pigment of flat wall paints. Dry colors—French ochres in particular, have been much scarcer and higher, Mr. Riley states, although shortage of this has been recently overtaken to some extent. Solvents, such as Ethyl Alcohol, have been higher, and containers have, owing to the scarcity of tinplate, been costing more money. Here again, however, early provision for advance requirements gave the paint makers their needed supplies.

These New Factors

"The new freight rates will have some bearing on costs, though not as much as would seem to be indicated," continued Mr. Riley. "Labor costs have not decreased, but there have rather been increases from time to time. And these cannot come down now, for the tenor of labor is such that they would not consider any reduction being made in their wages. Advances have been made to them during the year.

"In considering the freight rate increases it must be remembered that the operating and up-keep costs of the railways are enormous, and few understand what their difficulties in this respect are. I have travelled much and have found that the rolling stock and the service of the Canadian railroads is excellent, and with the costs that they have to face the rate increases seem to be justified. These increased costs will be a factor in the price of the manufactured goods.

"The raw materials are produced in many cases through the use of coal and coal is costing more money. This is an added item in the production cost of paint and varnish. Gums have been scarce and hard to get, too, although there is some relief on a number of these lines now."

A Bright Outlook

Mr. Riley is well pleased with the outlook for continued business of extensive

nature. "In all the big eastern cities of Canada there is an acute shortage of housing, and while I have not been in the West I presume that the same condition exists out there, even through to Vancouver. This means that there will have to be building, and the need for finishes will be great; people will have to use them extensively. There should be an excellent business right along for paints and varnishes."

Then, of course, there is the upkeep of property already constructed. Altogether this will mean a big country-wide sale for these products that may reach large proportions. While the very excessive cost of materials has restricted actual building operations it is apparent, Mr. Riley thinks, that much construction will have to be undertaken. Added to the immense quantities of finishes that will be called for in special work such as the painting, varnishing and finishing of railway equipment, rolling stock, etc., to say nothing of the immense and even growing needs of automobile manufacturers, there will be immense business indefinitely. And this is important, in that the demands from big industrial concerns and these railways will serve to absorb immense quantities and so keep prices fairly stable.

There are two items that have declined in price, linseed oil and turpentine. "But I believe that oil has about reached its low point, and there may even be a reaction the other way," commented Mr. Riley. Turpentine has declined owing to the fact that the European buyers have refused to buy. They have been doing without supplies for several years and have refused to pay the high prices. But they will be buying, and prices may not be very much lower on turpentine than they now are. Rosin is lower for similar reasons. But, taking a survey of all costs, the declines on these lines are more than offset by the higher prices ruling for other raw materials and for labor."

The Linseed Oil Market— Its Future Possibilities

Demand is Quiet—Buyers Well Taken Care of for Fall—Too Much Second-Hand Oil to Allow Any Imported Price Boosts.

ON ACCOUNT of the importance of linseed oil as a necessary vehicle of the paint trade, consumers just now are wondering exactly what price levels are going to be reached during the remainder of the season. Quite in contrast with conditions a year ago the demand is quiet and lacks any incentive for improving. Buyers have been well covered on contracts during the summer, they appear to be well taken care of for early fall and they are now awaiting developments, says the American Paint Journal.

The spring contracts of buyers still represent a considerable loss compared with present quotations as the failure of the seed market to rally has not given them the advantage of averaging their prices on open contracts. At the same time few buyers have shown any disposition to hold off and the fear that they would not turn in their shipping directions promptly because of the high price of some of their contracts has proven to be more guess work than reality.

For some time the trade has been talking about "dollar oil" this fall, but whether or not such a price will be realized is still problematical. Crushers are now operating steadily on old contracts and see the time ahead when they will be evened up. Although they now appear to be more confident of their position and are not inclined to cut prices in order to attract future business, the trade has not forgotten that a short time ago some orders were taken at $1.09 a gallon to test out the market. It is now believed that if the market shows any signs of strength buying will be renewed.

While the price of linseed oil now is $1 a gallon cheaper than it was a year ago, when the record level of $2.22 was established, conditions now are somewhat changed. Last year the crushers were enabled to pass the price of seed on to the consuming trade because the latter was compelled to get all the oil it could to satisfy the demands of contractors, no matter at what price. This year the consuming demand has not been so urgent and there has been too much second-hand oil drifing around the market to allow for any important price boosts.

When one considers the value of land, the cost of planting, the highly paid farm labor, the cost of harvesting, loading and shipping to market, not to speak of the tightness of money, the best informed interests in the market consider seed at present price levels a good purchase. The seed market for a time started on an upward trend, but has again reacted and if no unforeseen circumstances develop promises to go to still lower levels.

A year ago many speculators and some crushers plunged and made money. This year they are keeping away from deals which involve any risks or the taking of unnecessary chances on what the future may hold in store for them. In other words, they are going to play a "conservative game." There is nobody to "pass the buck" to this year and they do not want to be caught "holding the bag."

It is the belief of those in a position to know that consumers of linseed oil who follow a conservative course this year will be traveling on a safe road. If they buy in a sane manner, taking such lots as they need to cover their requirements for a short period ahead, they will avoid the pitfalls of overstocking on a declining market. While the price of oil may go a little lower it is not believed that it will average much higher than it is at the present time.

With Bolshevism the main issue in Europe as an aftermath of the war, the labor unrest in this country, the closing down of many industries because of lack of demand, the insistent demand of labor for higher wages and less production, and the tendency of the banks to draw in their loans, while the foreign exchange situation shuts off export outlets, all these conditions make for uncertainty in the future and point out to "big business" the futile policy of plunging.

Paint Prices to Hold Until Spring

So Decided at Meeting Canadian Paint, Oil and Varnish Association on Wednesday Last—Labor and Many Raw Material Costs As Well as Other Increases the Factors.

There will be no change in the basis for prepared paints and kindred products for orders to be shipped out next spring. So decided the members of the Canadian Paint, Oil and Varnish Association at their meeting held in Montreal on Wednesday last, and, unless something unforeseen happens there is strong likelihood of markets remaining firm on these products.

Interviews by Hardware and Metal with paint manufacturers have emphasized a number of the tendencies that have surrounded these products. It is evident that, with all raw material costs taken into consideration, there has been little, if any, reduction in the cost of producing a gallon of paint, despite the fact that linseed oil and turpentine have both reached materially lower levels in the past few weeks. All advices to hand have been indicative of the offsetting costs of labor and materials entering into paint manufacture, the cost of containers and their scarcity, the price of wooden cases, and so on. Adding to this the increased cost of fuel, freights, labels, imported ingredients, and thehigher prices of many dry colors, it is felt in trade circles that there is ample justification for a firm maintenance of the present market quotations.

Benjamin Moore & Co., Limited

AN exhibit that seems a very friendly place to thousands of consumers is that of Benjamin Moore & Company, Limited, makers of the famous Paints, Varnishes and Muresco.

Here thousands of users of Moore Products, and thousands that are going to use them, join in admiration of this unusually handsome exhibit.

A central display stand, with two opposing stands at the sides, are heavily filled with an impressive assortment of this celebrated line of paints. Beginning with the lower shelves and going upward the cans are graded in size and give a splendid idea of how well these goods can be displayed in the store.

Specially attractive "cut out" and other advertising matter decorate the walls. These walls are tastefully panelled with attractive, oval landscape decorations at the top of each panel. On the walls hang color cards of the paints and Muresco. In the right and left foreground appear two exceptionally effective display cards showing an interesting modern bungalow and the wording: "Moore's House Paints cover well and last longer."

The firm name, Benjamin Moore & Co., Limited, and the words, "Muresco Wall Finishes," are prominently painted at the front and top of the booth, while rich hangings give a tone of luxurious quality to the entire exhibit.

The whole atmosphere of this exhibit, influencing, as it does, thousands of consumers among the Exhibition visitors, is in full keeping with the Benjamin Moore policy of co-operation with the trade.

There is no doubt that while visitors have gazed on this interesting exhibit, thousands of them have made mental resolutions to do some painting with Benjamin Moore Products and instructively coupled the thought with their favorite hardware store.

The Brush Department

Regarding the Manufacture of Brushes

Description of Interesting Features of Manufacture in One of Canada's Important Industries—Knowledge of the Line Makes a Dealer a Better Salesman of Brushes.

THERE is a saying generally accepted that a salesman is most efficient when selling something with which he is thoroughly familiar. Undoubtedly there are many lines sold in the hardware trade with which not every hardware clerk is thoroughly familiar. It has been suggested that a description of the process of manufacture of brushes, the source of raw materials, etc., would be interesting and helpful to the trade so that a number of articles dealing with this subject will appear in this department starting with this issue.

Canadian brushes show very favorably when compared with the product of other countries, but it has only been of recent years that this fact has been accepted by both our domestic and export trade. The result is that now Canadian brushes are not discriminated against in favor of imported goods and the Canadian product is finding its way in increasing quantities into foreign markets. The industry has grown to great dimensions in Canada. A tour through a brush making plant demonstrates how interesting is the process of the making of a brush—how various are the materials, how far they are brought, how many operations are involved, how keen the eye and how steady the hand of the operator must be, and lastly, how perfect is the finish put on every brush.

Where Bristles Come From

From the interior of Russia, China, and India come the bristles. From South America are brought the woods that enter into the backs and handles of all higher grade articles. The latter come first to the attention of the visitor to the brush factory.

Most of the modern brushes are not made by the old-time drawn process, where each row of bristles was held by a single thread, but are so constructed that each tuft of bristles is a separate unit. Before these tufts of bristles can be stapled to the solid back it is necessary to have holes bored in the under side of the back and as the same principle is used in making the largest household brushes, a description of this process will cover the making of all kinds of brushes.

The size of the hole required depends of course, upon the size and nature of the brush itself. For instance, the large household brushes, requiring thick tufts of bristles, require larger openings. With these it is possible to use a most interesting machine that bores holes in 12 backs at one time. The backs are placed in a groove opposite to which are bits adjusted to an exact degree for depth. In the middle of the machine is a master brush back of brass and the operator guides a steel insert from one hold to another. This simple operation is accompanied by an automatic movement of all 12 bits, which bore holes in the backs. With this method it is unnecessary to previously mark the place for the holes.

(To be continued.)

Paint Association Endorses Open Shop Campaign

Washington.—The National Paint, Oil & Varnish Association is among the 108 business groups in New York state to indorse the open shop campaign, according to an announcement made by the Chamber of Commerce of the United States. The list of those organizations favoring the 12 principles, the second of which contains the declaration for the open shop, bristles with the names of national associations of dealers in fundamental products, says the American Paint Journal.

The announcement asserts that "the principles received overwhelming approval of the organizations voting in every state in the union."

The extent of the line-up for the open shop is indicated by such names as the following on the New York list:

American Hardware Manufacturers' Association, American Institute of Consulting Engineers, Inc., National Gas Appliance Manufacturers, American Iron, Steel and Heavy Hardware Association.

Progress of Turpentining in British Columbia

Vancouver.—The production of turpentine from the Douglas fir is still in the experimental stage. It is the belief of experts that it will eventually be worked out, but previous to its success being established as an actual fact and decided beyond question, there is some hesitancy to give too great a prominence to the endeavor.

Tapping the live Douglas fir is being proceeded with by means of ½-inch auger holes, the basis of the production being the actual excess yield of rosin by the tree and also by the pockets formed in the tree by accumulations of past excesses.

The rosin obtained is of the highest grade, and is distilled by a method of distillation which gives turpentine of the highest grade, fir oils, rosin oils and rosin in one process and its continuation. True Burgundy pitch and true Venice turpentine has also been manufactured.

The plant end of it is beyond the experimental stage and patents are pending in connection with the process.

The field operations, however, are still experimental and it is for this reason that it cannot be pronounced a complete success as yet.

Boston Varnish Co. Enlarges Plant

Boston Varnish Company, Boston, Mass., are planning the immediate construction of a new addition to plant and offices. The new addition will, it is claimed, practically double the firm's manufacturing facilities. The addition is expected to be complete early in December.

Paint Men Convened This Week

Montreal.—The executive and sales staffs of A. Ramsay and Son Company, Montreal, were in session this week, beginning Monday morning, in the Old Colony Club of the Windsor Hotel. This was presided over by Mr. Walter B. Ramsay, president, and Mr. Arthur W. Brown, general manager, and salesmen from Halifax to Vancouver were in attendance.

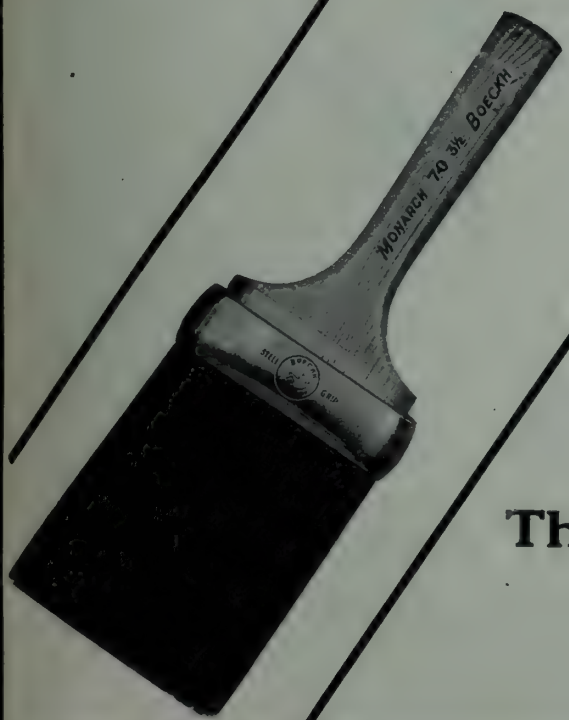
Montreal.—The Board of Trade Gold Medal for the best all-around display of any kind made at the Quebec Exhibition this year was captured by McArthur-Irwin, Limited, Montreal. The firm is naturally very proud of this distinction as it covers every kind of display regardless of its nature. This firm also secured a special diploma for its display of dyes and chemicals.

BOECKH'S

Rubber Set Paint and Varnish Brushes

The Bristles Can't Come Out

The reasons that place Boeckh Brushes first in the judgment of both consumers and dealers are based on the superior quality and design. The dealer has no "kicks" or "comebacks" because Boeckh Brushes "deliver the goods" in service. The Boeckh dealer's trade grows because consumers are far more than satisfied. The good reports spread.



BOECKH TRADE MARK EST^BD 1858 TORONTO

Consumers have learned from pleasant experiences the desirable features that give Boeckh Brushes their advantage: easy, comfortable handles; neat, attractively finished ferrules that protect the setting. The long, flexible bristles give a velvety and elastic contact that all painters desire.

The Boeckh advantages in mamaterial, combined with skilled workmanship, produce the perfect brush for sales and service. Boeckh dealers grow—let us show you why.

Every Boeckh Brush Guaranteed

The Boeckh Company, Ltd.

Established 1856

Outlook for Rubber Goods is Promising

Montreal.—In discussing the present and prospective outlook for rubber goods such as hose, beltings, etc., with a Montreal manufacturer, he stated that, while there had been a splendid current business, new bookings for spring had not yet been sought. "But we are very optimistic," he stated, "and are looking for a good booking season. The conditions are very satisfactory and the outlook promising." For some lines there has been extra heavy buying this year, Hardware and Metal understands, and where late business has been offered it is understood that immediate filling of orders, in some cases, could not be assured. Altogether it has been considered an excellent season.

Department Store Builds Paint Factory

Within six weeks, the paint department of Sears, Roebuck & Co., a Chicago mail order house, expects to occupy its new factory building, which covers almost half a block and is five stories in height. The entire building will be given over to the paint department, the offices of that department also occupying space in the new building.

At present the boilers and motors are being placed in the position, all outside work practically having been completed.

Early Glass Shipments May Be Difficult

Montreal.—In discussing the glass situation with a prominent Montreal jobber he referred to the advantage of placing orders for initial requirements without undue delay. This is advised, owing to the fact that a great deal of glass will be shipped out to cover orders which have been placed for some months and this informant claims that there may be a temporary shortage for this reason in the early part of the Fall season.

With regard to prices it was pointed out that the demand has been such as to preclude the likelihood of their being any decline in the near future.

How Hardwaremen Advertise Paints--No. 25

AN INVITATION to readers to visit the store of the Cowan Hardware, London, Ont., to see a demonstration of graining is featured in this ad., along with a paragraph about some paints for fixtures, radiators, stovepipes, etc., and finishes for porch and floors. An auto' finish is also described as lasting and durable and capable of withstanding hard usage and repeated washings. This finish, is said to dry quickly, to be free from dust in a few hours and to be hard enough to use within 48 hours after using. Prices are prominently quoted on each line.

A somewhat novel feature of this ad. is the little talk on some topical subject. In this case it is headed "A Tempest in a Teapot" and deals with a timely subject of interest to Londoners, signed, "Old Timer." Undoubtedly such a talk arouses some interest and is valuable as long as this feature attracts attention to the advertisement and does not merely secure a reading of that part alone, to the detriment of the balance of the ad.

Paint Up! Keep It Up! Clean Up!

FOR QUICK SERVICE PHONES—3461 and 3462.

JAP-A-LAC Demonstration

All Next Week

It is 46 years ago since Mr. Glidden first started manufacturing JAP-A-LAC. In that time dozens of varnish-stains have been put on the market in imitation. When your floors or furniture become scratched or marred insist on having JAP-A-LAC, the ORIGINAL stain and varnish combined.

Seven colors, varnish stains ..... 15c to $1.35 per tin
Nine enamel colors ..... 20c to $1.75 per tin

A Tempest In a Teapot

I do not like you Frank Carvell
The reason why I'm going to tell
For, as I know and know full well,
You travel on Sunday Frank Carvell.

We owe a debt of gratitude to Messrs. Reid Little Beck and the rest of the good fellows who are out for a Bigger, Better and Brighter London, and who entertained Hon. Mr. Carvell on his visit here recently. There is no doubt that he went away with the finest impression of our city and in all likelihood intended to do far more for us than he had promised.

Then came the Tempest in the Teapot, and for what reason nobody knows. The heinous crime of going to Port Stanley on Sunday had already been committed, and a hundred resolutions could not overcome the tremendous evil which had been done.

But it looks like a deliberate insult to Mr. Carvell and some of the very best of our citizens, and there is one thing certain that London won't get an extra dollar from Ottawa through the poor advertising this action of the Rev. Sirs have given us. Why not in London that every time we have a good Boost the Echo is a Knock.

OLD-TIMER

COME IN AND INVESTIGATE

Have our demonstrator show you how to do your own graining in a very little time and at a small expense.

Jap-a-lac Model Graining Outfits containing:
1 quart ground color
1 jar graining color.
1 quart Jap-a-lac Natural Varnish.
1 graining tool.
3 brushes.

Sufficient to cover 100 square feet of surface.

PRICE $4.00.

Jap-a-lac Gold and Aluminum Paints, for fixtures, radiators, stovepipes, etc.
Gold 35c per tin and up
Aluminum ..... 30c per tin and up

JAP-A-LAC Porch and Floor Paints, for interior or exterior use, weatherproof and waterproof. Six colors.
Per pint 75c
Per quart $1.25

JAP-A-LAC Varnishes for every purpose.

Endurance Auto Finishes

are made lasting and durable. They withstand hard usage and repeated washings. Dry quickly, free from dust in a few hours, hard enough to use in 48 hours. Seven colors and white ..
$1.70 per quart and up

Delivery Body, suitable for Ford runabout, detachable, cheap; for quick sale.

SALESLADY WANTED.

Cowan's Colossal Hardware

125-127 DUNDAS STREET. THE STORE WITH A STOCK.
Two Deliveries Daily: 9 a.m. and 3 p.m. STORE CLOSES SIX O'CLOCK EVERY NIGHT.

The Luxeberry Painter Says:

"When I see nice interiors spoiled with a poor or unsuitable finish, I am reminded of the old saying: 'You can't make a silk purse from a pig's ear.' I always use Berry Brothers' Varnishes, Stains and Enamels because they are uniformly fine and produce interiors that I am proud to refer to as my work."

This is the verdict of all discriminating varnish buyers and is why "Berry" brands sell so readily.

Weekly Paint Markets

MONTREAL

MONTREAL, September 16.—The important feature in paint circles this week is the announcement that the basis for prepared paints will be unchanged before next spring. There are few outstanding changes for the week although the easier undertone still prevails as regards linseed oil and turpentine. These are in good supply at present, and while linseed oil is only 3 cents per gallon lower there is a possibility that it will fall to $1.50 per gallon. The outlook is dependent upon the harvesting of the crops, which, in some parts, promise well. Shellac is lower, the supplies being more abundant of both white and orange. White lead in oil and putty are rather quiet and this condition applies regarding prepared paints. Some anticipate that the present basis on paints, white lead and putty, will hold for spring business, while others look for advances on paints, and a maintenance of the lead prices. Pig lead is temporarily unsettled, and the future prices depend upon some conditions which will be more definable shortly. The present rate of sterling exchange has, for instance, been responsible for an easing of the English price basis. Trade, in general, is seasonably quieter.

Turpentine Holds, But May Go Lower

Montreal.

TURPENTINE.—Present stocks of turpentine are ample and prices have eased off somewhat within recent weeks. At the same time the lowest quotation of $2.40 per gallon announced last week still holds, and what limited quantities are wanted are going forward to the trade without delay. Some expect still further reductions on this, and if transportation is uninterrupted it is likely that necessary quantities will be readily available.

Turpentine—	Imp. Gal.	
Single barrels	2 40	2 50
Small lots	2 50	2 60

(Packages extra.)

Linseed Oil Price is Slightly Lower

Montreal.

LINSEED OIL.—The present basis for linseed oil is somewhat fluctuating and quotations are made on single barrel quantities all the way from $1.57 to $1.70 per gallon, raw basis with usual differential. The bottom does not seem to have been reached, according to some jobbers, but there is some uncertainty as to what future prices will be. It is quite probable that before the week end a quotation of $1.50 will be available for those desiring any considerable quantity of the product, as there is considerable supply to hand.

Raw—	Imp. Gal.	
1 to 4 barrels	1 57	1 70

Colors in Oil Firm; Advances May Come

Montreal.

COLORS IN OIL.—The difficulty of obtaining the requisite stocks of dry colors and their high price has been causing some concern to the manufacturers and there is probability of advances taking place. Tendencies are firm on dry colors and colors in oil and there is some likelihood that higher prices may prevail in a few days. It is said that cost to produce these products is and has been much higher of late.

Shellac Prices Are Easier

Montreal.

SHELLAC.—A reduction in the basis of both orange and white shellac has been made during the week and in barrels white shellac may now be purchased for $8 per gallon and orange for $7.50. There is the usual differential of 30 cents per gallon on one gallon cans, while for 5 gallon quantities 20 cents is added to the barrel price.

Putty Holds Steady; Seasonable Selling

Montreal.

PUTTY.—There is very little to say on the putty situation excepting that a seasonable business obtained and the product is available in necessary quantities. Price basis has held without change of any kind and no definite change of present quotations is anticipated just now.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb. tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

Prepared Paints Continue Firm

Montreal.

PREPARED PAINTS.—The movement of prepared paints is much restricted but there is still a fair amount of sorting business and merchants are sending in orders continually. This quiet condition has been fully anticipated but paint manufacturers are looking forward to a satisfactory fall business. The undertone is steadily maintained and quotations are held without change.

Steadied Basis Holds on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—There is a fair sale for this product which holds at the unchanged basis ruling for some time past. The 5-ton quantities of Government standard lead are selling at $19.50 per 100 pounds, and in ton lots at $20; for ordinary small quantities the price is $20.35. There has been some softening of the basis on pig lead, particularly that on English lead, which is effective by the exchange situation, which has been lower.

TORONTO

TORONTO, September 16.—Quieter, without much change, is the prevailing report in the paint market. Business is said to be above the average for the time of the year, and prospects for the future look good. Staple lines such as white lead in oil, putty, shellacs and dry colors seem firm. Rosin has declined a little. Glass is unchanged and some jobbers do not expect any advance at present in spite of higher freight rates, although they admit that the increases are almost certain to affect prices eventually. Turpentine and linseed oil are firmer and little change is expected. Stocks in hand appear ample as demand is lighter. It would seem as if the present prices on prepared paints and varnishes will be maintained for the present and unless the unforeseen happens there is not likely to be a change before spring.

Linseed Oil Steadies; Quotations Unchanged

Toronto.

LINSEED OIL.—Quieter and steady is this week's report on linseed oil. The

Paints and Varnishes

Inside and Out

"The Right Paint to Paint Right"

Since 1842 Ramsay Paints and Varnishes have maintained the leading place in the estimation of dealers and consumers. The splendid variety of the Ramsay Products offers an appropriate and dependable finish for every surface.

With the addition of the versatile and well-liked Agate Family the Ramsay dealer finds himself prepared with a reliable finish to offer customers for every use.

demand is a little less and lower prices are not expected at present. Prevailing quotations are the same as last week and are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 80	1 83
3 to 5 barrels, gal.	1 79	1 82
10 barrels and over	1 77	1 80

Turpentine Firm on Unchanged Basis

Toronto.

TURPENTINE.—There is a little less demand reported for turpentine and stocks in local markets are said to be sufficient to meet normal requirements. Lower prices do not seem to be expected as the regular run of the first crop is now in and producers have an idea of the extent of the yield. Present quotations are $2.50 per gallon in barrel lots, and $2.65 per gallon for 5-gallon lots.

White Lead Firm Without Change

Toronto.

WHITE LEAD IN OIL.—It is "between seasons" in the paint market, and white lead in oil is experiencing the lessened demand of a rather slack time of the year in the wholesale trade. No change of prices is reported and prevailing prices are holding firm.

The ordinary brands are quoted as follows:

White Lead—Pure, tons, $20.35, less, $20.70 per 100 lbs.; Elephant, genuine, tons, $20.85, less, $21.20 per 100 lbs.

Putty Quieter; Unchanged in Price

Toronto.

PUTTY.—The demand for this commodity is said to be a little quieter, but otherwise as good as usual for this month.

Whiting, one of the chief ingredients, is understood to be a little more plentiful than it was, but is still light. No change, however, has taken place in prices which remain firm at the following quotations:

Putty—Standard, in 100-lb. drums, $8.20 per 100 lbs.; 25-lb. drums, $8.55.

Slight Decline in Rosin Quotations

Toronto.

ROSINS.—A slight decline has taken place in the price of rosins, which are stated to be a trifle more plentiful.

Prices now quoted are round ten cents per pound in barrels, to thirteen cents a pound in small quantities.

Shellacs Have Firmer Tendency

Toronto.

SHELLACS. — White and orange shellac which have lately been considerably lower than they were earlier in the season are showing a tendency to be firmer. The demand is said to have been fairly good.

Quotations will be found on the current market pages.

Methylated Spirits Higher in Price

Toronto.

METHYLATED SPIRITS. — A considerable advance has recently taken place in the price of methylated spirits which is at present being quoted at $2.95 per imperial gallon in place of former price which was round $2.00.

Zinc Coated Glaziers' Points Scarce

Toronto.

GLAZIERS' POINTS. — Zinc coated glaziers' points have been a little scarce lately. They are being quoted at twelve and a half cents in half pound packets.

Window Glass Still at Same Quotations

Toronto.

GLASS.—Some reports on the plate and window glass industry would seem to indicate that manufacturers are still considerably behind on the production and that they are finding it difficult to get materials and are having to pay higher freight rates on same, and taking all the circumstances into consideration it does not appear that any decline in prices can be expected. It is not however thought that there will be any change at present.

Belgian glass is not coming to hand in any quantity and Europe and the English market can absorb for a time all that the Belgian plants can produce, so that little can be expected from that quarter it is stated.

Prices remain 15 per cent. off list in case lots in single and double diamond.

Demand Seasonable For Paints and Varnishes

Toronto.

PREPARED PAINTS AND VARNISHES.—Ready mixed paints are moving out very well for this time of the year. This month is always regarded in paint circles as a dull month and as being 'between seasons,' but a very fair amount of business is reported. Some orders for next season have already been received. Hardware and Metal is informed that they are stated to be very satisfactory.

Prices are firm and very few changes noted at present.

Water Paints Have Large Sales

Toronto.

WATER PAINTS. — The demand this year for the so-called water paints used for interior decoration of walls and ceilings has been exceptionally great and manufacturers early in the season were unable to keep pace with the demand owing to a scarcity of materials and also to the fact that the demand was so much larger than usual and in some cases a few of the less popular shades were temporarily discontinued until manufacturers were able to supply the demand.

GENERAL MARKET REPORTS

(Continued from page 61.)

ceived, and are quoted as follows: 5½ $5.25 doz.

Sheets Unchanged and Still Very Scarce

Winnipeg.

SHEETS AND PLATES.—The prices on sheets and plates are holding firm. There is little or no stock and it is impossible to meet all prevailing demands and requirements. Prices are as follows:

Black Sheets—10 gauge, $10; 12 gauge, $10; 14 gauge, $10; 16 gauge, $10.35; 18 gauge, $10.40; 20 gauge, $10.40; 22 gauge, $10.45; 24 gauge, $10.45; 26 gauge, $10.50; 28 gauge, $10.65.

Galvanized Sheets—16 gauge, $12.35; 18 gauge, $12.50; 20 gauge, $12.50; 22 gauge, $12.65; 24 gauge, $12.65; 26 gauge, $12.80; 28 gauge, $13.35; 10¾ oz., $13.75.

Stove Pipes Short and Twenty Per Cent. Higher

Winnipeg.

STOVE PIPE.—There is a serious shortage of stove pipes here and the price has been advanced about twenty per cent., due to scarcity and the increased cost of raw materials. Stocks are very light indeed.

Prices are as follows:

Standard—6 in., $28.18 per 100; 7 in., $30.32.
Ready to Rivet—6 in., $27.18; 7 in., $29.32.
Riveted—6 in., $27.68; 7 in., $29.82.
Taper Pipes—5 x 6 in., $3.60 per doz.; 5 x 7 in., $3.60; 6 x 7 in., $3.60.
Tee Pipes—6 in., $4.65 per doz.; 7 in., $5.

Ten Per Cent. Advance in Prices of Box Stoves

Winnipeg.

BOX STOVES.—Being largely manufactured from steel sheets these have followed the general advance and are now being sold at an increase of practically ten per cent. The regular lines are quoted as follows:

18 in., each $7.50; 22 in., $10.66; 25 in., $13.19; 28 in., $15.59; 31 in., $16.64; 36 in., $25.03.

Malleable Fittings in Big Demand

Winnipeg.

PIPE FITTINGS.—Prices remain very firm on fittings. There is a big demand and jobbers' stocks are only in fair condition. Certain sizes seem hard to procure. The following prices are quoted.

Fittings, Malleable—Class A, 50 per cent.; Class B and C, off new list, 60; Bushings, 10.
Unions, "Dart"—¼ to 2-in., 15 per cent.; ¼, 2½, 3½ and 4-in., 5; Nipples, 4 in. and under, 45.

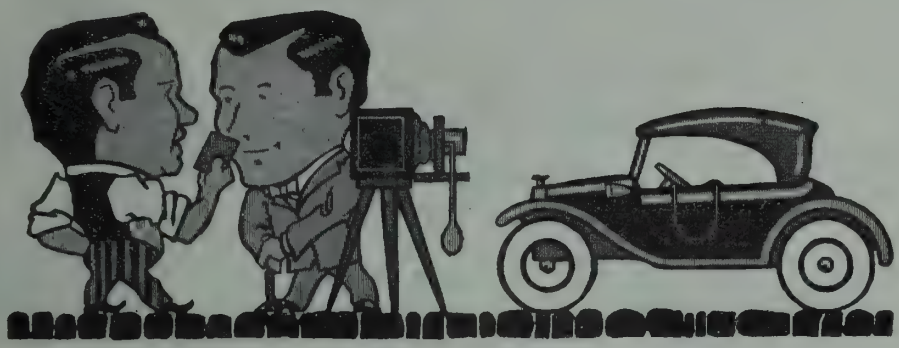
Revision on Prices of Solder

Winnipeg.

SOLDER.—The price has been revised and is now quoted in case lots of 100 lbs. at 43 cents a pound. Less quantities 44 cents.

Tinker, 52 cents.

Let this Picture Work for You!



HERE'S an inkling of the first advertisement in the heavy Effecto magazine advertising campaign this Fall — an advertisement that will reach more than six million subscribers to Cosmopolitan, American, Red Book, Farm Journal, Christian Herald and Farm and Fireside. This campaign will sell goods for you — if you have Effecto, the original auto enamel, on your shelves.

Effecto AUTO Finishes

Effecto Advertising has been working for Effecto Dealers for many years. Each season a larger campaign sends more prospects to the Effecto Dealer. It's a permanent part of the Effecto proposition — one of the chief reasons why the dealer who is keen for *new* sales is keen for Effecto.

You will be surprised and pleased with the amount of co-operation included in the Effecto proposition, in addition to this constantly enlarging magazine campaign. May we tell you what this proposition is? — a post card will let us know that you are interested. *Get "lined up" now for sure, steady sales and profits on Effecto!*

A Familiar Toronto Landmark
The Ivy-Clad Factory of
CANADIAN Wm A ROGERS
LIMITED
570 KING ST WEST
Manufacturers of 'Heirloom' Plate, Rogers 1881 and other Favored Brands of Exceptional Silverware

A view of the business section of Toronto from the top of the Harbor Commission Building on the waterfront. Note the three skyscrapers, the Royal Bank building, C.P.R. building and Dominion Bank. The Royal Bank building is the highest in the British Empire.

Millions Spent on Transportation Facilities Make Toronto an Ideal Centre of Distribution

GOOD transportation facilities are a big factor in increasing the commercial status of a city and Toronto, though for years one of the leading centres of industry and commerce in Britain's Overseas Dominions, is now spending millions of dollars on improving its facilities for transportation, both rail and water. The Toronto Harbor Commission is carrying on an enterprise of great importance which will have for its object the provision of industrial and transportation facilities second to none on the continent.

When the big harbor scheme, now in progress, is completed, Toronto will have over 13 miles of dock frontage, 6½ miles of which are already constructed. Over 644 acres of industrial sites will also be in use, situated on the water front, with unequalled transportation facilities. Much of this land for industrial sites has been reclaimed, and every available transportation facility will be extended to the new districts. Such facilities include motor truck, electric railway and steam railway. The main entrance to this industrial area will be over a bridge spanning Keating Channel at Cherry Street. Some rails have already been laid so that connections can easily be made with the street railway system when taken over in 1921. The bridge has a roadway 66 feet in width and all streets in the area are from 75 to 175 feet in width. Reservations have been made for the steam railways and sidings will serve every factory in the district. The section has been so arranged that every other street is free from

tracks. All tracks will be controlled by the Harbor Commissioners.

Under this scheme the harbor front is divided into three sections; Eastern Harbor Terminal (Ashbridge Bay) for manufacturers of heavy goods; Central Harbor Terminal (Cherry Street) and Western Development. The latter is a park development providing for a wide board walk and boulevard driveway 50 feet in width to extend along the lake front from the Humber east and around the Toronto Island, thence east to Woodbine and north. The boulevard when completed around the city will extend for 60 miles. Bathing facilities are being constructed at Sunnyside which will accommodate 5,000 people. This and other similar developments being planned all help to make Toronto a good place in which to work and will help to keep employees satisfied.

In the Eastern Harbor Terminal 150 acres of industrial sites are now in actual use and plants are being erected. Among the foremost manufacturers who have leases on property in this section are: Baldwin Canadian Steel Corp.; British American Oil Co.; Dominion Foundry Co.; Wm. Fielding & Sons; Imperial Oil Ltd.; the Barrett Co.; Peckovers Ltd.

Industrially Toronto leads among the other cities of the Dominion. There are 2,181 factories within the city limits, representing an investment of $259,610,000 with an annual output of $288,460,000 worth of goods.

One of the most outstanding examples of the growth of the city is the marked increase in local assessment. At the time of incorporation the assessment figures were computed in sterling figures and the first total assessment made amounted to the equivalent of $2,545,205, the population being 9,254. The 1920 assessment was $642,816,600. This was an increase of about $20,000,000 over 1919.

The above scene shows a portion of the engineering work in progress at the Ship Channel, part of the tremendous enterprise being carried out by the Toronto Harbor Commission, to make Toronto's Industrial and Transportation facilities second to none on the continent.

TORONTO—*the buying centre of Canada*

Our booth at the Toronto Exhibition was the subject of much favorable comment by the thousands who viewed it and visitors from all sections of the Dominion carried away lasting impressions of the beauty and character represented in Canadian Wm. A. Rogers silverware designs.

You can build on this reputation we have created for you by having a generous display of Canadian Wm. A. Rogers flatware in your windows. You will find many of your customers are familiar with the patterns and trade-marks — and have absolute confidence in the dealer who sells them.

DUNLOP TIRES

SEAL OF QUALITY

MOTOR TRUCK

Motor Trucks are, in respect to overloading, at the mercy of circumstance.

To-day this practice is even more pronounced than ever.

To minimize the effects of this evil, as far as humanly possible,

DUNLOP "SAMSON"

Motor Truck Tire was developed.

Every **Dunlop Truck Tire** is an over-size tire, and contains more cubic inches of rubber per foot than the corresponding size of any other Truck Tire made in Canada.

Dunlop "SAMSON" is constructed to take a big portion of road shocks that ordinarily play havoc with the mechanism of the truck or its load.

As already stated, **Dunlop Truck Tires** contain an extra volume of wear-resisting, load-absorbing rubber. It is this resilient, well-nigh indestructible rubber, also, that means better value to you in **Dunlop "SAMSON."**

A call from one of our salesmen puts you under no obligation to buy.

Drop a line or 'phone to the Dunlop Branch nearest you.

Dunlop Motor Truck Tires absolutely will not split nor come loose from the steel base. You cannot chisel them off.

Stock Now for the Fall "Clean Up" to

with

Floglaze

The Finish that Endures

The many uses for Floglaze make it the ideal finish for the dealer to stock.

You'll find it an excellent medium to develop "indoor month" painting—making your paint department pay good profits all the year round.

It is equally good indoors and out.

It is particularly suited to the many odd jobs of refinishing which the fall "clean up" makes necessary in the home.

On the farm it has many uses in the dairy and the implement shed, for it refinishes wood, metal or concrete with a brilliant, glossy and hard wearing surface.

Be prepared to handle the fall demand.

If you are not now selling Floglaze write for our dealer proposition.

30M—Two-piece mitten, palm and thumb from yellow horsehide; back olive split, two-inch band of imitation leather, canvas lined.

THE ability of Carhartt Gloves to withstand all degrees of temperature and all kinds of weather has made them justly popular with men who are keen to get a good article and are willing to pay the price for it.

Such men make good customers. They don't go around looking for bargains, but are content to patronize the store that gives them quality and service.

That is one reason why you ought to stock an assortment of Carhartt Gloves—for the profit they pay you and the satisfaction they give the customer. Another reason is that men who use tools usually wear gloves—and what is more logical than that the store that supplies them with the one should supply them with both? The repeat orders we get from hardwaremen show that Carhartt Gloves are well worth while.

GURNEY STOVES
FOR COOKING AND
HEATING
HAVE BEEN THE BEST
SINCE 1843
—OVER 1,000,000 SOLD—

New Gurney Heaters for the Garage

OR FOR THAT COLD ROOM OR STORE

HOW are you going to heat the garage this winter? You must protect yourself by heating it. A freeze-up might cost you the price of twenty heaters. You must heat it well too. A cold car that won't start is worse than no car at all.

These new GURNEY heaters have been designed for just this need. They will hold fire for twenty-four hours. They will burn any kind of fuel and take but the minimum of attention.

They are equipped with the same kind of grates and draft control as our finest hot water and steam heating apparatus; and they are sturdily built and economical in operation, worthy to carry our trade-mark, yet they cost no more than the ordinary kind.

We make them in several sizes, one of which will fill your need. Some styles have a single pot hole on top, and others two holes.

Send us a rough sketch of your garage and tell us how it is built and we 'll recommend a size that is best suited for you to use, send you more details than we can give here and arrange to have the local dealer supply and put it up, if you so desire. Anyhow, you'll be under no obligation if you write that letter to-night, and it leads to car comfort in winter with least coal.

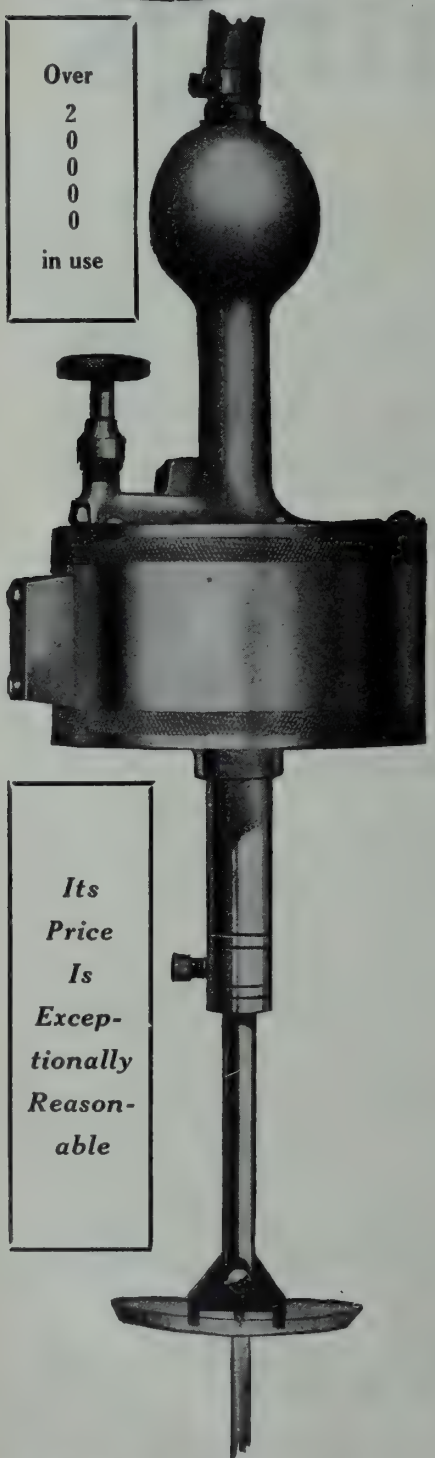
VELTUM
PNEUMATIC
VALVE GRINDER



Over 2 0 0 0 0 in use

Its Price Is Exceptionally Reasonable

Does the Job in Half the Time

THIS is not a claim. It's a proven fact, demonstrated by repeated tests of the Veltum Pneumatic. Flexible speed is combined with perfect control.

Absolutely guaranteed to do the work and stand up.

The VELTUM PNEUMATIC VALVE GRINDER

permits any speed from 50 to 1,000 strokes per minute, making it unnecessary to go over valve second time.

Does the entire job on a valve without stopping.

Operates on 15 to 500 pounds of air from the air tank you now have.

Plenty of power to grind any size valve, and attachments to fit all styles of valves. Grinds valve cages as well as valves.

Fits over-size valve stems into valve guides.

Quickly relieves stuck valves.

Does very delicate work, such as grinding carburetor float valve stems and fuel system valves.

Grinds valves that have no provision for tool to fit in head.

Grinds eighth valve on Ford engines.

All castings are made of aluminum, which gives the machine unusual lightness.

Canadian National Exhibition Encourages Industry as a Means to Prosperity

THERE were many distinct features connected with the Canadian National Exhibition in Toronto this year which all serve to emphasize the importance of this event in the national life and industry of the Dominion. The exhibits, the attendance, the all-round interest in the fair, signified the great value of such an annual event in encouraging thrift and industry. To this end the underlying idea of this year's fair was "Work and Prosper."

Last year's attendance was very large chiefly because of the presence of H.R.H. the Prince of Wales, and it was not easy to provide attractions which would result in drawing sufficient crowds to equal or surpass the 1919 attendance. However, this feat was accomplished during the two weeks of this year's fair, a good start being given by the presence of such notables as Sir Auckland Geddes, British ambassador to the United States, and Sir Thomas Lipton, the former conducting the opening ceremonies.

In planning this year's Exhibition the authorities had in mind the fact that the readjustment to normal conditions after years of war was at a critical stage, and that every effort should be directed along the lines of encouraging industry and production.

Keen Interest in Exhibits

What was perhaps the outstanding feature of the exhibits was the fact that both exhibitor and spectator appeared to take much greater interest this year than for some time past. Those who reserved concessions for exhibits were on the ground much earlier this year to put their booths in shape and as a rule spent more effort to make the exhibits as attractive and educational as possible.

Added to this there seemed to be a tendency on the part of those visiting the fair to

take a keener interest in the exhibits than heretofore. This tendency may have been the result of a growing desire upon the part of buyers to look around before purchasing to see what was being offered, and where they might get best value. This tendency has been evident in all branches of trade of late, and it is possible that the Exhibition was used by many as an opportunity for seeing what was being offered and making a convenient comparison with other products.

Realize Value of Exhibits

This sharper interest was evident on the part of everyone at the fair, and in so far as exhibitors were concerned it is suggested that they were perhaps more anxious to develop new business this year than for some time past, and that they are beginning to realize more fully the value of making annual exhibit of this kind.

This year's fair indicated that there was an outstanding lack of space for exhibitors. The Electrical Building, the Transportation Building, the truck and automobile accessory sections were all overcrowded and many manufacturers were unable to secure space for booths. This fact is significant in view of the fact that the rates for concessions were higher this year than in the past. Making an adequate charge for the booths will place the Exhibition on a better paying basis and allow of greater development.

Rural Facilities Much in Evidence

Another feature of the Exhibition was the large number of exhibits of lines of interest to rural districts. These included water systems, electric lighting outfits, labor saving devices, etc., such lines as are designed to give rural Canada the conveniences formerly enjoyed by the city only.

The multiplicity of lines shown, the fact that the exhibits demonstrate that the newest productions are receiving the utmost attention, and that the Exhibition is keeping step with the times as regards new developments in all parts of the country, indicate that the fair is living up to its reputation of being national in scope and is filling an important position in Canada's industrial life.

The Manufacturers' Building, viewed from the fountain, showing large crowds on the Plaza.

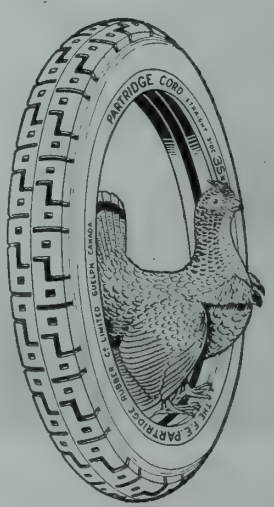
Samuel Trees & Co., Limited

One of the Most Imposing Displays in the Manufacturers' Annex

AS you entered the Manufacturers' Annex, under the Grandstand, you could see the "Samuel Trees" exhibit along the south side of the building taking up a goodly portion of the west half. The exhibit was a most commanding one, nicely arranged to the smallest detail and showing a wide range of lines manufactured and wholesaled by the firm.

It is quite safe to say that very few of the million and over visitors missed seeing the "Samuel Trees" exhibit, for the Manufacturers' Annex was crowded from morning to night and at times was apparently the most popular building on the grounds.

One thing that was noticeable was the courteous attention extended to the visitors by the men in charge of the exhibit. They were kept busy explaining the merits of the various articles on display—articles which to some were entirely new, such as the Hart Storage Battery, Primolite Lens, Se-ment-ol and other auto accessories.



It was quite evident this year that for some reason or other people were more than ever interested in the exhibits and were persistent in their endeavor to learn the main points of superiority of the various goods on display. There was evidence of a growing tendency to be more discriminating.

If interested tear out this page and place with letters to be be answered.

Exhibit at the "Ex"

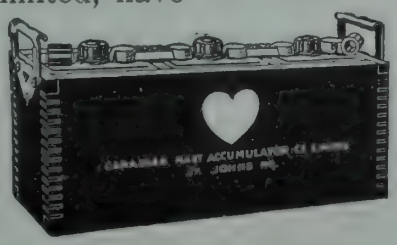
It Attracted Alike the Motorist and the Horse Admirer

The "Samuel Trees" Exhibit was the finest the firm have ever had, comprising as it did a very wide range of lines of interest to both motorists and horsemen.

Since the automobile has become a competitor of the horse this firm have gone into Automobile Accessories, making a phenomenal success right from the start. This has been done without interfering in the least with their harness trade, in fact, despite the fact that the automobile is fast replacing the horse for certain uses Samuel Trees & Co., Limited, have through their advertising created a splendid business from coast to coast in Imperial Brand Harness. There will always be a place and use for the horse. Old Dobbin is far from being relegated to the scrap heap and Imperial Brand Harness has a bigger sale to-day than ever in the history of this old-established company.

Samuel Trees & Co., Limited, are acting as the distributors for Ontario for the Hart Battery. This is a well-known British-made battery now manufactured in Canada. It is meeting the needs of the Canadian trade and standing up well.

The Hart Storage Battery was used universally by the British Navy and exclusively by the British submarines, the heaviest users of batteries in the British seas service.



Other lines exhibited were: National Auto Body and Auto Top Dressings. Partridge Tires were attractively displayed as shown on the opposite page.

If interested tear out this page and place with letters to be answered.

A Notable Exhibit of AutoStrop Razors

IN the central foreground of this interesting exhibit was a large show case that held the attention of the crowds of visitors. Beautifully arranged within it, and shown in a most attractive manner, were samples of the AutoStrop Razor in their handsome cases.

The walls of the exhibit were very effectively panelled; each panel serving to display various pieces of the very striking AutoStrop Safety Razor advertising. Of particular interest, centrally placed on the rear wall, was a large placard bearing in prominent letters the words, "Valet AutoStrop Safety Razor. Made in Canada."

At the two sides were bright-colored hangers, one of which read: "Nothing to take apart or get lost from Start to Finish —Stropping, Shaving, Cleaning. Sharpens Itself." And the other: "500 Comfortable, Quick Shaves Guaranteed from Every Dozen Blades. Sharpens Itself."

The AutoStrop Safety Razor Exhibit has served a wonderfully useful purpose, not only by its educational influence on the crowds of consumers who have seen this display, but by largely increasing the number of men who will enjoy better, quicker shaves from the AutoStrop Razors they will seek at the retailer's store.

T. S. Simms & Co., Limited

Two large, handsome models of the famous Simms Lather Brushes mark the entrance way to one of the most attractive and useful exhibits on the grounds—the Simms Brush Exhibit.

A large, centrally located show case shows an almost bewildering array of hundreds of Simms Lather Brushes, but to the trade they appear as an orderly arrangement of samples of the 200 odd lines made by this enterprising company. Among these are some brushes of extra large size which show more clearly the wonderful quality of the Badger. To the rear and at the sides, panels are cleverly arranged to show, alternately, painters' and household brushes in a very instructive way.

Agreeably colored counter pads, pennants and other attractive advertising matter of the Simms Company decorate the walls in a bright, pleasing manner. Prominent among these are the slogans: "The Product of Canada that leads the World," and "The Sun Never Sets on Simms Brushes."

Visitors to this exhibit recall to mind the fact that there is no other company in Canada which makes so many of the brush parts; such as celluloid parts, ferrules, handles, etc., involving many separate trades. Until a few years ago these had to be imported from the United States. This is but a continuation of the Simms policy of leading. They were the first to have machines for making solid back brushes in Canada. They were first in making Set in Rubber brushes, about 9 years ago.

The location of this exhibit has been fortunately chosen. Located on one of the wide aisles near the centre of the Industrial Building it is possible for the interested crowds to see this exhibit in comfort. It is hard to miss it and every day thousands of consumers are getting the preliminary information that eventually leads them to the local dealer's counter, more than half sold, by reason of the superiority of Simms Brushes.

Brandram-Henderson

THIS is a particularly striking exhibit that appeals to consumers especially. The first impression is one of pleasure caused by the attractive color display of the various contributing factors of the exhibit.

The illustration above shows the model store front—a beautiful work of genuine oak and plate glass and very much more costly than it is usually thought to be by the uninitiated. It is interesting to see from this model store front how easily a window can be dressed with the effective B-H cans. It doesn't take an advertising man to know that the B-H "package" is right and everybody knows the influence of the package on modern sales. A B-H window can be very quickly dressed.

Thus display quality of B-H labels is especially noticeable on the large revolving paint stand where the element of motion adds to the attention-getting qualities of the labels on the hundreds of cans of B-H products shown.

Strikingly attractive wall panels decorated with B-H advertising matter and embodying the "Save the Surface" slogan very prominently, furnish an effective setting for the whole display. Small, but handsome, oak stands scattered throughout the exhibit feature "China-lac," "Fresconette" and the varnishes: "Gold Medal," "Dependon," "Maritime Spar" and "Everlastic."

A large, clearly lettered display card shows a list of the 23 foreign countries where B-H products are sold outside of Canada, and also gives the locations of factories and warehouses in Canada.

This beautiful and practical display is interesting, not only to the trade, but also to thousands of consumers who are favorably reminded of their local B-H dealers. Such an exhibition serves to jog the memories of many consumers with half-formed plans for painting with B-H products.

If interested tear out this page and place with letters to be answered.

Jones & Shipman Limited

Leicester, England

THE only Old Country exhibit in Machinery Hall is a special attraction and has a particular interest for the Canadian hardware trade, as is shown by the attentive throngs who are so much interested in this excellent line of "J & S" Small Tools.

The high standard of manufacture of this complete range of British-made tools has aroused much favorable comment from the many members of the trade who enjoyed the opportunity of seeing them, expressing their desire to support British trade. A feature of the exhibit is the practical, useful way in which it has been arranged. A very favorable idea of the line is presented and the display arranged in a logical sequence that lends much to its instructive and educational value.

This exhibit has been seen by thousands of interested observers—not only members of the trade list, but by a very considerable number of manufacturers, machinists and other users of the tools. It is self-evident that a still greater knowledge and appreciation of this line has been spread among representative prospects who are patrons of hardware stores in all parts of the Dominion. Not least among these are many practical buyers who have made good use of this opportunity to observe the superior feature of the "J & S" range of small tools.

It will be found greatly to your advantage after comparison of discounts to stock "J & S" range of small tools. A complete range of these tools is carried at the Canadian warerooms.

This firm are publishing a complete list of "J & S" Tools and will be pleased to forward same with resale discounts to any bona fide hardware dealer upon request to **163 King St. East, Toronto.**

If interested tear out this page and place with letters to be answered.

McClary's

THIS unique exhibit showing the application of modern methods of cooking to four model kitchens was greatly appreciated by Canadian housewives. Thousands of people are interested in this educational exhibit.

The corner booth was handsomely and attractively fitted with modern kitchen appointments, as are all four of these women's model workshops. This one was devoted to the Simplex Range—the remarkable coal and gas range that can be changed from gas to coal, literally and practically by a turn of the wrist. A touch of the mechanism lowers the gas burner below the oven floor and closes the opening, leaving the oven with the appearance of the regular coal oven. This handsome range has white enamel splashers; bright, attractive nickel trim; a burnished top that requires no blacking. It can be fitted with a water-front, and uses either natural or artificial gas. The one shown exhibits the excellent broiling closet for fish, steaks, etc. Two specially important points are the flame spreader for even distribution of heat in the oven, and the advantage in design that permits the range to be set in a space of only 39 inches.

The next kitchen shows the use of coal and oil fuel. The coal range is the well-known "Happy Thought" cast range with the beautiful tiled splasher, nickel front closet with mirror, glass oven door and a deep, roomy fire box giving lots of hot water when the water-front is used. This is a special feature of the "Happy Thought."

The Florence Oil Stove does away with the old-time nuisance of supplying wicks, as it is practically a gas generator. It is free from valves—a purely gravity system. The supply tank is safely away from flames with no danger of explosion. A glass plate in the tank indicates the supply of oil. The Florence tank heater, for districts without gas or where the supply is low, is fitted with twin copper coils, and has two burners. It is much sought by owners of summer homes.

The third kitchen shows the famous Kootenay Steel Range with its well-known, handsome, nickel trim and roomy warming closet above. Here, also, is the splendid Cabinet Gas Range surrounded by admiring consumers, all prospects for their local dealers. The glass door and thermometer, as well as the handsome, satin-black finish attract favorable attention. The warming closet is large. A special burner in the lower closet permits boiling without odor in the house. A canopy connected with fume pipes carries off all odors from the open-burner cooking. White porcelain match tray, an automatic lighter, and availability for either natural or artificial gas, all interest the crowd of future buyers.

An idea of modern possibilities is suggested by the McClary's Electric Kitchen with the handsome McClary's Electric Range. Remember that electricity is cheap in Canada and easily supplied. A washable, sanitary, seamless oven, acetylene-welded and nickel-finished, is a feature of interest. The elements are removable and being of the porcelain filled type, take no longer to heat than average open elements, yet they are protected from material boiling over and are safer. The insulation is extra heavy. A convenient kitchen heater can be attached for the chilly days of early spring or late fall.

This entertaining exhibit convinces thousands of consumers who will soon be in search of their local dealers.

Fire Cannot Live a Second

Thousands Marvelled at the Simplicity and Efficiency of the "Pronto" Fire Extinguisher as Demonstrated at the Canadian National Exhibition.

PRONTO is new in Canada. But it is backed by one of the largest corporations in the world. It is a tried, proven fire-fighting success. It is being marketed extensively through hardware stores, general stores, and garages. Should your dealer not have PRONTO write us for full and free particulars.

In your home—in your office—your garage. Do you really know how you can best put it out—quick—before it does serious damage?

Few people have fire extinguishers—while every person has often thought that he should have one.

But the price—the high cost of a chemical extinguisher has deferred your purchase and that of thousands of people around you.

But now, PRONTO is here—the first practical fire extinguisher at a reasonable price.

PRONTO
Stops Fire Quick

PRONTO is simple—as a household fire extinguisher should be.

No lever to operate—no valves, no complications.

Just the most effective fire extinguishing agent known—put up in an especially perfected, capped glass container, and installed in a simply fool-proof bracket. When fire starts simply pull from bracket and dash contents into the fire. Caps come off as PRONTO leaves bracket. A child can use PRONTO as effectively as any man.

And when PRONTO strikes the fire—any fire, wood, oil, gasoline, rags, paper—it chokes it instantly.

But the big thing about PRONTO is its small cost. You can afford to protect every danger spot with PRONTO—the kitchen, fire-place, cellar, garage—because it costs about one-quarter of that of the ordinary "one place" pump extinguisher.

Special discount to dealers. Write for full information.

The Curtain is Lifted

Mrs. Asquith tells of secret occurrences at 10 Downing Street

"His frank, desert eye was misleading and he was less like what the public thought him than it is possible to imagine," writes Mrs. Asquith, in discussing Lord Kitchener. Her estimate of the great soldier is frank and unusual, not to say sensational; for Mrs. Asquith, who saw him perhaps every day during the time that Kitchener acted as Minister of War, tells things about him that the world would never have guessed. His "methods were Oriental," she declares; "he was a great diplomatist; he had power and charm, but limitations; he hated war; a lovable, clumsy fellow with a touch of genius."

Perhaps in no part of her memoirs, which are running serially in MACLEAN'S MAGAZINE, does Mrs. Asquith show a more individual insight or write more interestingly than where she deals with her recollections of 10 Downing Street and the great men who came there during her husband's tenure of office. In the September 15th issue (now on sale) she not only gives unreservedly her real opinion of Kitchener, but she tells quite as frankly of Milner, Botha—"a far greater figure than either Kitchener or Milner, one of the biggest men I have ever known"—Morley, Burns and others. Furthermore, she tells almost casually of strange things of tremendous importance that happened at that time and which have never been told: How Kitchener had to hurry to France early in August, 1914, to order French to attack rather than to withdraw from Paris; how the Germans secretly sued for peace two days after the Asquiths left 10 Downing Street; how Botha believed the peace treaty to be a bad one; what happened at 10 Downing Street the night that war was declared, and so on. It is a most astounding narrative and written in the fascinating, facile style that characterizes all of Mrs. Asquith's output.

Other features of Sept. 15th issue MACLEAN'S

Will the Old Parties Unite?

J. K. Munro, in his review of Dominion politics, suggests that a union of the two old parties is a possibility—they are "gradually drawing together to resist the offensive of the common enemy,"—the farmer. The only thing that can prevent it, he believes, would be that "some King Canute may arise to beat back the threatening waves of farmer votes."

The Concrete Bumper Company

THIS striking exhibit in the Accessory Building gets right down to "brass tacks" from the moment of the visitor's first attention. The emphasis placed on buying Canadian-made goods favorably impresses observers of this attractive display.

In the immediate foreground are two display racks with samples of some of the 72 styles of famous bumpers made by the Concrete Bumper Co., including the Concrete Filled Bumper, Spring Steel Bumper, Channel, Hexagon Channel and Diamond Rod Bumpers.

A feature that unfailingly interested the crowd was the bent bumper which can be seen in the photograph above. This bumper is said to have saved the lives of several passengers in a car which, while travelling at 45 miles an hour, collided with a telephone pole. The car was practically undamaged. Its effective action, and the lives saved in consequence, are very convincing evidence of the desirability of Concrete Bumpers on every motor-car. This case was not an isolated example. The second bumper from the top in the right-hand display rack has, on successive occasions in collision, performed its duty efficiently and well.

It is evident that such a practical, convincing exhibit as this, showing the Concrete Bumper and what it actually can do and has done, has an undoubted effect in convincing consumers in great numbers who ultimately apply to the hardware trade for these reliable and trustworthy Concrete Bumpers.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

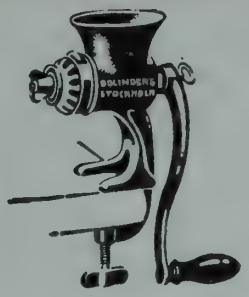
HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worth-while buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

BOLINDER'S

FOOD CHOPPING and MINCING MACHINES



THE "BOLINDER" FOOD CHOPPERS

Adjustable for chopping meat—coarse, medium or fine. Can be used to the same advantage for mincing fruit, vegetables, eggs, cheese, etc. Ahead of every other make on account of their many-sidedness.

Food Choppers made in 4 sizes.

The "BOLINDER" Mincing Machines

Are of the very highest standard. All surfaces are smooth to prevent the accumulation of dirt and to facilitate cleaning. Made in 9 sizes

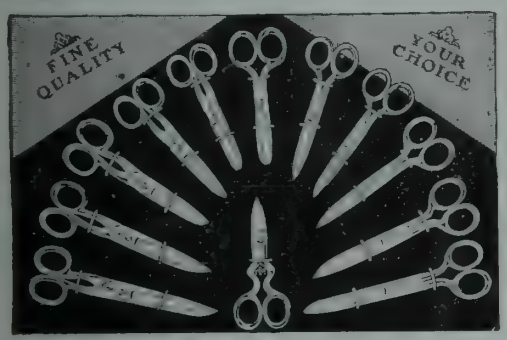
Both machines are constructed on the American system and all parts standardized to interchange with other machines of the same type.

The **Cutters** are of case-hardened Swedish steel, specially tempered and practically blunt-proof. The **Tinning** is extra heavily coated by expert workmanship with purest tin.

Exclusive selling rights granted to dealers where we are not actively represented.

For catalogues, prices and terms please write.

J. & C. G. BOLINDERS MEK. VERKST. A. B., STOCKHOLM, SWEDEN



Shears and Scissors

Profitable for Import

"Acme" shears and scissors are of special interest to dealers because of their extremely low price for the excellent quality. "Acme" offers a splendid line to sell in conjunction with a high-priced line. Their famous, specially hardened, sharp cutting edges "deliver the goods" for the consumer and thus bring repeat sales and future business to the dealer. An output of 35,000 pairs daily insures satisfactory delivery.

Write for Catalogue No. 5

The Acme Shear Co.

Bridgeport, Conn., U.S.A.

Incorporated 1882
Capital Stock, $500,000

Canadian Agent:
Mr. A. J. McCrae, 23 Scott St.
Toronto

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

No. 277

THE NEVER-FAIL OIL or GASOLINE CAN

Now comes the season when days grow short —the old lantern and the oil stove come into use — and here's a grand 5-gal. can to safely hold the precious oil. Finished also in brilliant red for gasoline. Nothing like a little reserve stock at home.

Trade Supplied by

H. S. HOWLAND, SONS & CO., LTD., TORONTO
or any Hardware Jobber

Made by

NEVER-FAIL PRODUCTS, LTD.
HAMILTON

P.S.--Made of course from "Premier" Galvanized Sheets.--TINKER TOM.

Stephens

Economy

Durability

Barn **Paint**

Permanence

Spreading

"Save the surface and you save all" *Paint & Varnish*

The Four Cardinal Points

of the many selling features of *Stephens* Barn Paint are shown above. The farmer to-day is not only painting to save the material but he wants his buildings to reflect credit on him.

The modern farmer is efficient and successful, and determined to have his building look efficient. He wants *Stephens* Barn Paint because it is reasonable in cost, durable under weather attacks, permanent in color and spreads easily, covering well. It stamps the barn owner as an alert, progressive farmer. There are many other selling points that help to close your sales.

An Agency will pay you—Ask about it

CARTER'S

Carter's Genuine Dry Red Lead

A pure, uniform and economical paint and preservative for metal work, steam pipes, etc.
Made from the highest grade of Canadian Pig Lead, highly oxidized and very finely ground. Used with pure Linseed Oil, it is very easy to apply and has unusual covering capacity.
Every sale of Carter's Genuine Dry Red Lead assures you a satisfied customer and a good profit.

Ask for prices on this and the other Carter lines—Carter's Genuine Dry White Lead, Carter's Genuine Orange Lead and Carter's Litharge.

The Carter White Lead Company of Canada Ltd., 91 Delorimier Ave., Montreal

The Powerful Sales Suggestion of Well Displayed Goods Is Attained By Using

Duluth

Sectional Shelving For Hardware

Increased sales are only profitable when accompanied by reduced costs. This attractive attention compelling shelving reduces selling costs by making the customer's selection quicker and the salesman's duty shorter.

The improved appearance of the store is another consideration—a consideration that can be measured in terms of increased business, because customers seek the store with the modern up-to-date appearance that infers up-to-date service and up-to-date goods.

Duluth Sectional Shelving are a direct factor in your success.

Duluth Showcase Company, Duluth, Minn., U.S.A.

MADE IN CANADA

BUFFALO OILS

These are a few of our most staple lines, so well and favorably known throughout Western Canada, and are sold only through reliable merchants.

Special Cylinder Oil for Steam Engines

Harness Oil. Neatsfoot Oil

A Gas Engine Oil (for gasoline engines).

Tractorlene Oil (for oil burning engines).

Ideal Thresher's Machine Oil (for general use.)

Automobile Oil and Transmission Greases.

PRAIRIE CITY OIL COMPANY, LIMITED, WINNIPEG

O-Rib-O

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

O-Rib-O
Manufacturing Co.
Winnipeg, Manitoba

For Solidifying Sales and Preventing Lost Accounts

For solidifying sales, and preventing lost accounts by keeping the trade "lined up," a weekly message to the whole Canadian hardware trade through Hardware & Metal will prove productive and profitable.

ARNETTIZE YOUR STORE

You can tell an Arnettized Store as soon as you enter it, because its arrangement and display are the utmost in store efficiency.

Write us for illustrated catalog and details of Arnett Service for your store.

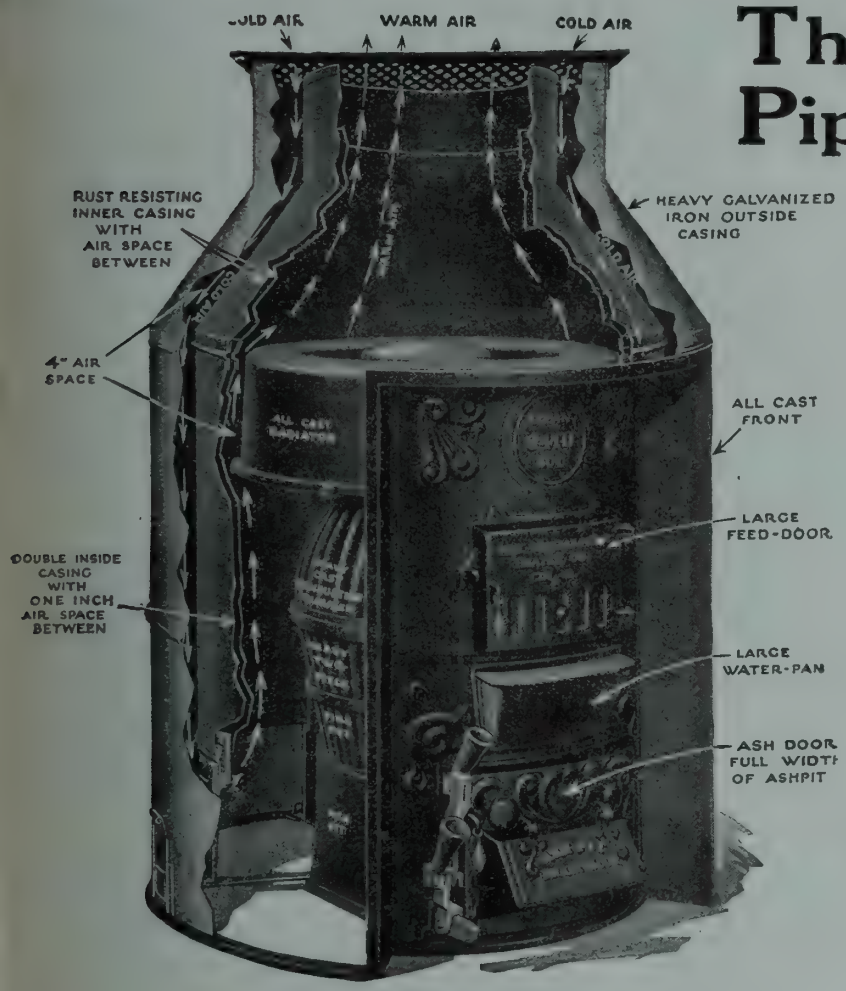
OWL METAL COMPANY WINNIPEG

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

The Williamson Pipeless Furnace



Maximum Heat at Minimum Cost

The construction of The Williamson Guaranteed Pipeless Furnace has practically eliminated the loss of heat through friction. "Air when heated rises and replaces the colder air"—this is the natural law on which this type of furnace is based, and the specially selected material used makes it possible for this law to act without deviation of any kind, which means maximum heat at minimum cost.

Time and Labor Saver

Dealers will find many prospects for their furnace trade in new buildings and old homes that are being remodelled. It does not take long to convince a "prospect" of the saving in time and labor, and how the absence of dirty and dusty registers in every room will save furnishings and draperies. Write for more details.

Attractive Selling Features of the Williamson Pipeless Furnace:

Burns Hard or Soft Coal, Coke, Lignite, Gas or Wood. Easy to Install. Flat or Triangular Grates.

Barrett Money Makers

How's Your Stock?

Every building owner, every manufacturer, every farmer in your community is a live prospect for every one of these well-known Barrett Products. They are business-builders because they are satisfaction-producers. That's why they bear the Barrett name! Don't overlook the opportunity they provide to increase your sales, your profits and the good will of your customers.

EVERLASTIC "RUBBER" ROOFING

The standard ready roll-roofing of Canada. Made of high-grade waterproofing materials. Used on thousands of farm and factory buildings throughout the Dominion. Is low in price — easy to lay — wonderfully durable. You couldn't carry a better brand.

Three weights—light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement with each roll.

EVERLASTIC LIQUID ROOFING CEMENT

Nothing can compare with it for saving and restoring old felt and "rubber" roofs. Comes ready for use. Spreads easily, dries quickly. Forms a smooth, waterproof, weatherproof surface that stops the small leaks, strengthens the weak spots and adds years of service to the roof.

Packages of all sizes, from 1-pint cans to 40-gallon barrels.

ELASTIGUM PLASTIC PATCHING CEMENT

The waterproof cement that *sticks and stays*—regardless of weather or temperature. Just the thing for patching holes in roofs, lining gutters and flashings, and stopping leaks in wood, metal or masonry. Known as "The Plastic Cement of a Thousand Uses."

Put up ready for use in 1-lb. tins (cases of 24); 5-lb. cans (cases of 12); 25-lb. and 100-lb. packages, ½-barrels (about 300 lbs.) and barrels.

EVERJET ELASTIC CARBON PAINT

The most popular and most effective protective paint on the market. Impervious to moisture, alkalies and acids. Will not peel, scale or crack. Prevents rust and corrosion on machinery, farm implements, smoke stacks and all metal surfaces subjected to severe exposure.

Put up in 1-gallon lithographed cans (cases of 12); 5 and 10-gal. cans, ½-barrels (about 20 gallons) and barrels.

The Backbone of your Business

The Backbone of Your Business consists of goods always in demand, producing easy sales and quick turnover.

Such as Famous Five Files.

They are universally known as the standard of quality; people ask for them.

There is a constant demand, because even the best files lose their edge after reasonable use, and must be renewed.

And stock can be quickly replenished on short notice by jobbers. Your money is not tied up as in slow-moving goods.

Order the Famous Five brands:

KEARNEY & FOOT
GREAT WESTERN

MEAKINS BRUSHES

Profitable Sales

and repeat orders will reward the dealer who stocks Meakins famous Rubber Set Brushes. The "man on the street" knows that satisfaction and Meakins brushes are synonymous. He knows that the bristles will stay in; that these brushes can be used on delicate work, with the utmost confidence that the bristles will not adhere to the surface of the work. That Meakins Brushes are made from selected materials by skilled workmen.

Write now for particulars that will multiply your business.

Write for catalogue.

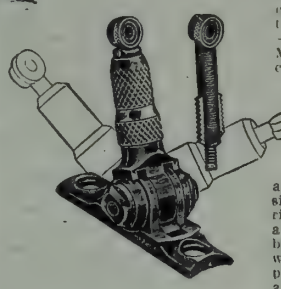
MARBLE'S
Cleaning Implements

Gun Sights

You can't stock better profit-makers. Marble's Sights are so well known and highly endorsed by renowned shooters everywhere—Marble's Cleaning Implements make gun cleaning a pleasure.

Marble's Safety Pocket and Camp Axes, Hunting and Fish Knives, Fish Gaff, Compasses, Waterproof Matchbox, Auxiliary Cartridges, Shell Extractors sell to every outdoor man. These prices are list—liberal dealer's discounts. Order through your jobber—be sure you have Marble's new trade catalog.



Marble's Flexible Rear Sight—Known wherever guns are fired—a perfect rear sight and a favorite with both amateur and professional. Stem is not rigid but is held by a strong spring in base — won't break when struck. Spring permits sight to give and instantly brings it back to correct shooting position. 2 discs furnished. $3.60.

Jointed Rifle Rod—Best general purpose rod—can be packed in a small space—when screwed together it's solid as a one-piece rod—can't wobble, bend, break. 3 brass sections, 2 steel joints, steel swivel at end. Brass or steel, 26, 30 and 34 in. long, $1.10. Give calibre and length.

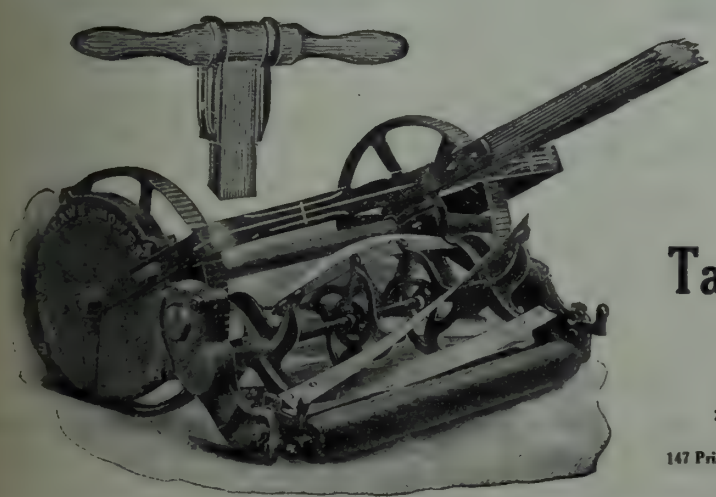
Mowers With An Ever-Growing Demand

There is a growing demand for really high-grade, close-cutting Lawn Mowers for continuous service, for use on Bowling Greens, in Public Parks, Cemeteries, School Grounds, etc., and experienced hardware dealers appreciate the advantage of carrying Ontario and Adanac Lawn Mowers in stock to supply this demand.



Think this suggestion over. You have an opportunity. An Ontario Mower on the local Bowling Green is a wonderful ad. to you, because Bowlers are lawn enthusiasts and delight in close-cropped, velvety sod. Include a few of these high-grade machines in your specification.

WHERE VALUE COUNTS

Our policy always has been and always will be to give men who shave the **most** razor value for their money.
Whether a customer pays $2.00 for a razor or $5.00, he wants a good shave.
We have put the material and workmanship **into** G. W. Korn's Razors which assures men getting the maximum number of shaves **out** of them.
The line is big—the profits worth while.

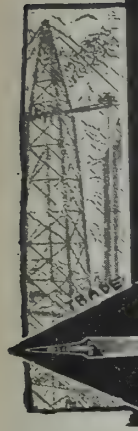
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Reduces Cost of Production

That Carbalox is available in convenient rolls means a saving in production cost. Workmen equipped with convenient rolls can use Carbalox as needed without waste or loss of time in cutting up sheets. Carbalox, in hardness and cool cutting qualities, is particularly suitable for cutting and polishing aluminum, brass, copper and iron.

The Most Popular Ratchet Combination

The "Keystone" Reversible Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities. It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed, preventing dust and grit from clogging up mechanism.

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts—the time-saving brace. "Keystone" tools are known the world over for high quality. Sell them for profit and prestige.

Let us know if your jobber can't supply you.

BUYING HABITS!

How a human trait may Keep oil sales from you —A remedy

MOST folks in any town know the local hardware merchant. He is an important member of his community. The housewife thinks of him when she needs tacks to put up a shade. Boys think longingly of bright-faced hatchets as they pass his hardware store. Men of all trades look to the hardware merchant for tools.

Yet, from force of habit, the very man who buys tools from you, Mr. Hardware Merchant, will often drive his car blocks further to get a can of Gargoyle Mobiloils.

How can you change this human trait?

Here are 4 steps which are bringing oil sales to hardware merchants the country over:

1. Hang out the Gargoyle Mobiloils flange sign which we will gladly send you. It is sure to attract many passing motorists who know the value of scientific lubrication.

2. Have cans of Gargoyle Mobiloils constantly in your window, where people can see them.

3. Place your stock of Gargoyle Mobiloils in a handy, light place.

4. Hang the Chart of Recommendations in a conspicuous place on your wall. It will show people you sell oil in the scientific way.

Hardware dealers who use these sales helps report new impetus in their lubricating oil sales.

"3450" Insulators Are Practically Indestructible

They are so hard and tough that they stand up under treatment that is never experienced even in emergency use in a motor or engine.

You can heat them white hot then douse them in water—knock them with a wrench—drive them through a cake of lead—drop them on the floor, and you won't find a chip or crack in the glaze.

Do you realize what this means in ignition efficiency?

Champion

Dependable Spark Plugs

all have "3450" insulators. There's a type that will help to increase the efficiency of every motor car, truck, tractor, farm engine, motor boat, motor cycle or aeroplane.

Knowledge of this wonderful efficiency is a big sales help to the dealer who handles Champions. It creates business without the necessity of having to "sell" each customer.

Link up your store with our advertising and selling campaign, by displaying Champions and our dealer helps. It will put many dollars in your pocket without a great deal of effort on your part.

Keep the full line of Champions on hand, and get the full benefit of our promotion.

The Standard Spark Plug of the World

At the Uniontown Speedway, in the 225-mile Universal Trophy race, Tommy Milton added another victory to the AC Spark Plug record for 1920. His triumphant Duesenberg, which averaged 94.9 miles per hour for the distance, was equipped with AC's. So were the Duesenbergs of Eddie O'Donnell and I. P. Fetterman, who finished third and fourth respectively. These drivers knew that AC Plugs would serve them unfailingly regardless of what was asked of them. Dealers, in selling AC's, know, too, that their customers can ask nothing of AC's that AC's cannot give. That's why it pays to concentrate on the complete AC line. Dealer information sent on request.

B·S·A

SPORTING RIFLES

LEE-ENFIELD ACTION

The B. S. A. Sporting Rifle illustrated has the same action as the famous Lee-Enfield model which proved superior in the firing lines of France. In extremely cold climates the Bolt always functions perfectly—a feature thoroughly appreciated by many veteran hunters where the mercury is below zero.

Since the war there has been a world-wide demand for B. S. A. Sporting Rifles. Dealers can therefore be sure of ready sales. There is satisfaction also in knowing that you are selling a good article that will help maintain the prestige of your business. The B. S. A. Trade Mark stands for rifles and shot-guns of unerring accuracy, perfect balance and excellent workmanship. It is a pleasure to place one of these firearms in the hands of a customer—to see him test its balance, open and close the breech, bring the butt to his shoulder and decide it will be *his* rifle!

Dealers are invited to write concerning the stocking and selling of B. S. A. Rifles and Shot-Guns.

Available from Montreal Stock

Cord or Fabric.

Cord Tires

Since its inception, the F. E. Partridge Rubber Company, Limited, has unhesitatingly adhered to the policy of giving to its dealers only products which would sell readily and build up, by exceptional quality, an enviable reputation for dependability.

To meet the incessant demand for Cord Tires, the Company has doubled the capacity of its plant, and is now producing, with the usual Partridge super-efficiency, cord tires of outstanding quality and value.

Every dealer knows that motor car owners willingly pay a higher price for Cord Tires—if they are sure that they are getting tires which justify the price.

Partridge Cord Tires more than justify their cost. Strength, durability and dependability is built into them—and they prove their economy by giving long terms of satisfactory service, free from the inconveniences of tire trouble.

Prove to your customers that price should never be considered when buying Partridge Tires—for Partridge always give a handsome return in tire service.

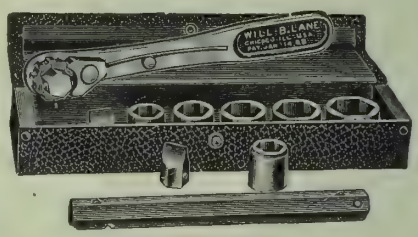
Lane's Handy Auto Ratchet Tools

A popular quick-selling line that interests your customers at once because of their ability to perform tasks where other wrenches fail.

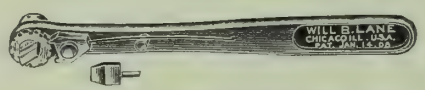
The line comprises the "Standard" and "Ford" Sets of the Lane "Unique" Ratchet Wrench, the Lane "Super-Unique" Ratchet Wrench Set and the "Unique" Off-Set Ratchet Screw Driver.

SUPER-UNIQUE SET



FORD SET

STANDARD SET



OFF-SET RATCHET SCREW DRIVER

All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

A line that meets many requirements and presents unusual selling opportunities for the dealer.

Manufactured by

Will B. Lane Unique Tool Co.

180 N. Dearborn St., Chicago, Illinois

The Plug with the Hotter Spark

The ball point of the "M&S" spark plug concentrates the current and intensifies the heat. This gives a sure, hot spark—producing better combustion and greater power.

The "M&S" plug is made in all styles to suit every make of car—it is standard equipment on the popular new Overland "4."

The "M&S" plug is made in Canada and guaranteed to give complete satisfaction.

Dealers:—Ask your jobber for the "M&S" plug.

No. Models
500—½" Standard
501—⅞" Standard
502—⅞" Long
503—⅞" Long with Chevrolet Terminal
506—½" Long
504—Regular Porcelain
505—Chevrolet Porcelain

MACHINE & STAMPING CO., Ltd.

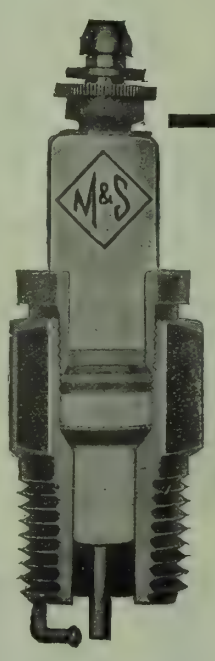
Toronto, Ont.
Commercial Dept.
Russell Motor Car Co., Ltd.

25



The Plug with the Hotter Spark

The ball point of the "M&S" plug creates a larger and hotter spark, causing more complete combustion. This hot spark will give your car new life and more power.

The three-in-one terminal is adapted to any style ignition wiring. The high-grade chemically glazed porcelains are interchangeable—one porcelain fits all plugs.

Dealers—The "M&S" plug is standard equipment on the new Overland "4". Ask your jobber for them.

Millions Have Bought It
—millions more need it!

Millions of SHALER 5-Minute Vulcanizers have been sold to motorists.

Millions of other motorists are being induced, through our large advertising campaign, to want the SHALER 5-Minute Vulcanizer.

The dealers who sell it make the profits.

Dealers predict larger sales of SHALER 5-Minute Vulcanizers for the future than during the past. Larger repeat-sales—and profits for dealers—must follow.

SHALER 5-MINUTE VULCANIZER

Every sale of a SHALER 5-Minute Vulcanizer is *not* one sale and one profit alone—it means that more sales will follow from the same customer, because he needs to buy the Patch-and-Heat Units regularly for use with the SHALER.

This repeat business comes to you—and brings you regular profits—in addition to your profits from selling the SHALER Vulcanizer—and without any effort on your part.

Get Your Share of This Big Business—Order from Your Jobber Today!

Keep a good stock of SHALER 5-Minute Vulcanizers and SHALER Patch-and-Heat Units. Display them prominently in your windows and on your counters, so that motorists know you sell them. Our advertising will bring customers to your store—the SHALER sells itself. Order from your jobber today or write us at once for full information and catalog of the complete SHALER Line.

"Hammer the Hammer"

The World-famous Slogan that Sells Iver Johnson Revolvers

Every day, people walk into stores where Iver Johnson revolvers are sold and ask for the "Hammer the Hammer" revolver. Perhaps they have forgotten who makes it, probably they don't know of the other excellent features of the revolver—but they do know it is the revolver that can't go off by accident, and they want it.

If you want a share of this business, if it is worth a few minutes of your time to close such sales, deliver a revolver that stays sold and gives a full measure of satisfaction—write for catalogue and complete dealer information.

Stock the entire line—22, 32, 32 special and 38 calibers, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms. Perhaps you will be interested in Iver Johnson bicycles and motorcycles, too. Write for full information.

The Defenceless Man —Put a COLT in His Hand

EVERY one of your customers requires the protection of a Colt Automatic Pistol or Colt Revolver in his home.

We are in the midst of restless times. Newspapers are full of accounts of "breaking and entering" in the night time—a form of crime made comparatively safe by the ease with which these midnight prowlers can make their "get away" by automobile.

Armed with a Colt, the householder knows that he is safeguarded by "the world's right arm." There is no protection that you can sell in the fire arm field equal in efficiency and safety to a Colt.

One-sixth of your salesman's time to make change

It is estimated that it takes one-sixth of a salesman's time to make change under ordinary conditions. This means the time of one salesman in a staff of six. Eliminate the running and five salesmen can do the duties of six.

Our Cash Carriers will accomplish this for you, and at a greatly reduced cost with more efficiency. There also would be two persons in every transaction, viz., the salesman and cashier—each checking the other—and your money will be in the custody of one person, and in your office, where it properly belongs. Had you thought of it in this way? Our leaflet explains it fully.

A Paint Agency That Increases Customers and Profits

"Save the surface and you save all" - Paint & Varnish

Guarantee

WE GUARANTEE THE MARTIN-SENOUR 100% PURE PAINT (except inside White and a few dark shades that cannot be prepared from lead and zinc), to be made from pure white lead, pure oxide of zinc, with coloring matter in proportionate quantities necessary to make their respective shades and tints, with pure linseed oil and turpentine dryer, and to be entirely FREE from water, benzine, whiting and other adulterations, and SOLD SUBJECT TO CHEMICAL ANALYSIS.

The **Martin-Senour** *Co.*
LIMITED

Two things are vitally necessary in such a Paint agency. First — **Quality Paints** and then **Intelligent Co-operation.**

In offering you the M.-S. Agency we offer you a maximum of both. Martin-Senour 100% Pure Paint and Varnishes are nationally famous for their quality and sales are stimulated by a steady, forceful campaign of advertising.

Investigation will prove that the Martin-Senour Dealer Agent gets the lion's share of the paint and varnish business in his locality. This does not happen by accident. It is the natural consequence of a quality line backed by up-to-date sales promotion.

Send a postcard for particulars of our Dealer Agency Plan.

Aladdin has been presented to Canadian women thousands of times through big space advertisements in leading Canadian publications.

Aladdin and the Ladies Are Chummy Now

When Aladdin was properly introduced he became a great favorite with the ladies.

They all liked him.

Women all across Canada are now well-acquainted with Aladdin as the name of a wonderful new Dye Soap; unique in its magic coloring possibilities; and simple and satisfactory to use.

Aladdin Dye Soap is being extensively advertised to women with large space advertisements in leading daily newspapers.

And to make it easy for the dealer to display Aladdin Dye Soap; and the customer to make a careful selection of the color she desires, a handsome revolving display stand is given free with a one-gross order of Aladdin Dye Soap.

Aladdin's popularity with the ladies is making great business for the dealer. Are you getting yours?

Order a gross from your wholesaler and start right in.

Their *working points* are the best talking points of Starrett Tools.

Selling Starrett Tools to apprentices and manual training students is one of the best possible ways to build future business.

These boys know Starrett Tools. They see instructors and skilled mechanics using them, they read the Starrett ads. in such magazines as Popular Mechanics, Popular Science Monthly, and the like.

It's business that's worth going after. Put sets of Starrett Tools where apprentices can see them, with perhaps, a few of the lower-priced "mikes", and copies of The Starrett Book for Machinists' Apprentices.

As these boys learn their trade, they'll need more and more tools. And they'll remember the dealer who sells them their first set—if the tools they buy are marked with the name of Starrett.

"The Tools Mechanics Buy" is full of suggestions about increasing your profits through Starrett Tool sales. Write for as many free copies as you need.

Building for the Future

OWING to the shortage of high-grade raw materials, it has been difficult for you to obtain the quantity and varieties of sheet metal ware you could sell.

Faced with such a condition, some dealers have unwisely stocked with inferior lines. Not only has this resulted in the loss of good customers; they have risked their good-will with the community.

Would it not have been far wiser for them to have kept a smaller stock of a better grade line—a line that would give the housewife better and longer service? A line the dealers could conscientiously recommend?

The wiser dealers stock with the better-grade lines, for they recognize that good customers are easier to lose than make. And they stock SMP lines, knowing that SMP Quality is always kept at the highest level. Quality is the slogan all the way through our factories, and Quality is built into every article we make.

Housewives in every corner of the Dominion are using SMP articles of sheet metal ware. And our products are standing the severest tests that household utensils can undergo—constant use in the kitchen and around the home. These housewives know what SMP quality means.

Build for the future. Build on these lines—

PEARL WARE — DIAMOND WARE
SMP WHITE WARE — BEACON LANTERNS
SMP HOT GALVANIZED WARE
HOT BLAST STOVES AND HEATERS

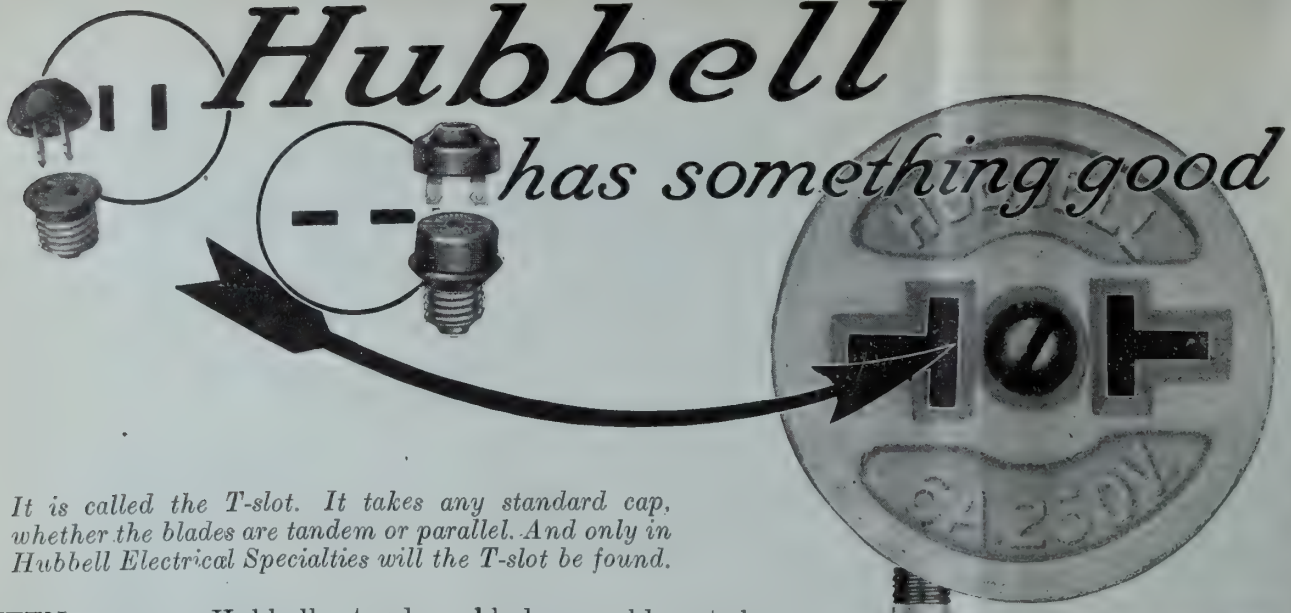
Hubbell has something good



It is called the T-slot. It takes any standard cap, whether the blades are tandem or parallel. And only in Hubbell Electrical Specialties will the T-slot be found.

FIFTEEN years ago Hubbell produced the two-piece attachment plug. The base was threaded to fit a standard socket; the Cap had two brass blades, set tandem, and plugged through two tandem slots into separate arcing chambers in this base. This did away with the awkward and often dangerous twisting of the cord.

As the use of these plugs increased, a demand arose for a more convenient form of current outlet in the walls, so that table and floor lamps, small machines, or other electrical devices could be connected without disturbing a lamp bulb. Then Hubbell produced the wall receptacle, provided with two slots, set tandem, to take these attachment plug cap blades.

Later, when the need arose for a somewhat smaller plug, Hubbell produced the one with parallel instead of tandem blades. This change was needful in order that the contact springs could be placed within the threaded shell, thus making the base considerably shorter.

But parallel blades would not fit tandem slots, and tandem blades could not be used where only the parallel slots were provided. This naturally caused some inconvenience to those who had adopted the new type of plug, as they often found themselves unable to use it with the standard receptacles.

So Hubbell invented (and patented) the Hubbell Double T-slot. Each slot is shaped like the letter T, which incorporates the tandem and parallel slots in one opening, and gives access to the contact springs, so designed that they take either type of blade.

The Hubbell Line has always been standard. Hubbell Attachment Plugs with tandem blades will fit more than 50 million Hubbell Current Outlets **already installed.** And now it makes no difference whether the cap has blades set tandem, parallel, or at right angle—the Hubbell Patent T-slots will take all three.

Every style of Hubbell Flush Receptacle, Wall Receptacle and Current Tap, for lighting circuits, are now provided with T-slots. When you use Hubbell Plugs, when you install Hubbell Current Outlets, you avail yourself of this consistent standardization, which has made the Hubbell Standard Line **interchangeable.**

And the QUALITY? That's Hubbell!

Story for Week Dated Sept. 25, 1920 **Being No. 24 in the Series**

Sulphite Pulp the Pure Basis of Many Eddy Company Papers

THERE are two processes for making wood-pulp, as you know. The process you read of in the last two articles in this series was the mechanical process by grinders. There is also the sulphite process, which is a gigantic "cooking" operation, turning out the purest possible pulp in immense quantities. During the process the wood fibre becomes delicately clean and white as a snowdrift. It looks good enough to eat. Out of this pure substance Eddy papers are made. The appetizing cleanliness of Eddy Co. paper bags for holding foodstuffs, the perfection of purity in Eddy Co. tissue papers for all purposes, can be guaranteed to the customer in every case.

In the case of the mechanical process the logs, sawn to short lengths, barked clean and white, go direct to the grinders. In the Sulphite process the logs, after being sawn to length and barked, go through more elaborate preliminary treatment. They have to meet the revolving knives of the powerful Chippers, which reduce them to fragments, just like the chips around a chopping block. But these chips must all be about the same size, and not too big.

The chippers work tremendously fast. They will chip 150 cords of wood in ten hours. From their busy knives the chips are hurried through hoppers to the crushers, which free them from over-large chips and sawdust. The sawdust goes to the furnaces. Passing through large revolving tubular screens, the chips are shaken up and winnowed of all clumsily-shaped or over-large pieces which remain, and thus they are prepared for the Digesters, in which they are "Cooked." All unsuitable chips eliminated by the screens are returned to the machines for rechipping. There is no waste that can be prevented about the Eddy Company Plant.

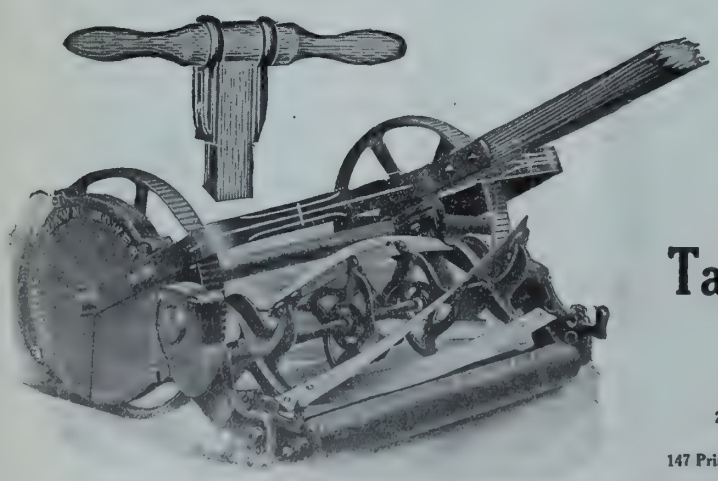
Mowers With An Ever-Growing Demand

There is a growing demand for really high-grade, close-cutting Lawn Mowers for continuous service, for use on Bowling Greens, in Public Parks, Cemeteries, School Grounds, etc., and experienced hardware dealers appreciate the advantage of carrying Ontario and Adanac Lawn Mowers in stock to supply this demand.



Think this suggestion over. You have an opportunity. An Ontario Mower on the local Bowling Green is a wonderful ad. to you, because Bowlers are lawn enthusiasts and delight in close-cropped, velvety sod. Include a few of these high-grade machines in your specification.

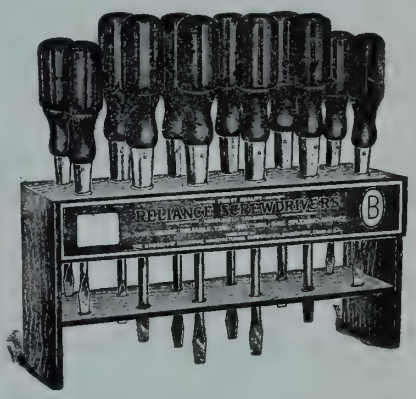
Reliance Screw Drivers
No. 35 ASSORTMENT



This fine driver is packed in a very attractive display rack containing the following drivers: Four 4-inch, four 5-inch, and four 6-inch. The rack as shown above is substantially made of hardwood in mission oak finish, with attractive white, violet and gold labels. Displayed in this way they sell "on sight." 13 Assortments in case.

Are You Using Up-To-Date Tools In Your Shop?

Or are you losing time, money and contracts, while your highly paid mechanics spend valuable time repairing old, worn-out machines. Modern tools mean greater production, which is the only way to combat high labor costs.

Our line comprises all kinds of light and heavy Sheet Metal Working Tools, including Power Presses, Shears, Brakes, Bending Rolls, etc., etc.

Ask for Catalogue No. 26. It will convince you.

PERFORMANCE COUNTS

BURMAN CLIPPERS

Are made for clipping horses and for shearing sheep. They are made of the best materials procurable, by the best skilled workmen it is possible to engage, and by a large company who manufacture only clippers. Never has expense been spared if there was possible the slightest improvement in quality or cut. That means a tremendous lot to the hardware merchant.

YOU DON'T HAVE TO BUY A NEW HEAD

PLATES ARE INTERCHANGEABLE

BURMAN CLIPPERS

Are the acme of perfection when it comes to performance. They cut clean. Heavy work does not frighten the "Burman"; they handle the heavy, tough hair well, giving every service and satisfaction to the user.

One important point for the dealer is that plates are interchangeable, that is, when the purchaser wants to shear sheep he simply requires to change the plates. This does away with the old necessity of buying a new and costly head.

YOU DON'T HAVE TO BUY A NEW HEAD

93-97 Adelaide Street West - - TORONTO

It's the Adjustable Feature that Counts

The adjustable feature of the Empire Adjustable Aluminum level is important. It makes possible a tool that will work on both straight and pitched surfaces. Merely loosening two screws on each vial case makes it possible to adjust the glass as necessity demands. When the screws are tightened the cases are secure—cannot possibly be jarred loose. Another important feature is the fact that when a glass is broken the level need not be sent away for repairs. Just loosen the screws and insert a new vial case—it takes but a minute—and the level is again ready to use.

The Empire line includes adjustable aluminum and stationary aluminum levels, millwright's, carpenter's, brass-bound, black walnut, and various other types of levels in many sizes. Write for complete catalog.

4 Good Reasons --READ 'EM

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the most economical saws to buy in the long run. They stand hard usage and wear exceptionally well, hold their cutting edge and temper longer than the ordinary saw and do not bind in the kerf. Lumbermen prefer the Simonds Crescent Ground Cross-Cut saw because they have proven that it will cut 10 per cent. more timber than other brands.

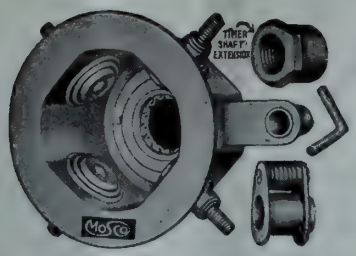
Dependable MOSCO **Products**



Improved Bemus Ball Contact Timer for Fords

Easier Starting--Smoother Running--Longer Life--Saves Coil Points

The IDEAL TIMER because form of contact is the only one which is correct both electrically and mechanically. This is made by a hardened tool-steel brush coming in contact with steel balls which are kept in proper position by means of a spring with plug on the end pressing against them. The impact of the brush causes the balls to turn so that a fresh surface is presented for each contact. The brush comes in contact only with the four balls, touching no fibre or insulation. The balls are so located that each has a track of its own on the brush, this insuring a maximum amount of wear.

Mosco Products Are Carried By All Leading Canadian Jobbers.

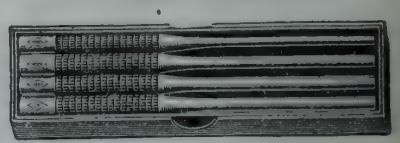
MAYHEW made **TOOLS** ARE RIGHT



Road Signs and Store Signs

The wrong road!

What chagrin the motorist feels when he makes the discovery! It's the waste of time he dislikes most.

Engine trouble! Another great time-waster equally annoying.

Most motorists avoid such accidents by watching for signs—dealers' signs as well as road signs. Choosing the right gasoline and lubricating oil is as important as choosing the right road.

And over 62 per cent. of Canadian motorists use Imperial Polarine for lubrication. When they need lubricating oil, they look for the Imperial Polarine sign. It points to correct lubrication.

You can do a big business with motorists by stocking Imperial Polarine and displaying the Imperial Polarine sign. There is an annual market for hundreds of dollars' worth of Imperial Polarine in your territory. And every sale brings you a minimum profit of 33 1/3 per cent.

Imperial Polarine is made in three grades for cylinder lubrication—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A., and there are also special Imperial Polarine transmission and differential oils and greases.

Put up in ½ gallon, gallon and four gallon lithographed sealed cans, 12½ gallon steel kegs, half-barrels and barrels.

IMPERIAL
Polarine
MAKES A GOOD CAR BETTER

Three grades for automobile cylinder lubrication.

IMPERIAL POLARINE
(light medium body)

IMPERIAL POLARINE HEAVY
(medium heavy body)

IMPERIAL POLARINE A
(extra heavy body)

One of these grades is specially recommended for the correct lubrication of any car or truck in your community.

See the Imperial Polarine Chart of Recommendations—display it prominently and sell by this chart.

For efficient automobile transmission and differential lubrication sell

IMPERIAL POLARINE TRANSMISSION OIL

In cases where grease is required or preferred, sell

IMPERIAL POLARINE TRANSMISSION GREASE "BB"

IMPERIAL POLARINE CUP GREASE

The registration of motor cars and trucks this year is 30% greater than a year ago—go after the business. You can sell carload orders. Ask the Imperial Oil man to tell you how and show you the profits.

A Message to Gillette Dealers and their Assistants

Keep clearly in mind the EIGHT principal reasons why you should throw the weight of your recommendations behind your Gillette sales :

(1) The man who buys a Gillette is keenly satisfied!

(2) The sale means an immediate profit well worth while.

(3) The sale means a continuous outlet for blades.

(4) The variety of sets satisfies every need.

(5) Gillette Advertising brings sales ready to close.

(6) You have ample GOOD material for window display.

(7) You are certain of getting Gillette goods as you need them.

(8) There is the biggest concern in the business back of the goods.

That is why dealers with experience say, "It pays to push the Gillette Line."

MONTREAL

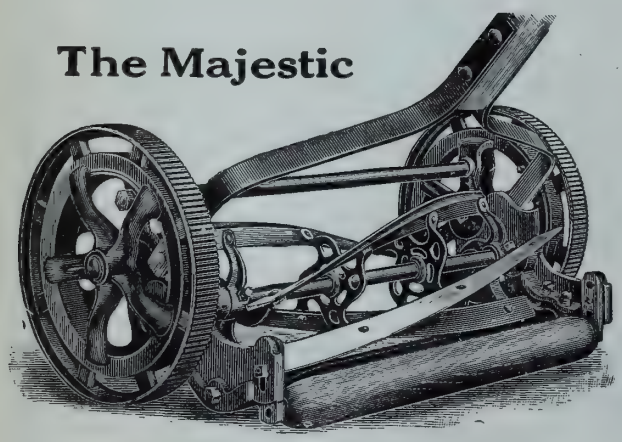
The Majestic



Before placing your order for mowers, it will pay you to investigate Eureka Machines. Our range consists of the following:

Rapid, Garland, Majestic, Speedy, Forest Glen and Federal.

Sizes: 14, 16, 18 and 20 in. cut.

Speedy in Action
Speedy in Sales

The Speedy is one of the Eureka Famous Six, that has met with popular favor wherever used. Its reliable action resulting from the high quality crucible steel blades, eliminates that fault found in many machines of pressing the grass in the earth, instead of cutting it. The Speedy is a quality machine built for service and it "delivers the goods." The hardware man will find the Speedy a machine he can sell with ease, customers recognizing quickly its superior advantages. It pays to sell Eureka Mowers. Why not be our sole agent in your district? Write to-day.

Will Hold Retailers to Account for Alleged Frauds Which Really Result from Beclouded Tax Regulations of Wavering Officials

Inland Revenue Officials Throw Further Slanders on Integrity of Retailers Who Are Ignorant of Tax Regulations—Through the Indefinite Demands of Government Three-Quarters of Luxury Tax Uncollected—Example to Be Made of Some Dealers—New Set of Regulations is Needed

THROUGH the wavering attitude of Ottawa Government and the uncertainty which results from an ignorance of the facts, the new taxation introduced earlier in the year, in the form of an excise and luxury tax, is not working out as Sir Henry Drayton planned. The manner in which the whole matter was first broached and has been handled since indicates a hap-hazard, hit or miss groping in the dark and laying on of taxation out of all proportions in some cases. The natural result is evident in the announcement just made — that the Government alleges wholesale frauds against retail merchants for not making complete returns. Because the retailer could not see what the Government was groping after in the dark, he is held to be the one to blame and immediately stringent measures are to be taken to bring him to time.

In the first place the taxation scheme was launched without sufficient forethought and without securing the advice of those who were acquainted with the obstacles which would have to be surmounted before such a plan could work successfully. The result was that the plan had no sooner been launched than it had to be withdrawn and a new set of rules made, which showed very little improvement over the first attempt. Throughout the whole summer amendment after amendment was made to the original resolution which has resulted in the production of something which is not sufficiently understood by the average retailer that he may feel confident he is not committing some offence unconsciously. And to add to the ignominy it is a fact that many of the Government's own officials representing the Inland Revenue Department are either not fully acquainted with the facts or else they are too dependent upon higher officials to dare to give a ruling on something they do not quite understand. There has been a great deal of bungling all along the line and now the retailer is the one who is going to pay the penalty.

Some of the "Offences"

Some experiences of hardware dealers who have been unconsciously committing an offence against the regulations are enumerated herewith. One prominent dealer in Western Ontario has a tinshop and makes anything from a tin cup to an eavestrough. Wishing to confirm the opinion expressed that under such circumstances the store owner would be considered to be a manufacturer and should be paying a two per cent. tax on all such lines made on his premises, he thereupon wrote to the local representative of the Inland Revenue Department and was advised that a ruling would be secured on the matter. Though several letters have changed hands between these two parties no definite ruling has been given him yet and no tax has been paid. The Government states that ignorance of the regulations is no excuse.

Collects Tax On Ammunition

Another dealer from the same district has been collecting the tax on ammunition ever since the regulations were made effective. It will be recalled that in the original resolution this was the procedure to be followed. But in the shake-up the responsibility for collecting and forwarding the tax on ammunition was transferred to the manufacturer. This change was hidden away in the text of the second resolution in such a way that it was days before it was found. No doubt there are many retailers who have not discovered the change yet

and have been charging the customer the amount of the tax over and above the manufacturer's charge for tax, thus collecting it twice. Then again, another dealer from Northern Ontario says some hardware dealers in that district had purchased large stocks of ammunition before the tax was transferred to the manufacturer and then, of course, they applied it erroneously and found out later when they had taken much money from local customers that they were not entitled to it.

Retailers Grope in the Dark

Furthermore, what has happened to the money collected under the original resolution on other lines such as nickel plated ware, etc., which were free from tax before the second resolution came out, and before any returns were made? Did the Government make any provision covering such circumstances so that retailers would not be left to grope in the dark and have them held up to public scorn as being responsible for high costs?

Fishing tackle is another point on which there is much misunderstanding. The resolution says articles over 50 cents in value are to be taxed, but the ruling was once given that if two articles or more were purchased at one time and each was under the 50 cents, but the total was over 50 cents, then the whole was taxable. Of course the result of such illogical deduction would be to make the customer come back two or three different times to purchase each article separately in order to avoid the tax. What has the Government to gain from such a plan?

All Dealers Suffer For the Dishonest Few

Another phase of the matter is that though the great majority of the dealers are honest and anxious to do the right thing by all parties concerned, there were bound to be a certain number throughout this Dominion who saw an opportunity to line their own pockets with money collected dishonestly from ignorant customers. Still the department, so far as is known, took no action to protect the public or to bring to time the offending retailers. The result was that for a time the average customer did not know whom to trust and this put the whole trade on a parity with the dishonest few. Unfortunately this did not help matters and came at a time when already the retail trade was burdened with the difficulty of meeting customers with the usual tale of higher prices, and the result was to put retailers as a class in a bad light.

What of the Stamp Regulations?

The logical solution of much of the difficulty was to apply the stamp regulations similar to the plan followed in the collection of other Government revenue. The suggestion had to be made to Ottawa, and even then it took a long time to see the advantage of such a plan. Subsequently the plan was decided upon and stamps were to be ready by the first of August. Then it was the fifteenth of that month and still it was postponed. So far the stamps have not put in an appearance so far as is known.

Under such circumstances, with such an indefinite plan to work on and a wavering Government represented by dependent officials throughout the country, could anything else be expected than that the regulations would not be followed to the strict letter? Undoubtedly some of the discrepancy between the amount of revenue expected and the amount received was due to dishonest practice on the part of a very few, but the greater part of it was due to a lack of information on the part of hardware dealers whose integrity is unquestioned, and who are to-day thoroughly disgusted with the manner in which the tax collection has been conducted.

Dominion Secretary of R.M.A. Speaks Out

The announcement is made that the Inland Revenue Department has commenced the selection of a staff of accountants to investigate the discoveries made by investigators who have been quietly at work among retailers for some time past. Coupled with this comes a broadside from E. M. Trowern, secretary of the Dominion Board of the R. M. A. of Canada, stating that the new tax is too complicated, too expensive to collect, too diversified, unjustly applied and discriminating.

Government officials state that three-quarters of the luxury tax which should have been collected has not gone into the coffers. The actual amount of which the Government has been defrauded is said to be very large, though definite figures are withheld until a more favorable showing can be made, according to the statement of a Government official.

The opinion of retailers in general is that as much of the revenue from taxation as possible, should go to payment of the national debt instead of a large portion being taken for the payment of a large staff of clerks which are part of the cumbersome machinery needed for tax collection under the present system.

Specific instances of fraud are pointed to by officials of the Inland Revenue Department. In one case an article on which the luxury tax is collected over a certain sum, was sold at $4 in advance of this price. But to absorb the amount in excess of the exemption figure other unpurchased articles were put down on the bill. On these extra items, which were not bought, there was no tax.

Of course justice demands that such fraud be penalized. No one denies that. But the point is that the big part of alleged fraud is plain ignorance on the part of the retailers, for which the Government is largely to blame, and for which the Government now comes out with the thunderous announcement that examples are to be made of retailers who are perpetrating such frauds against the tax regulations. Let the housecleaning start at the right place and let us have a clean set of fool proof regulations so that nothing will be left to uncertainty and then the trouble and the reflection on the retail trade will cease.

Boys Influence Fall Sporting Trade

Planning a Unique Window of Fall Hunting Lines—The Camp Trim Always Makes a Strong Suggestion—Much Information Can Be Given Customers Regarding Guns, Equipment for the Hunting Trip, Game Laws, etc.

THE fall hunting season is now in full swing and the opportunity is provided for making a big thing of sales of guns, ammunition, hunting garments, camp equipment, etc. The windows should again be brought into use for they constitute one of the best mediums of advertising at the dealer's disposal. The photograph shown in connection with this article illustrates a good type of window to run at this time of year. It has an attractive background making use of manufacturers aids showing ducks on the wing and a shooting scene on the harvest field. Seasonable lines are prominently displayed and price cards are generously used. Linking up with the windows, some good ads. can be used along the lines suggested in the sample ads. shown herewith. Use some catchy and sporty phrase to catch the attention of the sport. "Johnny Get Your Gun" heads off the ad. by Blairmore Hardware Co., Blairmore, Alta. It points out that the duck shooting season is now open and calls sporting men to secure their outfits.

Appeal to Young Sportsmen

The windows are very important, and it is unfortunate that very often in arranging window displays of guns, etc., that an important class of buyers is

completely forgotten. The buyers we refer to are the coming hunters, the young sportsmen, the small sons of the veteran trappers of game. To some it may seem strange to call young boys an important class of purchasers of such articles as are necessary for hunting.

However, in considering the matter the idea appears to be a sensible one. We do not mean to say that young boys go out into the woods in search of game. We speak of them as important buyers because of the effect which they are capable of producing upon the general business of the hunting supplies department.

In the first place, the youngsters love to play with a rifle. Their enthusiasm for this sport is boundless. They stage many miniature trap shooting tournaments. They also play hunting to a considerable extent. This means that the hardware dealer who sells sporting goods can make many sales of rifles by catering to the boys.

Another factor which makes the boys an important class is the effect which their enthusiasm and love for rifles have upon their fathers. Most fathers like to see their children happy and consequently gladly consent to go along with their sons and help select a rifle. When the men have been induced to come along to the hardware store, they notice some articles which they need for their hunting trips. Thus the dealer obtains a generous amount of business through the interest which he has stirred up among the boys of the neighborhood.

A Sample Window For Boys

Because of his ability to appreciate the fact that a window exhibit of guns and supplies which would appeal to boys as well as to men would mean

This window of fall sporting equipment by Bond Hardware Co., Guelph, Ont., is a good type of window to use at this time of year to stir up interest. Very often just the suggestion is required to send many hunters on their way to the favorite haunts. Guns, ammunition, rifle cases, ammunition belts, hunting garments, camping accoutrements are the lines which can best be featured. In this display price tickets are shown on each article. By making use of manufacturers' aids an appropriate background and side panel is provided.

Here are some samples of ads. on fall hunting equipment as used by Capital City Hardware & Sporting Goods Co., Calgary, Alta., and Blairmore Hardware Co., Blairmore, Alberta. A catchy heading, "Johnny Get Your Gun," appears on one of these ads. with an announcement re the opening of the duck shooting season. The other ad. enumerates various lines of fall hunting equipment with prices.

many sales, an Ontario dealer recently trimmed such a window and did a big business in this line. The display consisted of two beaver board columns covered in black and white striped paper with a large five by nine foot enlargement of one of the rifle company's advertisements. The advertisement gave particulars regarding a rifle contest for boys. The enlargement was made by the dealer, in black and white, on beaver board, with a lumberman's crayon.

"Directly in front of the centre panel were placed two rifles on nickeled stands. Nearer to the window were three cut outs supplied by the rifle manufacturers.

"At one end of the background was displayed a sweater, and at the other end a gunning coat. At other places there were clothing, guns, and ammunition.

Draped from the rifles and over the pedestals in the centre was yellow velour, and from the side pedestals and around the outer edge was draped a dark green velour.

This window display attracted the attention of both men and boys. In fact, the youngsters brought, directly and indirectly, a large amount of business.

Natural Effect is Strongest

In planning the window display care should be taken to keep them natural in appearance. By combining a selection of rifles, ammunition and similar goods, with a camping scene, a setting may be made that will carry a strong appeal to the hunter. It will set his mind working on the hunting trip he has been planning, and eventually bring him to your store to fill his requirements.

It is well to plan the sporting goods window around some central figure or scene, as this will increase its effectiveness as a selling factor, and not make it a mere attention drawer without any sales pull.

A Good Camp Scene

Suggestions for camp scenes have been outlined in Hardware and Metal on many occasions. The most effective display is that along the following lines: In the centre have a canoe, while at one side may be paced a small tent, and at the other side some bushes. The scene may be made more realistic by building a camp fire in front of the tent, making the fire effect of red tissue paper with an electric bulb under it. A further touch of realism is secured by rigging up a flag pole in front of the tent and have an electric fan concealed in the bushes to keep it in motion. Getting action into the display is the way to make it pull results. By the side of the canoe or near the tent may be placed a figure either of wax or a cut-out figure with a rifle and dressed in hunting costume.

The effective arrangement of rifles, ammunition, etc., may then be left to the individual window dresser. Some dealers introduce some stuffed birds or animals, placed where they will draw special attention to some of the stock on display. Birch bark is often used effectively in the display, and some branches of colored autumn leaves work in very attractively. Pictures such as are used by the railway companies to illustrate the best hunting grounds may also be used to advantage. It is well to keep in mind that every article shown in the display should bear upon the central idea of featuring the merchandise, and therefore, not to overload the display with superfluous material which will only detract the mind from the goods. Often times there will be some feature distinctly local which the window dresser can make use of to advantage. Some pointed messages can be conveyed by cards or printing on the panelling in the background.

Much Information to be Given Customers

The function of the successful hardware dealer is to give customers as much information as possible concerning the line being sold. This factor establishes the difference between the good salesman and the other kind. It is doubtful if there is any other line of goods which offers such a field for the giving of information than that concerning the use of fall hunting equipment, and information concerning the laws of the province in which the shooting is to be done. The regulations of the various provinces will be reproduced in Hardware and Metal and dealers would be well advised to keep these for reference and to form the basis of advice to customers.

Collections Important During Uncertain Period; Individual Element Once More Assertive

Merchants Should Make Every Effort to Turn Over Stocks as Frequently as Possible—Banks Curtailing Credits, Why Not You? —Look After Collections Monthly—Pay Your Bills, Make Others Do the Same

IF there is a feeling of nervousness in the trade with regard to fall business and the outlook for next year—and there seems to be such a feeling, particularly in the larger centres of population—it is all the more imperative that extra care be exercised in the matter of extending credits, either long or short term, to customers. The banks, partly because they require the money to finance the forthcoming crops, have gone a long way toward curtailing credits to manufacturing and retail interests. The wise merchant will exercise the same due caution. He should do so at all times, but particularly so when pressure is brought to bear on his business by the financial institutions of the country.

The Individual Element Again

It is certain that business will be harder to get during the next 12 months than it was during the 12 months in 1919. Merchants will watch their businesses much more closely than they have with regard to the smaller details, with regard to buying, and with regard to the best methods of merchandising their goods to get quick turnovers. Nearly everything in the zone of business today hinges upon the sincerity of the interest that the individual takes in the performance of his duties. All occupations are suffering from the indifference of the bulk of their operatives. Both men and women workers do not seem to see that the losses their neglect and half-hearted work entail, bulk to a terrific total which is projected directly against their own comfort. Many have more regret over the loss of a dollar than they have over the loss of the consciousness of duty. The real fact of the matter is to-day that the country is in far greater danger of self-indulgence panic than it is of a money panic. Safety, prosperity and the ability to enjoy more fully the privileges of the present advancement of civilization, are each wrapped in the desire to serve in the manner that the individual himself would be served. Such a belief practised makes one first worthy of prosperity, then presents him with it and protects him in it. Money, currency and credits, are too much thought of as all-powerful elements to which the individual feels himself unrelated in so far as they show the direction of our commercial travel. A noted writer has said: "Money and the use of tightness of its flow is incorrectly looked upon as the power of trade, whereas it is merely a material to which certain natural properties belong after man has put motion to it. Money in the belt that connects the fly wheel on the motor of brains to the pulley on the generator of brawn." After all, the individual element is the telling factor in business, and the more of it that finds its way into business during the coming months the better for the business.

Credit Man's Advice

In conversation with the credit man of one of the large wholesale houses in Toronto, W. H. Lamont, it was strongly advised that stocks be kept as well assorted as possible; at the same time they should be kept as liquid as possible. In getting in touch with the retail trade in his line, he tendered them the following advice:

"For several years we have been passing through very abnormal times, and it is evident this unsettled condition is still with us, making it necessary to give business, whether large or small, most careful study.

"Prices, as you will observe in looking through this bulletin, are still advancing, and as long as these conditions remain, credit is being stretched to the limit.

"The retail merchant, as well as the jobber, should put forth every effort to turn over his stock as many times as he possibly can, and also to promptly collect his outstanding accounts.

"To get his money in will help every merchant to maintain an easy financial position as well as provide means to keep his stock well assorted, and thus give service to his customers.

"The reports regarding the crops throughout this province are most encouraging. The farmer will, no doubt, obtain high prices for his products, and in consequence be in a position to co-operate with the retail merchant by making prompt settlement of his debts.

"We would suggest at this time of the year that you go over your accounts very carefully, see that your bills are rendered promptly every month, and that customers who do not respond get timely reminders. The result of such continuous effort, we feel, will be encouraging to you."

A Banker Agrees

Hardware and Metal showed Mr. Lamont's advice to one of the leading bankers of the city, with the result that there was a hearty agreement on his part. "There is only a certain amount of money now available," he said, "for credit, and when this is used it can't be used again. By prompt payments, the business of the country can be carried on much quicker than by slow, dragging payments. The outlook for the crops in this country is good, never better, and when these are taken in it is turning it into new money. But during the time until the crops are taken off, the country relies upon the banks to finance them. Merchants should keep this in mind because if the crops are taken off, and not financed properly and quickly, the merchants themselves will suffer in the end."

It is well that such advice be borne in mind with the opening of fall business, both buying and selling. Purchasing for the coming spring will be in progress before many weeks, and, as Hardware and Metal has advised before, care should be taken to meet all the legitimate requirements of the trade, having due regard to uncertainties both as to manufacturing costs and the general attitude of the consuming public.

Editorial Comment

FIRM PRICE TREND

ALTHOUGH there have been declines here and there in the prices of a few hardware lines, the general trend of the markets is towards continued firmness. Labor costs enter into hardware lines to a very great extent, and there is no evidence of a decline in wages. There are also increased freight costs on raw materials, travelling and hotel expenses are still on the upgrade, heat and power costs are still moving skywards. These increased expenses with many others are all factors in keeping hardware prices near present levels. Although supplies of some hardware lines are moving more freely, there is still a great scarcity of many manufactured hardware products, and it will take months to catch up to the demand. Present price movements must be interpreted with considerable care. There are some hardware goods which are greatly in demand at present prices. Other cases in print are those commodities the prices of which appear stable, but in which almost no business is being done. The hardware trade of Canada, dealing as it is in actual necessities, rather than luxuries, will not be subject to the sudden fluctuations which may be experienced in some other lines of business.

YEARLY MEETING PLACE

FALL fairs are now the order of the day. Scores of hardware merchants are officials on the local fair boards, and take a deep interest in developing the community spirit through the local fair. Fair time is one that the farmer sets apart in the whole year to meet with his neighbors and other farmers in distant parts of his district. They all go to see what is newest and best in stock, machinery and other lines. Hundreds of thousands of farmers make a special point not only of going to their district fair but also to the larger fairs which last for several days. These fairs, both the small and the large, offer merchants one of the finest possible opportunities for meeting customers, demonstrating goods and talking about them personally to prospective buyers. The farmer, taking him collectively, is now perhaps the largest purchasing agent in the Dominion and he has plenty of money wherewith to buy. Few merchants have a stock more adapted for attractive and serviceable display than the hardware man with stoves, ranges, paints, electrical labor-saving devices, and many other lines to show. Your presence and your exhibit at the local fair should create a lasting and favorable impression.

A THOROUGH STATEMENT

THE address of Thomas Findley, of the Massey-Harris Co., before the Tariff Commission at Winnipeg, has been published in many Canadian daily newspapers as paid advertising.

It may be that it is necessary to do this in order to get his views before the public. It is a fact, though, that the same papers publish every day a tremendous amount of material that is not half as interesting nor one-quarter as instructive as the facts presented by Mr. Findley.

He reviewed the position of his company; he told of all the tinkering that had been done with the tariff on agricultural machinery; mentioned the loss the farmers were inflicting upon themselves by not housing their implements; showed that the farmer in Saskatchewan was buying his binder cheaper than the farmer south of him in North Dakota or Montana.

It is hard to recall offhand where any man has so thoroughly laid before the public the business of his company.

It is such frankness and such adherence to facts that will carry conviction.

The Clerks' Department

Hardware Clerk Has Unique Opportunity

Few Businesses Offer Such a Golden Opportunity for the Clerk Who Applies Himself—Always a Good Opening for Man From Behind the Hardware Counter

TO my way of thinking, there is no other business in Canada offers such golden opportunities for the young man as does the Hardware business. Without any effort whatever I can call to mind at least a dozen young men, who a few years ago were working in Eastern Canada stores, learning the business, and are now holding big jobs. Some are still with the firm they started in with, others are working for manufacturers, representing them on the road.

The hardware business takes in an enormous number of different lines, manufactured by as many different manufacturers, giving the clerk an opportunity to either specialize with the idea of entering the employ of some manufacturer, or to go into the business thoroughly and become a first-class hardware salesman. There is always a grand opening for good men behind the counter. A first-class floor salesman will never have to complain about his salary. I know of a clerk—salesman, I mean—who always has two or three customers waiting until he is disengaged. They would rather wait until he can serve them than allow another clerk to wait on them. The reason is not hard to discover. This salesman knows all about his stock, he can give the best advice to his customer. He is a man who has never been heard to complain about his salary. The firm he is employed by realizes that he is a man they could not afford to let go, and pay him accordingly. One of the best recommendations a clerk can have is to have customers waiting for him to serve them.

A man came to me the other day and asked this question: "I have a boy who is ready to go into some business, what would you suggest?"

Naturally I said that this was a question the young man himself should decide, but I found that this was a case, like hundreds of others, where the main idea was to get a job, and the young fellow could almost adapt himself to any job.

Starts in Auto Accessory Department

The hardware business seemed to attract this boy, and he was also of a mechanical turn of mind, so I suggested that he get in with some hardware house in the automobile accessory department, which he did.

The reason I suggested the automobile accessory end of the hardware business was because merchants all over are finding that they need men who are thoroughly familiar with cars and their requirements.

The manager of a large firm handling automobile accessories said, "We have a large department here, and are doing a good business, but what we want is a clerk who knows all about cars, we have one man, the manager of the department, who is an expert, but he can't do everything himself, and when he is out there is always some little thing crops up which has to wait until he returns, our clerks do not go deep enough into this end of our business."

He went on to say, "Any boy who will make a study of this business, and put his whole heart into it, will have a vocation that offers him more opportunities than any other business at the present day."

I can give a case of a young man who joined the staff of an Eastern Canada store, in the automobile accessory department, at a very moderate salary. To-day he is drawing a salary far in advance of the average clerk, and earning it too.

Makes Big Steps Forward

The young man I am referring to put his whole heart and soul into his job. He compiled the first catalogue the firm issued, and has since compiled two more. Naturally he is familiar with every article the firm stocks in this line, and can give the fullest information necessary to a customer. His salary advanced every year, and lately the firm has placed an automobile at his disposal for use in connection with this department.

This clerk has made good in less than five years. His career proves the opportunities in the automobile accessory business are plentiful, but the aspirant must be mechanically inclined, and fond of machinery.

Paint Department Also Offers Good Opportunity

To the man who is not interested in motors, the paint department of any hardware store offers many opportunities of making good. I know of several men who have done exceptionally well in this line. A clerk who thoroughly knows the paint business is an asset to employer and customer. Painters have had more work than they could do, and private citizens have been wielding the paint brush freely.

A good paint salesman must be able to tell his customers how much paint is needed to do a certain job, and be able to suggest the best kind to use in different circumstances. He must be able to match colors, and know what colors go together to give the most pleasing effects. As a rule, the average householder who intends doing some painting always expects a lot of advice, and the man who knows the business is the one the customer tries to get hold of. The manufacturer, too, is always on the lookout for good paint salesmen, and many of my acquaintances are now representing some of the largest paint manufacturers in Canada. When we realize that every person who enters a store can find some use for paint, we also can form some idea of the scope there is in the paint business.

The same rule applies to the hardware business, to be successful, a man must have a definite aim, and then go to it.

If he intends to be an inside man, he should settle down and make himself the man every customer is looking for. It is no use waiting for something better to turn up, the man who does that will always be on the waiting list.

Dozens of men who a few years ago were hardware clerks are now holding big positions.

* * *

Hardware business is so broad that it offers chance to specialize or become thorough hardware merchant.

* * *

A first-class floor salesman will never have to complain about his salary.

* * *

Paint department and auto accessories offer good opportunity.

News of Western Canada

Has Faith in B.C. Turpentine Possibilities

Despite Trade and Commerce Reports of Unfavorable Circumstances and Failure of Previous Attempts, E. S. Oliver Has Got as High as 33 Per Cent. Bulk of Turpentine

VANCOUVER, B.C.—Despite reports from the Department of Trade and Commerce to the effect that there are few trees in British Columbia which contain a sufficient amount of pitch to warrant the necessary expense of felling and transporting the timber to a mill for the extraction of turpentine, and that sufficient pitch could not be obtained by tapping the trees to make a commercial success of the undertaking, E. S. Oliver, industrial chemist, makes a very glowing report on the possibilities of this industry, and in support of previous statements, Mr. Oliver says:

Under the old system of scarifying the barks of the trees and collecting the resin after the most volatile elements have become oxydized by contact with the air, it was not possible to procure more than 17½ per cent. bulk of turpentine. In Canada the highest production in any of the eastern plants was 15½ per cent. Under Mr. Oliver's tests, the lowest he has yet received was 33 per cent., or one per cent. higher than in Germany, where the resin by-product industry has been developed to an art.

Without disclosing any of the secrets of the process, it may be said that Mr. Oliver achieves his results by boring a very small hole into the tree trunk and hermetically sealing it to an airtight flask. In this way, instead of injury being done to the timber, the growth of the tree is aided. The resin being in the nature of fecal matter which the tree is seeking to rid itself of, the quality of the timber and the rapidity of its growth is aided, the small drain holes not affecting the efforts of the tree to send up sap and build up new cells.

The theory worked out by Mr. Oliver to explain why larches and pines send out resin is that the pines and conifers are the survivors of a cold epoch which swept over the northern hemisphere. The only way in which the germ of life in the tree cell could endure was by the tree evolving a non-freezable and non-swelling substance to enwrap and protect the cells. Such a substance is turpentine, which forms a large element in tree resin.

Have a Surplus of Resin

"With a return to warmth," says Mr. Oliver, "these trees now find themselves with a surplus of resin for which they no longer have any use. The tree is always seeking to rid itself of the substance by discharging through the roots into the ground, and by forming abscesses in the tree trunk, which grow with the tree as it sways and strains with the wind pressure. When the tree trunk is scarified or the bark injured the resin will come oozing out in its efforts for an outlet."

The Emperor Constantine is the parent of the resin industry, says Mr. Oliver, having had his foresters experiment with conifers by pruning to develop growth after ruminating on the way in which pruning had developed his fruit orchards. From the early resins thus obtained early chemists distilled the famous turpentine and oils which have made possible the art treasures of the Middle Ages.

Pointing out that Quebec and Ontario wood product plants last year, distilling chiefly alcohols, had produced $8,000,000 worth of products, Mr. Oliver pointed to the samples of valuable products which he has obtained as a result of his experiments with the high grade resins from the British Columbia Douglas fir.

"The greatest satisfaction," says Mr. Oliver, who is a natural economist and man of research, "is that the industry will be a constructive one instead of a destructive one as practised in the southern pine forests of the United States. Every tree, no matter how small or how illshapen, so long as it is healthy can be made revenue producing. It will help the lumber industry, and itself become the greatest single industry in the province."

The Gas City Brick Co. to Manufacture Hollowware

Medicine Hat, Alta.—The Gas City Brick Co., Ltd., of Medicine Hat, Alberta, have recently augmented their facilities by the installation of a plant for the manufacture of hollow ware.

Heating Expert Thinks His Device Will Heat Houses at Big Savings

Winnipeg.—Is it possible to heat houses for six cents per day per room or $18 per month for a 10 roomed house?

It is according to James Taylor, engineer of the I.O.O.F. building in this city, who gave a demonstration of heating devices he had invented. Several prominent citizens were in attendance and expressed the opinion that the invention would revolutionize the heating problem of this city. Dr. A. E. St. John, who has investigated J. Taylor's system, thought that the Citizens' Liberty League could perform a great public service by promoting its manufacture on a large scale.

Iron and Steel Manufacturing Prospects Bright in B.C.

Victoria, B.C.—Never in the history of British Columbia has the prospect for development of the manufacturing stage of the iron and steel industry been so bright as at the present time, according to a statement made by Major J. B. Martyn, Provincial Industrial Commissioner, who, with James H. McVity and Nicol Thompson, has returned from a trip of investigation and inquiry in the United States and Eastern Canada for the Government. Major Martyn indicated that negotiations were interlocked with the plans of a British Columbia syndicate and a group of British capitalists.

Adding To Plant

The Western Steel Products Co., Ltd., of Winnipeg, are making an addition to their factory. This will give them considerable more warehouse space and will supply them with new office quarters which they contemplate having on the second floor.

The Andrew Wire Works of Canada, Ltd., to Enlarge Their Plant

Work is being started immediately on a large addition to the plant of the Andrews Wire Works of Canada, Ltd., at Watford, Ont. The building will be of brick with steel sash and concrete floors. The roof will be supported by steel work and the construction modern throughout. The blower system of heating will be used. An increase of 75,000 square feet of floor space will be gained by the erection of this addition.

New Co-operative Store is Opened in Vancouver

A new co-operative store has been opened in Vancouver at 152 Hastings West, under the title, Veteran and Civilian Co-operative Association, of Vancouver, Ltd. Owing to the B. C. Co-operative Association Act, 1911, and amending acts, the society will proceed along the lines of all other B.C. co-operative lines laid down for any society using the word "co-operation" by the act—as to distribution of profits, etc.

Cash bonuses are returned to patrons according to their purchases, states the circular. Mr. Jones owns one share of stock at $20.00 fully paid. This stock at 7 per cent. (current rate of interest) gives $1.40 a year. His trade with the society was, say, $600.00 for the year. After deducting other funds regularly set aside by co-operative societies as above, the surplus savings amount to, say, 10 per cent. of the merchandise sold.

The members of the society having agreed that the surplus saving shall be distributed on the basis of 10 per cent. of their patronage, Mr. Jones receives a cash bonus of 10 per cent. of $600.00, namely, $60.00, and that, in addition to the $1.40 interest on his share of stock.

This extract from the prospectus will be interesting to the grocer closely in touch with cost of doing business, and net profits possible.

British Supplies Offered

A communication has been received by the British Senior Trade Commissioner in Canada from a British firm of telephone, telegraph and signalling engineers, stating that they have available for export a surplus stock of electric heating and cooking appliances, and that they will be pleased to quote against definite inquiries from interested merchants or importers in Canada.

Good deliveries, in particular, can be given of electric heating appliances. Further particulars and prices may be obtained from the British Senior Trade Commissioner, 248 St. James Street, Montreal.

Officials Western Steel Products Ltd.

Winnipeg, Man.—The death of W. J. McMartin, of Western Steel Products, Ltd., formerly Winnipeg Ceiling and Roofing Company, has made necessary a re-arrangement of the responsibilities in connection with the carrying on of the business as follows: H. Ormond, representing the estate of the late Mr. W. J. McMartin, president; H. C. McMartin, vice-president and general manager; W. J. Wilson, sales manager; R. R. Symington, credit manager and secretary. This executive staff have been associated for many years with W. J. McMartin in carrying on the business.

Western Notes

Moose Jaw, Sask.—A small fire occurred in the shipping room of Morrison-Blackwood, wholesale hardware merchants, last week.

* * *

Virden, Man. — W. F. McGuinness, Brandon, sec.-treas. of the Manitoba Hardware and Lumber Co., was a business visitor here for a few days last week, during which he, in company with the president, Mr. W. A. Bridgett, visited the company's branches at Reston, Hamiota and other points.

* * *

Hugo Goldsmith, of P. Goldsmith's Sons, manufacturers of sporting goods, Cincinnati, Ohio, is taking a combined business and pleasure trip through Western Canada.

* * *

Winnipeg.—Mr. Gordon Hoskin, of Wood, Vallance, Ltd., Regina, was in Winnipeg for a few days last week and reports business very good.

* * *

Winnipeg.—The Merchants' Bowling League has again been organized. The season will open October 5th. Wood, Vallance, Limited, have entered a strong team, and expect to be right up near the top at the finish.

* * *

Winnipeg.—M. T. Christie and L. C. Stephens, of G. F. Stephens & Co., Ltd., were in Montreal last week on a business trip.

* * *

Winnipeg.—J. B. Lawrence, manufacturers' agent, is returning to the city from a trip to the coast.

* * *

Edmonton.—The partnership of Wm. Hober and John Hyndman under the name of Western Tire & Rubber Co. has been registered.

Connections Secured For New Exporting Firm

Renfrew.—F. D. Vickers, vice-president of the British Canadian Export Co., has returned home from a very successful two months' business trip to England and Scotland, and as a result he is said to have built up a fine connection for the new Renfrew exporting firm which handles the products of the Renfrew Electric Products, Limited, the Renfrew Refrigerator Co., and the Renfrew Roller Mills.

Formation of Confederation of German Factories Manufacturing Enamelled Ware Goods

The department of overseas trade is informed that according to the "Frankfurter Zeitung," the former association of German enamelled ware factories, which had existed without definite articles of association for a number of years, was dissolved at a recent meeting. In its place a new confederation of German enamelled-ware works had been founded, its members embracing over 60 factories, representing about 80 per cent. of Germany's production. The confederation will control and give information in respect to foreign markets. The first meeting of the new confederation agreed to prices being lowered by 20 per cent., so that export prices must be correspondingly lowered in view of the fact that on account of high prices the foreign markets are no longer obtainable. The increases on goods of particular quality have also been defined. New prices come into force on September 30th, but only in respect to those contracts in which deliveries will be made before the 31st December.

Form Company to Exploit New Steel Process

The Societe des Acieries Basset, which was recently formed in Paris to solve the problem of converting iron ore directly into steel without the use of blast furnaces, is reported to have taken over shares for 5,000,000 frs. in the Societe Francaise des Mines de Fer, and has thus secured control of this iron ore mining company.

Request for Loans for Workmen's Dwellings Made to Quebec

Quebec.—The announcement that the Administrative Commission has forwarded to Quebec the official application for a loan of $1,000,000 out of the fund for the construction of workmen's dwellings will, it is believed, quicken interest in that project.

CANADA'S FOREIGN TRADE FOR APRIL-JULY

Canadian commerce for the first four months of the current fiscal year shows an increase of $166,480,404 over the corresponding period a year ago. For April-July in the present year the total value of goods exported and imported was $825,267,761, while in 1919 the total was $658,787,357.

The trade statement issued by the Department of Commerce shows that Canada is importing goods to a much greater extent than during 1919. The total value of goods imported into Canada from April to July, inclusive, this year was $473,572,589, while last year it was only $284,897,013. The total value of domestic merchandise exported, however, was some $15,000,000 less than during the four months' period in 1919. From April to July, inclusive, this year Canada exported domestic merchandise to the value of $342,112,423, and during the corresponding period last year the Dominion exported this class of goods to the value of $357,883,897.

Re-exports aggregated $9,582,749 this year, contrasted with $16,006,447 in April-July, 1919.

Events in the Trade

Business Changes

Ayr, Ont.—R. A. B. Fleming has sold his hardware business to N. Bennett.

* * *

Kenton, Man.—J. Brown & Son, furniture and hardware dealers in Kenton, Man., have sold their business to J. A. Fraser.

* * *

Luseland, Sask. — R. M. Patterson, pioneer hardware dealer of this town, has sold his hardware business to C. D. Nicholson, formerly of Kerrobert.

New Business

St. Boswell, Sask.—G. W. Williams has commenced a hardware business here.

Incorporations

Montreal.—The Central Electric Co. was recently registered at Montreal.

Toronto.—The Eastern Electric Fixture Co. was recently registered at Toronto.

Montreal.—Dubuc and Giroux, hardware merchants, were recently registered at Montreal.

The Beaver Varnish Company, Ltd., has been incorporated with a capital stock of $200,000 to manufacture paints, varnishes, and kindred products, their chief place of business to be at Thorold, Ont.

Obituary

Dundas.—The death occurred in Dundas of a well known figure in the commercial world in the person of Peter B. Burton, Toronto. Deceased was for over 20 years a traveller for the John Bertram & Sons Company, of Dundas, and later for several years was with the firm of A. R. Williams & Co., of Toronto. Latterly he had been manager of a warehouse of the Canada Machine Corporation in Galt.

Western Ontario News

Dr. C. O. Fairbank, of the hardware firm of VanTuyl and Fairbank, Petrolea, has returned with his family after spending some months in California.

* * *

W. A. MacLaren, of Hensall, has been making an exceptionally fine showing in the district bowling tournaments, sweeping many prizes in the Scotch doubles.

* * *

Plans are being prepared for a $100,000 addition to the plant of the London Concrete Machinery Co., at London, Ont., and work will start this fall.

* * *

Col. T. S. Hobbs, of the Hobbs Hardware Co., London, has been elected to the directorate of the Ruggles Motor Truck Co., which will start work at once on a $2,000,000 plant at London.

* * *

Russell Beattie, of the Russell Beattie Hardware, London, will shortly join the benedicts.

* * *

Laurence Fry, of the Cochrane Hardware, at Sudbury, Ont., is at his home in Chesley for the first time in six years, having enlisted in August, 1914. He was wounded but returned to the firing line, and was at Mons when the armistice was signed and marched into Germany with the army of occupation. He was called home owing to the death of his brother, Earl, who was in business at Wiarton.

* * *

Fred Trebilcock, traveller for the D. H. Howden Hardware, London, Ont., will start back to work again shortly, after having been off the road for some weeks as a result of having to undergo an operation.

* * *

An investigation may be asked for shortly into a fire at London, Ont., which broke out in the work rooms of Everybody's Overall Co., on Sunday afternoon and caused a loss of $20,000 to the company, and the stock of the Odell Hardware and McCormick Harness Co. in the same building.

* * *

Harvey Gleiser, for several years with Liphardt Bros. Hardware, at Waterloo, Ont., has started for himself in the Devitt block in the plumbing and heating business.

* * *

A shipment of steel just received from Pittsburgh has enabled the Stamped Enamelware Co., of Hespeler, to resume work at full time again. Owing to difficulties in obtaining raw materials the plant was somewhat slack for a time.

* * *

At Strathroy Fair this week W. H. Cuddy had an unusually attractive display, featuring especially stoves and heaters, roofing and paints. A demonstration attracted much attention.

Fraser Companies, Ltd., Take Over Dominion Pulp Co.

Chatham, N.B.—The Fraser Companies, Ltd., have recently taken over the plant formerly operated by the Dominion Pulp Company at Chatham, N.B. They will continue to operate this mill as it was formerly run, employing about two hundred and fifty men in the production of unbleached sulphite fibre.

Northern Aluminum Co., Ltd., to Enlarge Toronto Plant

The Toronto works of the Northern Aluminum Company, Ltd., are being enlarged by a new building, which, it is said, will triple the capacity of the rolling mill. This building is to be of the usual factory type of saw-tooth construction, about three hundred feet long with a width varying from one hundred to two hundred feet. The cost will be in the neighborhood of $160,000 and the company hope that they will be able to commence operations in the extension early next spring.

The Lion Tire & Rubber Co., Ltd., Will Build Plant in New Toronto

The Lion Tire and Rubber Company, Ltd., are a recently incorporated firm who propose to erect a plant in New Toronto, on the Toronto-Hamilton Highway. The site owned by the company is one of 5 1-10 acres, and the plant will be a modern and up-to-date factory for the manufacture of fabric and cord rubber tires, as well as a line of inner tubes for all kinds of motor vehicles. All mechanical and technical details of the company are in the hands of the Rubber Engineering Company of Akron, Ohio, but the company will operate under an Ontario charter.

Building Cost $1,500,000

Toronto.—The Dunlop Tire and Rubber Company are moving into their new building. This four-storey structure cost $1.500 000. and has a floor space of about 175,000 square feet.

New Steel Company Going Ahead

Sarnia, Ont.—At a meeting attended by Indians of the local reserve and representatives of Lake Huron Steel Corporation and Wills Lee Company, the steel company officials are reported to have said positively that the Indian land arranged for would be taken over and the money paid inside of 60 days.

Laundryette Manufacturing Co. to Make Machines in Canada

Peterboro, Ont. — The Laundryette Manufacturing Company of Cleveland, Ohio, are opening a branch factory in Peterboro, Ont. The product of this company is a patented domestic laundry machine, which both washes and dries clothes.

Fire Destroys Works of Owl Metal Co.

The premises of the Owl Metal Company were destroyed by fire last week. The loss is estimated at $12,000, including the building, which represented in value half the amount named. Insurance to the extent of $9,200 was carried.

English Visitors to Hamilton Factory

Hamilton. — C. D. Culston, general manager for the Hoover Suction Sweeper Company, of England, was in Hamilton, in company with E. Tarrant and C. Bethel, sub-managers of the same company in London, England. Mr. Culston is here to see if he cannot speed up production in the Hamilton factory, which is supplying both England and Canada at the present time.

Syndicate Wants to Buy Delaney Iron & Forge Co.

Brockville.—At a meeting of directors of the Canada Foundries & Forgings Company, the headquarters of which are in Brockville, held in New York, a wealthy syndicate made a proposition to purchase the Buffalo plant of the company, known as the Delaney Iron and Forge Company, Inc.

No decision was arrived at, but the directors and shareholders will meet here on the 28th inst. to dispose of the offer.

Production of Pig Iron in Canada

Ottawa.—The total production of pig iron in Canada during the first half of 1920, according to statistics by the mines branch of the Department of Mines, Ottawa, was 502,667 short tons (499,891 tons made in blast furnaces and 2,796 made in electric furnaces), as compared with 524,977 tons during the first half of 1919, and 392,804 tons during second half of 1919.

The average monthly production of pig iron during the first half of 1920 was 83,778 tons, compared with an average monthly production of 87,496 tons during first half of 1919, 65,467 tons during second half of 1919 and 76,482 tons for the whole year.

Photo which shows the Ontario salesmen, their wives, and the Fergus office force, was taken on Saturday afternoon before the group dispersed.

Beatty Bros'. Summer Sales Convention

All Ontario salesmen of Beatty Bros., Limited, Fergus, Ont., met together for a three-day sales convention. This company's new business year commences September 1, and during the convention plans were made and quotas set for the forthcoming year. The year of 1919-20 was a most successful one, and there was thought to be every prospect for still greater things next year. An interesting feature was the visit of the wives of the salesmen who were invited to come with their husbands. The head office thus had the pleasure of meeting practically all the "better halves" of their Ontario men. As well as being profitable in a business way the convention was a splendid "get together" meeting and a pleasurable time as well.

Canadian Imports of Sporting Goods from U.S.

Canada during the month of June imported more sporting goods from United States than any other country in the world.

The value of these imports was $94,-464.

Capacity Output of Steel

President of Dominion Steel Corp. Says Outlook for Steel Industry is Good—Coal Production is Disappointing—Royal Commission to Make Valuable Suggestions.

MONTREAL. — "There is a capacity output at the steel plants, but coal production is disappointing," stated President Wolvin, of the Dominion Steel Corporation, on his return to Montreal.

"There are too many holidays, and the increases in miners' pay have resulted in a reduction of the quantity of coal mined."

While at Sydney, Mr. Wolvin inspected the company's plants and conferred with the officers in charge of its steel and coal activities.

"The steel works at Sydney are at present very prosperously employed and working to full capacity," Mr. Wolvin stated. "We have plenty of orders ahead, and, taken altogether, the outlook is good. Production at the coal mines, however, is disappointing, due in large measure to the fact that the miners are taking many summer holidays, while there is a feeling of restlessness abroad while waiting for the report of the Royal Commission now investigating conditions in Nova Scotia."

The commission, Mr. Wolvin said, has not yet completed its report, so far as he was aware, and he had no information as to what its recommendations would be. He stated, however, that he believed it would contain certain suggestions for improvements in conditions at the mines, most of which the company were now actually at work in putting into effect. Anything of this nature he said, would be very acceptable to the coal company.

Mr. Wolvin expressed the view that owing to the conditions existing in the country at the present time, and with the cost of living on the decline, together with the prospect that there would be considerable unemployment during the coming winter, the commission could not with consistency recommend an increase in wages. The investigation of that body, he stated, would undoubtedly show that the increased wages granted during the past three years had generally resulted in a decrease in the output of coal at the mines.

Newsy Notes From Here and There

Toronto. — J. M. Rise of Whitby, and Mr. Henry, of J. Henry & Son, Orono, Ont., were visitors to Kennedy Hardware Co. last week.

* * *

Toronto. — A jury in the County Court awarded the Russell Hardware Co. $325 in their action against Abe Brown, of Woodstock, for $700 for the damage done to their truck in a collision on the Toronto-Hamilton highway last May.

* * *

Toronto. — Sir Frederick Orr Lewis, Bart., of Whitewebbs Park, Enfield, England, and Montreal, by deed poll at Osgoode Hall, altered his name to Frederick Orr Orr-Lewis. Sir Frederick is a well known hardware merchant in Montreal, and the Canadian agent for Vickers Limited.

* * *

Toronto.—The employees of H. S. Howland, Sons & Co., Limited, and their friends held a very successful corn roast on Saturday, Sept. 18th. Over 130 were motored to Erindale by the firm's trucks. Music was supplied by De Peitro, and his well known automatic organ. The only incident to mar the delightful time was due to two of the drivers getting temporarily lost on their return.

* * *

Toronto. — The following were among the visitors to H. S. Howland & Sons, Ltd., last week.

R. Blain of Brampton, Ont., representative of Padgett & Hay, Agincourt, Ont. Representative of Shannon Bros., Tara, Ont.; E. C. Charlton of Luton Brook, Ont.; H. Long of Port Credit, Ont.; representative of Richmond Hill Hardware, Richmond Hill, Ont.; Representative of Mrs. W. H. Dickson & Son, Sprucedale, Ont.; J. U. Perkin, Unionville; Chas. Shaw, Kleinberg; Representative of H. Stevenson & Son, Willowdale, Ont.; and B. R. Brown of Lansing, Ont.

* * *

Porcupine.—W. G. Smith, who has for some years been on the Hollinger mine staff, has taken over the management of the local store of Geo. Taylor, hardware.

* * *

Hamilton.—Thomas F. Kelly, sales manager of The Hoover Suction Sweeper Company of Canada, Limited, has left Hamilton for his annual trip through to the Pacific coast. Mr. Kelly is calling on the dealers in the large communities out West who sell this "Made in Hamilton" product, and will also hold meetings of members of his sales organization, from place to place.

* * *

London. — McCormick's harness shop and Odell's hardware store suffered slight damages by fire last week.

Whitby. — Disney's hardware store was visited by thieves last week.

* * *

Brockville.—The hardware store of W. and J. Sheridan was badly damaged by water and smoke in a fire which occurred here last week.

* * *

Bolton.—Burglars entered Smith and Schaefer's hardware store by a second-storey window, blew open the safe with material secured on the premises, and secured $16 in change.

* * *

Quebec.—Among visitors to Quebec last week was S. Bennett, vice-president of Stanley Works, Ltd.; Philip Stanley, vice-president of Stanley & Lovell Co., accompanied Mr. Bennett.

* * *

Montreal.—W. S. Ivison, representative of the Wallworth Mfg. Co., Ltd., Boston, was in Montreal this week. H. Stewart, general manager of the Gourock Ropework Export Company, Ltd., Montreal, returned last week from an extended trip to the British Isles.

* * *

Hamilton.—Thieves entered Ramsay's hardware store, Market Square, and got away with a number of revolvers and butcher knives, a quantity of ammunition and a number of pocket flashlights and batteries. About $5.20 in cash was also stolen. The total loss is in the neighborhood of $100. The thieves entered by removing a glass from the front door.

Champion Spark Plug Salesmen Hold Convention

The eighth annual sales convention of the Champion Spark Plug Co. was held at Toledo, Ohio, recently.

The attendance totalled over 150 men, who make up the sales force in Canada and the United States. The territory represented was from Edmonton to Key West, Fla., and from Newfoundland to San Francisco. The convention covered two weeks. The first week was given up entirely to business, and the second week almost wholly to festivities. One of the most pleasant incidents of the entire convention was the arrival of Mr. F. B. Caswell, the vice-president and general manager of the Canadian plant, and the general director of sales. Mr. Caswell left Montreal the latter part of May as a delegate to the International Chamber of Commerce convention which was held in Paris, France, and while in Europe he also established sales offices for the Champion Spark Plug Co. in England, France and Belgium. The sales force in Canada has been increased lately by the addition of D. S. Pocock, for the province of Manitoba; D. J. Dowling for Saskatchewan, and W. T. Dodds for Alberta and British Columbia.

Dominion Steel Co. Ship Plates to New Zealand

The Dominion Steel Co.'s new steel plate mill is working regularly, and in addition to supplying the home market the company has begun to make shipments of steel plates abroad, a large consignment being now on the way to New Zealand. When the mill is worked at full capacity it will turn out 250 tons of plates daily.

Hardware Letter Box

* * *

KEYSTONE METAL DOOR MAT

Martin, Finlayson and Mather, Ltd., Vancouver, B.C.

Kindly give us the address of manufacturer of the Keystone Metal Door Mat.

Answer—This mat is made by the Port Hope Mat Co., Port Hope, Ont.

Trade Inquiries

1852. **Wire rods.**—A London firm wish to hear from Canadian manufacturers of wire rods who can offer supplies for export.

1853. **Nails.**—A firm of travelling agents, with branch offices in Jamaica, Demerara, and Barbados, desire to obtain a Canadian connection for nails and other small hardware.

1854. **Steel products.**—Established trading corporation, with head office in Chicago and branches throughout the world, ask to be placed in touch with Canadian manufacturers of iron and steel products, particularly structural iron, steel plates, pipes and pipe fittings of all kinds.

1855. **Wire rods.**—Large ironworks in Scotland would be glad to receive quotations from Canadian producers who are in a position to export. The immediate requirements of this company are filled, owing to the arrival of a recent shipment from Canada, but they are regularly in the market.

1856. **Barbed wire.**—A Buenos Aires firm of general importers are interested in receiving quotations c.i.f. for black, galvanized, oval high-tension and barbed wire.

1870. **Twines.**—A firm in Newfoundland are open to purchase quantities of lines, twines and cordage.

1857. **Iron and steel bars, etc.**—A Buenos Aires firm of general importers are interested in receiving quotations c.i.f. for iron and steel bars, beams, galvanized sheets and black sheets.

1858. **Tinplate.**—A Buenos Aires firm of general importers are interested in receiving quotations c.i.f. for tinplate.

1875. **Roofing felt.**—A commission merchant in Newfoundland is open to receive samples and prices of Canadian-made roofing felt, tarred in 1, 2 and 3 plies.

1920. **Wire nails.**—Scotch nail company will be in the market for wire nails at a later date.

1921. **Cut nails**—A London company already handling Canadian goods reports a large demand for cut nails for building purposes, and would be glad to hear from Canadian manufacturers who can fill orders, so that specifications and other details can be furnished.

1922. **Tack plates.**—Scotch nail company desires to get quotations for early delivery of a load of 5 to 10 tons of tack plates.

1923. **Brass and iron screws.**—A South of England firm ask for names of Canadian manufacturers of brass and iron screws.

1924. **Steel sheets.**—A Cape Town metal goods manufacturer makes inquiry for supply of black steel sheets 290 gauge, in three sizes, 24¾ inches by 99 inches, 25 inches by 102 inches, 26 inches by 104 inches.

1929. **Pickaxes.**—A South African commission agent calling regularly on the hardware, mining and contracting trades is seeking the agency for a Canadian-made pickaxe.

1930. **Hardware.**—A firm of commission agents in Trinidad with good references wish to represent a Canadian house for general hardware lines.

1931. **Hardware.**—A commercial agent in Demerara, British Guiana, in good standing wishes to secure a Canadian hardware house.

1919. **Galvanized wire nails.**—Scotch importer who is willing to take ten tons or more at a time desires to get in touch with Canadian manufacturers in a position to export galvanized wire nails, and with whom he could deal direct. This importer does not desire to deal through a London agent.

1926. **Wire.**—A Buenos Aires firm of manufacturers' representatives specializing in railway material and iron and steel would like to be placed in communication with a manufacturer of black varnished, galvanized and barbed wire.

1927. **Nails and cement.**—A hardware company in the city of Nassau wish to secure supplies of common wire, galvanized wire, nails and cement. Canadian manufacturers are asked to quote prices f.o.b. Canadian port.

Catalogs and Booklets

NEW FALL AND WINTER SPORTING GOODS CATALOGUE

Wood, Vallance, Limited, Winnipeg, new fall and winter sporting goods catalogue is just off the press. Both front and back covers are attractively designed, the colors used being most suitable for the season at hand. Catalog is 12 in. x 10 in., contains 128 pages and is printed on good quality paper. Besides completely illustrating the newest designs in guns and rifles, a great deal of useful information is included, such as: How to quickly assemble or take down repeating shot guns, table of shot gun patterns, necessary information to give when ordering special shot guns, how to aim, care of firearms, special information for shipping stumping powder when used for clearing land. Rugby, football and hockey supplies are well represented. In addition to properly illustrating Wood, Vallance Limited stock of fall and winter sporting goods, this catalogue is a valuable guide to all hardware and other stores carrying sporting goods.

BRUSHES OF EVERY DESCRIPTION

Meakins & Sons, Ltd., of Hamilton, with branches at Toronto, Hamilton, Winnipeg, London, and Vancouver, have issued a new and comprehensive catalog of brushes and other lines that they manufacture. Brushes of every description is the heading on title page, and when it is stated that over 2,000 different brushes are listed, and that the catalog contains descriptions and prices of brushes suitable for, and used by, over two dozen different trades and callings, it will be seen that there is a brush made for nearly every kind of purpose.

The catalog is a handy size, 8¼ in. x 5¼ in., is fully illustrated, and divided into three parts; the first one comprising paint, varnish and kalsomine brushes; the second, decorators, artists, and gilders' brushes, etc., and the third brooms, household and toilet brushes and all the other varieties.

FIREARMS FOR SEASON 1920-1921.

Starke-Seybold, Ltd., Montreal. This firm has just issued an illustrated booklet of the principal lines of rifles, shot guns and pistols they carry in stock. These include all the popular selling models of Winchester, Savage, Remington and Stevens makes of rifles and single and double barrel shot guns made by the Winchester, Stevens and Harrington & Richardson factories.

Prices and description, with weights, etc., accompany the booklet.

SPORTING GOODS CATALOG

The J. H. Ashdown Hardware Co., Ltd., of Winnipeg, Calgary and Saskatoon have issued a new sporting goods catalog, for fall and winter.

The catalog contains a full list of the wide range of rifles, shot-guns, revolvers, etc., carried by the firm as well as lists showing loads, etc., of practically all sizes of metallic cartridges and shells.

The component parts of the different firearms are also shown, making it easier to order repairs.

Every need of the sportsman is catered to with a full line of hunting requisites, and other fall and winter sports are not forgotten as a full line of skates, hockey supplies, sleighs, etc., are listed, in fact there is little in the sporting goods line for this period of the year that has been omitted from the catalog which is more concise, better compiled and neater than previous issues.

Improvement Indicated in Steel Sheets

MONTREAL. — Hardware and Metal is able to report that sheets from Great Britain will be available in increasing quantities from now forward. British manufacturers seem to have overtaken a great deal of the heavy business which has been offered them throughout the past month, and some of them have been making special efforts to take care of Canadian business. As a result of this shipments have recently arrived in Montreal and have been simply sent forward to fill urgent needs of the trade in various parts of the country.

In discussing this matter with a prominent importer he indicated that up until the end of August his firm had been able to make deliveries of over 3,000 tons. In addition to this it is expected that before the closing of navigation almost as much additional tonnage will have been delivered to the Canadian trade.

This applies largely to galvanized sheet, of which there has been so acute a shortage during the past weeks and months. It is expected that from now forward improvement will be made in the delivery of galvanized sheets to the trade, and as conditions improve at points of production prices will likely ease off somewhat although there is no promise of this within a reasonable period.

IMPORTATIONS OF GLASS FROM UNITED STATES

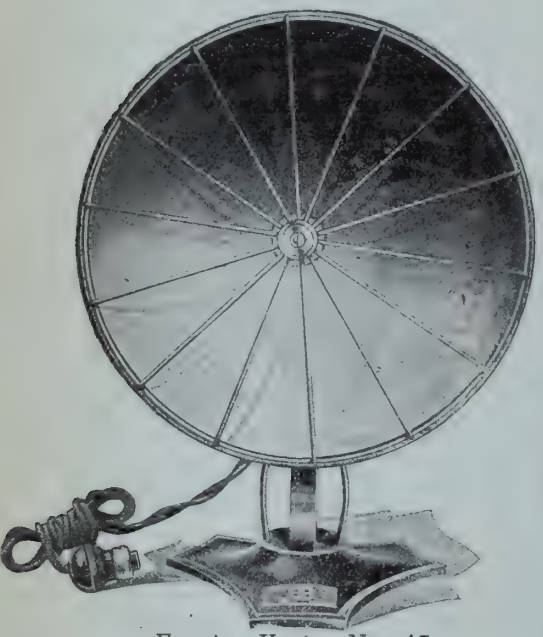
Canada's importations of window glass from the United States in 1915 amounted to over 20,000,000 square feet compared with 59,813 square feet in 1919. Through the dropping of some figures in a table in Sept. 4 issue of Hardware and Metal the significance of the comparison was not apparent.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

NEW ELECTRIC HEATERS AND TOASTERS

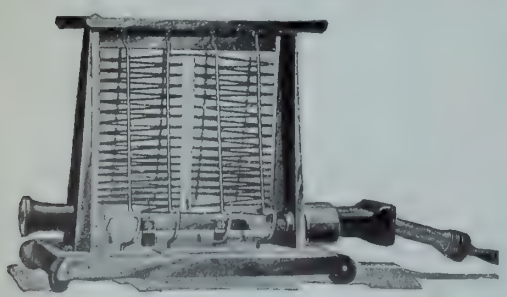
The Equator Mfg. Co., of Hamilton, manufacturers of electrical appliances have recently made several additions to their line—including an upright toaster,



Equator Heater No. A7

reflector type heater, and automobile engine and carborator heater, and the following is their description of the first two lines:

"The Equator Heater, Cat. No. A7, radiates a generous ray of heat wherever desired. The highly polished solid copper reflector makes a very cosy and delightful effect when in operation, and is adjustable to any angle. The heavy cast iron base insures firmness and the copper wire guard can be removed for cleaning the reflector. The element is wound on a porcelain spool and is ex-



Equator Toaster No. A8

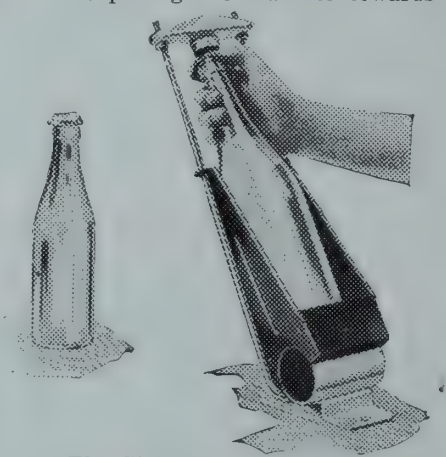
changeable. Supplied with eight feet of cord, attachment plug and extra plug. Reflector 12 in. in diameter, 600 Watts."

"The Equator Upright Toaster, Cat. No. A8, is rich in design and finish. Built of steel, highly polished nickel finish and black fibre feet. Base cannot fill with crumbs and is easily cleaned. Will harmonize with the best tableware. Supplied with six feet of cord, attachment plug and heater plug complete, consumes 500 Watts."

The new products bear the Equator guarantee to be very reliable and efficient.

THE GLOBE CROWN CAPPER

The Globe Machine & Stamping Co., 1200-1250 W. 76th St., Cleveland, are offering to the trade a bottle capper which should appeal to every woman who makes her own catsup, grape juice, wines, home brew and other beverages. The capper consists of a sheet steel frame, with steel tubing connecting base and top. The whole is finished in black japan and is said to be rustproof and can be fastened by screws to a table or small light board. The capper is hinged at the base and the makers state that pulling the machine towards



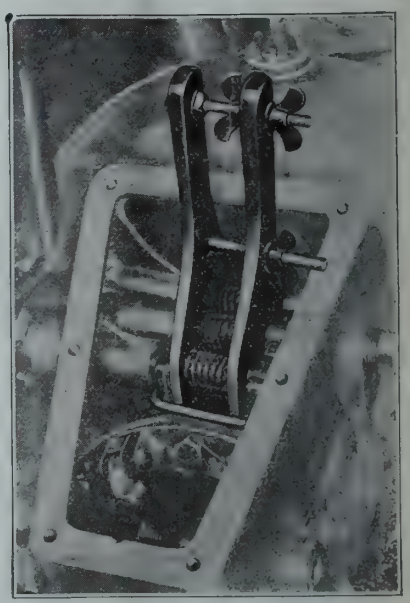
The Globe Crown Capper

you in the same way that a chair is rocked depresses the capper and puts a crimp into the cap as it forces it on to the bottle. It can be used for either pint or quart bottles.

THE HOOF FORD TRANSMISSION TOOL

The Hoof Tool Co., 522 Boston Block, Minneapolis, Minn., are offering a new tool which they claim saves half to two-thirds of the time usually consumed in changing Ford transmission and brake lining.

It is constructed of high-grade steel castings, black japanned, with spring clevis of specially tempered wire guaranteed to hold its shape against the pressure of the bands.



Hoof Transmission Tool

It is claimed that it does away with the old troublesome method of assembling and changing transmission linings and that its use in repair shops and garages saves the time of high-priced men, enables them to accomplish more by giving them a tool that will do away with the disposition of wrecking part of the job.

THE DIAMOND VARNISH CAN

The Diamond Clamp and Flask Co., of Richmond, Ind., have introduced a varnish can, the object of which is to prevent the evaporation of alcohol.

The pot is 5x5x9 in. high and holds 1

The Diamond Varnish Can

gallon and is made of brass and is perfectly airtight. The front part of can forms a separate compartment and by means of a valve any quantity desired can be let into this compartment and thinned with wood alcohol ready for use, it is claimed.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

MARKETS AT A GLANCE

THERE are not so many price changes in hardware commodities as usual this week. Chain has been advanced in price and the increase in price includes steel coil chain and also steel and brass jack chain and cow ties, heel and trace chains, etc. Higher quotations are in effect on dry cell batteries and on ignition units.

Cold shuts and repair links are advanced in price and some makes of tools, hammers, wrenches, etc., are also increased in price.

A slight advance is recorded in black oils.

Rubber garden hose is being booked for next spring at slightly lower prices, and a little further reduction has taken place in linseed oil and turpentine which have been having a downward tendency during the past few weeks.

Many staple goods continue to be very scarce and prices on same remain very firm.

Among commodities that are scarce are wire nails, especially the smaller sizes; bar iron, steel, wire and wire products, fencing, etc., which show very little improvement in deliveries, stocks in many cases being very low.

Galvanized and black sheets and plates are reported to be coming forward in small quantities and but little change is seen in the situation.

Canada plate is still very hard to procure and the supply of stove pipes this fall is quite a problem to dealers.

Bookings for next spring goods are reported to be very good, but present business is said to be a little quieter with merchants and dealers buying more carefully than has been the case during the past year or two.

Stocks generally are inclined to be low and the shortages in many lines would have that effect apart from any desire to purchase in smaller quantities.

Collections are said to be coming forward satisfactorily.

MONTREAL MARKETS

MONTREAL, September 24.—All jobbers state that they have been accorded a remarkably large volume of business during the past several weeks, and activity is reflected, particularly from country points. There is a maintained strong tone on most manufactured products, with some lines advanced. Malleable and cast fittings and wrought iron pipe are still scarce and high. Hickory, for handles, is scarce and very high in price. Scales and weigh beams are firm and are quite active. Electrical and plated goods are firm and quite active. There is a firm undertone on nails and these are likely to advance, some think. A 25 per cent. increase has been made on dry batteries and advances are expected in some quarters on flashlight batteries. Iron and steel bars are scarce and firm. Repair links, of the common type, are higher. There is a general increase for coil and other chain, including heel chains and cow ties. Rope, portland cement, carpenters' and other tools are active and steady. Whitman and Barnes tools have advanced five per cent. Fuel oil is still scarce. Wares are firm and active. Heaters are selling freely and manufacturers are booked up with all the orders they can fill within a reasonable time. There may be advances for these lines soon. Some supplies of galvanized sheets are to hand but these are quickly absorbed. Higher freight rates will soon be felt on many lines, undoubtedly. Garden hose is down about 5 per cent.

Malleable and Cast Goods Still Scarce

Montreal.

FITTINGS.—There has been an unprecedented call from the trade and from manufacturers for cast and malleable fittings, and the condition has brought about a scarcity. This, some expect, will continue for some time. While prices have advanced in the United States it is not expected, in some manufacturing circles here, that any advances will be made on this side of the line.

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2 in.	8%
Do., 2½-in. and larger	5%
Nipples, up to 4-in.	50%
Do., 4½-in. and larger	40%
Do., running thread, 4-in. and under	20%
Couplings, 4-in. and under	20%

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Best Handle Material Scarce; Prices Firm

Montreal.

HANDLES.—There is a continued scarcity of axe, pick and other special handles and it is stated that there will be little likelihood of relief this fall. The scarcity of good materials, such as hickory, still exists.

Various Scales Are Firm and Selling

Montreal.

SCALES.—There is a good movement of scales to the trade and prices are very firm. At the present time it is difficult to procure the necessary labor for making these, and as there is not a big skilled labor market to draw from, scale makers report some difficulty in maintaining the necessary staff. In

view of the high cost of these products the scale mechanics are kept busy on repairing scales which are repairable. No change has been made in the standing charges, since the change of early summer was announced.

Electric Plated Goods Sell Despite Prices

Montreal.

NICKEL PLATED GOODS. — Prices are firm on electric nickel plated goods such as percolators, grills, toasters, irons, etc., Some of these products are exceedingly high in price, and even in such instances makers are behind with orders and may be for weeks and even months. The consumer is willing to pay the price for a good article and all these goods have been freely in demand.

Nail Prices May Soon be Advanced

Montreal.

NAILS.—There is a strong demand for nails still and due to the shortage some anticipate an early advance again for wire nails. These are selling at the unchanged price of $6.40 per case with the new differentials announced last week applying. Cut nails are firm at $6.90 per keg.

25 *Per Cent. Increase Made on Dry Batteries*

Montreal.

BATTERIES.—An advance of approximately 25 per cent. has been made in dry batteries. This is due to higher material and labor costs, and as one jobber stated to Hardware and Metal, "Until Europe and Russia are again in the market there is little likelihood of lower prices in this market."

Flashlights Move in Active Fashion

Montreal.

FLASHLIGHTS. — There is an excellent demand for flashlights from the trade at the present time and some report a much better trade than they have ever experienced. Prices are very firm and are likely to continue so, in fact some are looking for another advance in price.

Firm Prices Continue on Iron and Steel Bars

Montreal.

IRON AND STEEL. — Some jobbers were able to protect themselves many weeks ago on supplies of iron and steel and as a consequence have been able to supply the trade with fair promptness. At the same time there is general difficulty in getting the products due to the short runs of manufacturers who have been confronted with strikes in their plants, and the undertone is very firm. Some revisions of prices have been made in the list as will be seen herewith.

IRON AND STEEL

Iron finish machinery steel	$5 35
Norway iron	15 00
Single reeled machinery steel	6 80
Spring steel	6 00
Sleigh shoe steel	5 30
Tire steel	5 50
Toe calk steel, per 100 lbs.	6 10
Band steel	5 30
Harrow tooth steel	5 15
Mining tool steel, per lb.	0 24½
Black diamond tool steel, per lb.	0 24½
Black diamond cast steel, per lb.	0 24½
Common bar iron, per 100 lbs.	4 85½
Refined iron, per 100 lbs.	5 65
Mild steel	5 30

3-16 and thinner flats in iron or steel take extra 50c per 100 lbs. over base and regular extra.

Iron Pipe Will be Scarce For Long Time

Montreal.

IRON PIPE.—There is considerable difficulty in filling the present demand for iron pipe, and even those who are supplying the trade with second-hand pipe are booked beyond their capacity to fill orders. Prices are naturally very firm and while the present shortage of skelp exists there is not likely to be much improvement in the situation. Prices hold firmly without change.

LIST NO. 46

Supply Insufficient; Pipes, Elbows Scarcer

Montreal.

STOVE PIPE, ELBOWS. — As heretofore reported, there is a continued scarcity of stove pipes and it is doubtful if there will be any great relief this fall. Some are reported as having cut up off sizes of iron in order to meet the situation, and galvanized is, in some cases, being used. Much the same condition applies on stove pipe elbows.

Steel Scarcity Boosts Prices of Curry Combs

Montreal.

CURRY COMBS. — An advance has already been referred to in Hardware and Metal on curry combs, the discount now being 25 per cent. List prices are as follows:—No. 75, per dozen, $5.40 ; No. 101, $2.36; No. 102, $2.76; No. 11, $2.64; No. 121, $2.86; No. 127, $3.80. There is a reported shortage of No. 127, which is the popular seller.

Increased Prices For Repair Links

Montreal.

REPAIR LINKS.—Open lap links have been advanced in price and the following quotations are now available. 7-32 per gross, $2.65; 1-4, $2.80; 5-16, $4.25; 3-8, $6.00.

Strong Price Basis on All Jack Chain

Montreal.

JACK CHAIN. — The present market on jack chain is very strong. Present discounts are as follows:—Steel, list plus 60 per cent; brass, list plus 40 per cent.

Advanced Prices on Various Heel Chains

Montreal.

HEEL CHAINS.—No. 85 heel chains are advanced in price, and are now selling at $4.00 per doz., net. No. 95 are quoted at $4.25 and No. 150, $1.90.

Cow Tie List Subject to List Plus 37 Per Cent.

Montreal.

COW TIES.—An advance has been made in the price of cow ties and the list is now subject to 37 per cent. plus over the list.

Higher Prices Prevail For Various Coil Chain

Montreal.

COIL CHAIN. — An advance has been made in various grades of coil chain and the following prices are now in effect: For "B B" chain, 1-8 is selling at $26.00; 3-16, $21.00; 1-4, $19.00; 5-16, $16.75; 3-8, $13.80; 7-16, $13.60; 1-2, $13.25; 5-8, $12.75; 3-4, $12.50; B.B.B., 1-8, $26.50; 3-16, $23.00; 1-4, $21.50; ; 5-16, $18.50; 3-8, $15.75; 7-16, $15.50; 1-2, $15.00; 5-8, $14.50; 3-4, $14.00.

Hand Cultivators Will be Ready For Spring Trade

Montreal.

CULTIVATORS. — Hardware and Metal understands that while the booking season has hardly started yet, there will be an available supply of various small hand cultivators for spring use in due time. As yet prices are down and out but it is likely that these lines will be fairly firm.

Carpenters' Tools Active and Holding Firm

Montreal.

CARPENTER'S TOOLS. — There is a good demand at present for various carpenters' tools such as hammers, screw drivers, bits and braces, saws and so forth. These are coming to hand a little more rapidly than they were a short time ago and jobbers generally are able to fill orders with more promptness.

Probable Scarcity Hickory Hockey Sticks

Montreal.

HOCKEY STICKS. — Some assert that there will be a shortage of hockey sticks this fall. A few jobbers seem to have anticipated their wants long ago and have already sent forward considerable supply to the trade. A shortage of material for making these constitutes the reason for this shortage.

Portland Cement Moves; Price Steady

Montreal.

CEMENT.—Portland cement is in steady demand and there is ample stock to take care of the same. Prices hold steady without change, and no new adjustments are indicated at present or are anticipated.

Unprecedented Sales of Popular Heaters

Montreal.

HEATERS. — At no time since a year ago has the activity been so great in heating stoves. Certain lines are practically unobtainable, that is, for those sending in orders at the present time. Manufacturers are working to capacity on orders placed early in the season, and one of them stated to Hardware and Metal this week as follows:—"We are absolutely filled up with all the business we can handle on these lines and are unable to accept any more orders. Those who have put off buying these goods will have to face the consequences as we are unable to book any more orders." The movement of these lines to the trade has been very active for the past two or three weeks, and this will continue for some weeks yet. Prices are very firm.

Special Line Tools Advances Five Per Cent.

Montreal.

TOOLS. — Advances have been made in a general way all through the line manufactured by Whitman & Barnes. The approximate increase on various tools of this make is 5 per cent. and applies on wrenches, hammers, and such other tools as are usually sold by the hardware trade made to this firm.

Gasoline and Coal Oil Steady; Big Sales

Montreal.

COAL OIL, GASOLINE. — The demand for coal oil and gasoline continues brisk and market conditions on both lines are very firm. Coal oil is selling at 31 cents per gallon, ordinary grade, and motor grade gasoline at 43½ cents per gallon.

Industrial Improvement Would Move Old Materials

Montreal.

OLD MATERIALS.—While there has been little change from the basis reported last week, large factors state that there would be an undoubted strengthening of the quotabie basis—particularly on iron and steel scrap—if the industrial plants began operating on an active scale. Some of them have resumed operations, and there is quite a demand for heavy scrap iron and melting steel. Overseas demand still exists, also, and this has helped maintain the local market to some extent.

Plumbers Buy Many Finished Products

Montreal.

LEAD PRODUCTS.—A satisfactory demand obtains for various lead products used by the trade. Plumbers are purchasing quite freely of various needs, and the undertone, while somewhat easier, is fairly well maintained. If pig lead should show any marked recession together with the easier tendencies on pig tin, there will doubtless be some re-marking of prices.

Lead pipe, per 100 lbs.	....	17 00

Sheets and Plates Steel Hard to Obtain

Montreal.

SHEETS AND PLATES.—The demand for galvanized iron and black iron is unabated, but supplies are still hard to obtain. The situation on galvanized sheet is purely a nominal one and many are getting a premium for supplies when they are to be had. There will be a gradual improvement from some points where these lines are produced and it is expected that within a few weeks the situation will be more favorable as regards delivery and price.

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots. These quotations are nominal.

New Hose Prices Somewhat Lower

Montreal.

GARDEN HOSE.—Prices have somewhat eased on various garden hose, and this will be welcome news to the trade. For spring requirements the following discounts are being quoted on prices appearing on some brands.

Garden Hose—Dunlop Extra, list plus 15%.

Peerless, list less 15%.

Ideal—wire wound—½ in. x 4 ply, 19¼c ft.; ⅝ in. x 4 ply, 23¼c ft.; ¾ in. x 4 ply, 26c ft.

Hercules—½ in., 21c ft.; ⅝ in., 24c ft.; ¾ in., 28c ft.

Banner—½ in. x 3 ply, 13c ft.; ½ in. x 4 ply, 14½c ft.; ½ in. x 5 ply, 15½c ft.; ½ in. x 6 ply, 18c ft.; ⅝ in. x 3 ply, 15½c ft.; ⅝ in. x 4 ply, 17½c ft.; ⅝ in. x 5 ply, 19c ft.; ⅝ in. x 6 ply, 21c tf.; ¾ in. x 3 ply, 17c ft.; ¾ in. x 4 ply, 19c ft.; ¾ in. x 5 ply, 21c ft.; ¾ in. x 6 ply, 23½c ft.

List prices on ⅝ in. hose will be as follows:— ⅝ in. x 3 ply, 28c ft.; ⅝ in. x 4 ply, 34c ft.; ⅝ in. x 5 ply, 42c ft.; ⅝ in. x 6 ply, 50c ft.

Couplings—½ in., ⅝ in., and ¾ in., per set, attached, 45c.

On shipments made on or before May 31st, 1921, a special discount of 5% will be allowed on fully specified orders placed on or before November 30th, 1920.

Some Lower Prices Apply on Ingot Metals

Montreal.

INGOT METALS.—While there has not been any definite change in the Ingot Metal list during the week a number of lines are somewhat easier.

TIN.—This has been easier in London and while its appearance has been fluctuating somewhat at this writing exchange is weaker and tin is quoted at 53c per lb.

COPPER.—Copper has been somewhat weaker and is still quoted at 23½ and 24c for casting and eletrolytic respectively.

LEAD.—This is weaker and supplies may be had at 8¾c per lb. Arrivals from outside sources have been considerable within the past week or so.

ANTIMONY.—This is quoted at 9½c and remains unchanged.

SPELTER.—There is a somewhat easier undertone on spelter and the movement is very slow. The price of 10½c per lb. is quoted in this market.

ALUMINUM.—This is quoted at 36c per lb. and the demand is limited. There has been a weaker feeling in New York due to arrivals of foreign-produced supplies.

TORONTO MARKETS

TORONTO, September 23.—Fewer price changes are noted this week, and jobbers and dealers will unite in the hope that it is a sign of an approaching halt in rising values.

In goods that have taken an advance this week the chief lines are coil chain and ignition dry cells.

Black and galvanized sheets are at higher quotations, but these goods have for some time been at only nominal prices, and premiums have had to be paid to secure deliveries. They are still a very scarce article and although English sheets are coming in better quantities than they were, the market is very short and orders a long way overdue.

Canada plate is another commodity that is very scarce and it is said to be practically off the market.

Among other goods that have advanced in price are household stepladders and black oil. Lower quotations are in effect for garden hose for booking for next spring. Fuel oil is slightly lower in price this week.

Bookings for various lines of spring goods are reported to be very favorable, but other business appears to be a little quieter on the whole.

The demand continues to be fairly good for fall goods, and ammunition, oil and electric heaters, horse blankets, and logging tools, etc., are having a ready sale.

Winter goods, sleighs, skates, snow shovels, etc., are now being shipped out, and supplies of same are reported to be in better shape than last season.

The shortage of many staple lines such as wire nails, bar iron and steel, fencing, etc., is still acute and hampers business in many ways. Stove pipes are very difficult to obtain in any quantity.

Collections are reported to be favorable.

Iron and Steel Scarce and Firm

Toronto.

IRON AND STEEL. — Little change in the situation is reported in the iron and steel markets. Scarcity in the various grades and different sizes continues, and the outlook for improvement in conditions is not regarded as very bright by jobbers and dealers. Prices continue very firm in all lines.

Latest quotations are as follows:

IRON AND STEEL

Common bar steel, 3-16 in. and lighter	$ 6 25
Common bar steel, ¼ in. and heavier	5 75
Common bar iron, 3-16 in. and lighter	6 25
Common bar iron, ¼ in. and heavier	5 75
Angle base	5 75
Horseshoe iron	6 00
Tire steel	5 95
Band steel	6 25
Spring steel	12 75
Mining drill steel	31 25
Sheet cast steel	....
Mild steel	5 75
Norway iron	16 25
Toe caulk iron	6 70
Sleigh shoe steel	5 75
Hoop steel	6 75

Twenty Per Cent. Advance on Dry Cell Batteries

Toronto.

DRY CELL BATTERIES. — There has been an advance in the price of dry cell batteries for ignition purposes, of 20 per cent., due to the increased costs of raw materials, labor and freight rates. Manufacturers state that the increase in the price of these goods in the past few years has been less than almost any other commodity.

New quotations on the No. 6 dry battery are as follows:

Contract Prices—In barrel lots, 41½c each; box lots, 44½c.

Without Contract—Barrel lots, 42½c; box lots, 45½c.

Small Quantities—Less than 50, 49c; less than 12, 55c. List price 60c.

Above f.o.b. factory, Toronto. In effect Sept. 17th, 1920.

Ignition Units Advanced in Price

Toronto.

IGNITION UNITS. — These multiple batteries have also been advanced and new prices are as follows: For the 4 cell unit, $2.05 net; 5 cell, $2.52 net; 6 cell, $3.05 net. F.O.B. factory.

Slight Reduction in Fuel Oil

Toronto.

FUEL OIL. — There has been a slight reduction in the price of fuel oil, and this is now being quoted at $20.80 per barrel, net, and $18.80 in tank cars.

Black Oil Advanced in Price

Toronto.

BLACK OIL. — There has been a revision in the price of black oil which has been advanced 2½ cents per gallon.

Present quotations are: Black oil (summer), 32½ cents gall.; (winter), 33 cents gall.

Coal Oil and Gasoline Unchanged; Prices Firm

Toronto.

COAL OIL AND GASOLINE. — No change is recorded in the price of coal oil or gasoline this week. Both are firm and the demand is very large.

Step Ladders Cost 5c Per Foot More

Toronto.

STEP LADDERS. — Household step ladders have been advanced aproximately 15 per cent., and are now quoted up to eight feet at 35 cents per foot.

Garden Hose Costing Less For Spring Booking

Toronto.

GARDEN HOSE. — There has been a slight reduction in the price of garden hose for next spring, and it is being booked as follows:

Corrugated ½ in., 21 cents per foot; ⅝ in., 24 cents per foot; ¾ in., 28 cents per foot, less 5 per cent. for full reels of 500 feet.

Coil Chain Advanced About $1.50 Per Cwt.

Toronto.

COIL CHAIN. — There has been an advance of about $1.50 per hundred on coil chain of all sizes and grades.

Black and Galvanized Are Still Very Scarce

Toronto.

BLACK AND GALVANIZED SHEETS.—Very little, if any, improvement is recorded in the supplies of black or galvanized sheets. A few cars of sheets are said to be coming forward, but no regular supplies.

Prices that have hitherto been nominal are slightly higher and below are quotations:

BLACK SHEETS

14 gauge	$11 35
16 gauge	11 50
18-20 gauge	10 80
22-24 gauge	10 85
26 gauge	10 90
28 gauge	11 00
3-16 inch plate	9 75
¼-inch boiler plate	....

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS

	Premier	Apollo
10¾ oz.	$12 50	$13 25
U.S. 28	12 70	12 85
U.S. 26	12 40	12 55
22 and 24	12 25	12 40
18 and 20	11 95	12 10
16	11 95	12 10
12 and 14	11 20	11 95

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

65% Disc'nt Off New List Miscellaneous Wire Nails

Toronto.

MISCELLANEOUS WIRE NAILS LIST. — The new discount on the new

miscellaneous wire nails list published last week is 65 per cent. The discount applies only to miscellaneous list.

Rubber Belting Firm; Without Change

Toronto.

RUBBER BELTING. — No change in quotations on rubber belting has taken place; the last revision having been made in July. Prices hold firm and the demand has been very good and continues strong.

Pipe Fittings Unchanged; Malleables Are Scarce

Toronto.

PIPE FITTINGS.—These with other commodities are suffering from the prevailing scarcity of raw materials and figure on many orders as "shortage." No change has occurred in prices and quotations are as below:

PIPE FITTINGS

Cast iron fittings	Plus 10%
Plugs	7½%
Bushings	10%
Unions, ¼-in. to 2½-in.	30%
Do., ⅛-in. to 3-in. and larger	25%
Dart unions, ¼-in. to 2-in.	Plus 50%
Do., 2½-in. and larger	8%
Nipples, up to 4-in.	60%
Do., 4½-in. and larger	50%
Do., running thread, 4-in. and under	30%
Couplings, 4-in. and under	30%
Couplings, 4½" and larger	Net list

MALLEABLE FITTINGS

Class A	0 70	0 85
Class B	0 30	0 40
Class C	0 20	0 30

Snow Shovels Being Shipped; Stocks Light

Toronto.

SNOW SHOVELS.—These articles are moving out now and prices are firm. Stocks are not heavy and there may be a scarcity in these goods when present stocks are cleaned up, owing to the short age in raw materials.

Wire Nails Scarce; Little Improvement

Toronto.

NAILS.—Wire nails are still meeting a demand that appears larger than the supply, though a little improvement has been observed in deliveries. The base price remains at $6.40 per keg for wire and $7.35 for cut.

Oil Heaters Are in Good Demand

Toronto.

OIL HEATERS.—A good demand is being observed for oil burning heaters at the present time and sales of the different makes are quite large. Prices are firm and unchanged.

Very Good Demand For Ammunition

Toronto.

AMMUNITION.—The movement of the different sizes of metallic cartridges and shot shells this fall is reported to be exceptionallv large and the demand for the newer high-power rifle cartridges is especially great. Discounts are unchanged.

Cross-cut Saws Firm; Demand Good

Toronto.

CROSSCUT SAWS.—The majority of the merchants in the lumbering centres have got their fall supplies of logging tools in by this time, but jobbers report a good demand for various makes of crosscut saws and saw handles and sets. Prices hold very firm.

Mops and Polish Sales Good; Higher Prices

Toronto.

POLISH MOPS AND POLISHES.—Business in these lines has been very good this year, and higher prices on the polishing oil in certain makes is expected at the end of the month.

Scales Selling Well; Prices Unchanged

Toronto.

SCALES.—Manufacturers report a good business in platform, counter and household scales during the present season. Prices have been unchanged since the summer and the charges for stamping have been unaltered since the change last June.

Lead and Zinc Products Show Signs of Easiness

Toronto.

LEAD AND ZINC PRODUCTS.—Little easier tendencies are recorded in lead products this past week but trading has been quieter. Some fluctuations in solder and also in bar and sheet lead are noted but prices on the whole are little changed. Quotations on principal lines are as follows:

Lead pipe, list, per lb.	0 17
Do., over 8 in., list, per lb.	0 19
Lead traps and bends	add 30%
Lead wool. lb.	0 16
Lead sheets. 4 to 6 lbs., sq. ft., in rolls, lb.	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size 1c lb. extra.	
Solder, wire, lb.	0 43
Solder, strictly, lb.	0 35
Solder, commercial, lb.	0 31
Solder, guaranteed, lb.	0 37
Solder, wiping, lb.	0 33
Lead waste pipe, list, per lb.	0 18
Zinc sheets, per lb.	0 19

Steel and Brass Jack Chains Advanced

Toronto.

JACK CHAIN.—There has been an advance in the price of jack chain and the steel jack chain is now quoted at 60 per cent. off list and the brass 40 per cent. off list.

Waste Material Still Dull and Unchanged

Toronto.

WASTE MATERIALS.—Another quiet week is reported in waste materials, most lines moving only slowly. Cast iron scrap is said to be about the most active of the metals. Trading in copper and brass has been rather dull. Prices are unchanged generally and following are principal quotations:

WASTE MATERIAL

No. 2 busheling	$13 00
Stove plate, pe rton	32 00
Yellow brass	0 10
Red brass	0 15¾
No. 1 machinery cast	33 00
Heavy melting steel	15 00
Heavy copper	0 17
Scrap zinc	0 06
Light brass	0 08
Wrought iron, No. 1, per gr. ton	15 00
Heavy lead pipe	0 06
Old rubbers, boots and shoes	0 06
Overseas lumbermen's rubber boots	0 04
Bicycle tires	0 01½
Heavy lead pipe	0 05¾
Tea lead	0 03
Automobile tires	0 02½

No Change in Compression Goods

Toronto.

COMPRESSION WORK AND VALVES.—The demand, though fair, is said to be a little less for these goods with prices holding firm. Quotations on the better known lines are the following:

Compression work, standard	25%
Fuller work, standard	30%
Bath cocks, compression	25%
Bath cocks, Fuller	28-30%
Flatway stop and waste cocks, standard	25%
Roundaway stop and waste cocks, standard	25%
Brass steam cocks, standard	add 10%
Globe, angle and check valves, standard	add 5%
J.M.T.	plus 10%
J.M.T. C	Net
Gate or straightway	Net
Jenkins gate valve	10%
Standard gate	list plus 5%
Jenkins Globe	list plus 20%
Radiator valves, standard	23%
Do., removable disc	38%
Basin Cocks—	
No. 1 and 1, Fuller pattern	30%
Compression	16%
Quick opening	28%

Ingot Metals Quiet, With Little Change

Toronto.

INGOT METALS.—Trading on the whole has been quiet on ingot metals with very little change in prices recorded. Spelter has been showing the most activity among the different metals.

TIN.—There has been slight reactions reported in tin, but the market is said to be rather irregular. It is fairly quiet at present with quotations ranging from 55 to 57 cents per pound.

COPPER.—This metal is reported to be dull with demand lagging. Price for casting copper is about 24 cents locally.

LEAD.—Although lead has been showing easier tendencies quotations are practically unchanged and the market is quiet. Some fluctuations are reported but prices quoted are still in the neighborhood of 9¾ cents.

ANTIMONY.—Prices are said to be steady for this metal but trading is dull. Quotations are unchanged and are from 10 to 14 cents according to grade.

SPELTER.—This metal has been fairly active during the past week, and latest quotations are about 10¾ cents per pound.

ALUMINUM.—The supply of aluminum is said to be more plentiful and stocks that the automobile industry curtailment have made available for other purposes are on the market. Prices are unchanged at 37 to 39 cents.

LONDON MARKETS

LONDON, Ont., September 23—The chief features this week were the advance on ignition dry cells and lower quotations for next spring booking on rubber garden hose. Other goods having new prices are sash weights, whip lashes, rubber belting, babbitt ladles and electric heaters, which all bear higher quotations. Prices continue generally firm, though probably the list of advances is not as heavy as usual this week. London merchants enjoyed good business during Exhibition week. The large crowds visiting the Western Fair stimulated business and the hardware dealers exhibiting stoves, etc., also got many good prospects for future business. Collections continue good.

Linseed Oil in Fair Demand and Unchanged

London, Ont.

LINSEED OIL. — The demand for linseed oil continues fair, and there is no change in prices from last week.

Present quotations are as follows:

	Raw	Boiled
1 to 2 barrels, gal.	1 80	1 83
3 to 5 barrels, gal.	1 79	1 82
6 to 9 barrels, gal.	1 77	1 80

Less barrels add 15c per gal.

Steady Sales and Prices Turpentine Unchanged

London, Ont.

TURPENTINE. — This product is having a steady demand here and prices are unchanged at last quotations, which are as follows: 1 bbl. lots, $2.50 per Imp. gall.; 2-4 bbl. lots, $2.49 per Imp. gall.; 5 gals, $2.65 per Imp. gall.

Higher Price on Wood Jacketed Cans

London, Ont.

WOOD JACKET CANS. — A new higher price is in effect on wood jacket cans, and the 5 gal. size is now selling for $1.35 each.

Supplies of Wire Nails Coming a Little Faster

London, Ont.

WIRE NAILS. — A brisk sale for these continues and supplies are now said to be coming in a little faster. The base price now is $6.25, and for cut $7.50. The new advances were published in these columns last week.

Sash Weights Take New Higher Prices

London, Ont.

SASH WEIGHTS. — A new higher price is being quoted on solid and sectional sash weights, and they are now selling as follows: Solid, $5.40 per 100 lbs.; sectional, ½ lb., $6.60; 1 lb., $6.

Whip Lashes Now Costing More

London, Ont.

WHIP LASHES.—New higher prices are being asked on whip lashes and they are being quoted as below:

4 ft., $2.85 per doz.; 4½ ft., $3.20 per doz.; 5 ft., $3.60 per doz.

Rubber Belting Advanced in Price

London, Ont.

RUBBER BELTING. — The price of rubber belting has recently advanced in price, and is at present selling at 32 per cent. off list, instead of at 35 per cent. as formerly.

Good Demand For Corn Hooks, Forks, Etc.

London, Ont.

CORN HOOKS, FORKS, ETC. — At the present time the various lines of forks, corn hooks, corn hoes, etc., are selling well. These are quoted at list less 50-10 per cent.

Linoleo Floor Wax Higher in Price

London, Ont.

LINOLEO FLOOR WAX.—This commodity is now higher in price and is quoted as follows: No. 6 size, $7 per doz.; No. 7, $3.60 per doz.

Advanced Prices on Melting Ladles

London, Ont.

MELTING LADLES. — New higher prices are in effect on melting ladles, and present quotations on these goods are as follows: 3 in., 60c each; 4 in., 65c each; 5 in., 95c each; 6 in., $1.20 each.

Twenty Per Cent. Advance on Dry Cells

London, Ont.

DRY CELLS. — A new higher price for the No. 6 ignition battery is now in effect. They are approximately 20 per cent. higher, being now quoted at 42½ cents each in barrel lots, F.O.B. factory, or 43½ F.O.B. London. Small lots 50 cents each.

The prices are for present as well as for spring booking.

Garden Hose For Next Spring Slightly Cheaper

London, Ont.

GARDEN HOSE. — Rubber garden hose is being booked for next spring delivery at slightly lower prices than have been prevailing during the present season. Quotations are as follows:

Corrugated Hose—½ in. size, 21c per foot; ⅝ in., 24c; ¾ in., 28c. Less 5% in full reels of 500 feet.

3 Ply, Plain—½ in., 13c; ⅝ in., 15½c; ¾ in., 17c.

4 Ply, Plain—½ in., 14½c; ⅝ in., 17½c; ¾ in., 19c.

Electric Heaters Sell Well; Price Is Higher

London, Ont.

ELECTRIC HEATERS. — The electric heaters of this type are having a ready sale, and the Majestic make is now quoted at a higher price.

No. 7, single coil, list, $11.50 each; No. 8, double coil, list, $17.50 each, less 27½ per cent.

Hand Sleighs Now Being Shipped

London, Ont.

HAND SLEIGHS. — Hand sleighs for the coming season are now being shipped, and the quotation on the Canadian Buffalo Sled Co.'s make is 35 per cent. off list.

Skate Shipments Moving Out Now

London, Ont.

ICE SKATES. — Booked orders for ice skates are now being shipped out. Last season there was a scarcity in many makes of these goods, and many dealers found it very difficult to obtain sufficient stocks to meet the demand.

Cross Cut Saws Present Prices

London, Ont.

CROSS CUT SAWS. — The booked fall orders for these lines are now being shipped out. The present prices on some of the well known makes are:

Simonds No. 22; No. 13; Maple Leaf, Lance Tooth; Premier; Pangborn; Racer.

Sizes—5 ft., $5.80; 5½ ft., $6.60; 6 ft., $7.55 each.

Philadelphia Lance and Improved Champion, 75 cents per foot.

Saw Handles Moving; Latest Prices

London, Ont.

CROSS CUT SAW HANDLES. — These goods are moving out well for fall, and present quotations on them are:

No. 3, $5.65 per dozen; No. 4, $4.25; No. 5, $7.50; No. 6, $4.25; No. 6½, $4.25.

Present Quotations on Lamp Chimneys, Globes

London, Ont.

GLOBES AND CHIMNEYS.—Lantern globes and lamp chimneys are meeting with a good demand at the present time and are selling as below.

Globes—		
1 doz to case, per doz.	....	1 20
3 doz. to case, per doz.	....	1 15
6 doz. to case, per doz.	....	1 10
Chimneys—		
No. O, per case of 6 doz.	....	9 00
No. A, per case of 8 doz.	....	11 00
No. B, per case of 6 doz.	....	9 65

Lighter Demand For Rope; Prices Firm

London, Ont.

ROPE.—The demand and sales for rope are said to be much lighter now that the harvest season is over.

Prices are firm and there is no change of price.

Prices are as below:

Pure Manilla, 35½c base; Beaver Manila, 28c; New Zealand Hemp, 28; Sisal, 22½c.

Seasonable Demand For White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—The demand for white lead in oil although less is seasonably good and prices are firm and unchanged.

The following are quotations:

Pure, $20.45 in ton lots; $20.85 per 100 lbs., in less than tons; Elephant brand, $20.95; in less than tons, $21.30.

Window Glass Selling Well and Unchanged

London, Ont.

GLASS.—Window glass is having a good sale at present time and no change is reported in prices which remain at fifteen per cent. off case lots in both single and double diamond.

Cut lights still sell at forty per cent. off list.

Putty Holds Firm; Quotations Unchanged

London, Ont.

PUTTY.—A good demand is reported for putty in this locality and prices are unchanged. It is being quoted as follows: Standard 100 lb. drums, $8.30 per 100 lbs.; standard 250 lb. drums, $8.55 per 100 lbs.; pure, 100 lb. drums, $10.80; pure, 25 lb. drums, $11.05 per 100 lbs.

Ash Sifters Moving Well; Price Higher

London, Ont.

ASH SIFTERS.—Ash sifters are beginning to move out and prices are higher this season. Stocks of galvanized iron sifters are limited owing to scarcity of materials. Prices on the better known lines are: Ordinary wood side, $3.75 per doz.; Banner, $3.65 each; Rocker, No. 1, $6.25.

Lanterns in Demand; Present Selling Prices

London, Ont.

LANTERNS.—Lanterns are finding a ready sale and present quotations are as follows on the two best selling lines: Plain tin, short or long, $15.00 doz.; copper well, short or long, $19 per doz.

Ammunition Having Good Sales; Present Prices

London, Ont.

AMMUNITION.—The demand for shot shells and cartridges for fall is said to be very good indeed in spite of the luxury tax. and the various calibres and makes are meeting with a steady sale.

The Dominion make is quoted at 37½ per cent. off list, and the American makes at 27½ per cent. advance on the American list.

WINNIPEG MARKETS

WINNIPEG, Sept. 23.—Nails and wire form the features this week in market changes, all kinds of wire having advanced in price. Prices are still climbing and a great many more items are quoted this week at higher prices. The coal situation is somewhat relieved, but the higher freight rates about to be put into effect will offset any reduction that might be incurred by better conditions. Iron and steel are still very scarce, but shipments of same are beginning to arfive. There is a possibility of a relief as regards the famine in sheets and plates, but the prospect still looks gloomy. Barbed wire and galvanized, annealed, bright and coppered spring wire have been advanced 30 cents per hundred pounds this week and stocks are in poor shape. Some sizes are scarcely to be had at all. The prices on boilers and radiators have been withdrawn and higher prices will be forthcoming in a few days. Some revisions have been made in the prices of galvanized sheets, which are higher. Wire nails have advanced 35 cents per hundred pounds and the base price now f.o.b. Winnipeg is $7.35 per keg. Extras on nails have also been revised. Irwin auger bits are marked higher. Stove pipe wire, hay bale ties, tire steel, iron and steel horseshoes have also been revised upwards in price. Other lines, namely, cow ties, scythe snaths, rubber and canvas belts, clothes pins, stocks and dies, car movers, lampblack, and many lines of builders' hardware and automobile accessories have been marked higher. The present condition of trade is satisfactory, there being a great many orders from the country.

Wire Nails; Base Price Advanced; Extras Revised

Winnipeg.

WIRE NAILS. — A new list of extras on wire nails is in effect (printed on pp. 58 and 59 of September 18th issue), and the base price here has been advanced 35 cents per keg, and now is $7.35.

Irwin Auger Bits Higher in Price

Winnipeg.

AUGER BITS. — Irwin auger bits have been advanced in price and are now quoted at 40 per cent. advance on list price.

Irwin car bits are 30 per cent. advance on list. Irwin auger bit sets, No. 111, each $4.35; No. 120, each $7.20; No. 132, $10.60.

Armstrong Stocks and Dies Marked Up 10%

Winnipeg.

STOCKS AND DIES. — An advance has been made in the jobbers' price on Armstrong stocks and dies, and they are now quoted as follows:

Armstrong's Adjustable Stocks and Dies, net list; extra dies, net list; bushings, net list.

Barbed Wire Makes Advance in Price

Winnipeg.

BARBED WIRE. — There is very little barbed wire to be had and the manufacturers are finding it very difficult to procure the raw material for same, even the spools for holding the wire are scarce, and hard to obtain. The following prices were put into effect this week:

Lyman 4-pt. Cattle	$6 10
Glidden, Cattle	5 90
Baker, Cattle	5 80

Coiled Spring Wire Advanced 35c Per Cwt.

Winnipeg.

COILED SPRING WIRE.—New higher prices are quoted this week on coiled spring wire, and are as follows: No. 9, $7.85 per 100 lbs.; No. 12, $8.10 per 100 lbs.

All Prices on Wire Advance This Week

Winnipeg.

WIRE. — All kinds of wire have been marked up in price this week, and nearly all sizes are scarce and at present are out of stock.

The following are the prevailing prices:

Galvanized Wire—No. 8, $8.05 per 100 lbs.; No. 9, $7.80; No. 10, $8.05; No. 11, $8.15; No. 12, $8.05; No. 13, $7.45; No. 14, $8.55; No. 15, $9.30; No. 16, $9.55.

Annealed Wire—Nos. 0 to 9, $7.50 per 100 lbs.; No. 10, $7.56; No. 11, $7.62; No. 12, $7.70; No. 13, $7.80; No. 14, $7.90; No. 15, $8.05; No. 16, $8.20.

Bright Wire—Nos. 0 to 9, $7.75 per 100 lbs.; No. 10, $7.81; No. 11, $7.87; No. 12, $7.95; No. 13, $8.05; No. 14, $8.15; No. 15, $8.30; No. 16, $8.45.

Coppered Spring Wire—Nos. 8 and 9, $11.16 per 100 lbs.; No. 10, $11.23; No. 11, $11.30; No. 12, $11.40; No. 13, $11.51; No. 14, $11.63.

Stove Pipe Wire, Annealed—No. 18, $10.30; No. 19, $10.80.

Hay Bale Ties, $8.65.

Carpenters' Adzes Have Advanced 10%

Winnipeg.

CARPENTERS' ADZES.—New higher prices are effective for carpenters' adzes. No. 10 is quoted at $36 per doz.

New Higher Prices on Cow Chains

Winnipeg.

COW CHAINS. — New higher prices are quoted this week on cow chains and are as follows:

Electric Weld—4-0, $5.72; 3-0, $4.55; 2-0, $4.16; 1-0, $3.77.

Brown's—4-0, $5.72; 3-0, $4.55; 2-0, $4.16; 1-0, $3.77.

Three Chain.—4-0, $5.72; 3-0, $4.55; 2-0, $4.16; 1-0, $3.77.

Stall Fixture Pattern—4-0, $4.16; 3-0, $3.64; 2-0, $3.12; 1-0, $2.86.

Fence Staples Advance 15c Per 100 Lbs.

Winnipeg.

FENCE STAPLES. — Another advance has been made on the price of fence staples, and same are now quoted at $7.60 per keg for bright.

Higher Prices on Iron and Steel Horse Shoes

Winnipeg.

HORSE SHOES. — New higher prices are quoted on iron and steel horse shoes and are as follows:

Iron Horseshoes—Nos. 0 and 1, $9.95 per keg; No. 2 and larger, $9.70.

Snow Shoes—Nos. 0 and 1, $10.20 per keg; No. 2 and larger, $10.05.

Steel Horseshoes, snow, toe weight, $11.95.

PITTSBURGH MARKETS

PITTSBURGH, Sept. 16.—The iron and steel market continues stagnant in practically all branches. It is a case of the trade going ahead on its momentum, as producers are well filled with business and production is fully absorbed by deliveries against orders already in hand. Consumers desire to be obligated only to take such material as is required for business they have in hand, and as deliveries are better there is less demand for prompt lots to piece out with contracts.

Heavier Steel Production

The monthly report of the American Iron and Steel Association shows 3,000,432 gross tons of steel ingots produced by the 30 companies that make monthly reports, against 2,802,818 tons reported for July. Computing on the basis of the number of working days in the month and year, and allowing for the unreported production, ingots were produced during August at the rate of about 42,700,000 tons per annum, showing a 7.0 per cent. gain over the rate in July. This is a large gain from one month to the next, and is particularly striking in view of the fact that August, being a midsummer month, would be subject to the same adverse weather conditions as July. Barring last February and March, the August production rate is the highest since December, 1918.

Shipments Heavier

In August there was a double gain in shipments, since the production was larger and the mills shipped more than their production, instead of shipping less as they had done in July and in the three months preceding. During those four months they had to stock some of their output, on account of car shortage. About the end of July the turn came, shipments and production being approximately equal. Since then shipping conditions have constantly improved. As to the total volume of freight movement, the last week reported upon, that for the week ended August 14, shows the largest number (962,352) loaded for that week in any year, the number just passing that in the record year, 1918. An authority estimates that by this time the total freight movement is not only ahead of that in the same period in any year, but is ahead of the best record made in any week in any year. As to steel shipments, they were naturally very heavy when production was at the rate indicated and shipments were in excess of production.

Of the finished steel products accumulated during the car shortage easily the major part has now been moved. There remains considerable tonnage of semi-finished steel, the steel having been put in that form as a convenience, with the idea that it could gradually be fed to finishing mills as supplementary to the current production of steel. The finishing departments can, of course, stand only a slight overload, and thus with the best shipping and market conditions it would be quite a while before all the semi-finished steel could be worked off.

Momentum of the Trade

It has been made clear to everyone that the pig iron and steel markets have gotten into a condition of dullness from which they will only be resuscitated by a marked improvement in general business conditions. There is nothing in the markets themselves that would lead to there being a fresh buying movement. The influence must come from without, as buyers are now to be supplied with heavier deliveries than they were getting, on an average, in the past five months, so that the requirements of buyers must increase before they take much interest in making fresh commitments.

In the circumstances, the only question is how long the industry will be able to keep busy on its present commitments, or in other words how long the momentum will carry the trade. At a juncture like this there is always a difference of opinion. Some observers point to "full order books" and compute how long the orders will last the producers. Others assert that order books count for nothing, that orders can be canceled and buyers order shipments suspended or curtailed. Experience gathered over many years, from various situations like the present, indicate that neither party is exactly right, but that the former come nearer being right. There are always cancellations at a time like this, and there have been this time, but the cancellations amount altogether to but a very few per cent. of the total amount of business on books. Quite possibly a great deal of business would be canceled if the market broke, but the producers always look out for this. When the time comes that they see little new business to be secured either at existing prices or even at deep cuts, while a great deal of business is to be squeezed out of existing contracts, they simply "stand pat" on their prices. To cut prices, to engage in competition, would be simply for the mills to swap orders with each other at lower prices all around.

Accordingly there is the experience of mills in general adhering stiffly to their previous quotations, with the exception in some cases of such small mills as have been securing the outside prices on account of being able to make very early deliveries. When such mills reduce prices they are still above the general average of the independents. The Steel Corporation is in a class by itself, its prices being so much lower than the lowest of the independents.

Steel Corporation Tonnage

For the first time since May, 1919, the United States Steel Corporation has shown a decrease in its unfilled obligations, the last report showing 10,805,038 tons of unfilled business at the close of August, this indicating a decrease of 313,430 tons in August, comparing with an increase of 139,651 tons in July. Thus there was a change of about 450,000 tons from one month to the next. About half of this was due to an increase in shipments and about half to a decrease in bookings, or rather in the net bookings, as there may have been some cancellations in August, offsetting a small part of the bookings. Shipments in July may be estimated at 75 per cent. of capacity, and August shipments at 90 per cent. As the August decrease in unfilled obligations was about 23 per cent. of capacity the net bookings in August were about 67 per cent. of capacity. The unfilled obligations left are equal to about nine months of production at say 90 per cent. Should the corporation book month by month only one-half as much as it shipped, this being a very low estimate, the orders, if properly distributed to the different departments, would theoretically carry the corporation for 18 months instead of nine months.

Review of Tinplate and Steel Situation

President of Montreal Firm Reviews the Outlook—Lack of Freight Cars and Shortage of Coal Have Interfered, Allotments in November

IN discussing the sheet and tin plate situation with M. Beverley Robinson, President of B. & S. H. Thompson Co., Ltd., Montreal, on his return from Europe, and the United States where he has been studying business conditions, Hardware and Metal, was given some facts concerning the outlook for steel, particularly as they effect the deliveries from their principals, the United States Steel Products Co. It is from them that Mr. Robinson's company distributes large tonnages of sheets and tin plates to the Canadian trade. Mr. Robinson said:

'On my return from Europe I went to New York to interview the officials of the United States Steel Products Co., about the Steel situation. They told me that the deplorable condition is almost wholly attributable to the prostration of the railways in the United States. This together with the effect of various strikes has put our mills back from four to five months in their deliveries. The lack of coal and railway cars has resulted in the operation of the mills being cut down from 50 to 70 per cent. Conditions are gradually improving, and our people think that in thirty days they will be able to make deliveries in considerably increased quantities.

With regard to tin plate the American Government insist on preference being given to the manufacture of them for food containers, and they are working on this class of material now. By the 1st of November, this class of trade will be pretty well taken care of and they can proceed with general business in this line.

We will of course have no further tonnage to dispose of for Canada for this year, and it will probably be November before we have any definite news about next years allotments, as it will take some time yet for the mills to work off their present commitments.

Our principals expressed their very great regret for the serious delays in deliveries to our customers, but assured me that their whole organization is doing its utmost to expedite shipments."

Pig Iron Production Increases

Iron and Steel Market as Free of Selling Pressure as of Buying Pressure—Movement of Steel is Increasing—Less Talk of Price Advances.

"MARKET conditions in iron and steel are approaching the drifting stage with their eventual course more subject apparently to the turn of general trade developments. Sentiment continues to be influenced by what is transpiring in other lines of industry, and in this respect, probabilities are being regarded more intently than such changes as actually have taken place. Buyers remain more content to take tonnage, in many cases long overdue, than to make new commitments, and producers with heavy bookings at good prices welcome the opportunity to convert their orders. Accordingly the market is as free of selling as it is of buying pressure. The increasing movement of iron and steel from producers' plants to consumers is being maintained and production is on the rise," says The Iron Trade Review.

The recovery of operations in the industry is set forth by the pig iron statistics for August. The output for that month increased by 102,314 tons over July, or from 3,043,918 tons to 3,146,232. This is the largest monthly production since March. The gain was about equally divided between merchant and steelworks' furnaces.

Less talk of price advances is to be heard in the market. The likelihood of the Steel Corporation making a general upward revision of its schedule seems more remote. The American Steel and Wire Co., however, has made further readjustments of its list to conform to freight advances. Nails have not been changed. Independent interests also are reported as being farther from marking up their quotations in such lines as shapes, plates, merchant bars, cold-rolled stock and strip steel. One price action which stands out in the week is the increase in the differential on small cast iron pipe to be followed by a flat advance of $4 per ton on all sizes, effective Sept. 11.

Presentation to W. H. Wiggs

Quebec.—A surprise birthday party was held at the home of Guy H. Simpson when the directors and members of the Mechanics' Supply Company met to extend birthday greetings and present a gold watch to W. H. Wiggs, founder and president of the company. Mr. Wiggs was taken by surprise when welcomed by his entire staff. An interesting and attractive musical programme had been prepared by various members. Walter Wilkinson filled the role of chairman. In making the presentation, Mr. Simpson, vice-president and manager of the company, briefly alluded to the work which Mr. Wiggs had done in the building of a business which thirty years ago was in its infancy. Mr. Simpson claimed that the training which the members of the company had received while in the service of the Mechanics' Supply Company had been good for them and would stand as an asset in their lives.

In thanking the audience for the handsome gift, Mr. Wiggs very feelingly spoke of the sympathetic co-operation he had received from the members of his staff.

Mr. Morisette, on behalf of the French-Canadian members of the staff, extended greetings to Mr. Wiggs in French. He told of the very fine feeling which existed between the French and English speaking members of the Mechanics' Supply Company and wished Mr. Wiggs and family much happiness. In response Mr. Wiggs also spoke in French. He spoke of the strong regard he had always entertained for the French nation and French-Canadian citizen, and that a great deal of the success of the Mechanics' Supply Company had been attained because of the support of the French-Canadians.

Mrs. Wiggs was presented with a bouquet of roses by the young ladies of the company.

British Chamber of Commerce in Paris Has Canadian Section

Amongst British Chambers of Commerce established abroad, that of Paris is conspicuous for its enterprise in serving the requirements of British trade and industry, and, furthermore, possesses an active Canadian Section.

The committee of this section is composed of persons themselves interested in trade with Canada, and consequently is in a position to supply all the requirements of Canadian members. The membership of the Chamber is restricted to firms of British nationality. It receives no subsidy from the Canadian or British Governments, and carries on its most necessary work entirely through the subscription of its members. To enable the Chamber to take up a firm position and thus sufficiently combat foreign competition, it very naturally deserves to continue to add to its membership.

Among other things it puts its members into touch with suitable agents in France, obtains information on the commercial standing of French firms, supplies exact Customs classification of goods, notifies changes in French Customs duties and proposed commercial legislation, communicates enquiries from French buyers of British goods and, furthermore, publishes a very useful bulletin of information.

Applications for membership should be made to the secretary of the Canadian Section, British Chamber of Commerce, Incorporated, 6, rue Halevy, Paris.

States Paint Prices Fully Justified

President Canadian Paint, Oil and Varnish Association Draws Attention to Relative Cost of Most Raw Materials, Labor and Transportation.

IN discussing the paint situation with Mr. George Henderson, President of the Canadian Paint, Oil and Varnish Association, and President Brandram-Henderson Limited, Hardware and Metal was informed that the action taken at the meeting of September 15th is reported in last week's issue in deciding to maintain present prices comes as a result of continued high cost for most raw materials. In addition to this there have been advances for labor, and other factors have entered which are of most recent dating, such as increased transportation rates.

"Nearly all raw materials," said Mr. Henderson, "are costing more than they did when the present price basis was established. There has been very little favorable change on any of them, and the lower prices for linseed oil and turpentine are more than absorbed in these other advances.

Two Important Factors

"There is one item of importance which is a big consideration in itself, that of labor. Despite the fact that wages have been advancing throughout the year, production has not increased, and this is something that must be borne in mind."

This is a point on which many manufacturers seem to be agreed. Wages have been high; are high. Notwithstanding the fact that average wages paid at the beginning of the year were higher than for any previous period, advances have in some cases been made since then. But labor does not seem to have been able in many cases, and unwilling in others, to speed up production on a scale that would compare favorably with pre-war efforts. Many place the present efficiency of an average manufacturing plant, from a production standpoint, at not more than 75 per cent. of the possible.

"The new freight rate increases, too, are an important consideration," continued Mr. Henderson. "While the freight rates to Winnipeg, Calgary and Vancouver will run from ten to fifteen cents higher, according to location, this is not being added to selling prices, but will for the present be absorbed by the manufacturers.

"The present selling prices on some lines in particular are very close to cost. Barn paints and shingle stains, for instance, really should have been advanced, but there will be no immediate advance on these two lines notwithstanding."

Numerous Advances

An important factor that may not have been generally taken into consideration is that of the higher cost of travelling expense. In all business being transacted this is increasingly important.

Then again the higher prices paid for containers, wooden packages, labels, and paper in its many forms, used for wrapping, color cards, printing etc., all naturally affect production costs.

Mr. Henderson pointed out that many dealers were already ordering liberally for spring, and that the paint manufacturers are of the opinion that paint and varnish prices will remain as at present quoted and firm until June 1st, 1921, unless raw materials or other considerations entering into the cost of manufacture should occasion the necessity for advances.

It is felt, therefore, that dealers will see the desirability of booking orders for shipment at any time desired between now and spring.

Standard Paint Co. of Canada, Ltd., Make Addition to Their Portneuf Plant

An addition of approximately 30 feet is being made to the machine room building of the Ruberoid Felt Manufacturing Company's plant at Portneuf, Quebec. In this the Standard Paint Company of Canada, Ltd., who control this company, are installing twelve additional dryers with the necessary pumps and other equipment to increase the drying capacity. When the company complete the extension, the output will be about 20 tons a day, or double the present output. The estimated cost of the entire development is $42,650.

Montreal Manager Passes

Montreal.—William Baxter Taylor, Eastern manager of Copeland-Chatterson, Ltd., of Toronto, passed away a few days ago at his home in Montreal, where he has lived for the past six years. The late Mr. Taylor was 45 years of age and took a keen interest in a number of clubs, and was also an enthusiastic curler.

Wages a Dominating Factor

Outlook for Paint Prices, Labor and Selling Costs Steadily Advancing—Gross Profits Said to Be Low.

WHEN asked by Hardware and Metal regarding the possibility of any change in paint prices, W. S. Fallis, managing director of the Sherwin Williams Company of Canada, gave some interesting information regarding the present situation.

"From the period of September 1, 1919, to the 31st of August, 1920," stated Mr. Fallis, "the factory cost of producing goods advanced at least 30 per cent., owing to the increased cost of all raw materials and increased cost of labor; the selling expenses for the same period show an increase of almost 30 per cent. owing to higher wages and higher operating expenses in every department, including that of travelling expense.

"Wages are still increasing; between the period of September 1 and January 1 another advance will take place, of at least 20 per cent.

"There are also higher freight rates, higher telephone rates, higher operating expenses in every particular.

"Most of the raw materials are remaining about stationary; a few are advancing, but labor cost is constantly on the increase. There are only two exceptions in the price of raw materials that have not remained firm, those of linseed oil and turpentine. Taking the average cost of linseed oil from the first of September, 1919, to the end of August, 1920, it is very little higher than the price of oil to-day, and there is every reason to believe that the average price of oil this year will be somewhat higher than that of last year.

A careful review of prices in the United States shows that they have remained firm on the main lines, while sundry lines have been constantly advancing, and are to-day.

"The sales of the present year were a record, and the increase to a large extent offset the increased cost of operations, but not entirely. Gross profits, on a percentage of turnover, were never so low. Transportation difficulties have been a serious problem the last few years; in normal times requirements were provided thirty days ahead, whereas now they are provided for a period of ninety days to six months.

"All manufacturers are operating, and will be for an average of four months to come, on the highest priced materials in their history. Even if there were a decline in the price of raw materials it would be six months before the more favorable prices would reduce the cost of production. Wages are the dominating factor in increasing costs, and will be, as far as any one can see, in the future.

"It is only by an aggressive policy of production by the factory and of sales development by the selling organization and by the effort of the dealers throughout Canada that the present volume of business can be maintained at prevailing prices."

"Save the surface and you save all" *Paint & Varnish*

Why Moore's Paint Sells

Moore's Paints have been accepted from coast to coast as the last word in Paint service and satisfaction.

Moore's Paints and Varnishes do a better job, with more reliable service and smooth finish for the consumer, while they increase business for the dealer. You take no risks by linking up with a Moore Agency.

Moore's Paint is so 100% efficient under all conditions that it sells on its merits.

Here are a few of Moore's Paints and Varnishes that sell on merit:—

"Impervo" Porch and Deck. "Tile-Like," Mooramel, "Muresco," "Impervo" Varnishes, Morelustre Enamel. Barn Paint, Moore's Floor Paint, Sani-Flat, High Gloss Enamel, Carriage Enamel, Wagon and Implement Paint, Shingle Stain.

Farmers Are Now Prospects for Paint

Harvest Season is Here and Crop Money Moving Into Circulation Should Help Business Generally—The Best Time to Show the Farmer the Economy of Preserving Buildings and Implements—Personal Calls on Prospective Farmer Customers Bring Good Business.

A SOURCE of business which dealers can develop to liven up sales in the paint department during early fall is farm trade. Farmers have been busy all summer and their money has been tied up awaiting the harvest. Now the crop is beginning to move into the mills and farmers are receiving their remuneration. This will affect paint business in two ways at least.

Much of the value of paint advertising and other sales effort is cumulative and while the farmer has been too busy all summer to do painting yet it is certain that with very few exceptions he has had the matter put up squarely to him on more than one occasion by the local hardware merchant or through the medium of advertising reaching him through the newspapers and magazines which come to his home.

Now that the harvest season is here and Canadian farmers are selling their crops, this is the time for the hardware dealer to cash in on sales of paint to the farmer. Crops have been good in most sections of the country and with a good return for the summer's work in his pocket. Mr. Farmer will be in a receptive frame of mind to listen to sound reasoning. The farmer knows that the stability of his farm buildings and implements is the most important matter in preserving his ability to earn a living and he will not be inclined to neglect them if he is shown that failure to apply a needed coat or two of paint will result in an eventual loss many times the cost of the paint now needed.

Visit Farmers in the District

The suggestion has been made before, but is timely and is therefore repeated, that the hardware dealer can well afford to make a visit to the surrounding farming district and where he sees the need of paint to talk the matter over with the farmer. There are a few weeks of good painting weather yet and much valuable property can be preserved over the coming winter through the exercise of a little foresight. The value of personally pointing out the need for paint on the farm buildings was emphasized at a recent convention of paint salesmen.

In many cases farm buildings which were neglected during the war have not yet seen the promised coat of paint. Farmers are still making excuses. There is no question it is in the best interests of the farmer to make provision for the future and with increased live stock production, the watchword of the present day agriculture, there is every reason that provision should be made for the comfortable housing of the stock.

This entails the preservation of farm buildings in first-rate condition, an accomplishment that is impossible without regular and thorough painting of the same if they are of material that needs paint to guard it from the action of the elements, as is the case with the great majority

(Continued on page 68)

The big season for interior paints and other finishes is now at hand and such displays as this can be used to advantage. To overcome the idea that spring and summer are the only seasons for the use of such lines this display links up interior finishes with a display of stoves, thus indicating they are for use during the cold weather.

A. Ramsay & Son Convention a Record One

Company Representatives Gather From Coast to Coast to Consider Sales Program for 1921—Business-Building Talks by Executives and Salesmen

THE 1920 convention of A. Ramsay and Son Company, Montreal, will take its place in history as the most successful yet held. Sessions opened in the Old Colony Club of the Windsor Hotel on Monday morning, September 13th, and continued daily until the afternoon of Thursday the 16th instant.

Using the firm name, the slogan of the convention was built upon it—R-epeated calls A-fter business M-eans S-ales — A-re Y-ou a repeater? This naturally interested the men by way of a little heart-searching as to what their several results were, and when the strong talks on salesmanship by various members of the firm and a number of the territorial managers were added to this, all were stimulated to new endeavor that 1921 may be still better. On all sides optimism was expressed by the men from various territories, and this exchange of ideas as to ways and means of creating new business proved to be excellent.

The annual banquet was a success, too, and after the "Royal Feast," the evening spent at the Montreal Club, where the function was held, was interspersed with instrumental and vocal music. The feature of the evening was the presentation to each guest of a copy of "The Agate Family of Agateville," by Mr. McAdie, the Advertising and Sales Manager of the firm.

Montreal Paint Company Holds Convention

A. Ramsay and Son Company Men Spent Most of Week in Considering Sales and Advertising Program—Biggest Gathering Yet

WITH the largest attendance yet recorded, sales representatives of the firm of A. Ramsay and Son, Company, Montreal, met in convention last week. The sessions opened on Monday morning, in the Old Colony Club of the Windsor Hotel, and daily, until Thursday night, sessions were held morning and afternoon.

Delegates had arrived in time for the opening session from all territories covered by the firm, representatives coming from Halifax and Vancouver, and many intermediate points in every province of the Dominion. This opening session was addressed by Mr. Walter B. Ramsay, president, and Arthur D. Brown, general manager of the company. Subsequent sessions were addressed, from time to time, by sales representatives from various outside territories covered by them, as well as by E. J. Sutcliffe, on advertising, and by E. Jones, on credit department co-operation.

Ten minute talks by H. C. Douglas and Gordon R. Colville, both representing British Columbia; W. E. Greer, Northern Alberta; F. L. Baker, Southern Alberta; H. S. Duncan, Central Canada Division; R. B. H. Cotton, Ontario; J. A. Donnelly, Quebec; L. Beaudry, Quebec; William McCormack, New Brunswick, and J. R. Simmonds, Nova Scotia, brought the opening sessions to a close, when adjournment was made for lunch at the Old Colony Club. Immediately before the opening of the afternoon session a group photograph was taken, followed by an inspection of the plant, this being supervised by H. B. Booth, while the varnish factory was afterward inspected under direction of Tom Ramsay. Inspection of the proposed advertising material and campaign was then made under the supervision of H. J. McAdie. Later, talks followed on interesting topics by W. Jauch; H. B. Booth, and others.

The slogan this year was as follows: "Repeated calls After business Means Sales. Are You a repeater?" The capital letters used, it will be noticed, spell the name RAMSAY, and this slogan appeared on the convention programme, printed in the company's own printing plant on the premises.

Conventions are strenuous affairs, in that attending salesmen are required to assimilate much information in a few days that will affect, more or less directly, their plans in selling during many months of the year to follow. Therefore, in this instance, it was particularly gratifying to the salesmen to learn that a banquet was arranged for Thursday night, this being the closing day of the convention. The Montreal Club had been secured and suitably arranged and decorated for the function, and although the night was "wild and wet" without, it was delightfully pleasing and successful, as a dinner, the evening's pleasure being generally expressed by those attending. Much music of instrumental and vocal character served to create a happy atmosphere, and this part of the week's entertainment will remain a pleasant memory for many long days.

A unique and excellent surprise was sprung by Mr. H. J. McAdie, sales and advertising manager of the firm, when he introduced an original cartoon, "Full-O'-Fun." This was entitled "The Agate Family of Agateville," depicting a street scene in Agateville village, where well-known members of the executive and sales staff were engaged in "serious" and "frivilous" occupations, including the arrival of the Western contingent by special train, for the convention, and the manufacturing of varnish and inspection of "Agateville" harbor, by a prominent member of the "S.S. Harbor Commission." "I didn't fly very much, but varnish can," was one of the typical slogans accompanying one of the "arrivals."

Altogether, this convention is reported as the best, in point of attendance and interest, that has yet been held.

Those attending the convention, in addition to the home office executive, were: Douglas Mills, W. J. Rowe, R. J. Sirman, J. R. Lefebre, R. H. Edington, W. A. Ramsay, L. Beaudry, W. J. Joyce, William McCormack, M. Preston, J. R. Lalande, L. Bertrand, E. G. Brownell, W. J. Morris, J. E. Donnelly, T. Ramsay, H. B. Booth, T. Crawford.

Drawback on Steel Sheets for Automobile Stampings

The Canadian customs memorandum (No. 2414B) of August 13, 1920, provides for the payment of a drawback of 99 per cent. of the import duty on steel sheets, hot rolled or coated with lead or a combination of lead and tin, No. 16 gauge and thinner, but not thinner than No. 24 gauge, measuring 20-42 inches in width and 50-120 inches in length, used between July 31, 1920, and August 1, 1921, in the manufacture of stampings for automobiles. One of the conditions attaching to the payment of the drawback is that the original import duty on the steel sheets must have been paid within 12 months of the manufacture of the stampings.

The Linseed Oil Situation

Are Present Low Prices the Result of English Oil Competition?

Montreal.—While there has been a gradual lowering of the price basis for lindseed oil, the situation at present is somewhat peculiar. In the first place crop estimates have been very optimistic and in the American Western States it was estimated that the yield of flax would be 14,000,000 bushels. This has since been reduced to 11,500,000 and the estimate has remained at that figure for some time. The Canadian crop is estimated at all the way from 5,000,000 to 10,000,000,000 bushels and while this is indefinite the combined crop of Western districts is looked upon by some as very favorable.

Some crushers are looking for a further reduction in prices while others believe that there will not be much recessions on prices now obtaining. Some report a freer supply of flax while others assert that farmers are withholding their supplies from the market in an endeavor and in the hope that they will obtain more for what they now hold.

In discussing this matter with a prominent crusher, he told Hardware and Metal that the present low prices of linseed oil were more the result of competition offered by English oil, which is coming into this market. This informant argued that while flax seed may decline further there will be little likelihood of oil prices toboganning much below present levels. In order to meet this competition it has been necessary for Canadian crushers to adjust their prices so that equalization would be possible.

There has been a considerable amount of active buying this week of oil, and one informant stated that they were as busy during this time as they had been at any time during recent years. This is probably due to the fact that some jobbers were finding their supplies low and immediately replenished their stock. It is further anticipated in some quarters that if the British Government succeed in reducing their debts to the United States within the next few weeks, it will have a very favorable effect upon sterling exchange in which case there would be a decided change in the market.

The Luxeberry Painter Says:

"The 'SAFETY FIRST' slogan should not only teach us to watch and guard against physical danger, but against the smaller foes that threaten our social life. I always think of this when buying varnish. Berry Brothers' brands are my 'SAFETY FIRST' refuge; their use is riskless."

This earned confidence is what makes the great and always growing demand for "Berry" Finishes.

Weekly Paint Markets

MONTREAL

MONTREAL, September 24.—Paint markets are firm. This was forecast and definitely referred to in the market report of last week. As then intimated, and as further referred to in this week's editorial section, the raw material and labor levels of to-day promise to hold these products firm. Production costs have continued high, any effort to attack these and effect a change not being possible, paint men assert, at this time. Linseed oil is in a somewhat undefined position. This is due to the incompleteness of crop reports, and also has been influenced by the competition of oil arriving from Europe. Prices may slide down several points yet—some think $1.50 may yet be recorded while others say that the market will not be materially lower than it now is. Turpentine is somewhat easier, but producers in the south will not, Hardware and Metal is informed, relinquish their stocks at present levels. Rosin is easier. Putty and white lead are quiet and unchanged. Colors in oil are higher, some of them 5 cents per lb. and others as much as 15 cents. This follows higher prices for the imported ochres. Red ochres are scarce and high. Glass is steady and unchanged. Varnishes are firm and might be further advanced at any time. Trade is seasonably quiet.

Producers Holding Turpentine Supplies

Montreal.

TURPENTINE.—The situation in the United States at the present time is rather peculiar. Producers are not anxious to sell at the present market prices and are withholding supplies, Hardware and Metal is informed. The price basis has been ruling much easier and is nominal, quotations running all the way from around $2.25 to $2.55 per gallon in single barrels. There has been much improvement in transportation and supplies are much more easily obtainable than a few weeks ago.

Turpentine—	Imp. Gal.	
Single barrels	2 40	2 50
Small lots	2 50	2 60

(Packages extra.)

Linseed Oil Situation Somewhat Undefined

Montreal.

LINSEED OIL.—There has been little recession from the quotable basis of last week although oil is selling at a rather nominal basis. Single barrel quantities are obtainable at from $1.57 to $1.70 per gallon and those requiring large quantities can usually obtain concession from these prices. There is a diversity of opinion regarding the immediate future of oil, some contending that the price of around $1.50 will be reached before the low point is recorded, while others state that possibly a few cents per gallon reduction is all that can be looked for. There has been considerable activity in buying this week.

Raw—	Imp. Gal.	
1 to 4 barrels	1 57	1 67
3 to 4 barrels	....	....
Boiled—		
1 to 4 barrels	1 69½	1 79½
3 to 4 barrels	....	....

Rosins Are Easier and Much Freer

Montreal.

ROSINS.—There has been an easier trend to the market on merchantable rosins, and local importers are quoting "G" at around $21 per barrel. The average grades are fluctuating around 25 to 50 cents of this price for "G," and there is a much freer supply than for some time. Prices may ease further.

Putty Is Held Without Any Quotable Change

Montreal.

PUTTY.—At present there is a seasonable movement of putty which holds at an unchanged basis and there is very little of interest in the market. Stocks, while not excessive, are such that orders can be filled with reasonable dispatch.

PUTTY—	5 ton	1 ton	ton
Bulk, in barrels	6 50	6 75	7 10
Do., ½ barrels	6 65	6 90	7 80
Do., 100 lbs.	7 35	7 60	7 95
Do., 25 lbs.	7 60	7 85	8 20
Do., 12½ lbs.	7 85	8 10	8 45
3 and 5 lb tins	9 60	9 85	10 30
1 and 3 lb. tins	11 10	11 35	11 70
Do., in 100 lbs. cases	8 35	8 60	8 95

White Lead in Oil Steady But Quieter

Montreal.

WHITE LEAD IN OIL.—There has been a good sale this year for white lead in oil, and while present demand is limited, there is some movement still. The undertone is quite steady, and no change is looked for from a quotable standpoint. 5 ton quantities of standard Government lead is selling at $19.50 per 100 lbs. ton lots at $20.00, and smaller quantities at $20.35.

Colors in Oil Higher; Increase 9 to 15 Cents

Montreal.

COLORS IN OIL.—As announced last week advances were probable in colors in oil. Since then an advance has been recorded of some 9c to 15c per lb. The average advance, however, is not very great and some colors will not be affected in any way.

Glass Discounts Held; Stocks Are Greater

Montreal.

GLASS.—The prevailing discount on box glass is 15 per cent. to the trade, indicating that there has been no change. Supplies are rather better than they were a while ago due to some easing of the demand from the trade. Plate glass is steady and importers state that stocks are better, due to the arrival of supplies from outside points, and a somewhat quieter condition of trade. There has been no quotable change on plate but no reduction is looked for.

Basis Is Continued For Prepared Paints

Montreal.

PREPARED PAINTS, SPECIALTIES.—The decision of the paint manufacturers last week to maintain prices on prepared paints did not come as a surprise. It will be recalled that Hardware and Metal pointed out from week to week the strong tendencies that were prevailing on most raw materials, with the exception of linseed oil and turpentine, and the decision of manufacturers will make it possible for the trade to place orders for spring delivery without any uneasiness. There is naturally a limited demand for these products at the present time, but prices hold steadily firm.

Varnishes Firm; Tendencies Strong

Montreal.

VARNISHES.—There is a constantly active demand for varnishes which hold very firm at unchanged prices. It is probable that change may be made by various manufacturers as the season proceeds as many claim they are now selling at very close to cost. The market is firm.

When The Falling Leaves "Cover The Earth"

AFTER the heat of Summer, and the activity of harvest time, comes the leisure of Fall and Winter, when preparations are made for protection against its cold, its snows and its storms.

This is the season of Fall Painting, because buildings need their protection, too, against the destructive power of frost and dampness.

The Sherwin-Williams Agency at this time, and always, is a dependable source of profit, as well as an assurance of satisfaction to your customers.

THE SHERWIN-WILLIAMS CO.
of Canada, Limited.
Head Office MONTREAL.

SHER-WILL-LAC

The Varnish Stain of "Cover the Earth" Quality

Many people are accustomed to add to the cheerfulness and comfort of their homes by inside painting and decorating in the Fall.

You, as a seller of Paints and Varnishes, are in a position to profit by this custom. You cannot sell a better quality finish for floors, furniture or woodwork than Sherwin-Williams SHER-WILL-LAC

Our Representatives are on their territories now. Wait for their call, or write us direct for Full particulars of our selling plans.

TORONTO

TORONTO, Sept. 23.—Prices generally continue firm in paint markets, and a little quieter tendency is reported, but business has been well above the average for the month. Dry colors appear to be firm, with some higher tendencies noted. Colors in oil have been advanced from four to fifteen cents per pound, but details are not yet available. White lead in oil and putty are both firm but unchanged in quotations. Shellacs are inclined to be a trifle firmer but are variable. Glass is said to be a little quieter and some is being offered at lower prices than the regular quotations. Linseed oil has declined a trifle, lower quotations are being given in some cases. Turpentine also is a little lower in price, but jobbers state they can see very little hope of any lower prices on this commodity. Producers are holding stocks, it seems, for higher prices. Business in paint trades is reported to be seasonably quieter, but amount of sales generally is over the average for the month.

Linseed Oil Quoted Thirteen Cents Lower

Toronto.

LINSEED OIL.—A decline from last week's prices is noted on linseed oil of about 13 cents per gallon. Lower prices are quoted on flax, which is now $3.36 cash, but the shipping strike at the head of the lakes is preventing any quantity from moving. The demand for oil has been fairly good but with the lower prices there is not the amount of sales that might be expected. Present quotations are the following:

	Raw	Boiled
1 to 2 barrels, gal.	1 67	1 70
3 to 5 barrels, gal.	1 66	1 69
10 barrels and over	1 64	1 67

Turpentine Declines Ten Cents Per Gallon

Toronto.

TURPENTINE.—A reduction of 10 cents per gallon has taken place on turpentine prices. Jobbers state that they cannot see any justification for any hope of lower prices as the second crop is now partly in and producers are doing business at very close to cost. Stocks at Savannah are said to be getting larger and there seem to be signs of the producers holding for higher prices.

Latest quotations are as follows:

Turpentine—	Per Imp. Gal.
1 barrel lots	2 40
2 to 4 barrels lots	2 39
5 gal. lots	2 55

Ready-mixed Paints Unchanged and Firm

Toronto.

READY-MIXED PAINTS.—Reports to hand from various sources would seem to indicate that business, though seasonably quieter, has been very good and future prospects are favorable. Prices continue firm and many factors enter into the cost, and with white lead and other ingredients firm or scarce, and with containers, labor, and operating costs at present high levels, offsetting any reduction in oil and turpentine, there does not appear to be any likelihood of lower prices for a while.

Putty Sales Quieter; Prices Unchanged

Toronto.

PUTTY.—The sales for putty are reported to have fallen off a little and business in it is a little quieter. The irons and containers are said to be scarcer and harder to get lately owing to shortage in the metal markets. Prices are firm and unchanged and quotations are as follows:

Putty—Standard, in 100-lb. drums, $8.20 per 100 lbs.; 25-lb. drums, $8.55.

Higher Quotations on Colors in Oil

Toronto.

COLORS IN OIL.—An advance has taken place in the price of some lines of colors in oil but details are not yet available. Nearly all colors are said to be affected.

White Lead in Oil Continues Firm

Toronto.

WHITE LEAD IN OIL.—A falling off in the demand for this product is noticeable. No change in prices is recorded. A scarcity in containers is being experienced. Quotations are as follows:

Window Glass Quieter; Quotations Unchanged

Toronto.

WINDOW GLASS.—The demand for window glass is said to have slowed down and not so much business is being done as might be expected. The supplies are said to have improved and conditions in U. S. markets seem a trifle better but prices are very firm. While the tendency in Belgian markets is for somewhat easier prices there does not appear to be much chance of expecting any quantities of supplies from there for a while. There is an optimistic feeling regarding future trading. Quotations are unchanged at 15 per cent. off list but better prices are said to have been offered in some quarters.

Dry Colors Are Firm, With Some Scarcity

Toronto.

DRY COLORS.—Though no change has been reported it is understood that some of the lines of dry colors are rather scarce and higher prices are possible in some grades.

Shellacs Variable With Some Fluctuations

Toronto.

WHITE AND ORANGE SHELLAC.—Prices on shellacs have been fluctuating somewhat during the past week or two but normal quotations have been around $7.50 for orange and $8.25 for white in barrels, with usual differentials for small quantities.

FARMERS ARE NOW PROSPECT FOR PAINT

Conintued from page 62

of farm buildings in Canada. Of course the excuse given for neglecting construction, repairing and painting of farm or other buildings at the present time is that the cost of labor and material is excessive. But it is a pretty safe bet that before these costs are materially reduced, buildings that are now beginning to show signs of neglect will have deteriorated to an extent that will necessitate expenditure out of all proportion to that needed at present to keep them in good condition.

Helps to Keep Young People on The Farm

One hears much talk these days of keeping the young people on the farm and discussion of means for making farm and rural life so attractive that younger generations will not desire to forsake the farm for the city. In this connection the statement of a Britisher who recently made a tour through Canada is somewhat significant. He had been a constant reader of a number of Canadian farm journals for some years before visiting this country and had read of the above mentioned difficulty. He states that on the basis of his extensive experience on farms in England, Scotland and other countries, he is led to believe that pride in the home farm, including the home and farm buildings, had more effect in keeping the family on the land than the barnyard or any other feature that he was aware of. "He could judge the status of a farmer," he said, "by one glance at barn and stables." A farmer who uses paint with good judgment will use purchased fertilizers in like manner, and the barnyard tells the tale of how much barnyard manure is appreciated on a particular farm. The man who uses these two forms of enrichment in fair measure, will either be a sucessful farmer, he declared, or else will be in the poorhouse."

Emphasizing the fact that paint applied in time saves many times its cost, it is interesting to note that the thrifty Hollanders have a proverb which reads "Painting costs nothing." This fact should be the basis of all sales talk to farmers and other prospects. It can be pointed out that by anticipating the ravages of moisture in property, and preventing its inroads with a timely coat of paint, a farmer will be money in pocket. No better example of saving at the bung and losing at the spigot can be furnished than by the man who argues that he saves money by not painting.

Selling Quality to the Farmer

Good paint is even more economical for the farmer than for the city man. There are so many more surfaces about the farm that need protection—surfaces exposed to weather and wear, but the opportunities for saving are correspondingly greater.

And there are Greater Profit-Making Possibilities Too

The farmer wants quality paint. He has come to realize that buying paint is really buying protection for the longest possible time. Low gallon price doesn't have its old-time appeal.

Give the farmer what he wants — Glidden quality. Let us tell you more about the completeness of the Glidden Line — How it covers every need of the farm and meets each need perfectly. Write for interesting literature to-day.

"Save the surface and you save all"—*Paint & Varnish*

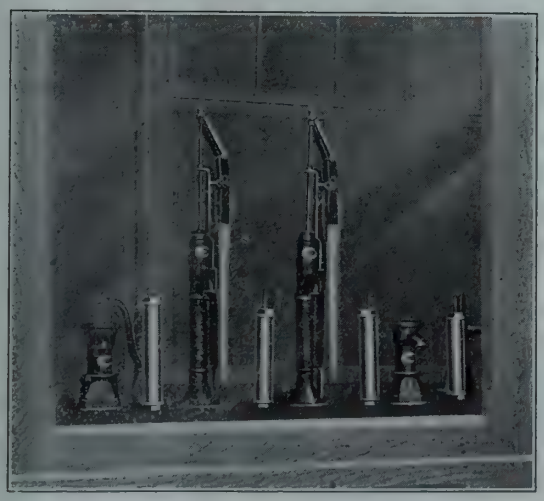
LITTLE VISITS **Beatty Bros. Limited Bulletin** With BT Dealers

Exterior W. J. Jeffs' Store

Interior W. J. Jeffs' Store



View of window from retouched photo, showing Pumps

Sixty Pumps a Year

For eleven years Mr. W. J. Jeffs, of Dresden, Ontario, has been handling BT Goods.

His specialty is BT Pumps. Every year he sells in the neighborhood of sixty pumps—pumps of all sizes, kinds and varieties.

He is one of the numerous Hardware Dealers who appreciate the BT "Ready-To-Ship" line of well pumps. Although he fits and instals all his own outfits he finds that the "Ready-To-Ship" Line makes it easy to keep a comprehensive stock with the smallest possible expenditure.

Personal attention to every pumping outfit he instals is responsible for Mr. Jeffs' success, year after year, in this line.

Order Pumps Now

Our representative will be calling on you soon. We suggest that you specify your pump requirements for spring delivery. He will be delighted to explain to you the protection we give in the matter of prices on orders for future shipment.

You are taking no chances when you order BT pumps, cylinders, leathers and other pump fittings.

The idea behind our "Ready-To-Ship" line was *service* to the pump dealer. We aimed to give him a line he could stock easily, get promptly and rely upon absolutely. The growing demand for these pumps is in itself proof that we have succeeded. The same is true of all BT pumps and fittings.

Pumps are an absolute necessity. When the customer wants a new pump—he wants it *at once*. The dealer who has the stock gets the business.

Make sure of your spring pump stock by ordering now and protect yourself on price at the same time.

TINKER TOM'S TALKS.

No. 278

ZINC

A most important item in **Galvanizing!**

Due to its unequalled "affinity" for iron, zinc is absolutely the best protective coating for sheet metal. It hermetically seals up all the pores in the metal.

To get best results, **pure, virgin zinc** only should be used, and that's the only kind in our shop—and furthermore, it's all **Canadian-made** (British Columbia) electrolytic process — the very **top notch in quality.**

"PREMIER" Galvanized Sheets

are first-class all through

BEST FOR ALL USES

TINKER TOM.

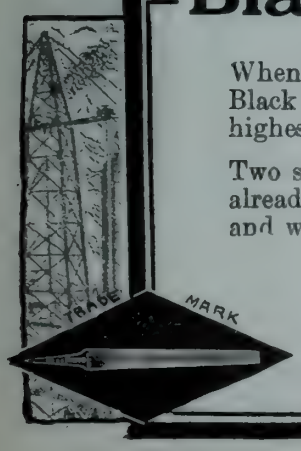
Black Diamond for Cutting



When you buy a file, you buy cutting service. For extra cutting value, buy Black Diamonds. Made since 1863 to a standard of file quality that has won highest honors at expositions and at the bench.

Two simple steps will lead to better filing except where Black Diamonds are already used. Our catalog is free for the asking. A shop trial costs nothing and will show convincing results.

Established 1863

Black Diamond File Works

G.& H. Barnett Company 1078 Frankford Ave. Philadelphia, Pa.

Owned and Operated by Nicholson File Co.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone fills the bill for the Canadian housewife. She has tried it and liked it and uses it whenever walls need beautifying, without regard to season. Silkstone is a year-round seller.

Silkstone beautifies walls at less cost than wall paper. It can be washed easily without rubbing off. Its soft, silky finish gives an artistic effect much appreciated by home lovers.

Silkstone is a tried and proven, steady salesmaker. It satisfies customers because it gives good results.

Volcano Chimney Top

The Deflector — the lower slanting part shown — receives wind through the sloped opening, directing it over the chimney on the "blow-pipe" principle, creating and maintaining a continuous draft.

Cures the worst chimneys, and closes sales with a bang. Homes, stores, churches, factories are all your prospects.

Order to-day.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

New Dominion 30-30

Loaded with a progressive burning powder that gives a flatter trajectory, greater penetration, and by far the greatest shocking power known in a 30-30.

200 feet more per second

—is the best selling talk to the sportsman. It makes his old 30-30 an up-to-date, high power sporting rifle. He should always be instructed to adjust his sights for this new cartridge, for he will be shooting high. Make sure that your stock is large enough to supply the demand.

Your Shot Shell Stock

Now that the duck season is well under way, it would be advisable to make sure that your shot shell stock has been checked up before you find some of the popular loads out of stock.

The J. H. Ashdown Hardware Co., Limited

Winnipeg, Canada

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Consumers Cordage

Established 1825

Rope like Lion Brand can be made from high grade Manila Hemp only. All Manila Rope is not Lion Brand, nor has it the same high qualifications. The difference in various grades of Manila hemp varies several cents per pound.

The surest way to know and appreciate Lion Brand is to have it in your store; to examine it, twist it, stretch it and compare it any fair way at all with others. It will always prove superior. Consumers of rope know this so that you will find another superior feature of Consumers Cordage Products from a dealer's point of view—it sells, gives satisfaction and multiplies business. It is the kind for you. Try it, if you are not already handling it.

Consumers Cordage Company, Limited

Head Office: Montreal, Canada

Agents and Stocks:

Tees & Persee Limited—Winnipeg, Regina, Saskatoon, Moose Jaw, Calgary, Edmonton, and Fort William.

Jas. Bissett & Co., Quebec.

MacGowan & Co.: Vancoover

Household Beauty is Easily Obtained With "Agate"

Save the surface and you save all" *Paint & Varnish*

Easily Used - Easily Sold

The wonderfully popular Agate Family fills the want that existed among consumers for a handy line of real home beautifiers.

Only a part of the Agate Family is shown here. A particularly popular member of the family is Agate Varnish Stain. This labor-saver does staining and varnishing at one operation. Consumers welcome it in eight beautiful shades and natural.

All the Agate Family is well worth investigation by the trade.

Reed's Patent Plastic Asphalt Roof Cement

repairs cracked joints, nail holes and defective places on slate, metal, gravel and prepared roofs.

This cement will repair a roof WHERE SOLDER CANNOT BE USED.

It is VERY ADHESIVE and sticks firmly to anything forming a tough leather-like skin over the top; WILL NOT RUN or loosen from joints or cracks in Summer or Winter.

For twenty-five years, in all climates, this cement has given perfect satisfaction and its supreme usefulness makes it one of the best-selling items in a hardware store when properly displayed.

Put up in 1, 5, 10, 25 and 500 lb. containers

Westco

Tankless Water System

A New Field for Profit

THE need for such a water system as the Westco is urgent in rural and suburban homes to-day. Wherever introduced it is selling rapidly. For its many interesting and splendid features make instant appeal to the farmer or rural resident who has electricity available.

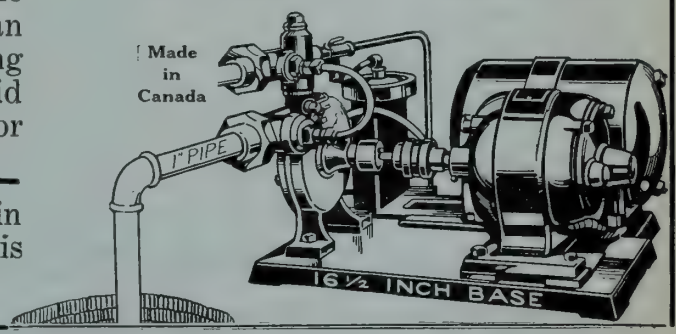
Get even one Westco System installed in your territory, and it will sell many others. It is a small, compact system, yet absolutely efficient in every detail.

Its chief selling features are—

(a) It has no supply tank.
(b) Simplicity of construction; no complications possible.
(c) Pump has only one moving part—the impeller. Nothing to wear out.
(d) Cheap to install, maintain and operate.
(e) Entirely automatic.
(f) Has no tank, no valves, no gears, no belts, no springs, no oil or grease cups, and it is self-lubricating.
(g) Uses less power than Electric Iron while supplying water for four faucets.
(h) Pumps 300 to 500 gallons per hour.
(i) Size 16½" long, 14½" wide, and 11" high, weighs less than 100 pounds.
(j) Opening of any faucet starts pump; closing of faucet stops it at once.

If your territory is still open, write us at once for full particulars and details of this splendid selling water system.

Westco Pumps, Limited
770 Yonge St., - Toronto, Ont.



THE BANKERS HAVE AN ASSOCIATION to protect their interests. Membership is confined to banks that conform to legitimate banking practices.

Other professions and businesses have similar associations with a high ethical standard.

From the advertiser's standpoint, the greatest and most useful co-operative organization is the Audit Bureau of Circulations, comprising advertisers, advertising agents and publishers.

It protects the advertiser and his agent. They are enabled to know positively the facts regarding the circulation of the publications with which they place contracts.

It protects the publisher against unfair competition, as the falsifier of circulation statements is barred absolutely from membership in the A.B.C.

The experienced advertiser, before placing a contract for space, asks to be shown the A.B.C. credentials of the publication.

Hardware and Metal is a member of the A.B.C.

If interested tear out this page and place with letters to be answered.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Write for price list and catalogue.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Hardware and Metal's unique circulation as proven by the A.B.C. audit is due to 31 years of honest effort to give the retail trade the best possible service.

O.P.W.

Trade Mark Registered

There are many paints
with many names,
Of doubtful values—of
uncertain fames,
But O.P.W.'s history
shows
The dealer's trade in-
creasingly grows!

"Save the surface and you save all" *Paint & Varnish*

"Paints and Varnishes for Every Purpose"

Now for the Inside!

With the beginning of cold weather and the forced conclusion of outside painting you will require a full line of O.P.W. Paints, Varnishes and Enamels for inside decoration. You should be prepared, not only for the usual seasonable demand, but for the additional requirements indicated by the unusual amount of outside painting that you know has been done this season.

Think over the inside requirements. Sort up with those in mind. Consult your O.P.W. list and order—not forgetting Jas-per-lac specialties nor Jas-per-ite Varnishes, Indestructo Floor Finish, nor any of the many other O.P.W. products that sell so well.

It's a Good Sign to Have "O.P.W." Over the Store

Do You Buy Wire and Rope by Weight---and Sell It by the Foot?

That's a common practice—and it's a custom of the trade which may account for much loss in profit unless caution is observed.

The wire rack, which gives

The Dayton Computing Hardware Scale

extra platform surface to accommodate large coils of wire, rope, rubber hose, etc., enables you to check up accurately and eliminate the possibility of loss on all such transactions.

The addition ladder—also a part of its equipment—enables you to compute the correct selling price of large quantity sales quickly and accurately.

The Dayton Computing Scale speeds up your service—saves your time and your customers' time. It assures your customers of correct weight, and gives them added confidence in your fair dealing. It prevents overweight, and insures you all of your profits.

The Dayton saves you time and money every time anything has to be weighed.

Complete information regarding Dayton Computing Hardware Scales, including prices, will be sent to you promptly if you write to our nearest office.

What Makes People Buy ?

Did you ever wonder what influences people to buy certain articles of every-day use?

O-Cedar Polish, for instance.

Some buy it because they have used it with satisfaction for years. Others, because they see it advertised extensively.

Many purchase it on the recommendation of its satisfied users. And some, because they see it attractively and invitingly displayed in your window or on your counter.

With so many influences at work selling O-Cedar Polish, it is obvious that quick turnover, with its consequent profit, must naturally follow.

Clippings from Toronto Daily, Sept. 27th, 1920

FAMILIES NEED COAL

May Be in Distress if Something is Not Done.

Complaints which disclosed the extreme need of some families for assurance of their winter's heat were heard at a meeting of the Earlscourt branch G.A.U.V. on Saturday night. Not alone are the veterans at Earlscourt in dire need of a supply of coal, according to the statement of J. Harry Flynn to The Star this morning. Mr. Flynn said that

O.B.U. CALLS COAL STRIKE

Alberta Miners to Down Tools Oct. 1st is Report.

Ottawa, Sept. 27.—The Ottawa Journal to-day publishes the following in its news columns:

"A definite call for a strike of Alberta coal miners has been issued by the One Big Union to take effect on October 1st. This course has been threatened for some time, but the situation between mine owners and miners has now reached such a stage that, unless something unforeseen happens, the strike will take place and western industry will receive a serious setback."

From "Daily Star"

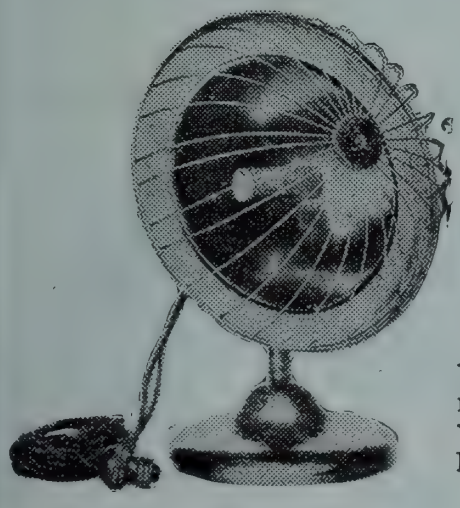
The Coal Situation Is Critical

Where there's smoke there's always fire, is an old saying, but true. Hardly a paper you pick up does not have something to say about the coal situation. It's one of the chief topics of the day.

Whether the coal situation will become as serious as some think, there is a certainty that the price, which is high now, will not be any less, and it is equally sure that wise people will conserve their coal pile all they can.

Auxiliary heat, such as an oil or electric heater, will make it possible to heat comfortably the main living rooms of the home during the cool days of Fall.

TWO AUXILIARY HEATERS



The Majestic Electric Heater needs no introduction to the hardware trade or the users. It has reached a stage of popularity which assures sales. We carry all sizes and styles to meet every need. Order your stock now.

The Perfection Oil Heater

For volume of heat generated there is no more efficient auxiliary heating device on the market to-day, cost of operation considered, than the Perfection Oil Heater. We carry all sizes and styles in stock.

Electric Lamps—All Kinds

With the long evenings comes a big demand for electric lamps.

We have a full line of Tungsten and Nitro Lamps in leading makes.

Order your stock to-day.

"The Trade Mark known in Every Home"

Home Needs

Why I Do Not Dread Housework

The woman with complete equipment of UNIVERSAL Home Needs doesn't dread housework, because there is none to dread. She tackles the housework, puts it through and sings her joyous whoop-sey-do.

The sweetest music to the dealer's ears is the ring of the cash register. With a well rounded stock of UNIVERSAL Appliances you can keep your register ringing loudly and continuously during the holidays.

The housewife will soon intimate to her husband that she would like something "Universal" for Christmas. If he doesn't take the hint she will buy what she wants and attach a card bearing "Merry Xmas from Hubby" written in her own hand. Stock UNIVERSAL lines for Christmas trade and play them up in your displays. Their designs and finishes will lure the eye—their quality and usefulness will open purses.

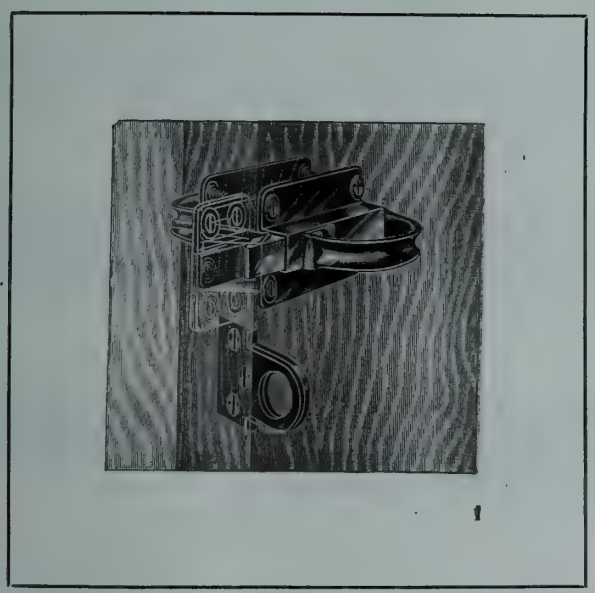
The Door to Prosperity Opens With C.S.G. Co.'s Latches



No. 1240 Barn Door Latch

opens all doors quickly and easily, just as it performs all the other duties of a latch, even the duty of selling readily and with a profit for the merchant. A durable, commonsense latch with Japanned frame and handles, tinned bolt and a Sherardized spring of piano wire that cannot rust. Packed one-quarter dozen in a carton, including padlock eyes. Weight, 175 lbs. per case.

The "Challenge" Latch

has opened a new door to profit for many a shrewd dealer, for it possesses more points of quality and value—selling points—than any other thumb latch on the market; for instance, it is made entirely of wrought steel and it is absolutely impossible for the thumb piece to work loose or get out of place.

Packed one-half dozen in a box. 12 dozen in a case. Weight, 180 lbs. per case.

Plymouth Rope

Native Filipino Stripping and Cleaning Manila Fiber

WHEN the Manila hemp plant reaches maturity the native Filipino cuts the stalk which is some 15 feet long and a foot or more in diameter, being composed of separate leaf stems growing compactly together in overlapping layers. The fiber, from eight to twelve feet in length, is contained in the outer bark of these leaf stems, which after being stripped are drawn under a knife hinged to a block of wood as shown in the picture, the edge of the knife being kept down on the block by a treadle, and released by a lever consisting of a bamboo pole. This cleaning operation which separates the fiber from its surrounding pulp is very crude and slow, resulting in limited production, more especially of the superior grades, for the better grades of hemp are really the result of care and labor both in the cultivation of the plant and in the processes of gathering the stalks and preparation of the fiber which quickly deteriorates under certain conditions.

Of the relatively small percentage of really first-class fiber thus produced, the Plymouth Cordage Company is always alert to secure suitable material to maintain its long-established standard of quality, and the buyer of Plymouth Manila Rope is assured of greater satisfaction in using the better article.

"I never spent money that gave me more pleasure."

That is what one man said about the "NEW IDEA" FURNACE. Sounds as though he got his money's worth. Here's his letter:

Manchester, Ont.

Dear Sirs:

Regarding the "New Idea" Furnace put in by Mr. W. L. Parrish of Port Perry, would say that I am more than pleased with it. Our home is heated as it never was before and we burn no more coal than with stoves. I never spent money that gave me more pleasure.

Sell Starrett Tools

"Their working points *are* the best talking points of Starrett Tools."

"Let's see an inside 'mike'," demands the machinist.

You show him a Starrett. The fact that the "mike" *is* a Starrett gives him confidence in the tool and in you. He knows that, for forty years, the Starrett name has stood for absolute and *lasting* accuracy.

The mechanical features of a Starrett Inside Micrometer — its adjustable anvils of hardened steel, the way the extension rods set into the head, the strength and wearing qualities of the tool —these and many other "working points" appeal forcefully to the mechanic. And among the many varieties of Starrett Inside "Mikes" he's sure to find one that exactly fits his work.

Your cash register never shows your full receipts from Starrett Tool sales. The repeat sales and the good-will advertising they bring you are profits you can't figure in mere dollars and cents.

Write for free copies of this sales-building book, "The Tools Mechanics Buy."

Mastering the Waters of the World

Mastering of the waters of the world has been and is an important factor in the advancement of civilization. The Canadian Fairbanks-Morse Co. Limited, claims its share in this advancement.

No matter where you live, or what your business, you are constantly dependent on pumps for the water you drink, for the protection of your home from fire, or the production of the things you use, wear, and eat. And quite likely it is a Fairbanks-Morse pump, for Fairbanks-Morse pumps have long been recognized as standards—dependable pumps, constantly giving maximum service under the most exacting conditions.

The Canadian Fairbanks-Morse engineers know the pumping problems of Canada and, with all the resources and reputation of this national institution behind them, have developed pumps that meet every requirement and meet it with a product that is worthy of being branded "Fairbanks-Morse 100% quality."

Make this mark your guarantee of satisfaction and our catalogue your buying guide.

GTD
REG U.S. PAT. OFF.

Are you Mechanic enough to see it?

When you get a shipment of new tools, do you ever take one of them in your own hands, look it over and study its improvement over its old-fashioned ancestor of a dozen years ago?

Here is an improved threading tool, just put on the market. It is the GTD Opening Die Stock. The workmen who made that tool were proud of it. The workman who is going to use it will be just as proud when he sees its capabilities, its speed, its new-found precision, its ability to cut threads both over and under size.

When you put this tool in stock, will it just pass through the store to the shelves and then to the customer who chances to ask for it — or will you familiarize yourself and your sales people with it — so that you can actually recommend it to the shop-foreman or superintendent in your trade area who doesn't know about it?

GTD is building tools which merit intelligent — not haphazard — selling. Our fullest co-operation is available to merchants who ask for it.

Two Judges of Good Tools

WHEN a real mechanic comes to you for tools, you always show him your best. Errors in design, flaws of workmanship will never escape his keen eye. It's mighty satisfactory for you and him to display the Millers Falls line.

Men whose handicraft earns their living are not the only judges of tools. The amateur, who works about the house or builds furniture during the winter evenings, is often as shrewd as the professional. This "Saturday Evening Post" advertisement asks him to judge Millers Falls Tools close by examination — and to ask your opinion, too.

Fifty years of service to you and your customers make us reasonably sure that your opinion will be favorable!

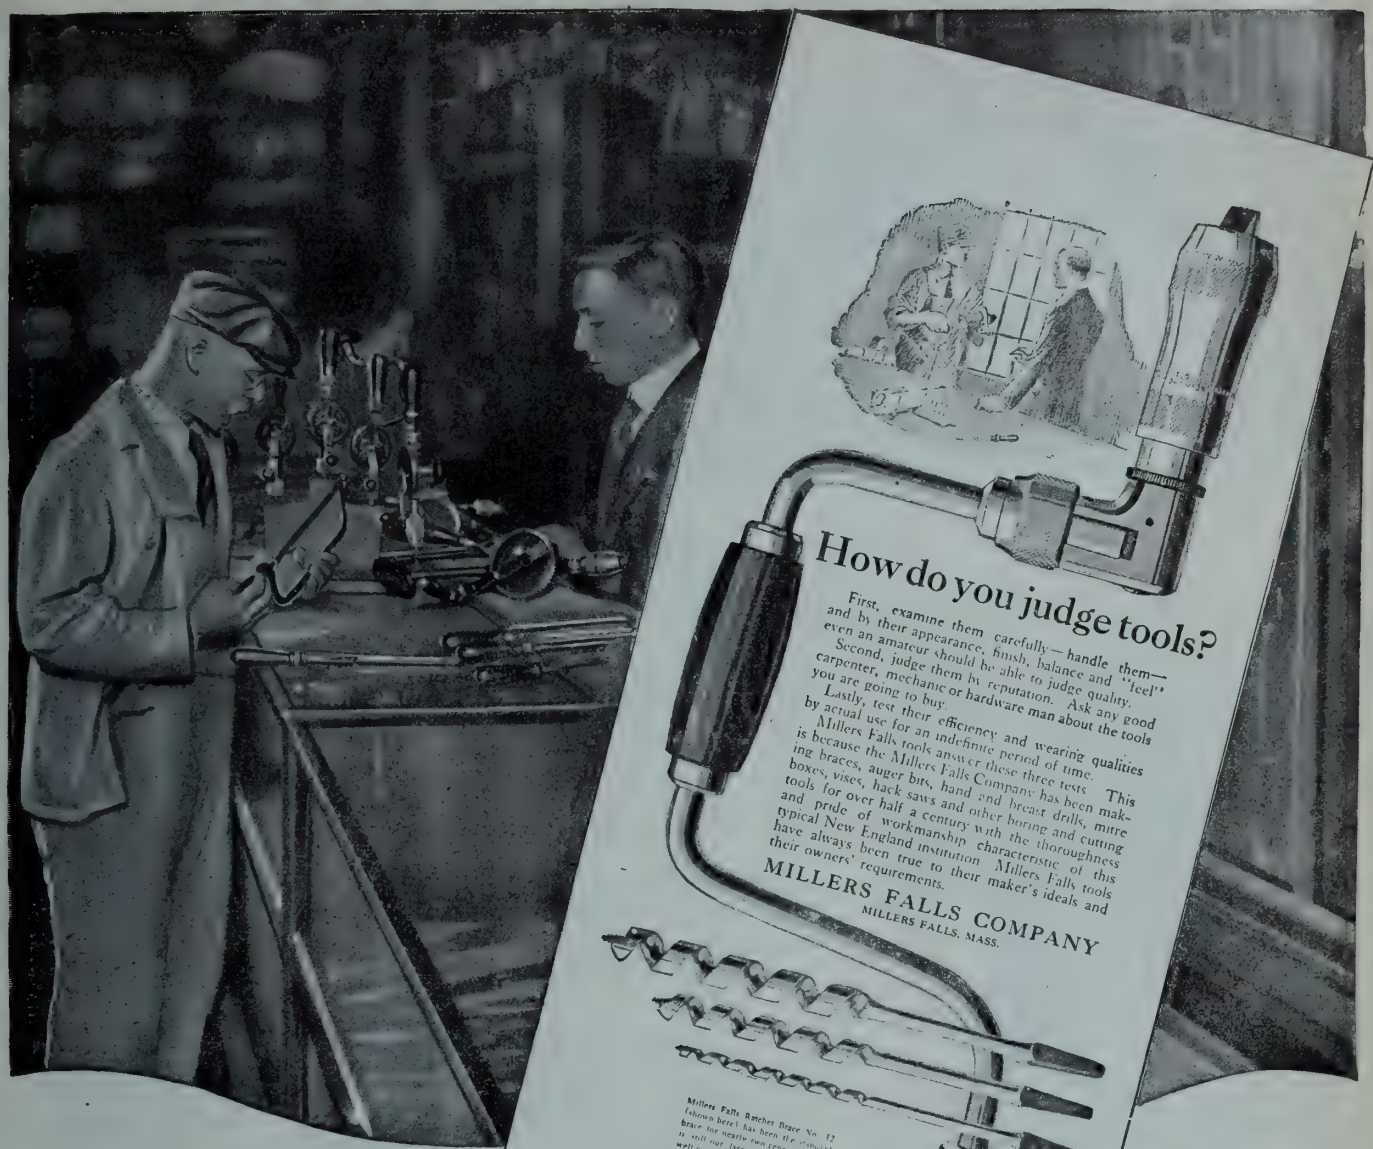
Makers of Millers Falls and Universal Hacksaw Blades

Canadian Agents: Adcock & Brewer, Ltd., 222 St. James St., Montreal, Que.

If interested tear out this page and place with letters to be answered.



How do you judge tools?

First, examine them carefully—handle them—and by their appearance, finish, balance and "feel" even an amateur should be able to judge quality.

Second, judge them by reputation. Ask any good carpenter, mechanic or hardware man about the tools you are going to buy.

Lastly, test their efficiency and wearing qualities by actual use for an indefinite period of time. This Millers Falls tools answer these three tests. This is because the Millers Falls Company has been making braces, auger bits, hand and breast drills, mitre boxes, vises, hack saws and other boring and cutting tools for over half a century with the thoroughness and pride of workmanship characteristic of this typical New England institution. Millers Falls tools have always been true to their maker's ideals and their owners' requirements.

MILLERS FALLS COMPANY
MILLERS FALLS, MASS.

Millers Falls Ratchet Brace No. 12 (shown here) has been the standard brace for nearly two generations and is still our largest seller. Has our well known 3 gear crank with all-cut gears of forged steel. The ratchet is of the lever pattern and the head ball-bearing. Cocobolo handles. Other parts nickel-plated and finest material throughout

The "Seafoam"

ELECTRIC POWER

Washing and Wringing Machine

Wrings While it Washes, Washes While it Wrings

is a common-sense washer and wringer that sells for a price that meets the popular demand. It is a Canadian-made machine that has been giving real satisfaction for ten years. Dealers who have not handled the Seafoam are missing much washing machine business. It can be readily sold to people who are keen buyers — who appreciate value, because they can secure a washing and wringing machine at a reasonable price that is not surpassed anywhere, at any price. The Seafoam does thoroughly all the washing and wringing by power without wear and tear on the clothes, and what machine will do more —even at double the price.

SEAFOAM FEATURES

Unsurpassed washing principle —wooden dolley moving halfway around and back forces the hot suds through the clothes and thoroughly washes them in a few minutes.

Cypress tub—nothing to corrode or tear clothes—keeps water hot.

Reversible wringer with highest grade rolls—will start, stop or reverse instantly. Controlled by lever conveniently placed at side of tub.

Safe to operate—as being belt driven the motor is protected against overloading. All gears being covered the danger of accidents is removed. Safe for children to be around.

Simple in construction—does not easily get out of order.

Attractively and durably finished. Shipped complete ready to operate on ordinary house lighting service.

Story for Week Dated Oct. 2, 1920 **Being No. 25 in the Series**

Making Eddy Co. Sulphite Fibre: "Cooking" in the Big Digesters

IT is when you come to the digesters that the great difference between making mechanical pulp and making sulphite pulp becomes most evident. The wood has been reduced to chips mechanically, but there ends the mechanical effort required. Within the digesters there is no machinery. They are simply huge sealed cauldrons in which, under the action of steam and acid, the wood loses all its resin and non-fibrous substances, and becomes pure white, silky fibre fit for the finest paper-making.

The first battery of digesters at the Eddy Plant consists of four big boilers, each forty feet long by thirteen feet six inches in diameter. They are made of steel three-quarters of an inch thick, and inside the steel sheathing there is an acid-proof lining of brick and cement nine inches thick.

The wood chips tumble through a man-hole in quantity sufficient to fill the digester about two-thirds full. The digester is sealed up securely, except for the pipes and valves through which acid and steam are admitted according to the requirements of the Eddy Process (which is, of course, a secret). The time of "cooking" varies according to the exact quantity of pulp required. Slower cooking gives a longer fibre, and makes for a stronger paper. As originally devised the sulphite process used to take as long as twenty-four hours. Now seventeen hours are sufficient for a thorough "cooking," and the process can be accomplished at need in as short a time as ten hours.

After the chips have cooked for the prescribed period, the acid is run off, and water is run in clear and pure to wash the cooked fibre. For four hours at least the washing process is kept up. Then when the water is drained off, men enter the digester with shovels, and dig out the fibre which is now white and tenacious, but which has still many processes to go through.

From Wood Pulp the Eddy Company make a host of useful products. Perhaps none is more in demand nor serves more useful purposes than the interesting and convenient paper specialties.

Now, when women are becoming greater patrons of the hardware store, a stock of paper serviettes are in harmony with the stocks of cut-glass and chinaware. Various industries are purchasers of Eddy Paper Towels.

Eddy's Paper Specialties

The sale of Eddy Paper Fixtures—the "Onliwon" Towel and Toilet Paper Fixtures —is a paying line for the hardwareman.

Judge by Your Own Home!

INQUIRY at your home tonight will disclose that your Bissell Carpet Sweeper is in *daily* use and considered a necessity, no matter what other cleaning devices you may have for periodic use. Other homes find the sweeper just as needful. The Carpet Sweeper has maintained this position of indispensability through fourteen years of vacuum sweeper enthusiasm and disappointments. And of all home utilities, the Bissell Carpet Sweeper is perhaps the least "mechanical", the most automatic in action and service and entails the least trouble chasing.

Moral—Order Your Fall Requirements Early

Bissell's Vacuum Sweepers (*with suction power greater than some electrics*) furnish efficient cleaning for those homes not wired for electricity or who count the cost. You probably have many such customers Remember there are no motor or other intricate parts to cause annoying complaints. They do the work. They are a satisfactory article to sell.

$1,000 IN CASH PRIZES

GENCO WEEK---NOVEMBER 8 to 13

Enter your store in the window display contest to be held during Genco Week, November 8 to 13. Win one of the cash prizes and increase your razor sales. The window will mark your store as a place where any man can buy

"The Razor That Will Shave Him"

Genco Advertising is telling millions of readers that there is a "Genco Razor for every kind of beard and skin."

The full page advertisements in MacLean's for Nov. 1 and Grain Growers' Guide for Nov. 3, will call attention to the special display and demonstration that Genco Dealers will make during the week following (Nov. 8 to 13).

One thousand dollars in cash prizes will be awarded the best 46 window displays during that week.

Every dealer who enters the contest will receive attractive display material free, with express and duty paid.

Dealer is not obliged to buy a Genco assortment or any other material in order to compete for the prizes.

It is not a condition that Genco Razors must be displayed in the competition and the displays in which Genco Razors do not appear will be given the same consideration as those in which they do appear.

Be sure to have a Genco Display Assortment on your cutlery counter.

Each assortment contains razors for every kind of beard and skin.

Order one now and receive the handsome display cabinet. If your Jobber cannot supply you, write us.

Write for free display material and further information concerning the contest.
